RESOLUTION ON THE PROGRESS REPORT OF THE FOREST ADMINISTRATION IN THE LOWER PROVINCES OF BENGAL FOR THE YEAR 1895-96.

REVENUE DEPARTMENT—FORESTS.

Calcutta, the 12th January 1897.

RESOLUTION—No. 119 FORESTS.

Read—

The Progress Report of the Forest Administration in the Lower Provinces of Bengal for the year 1895-96.

Read again—

The Progress Report of the Forest Administration in the Lower Provinces of Bengal for the year 1894-95 and the Government Resolution thereon.

The Bengal Forests continued in charge of Mr. A. E. Wild throughout the year, but the report is submitted by Mr. E. G. Chester, Mr. Wild having gone on privilege leave since the close of the year. It was received on 11th October, ten days after the due date, but still with much more punctuality than last year.

2. The following statement shows the area of each class of forest in the charge of the Department:—

FOREST.	At commencement of the year.	Added.	Excluded.	At close of the year.	PERCENTAGE—	
					Of total forest area.	Of the area of the province.
1	2	3	4	5	6	7
Reserved	Sq. mil	Sq. miles.	Sq. miles.	Sq. miles.		
Protected	5,839	43	5	5,877	45	3.7
Unclassed	3,091	435	89	3,437	26	2.2
	4,035	4,034	30	2.6
Total	12,964	478	94	13,343	100	8.5

Most of the net increase of 38 square miles in the recorded area of Reserved Forests was brought about by a recalculation of areas in Jalpaiguri the actual additions being trifling and amounting to little more than half a square mile. The area of Protected Forests in the new Sonthal Parganas division is now estimated at 435 square miles, and this accounts for the whole of the increase in the figures shown in the above table: no new areas were actually added to Protected Forests. Sixty-nine square miles in the Sundarbans were made over to the Revenue Department to be leased out and reclaimed. The remaining 20 square miles shown as excluded had been leased out to raiyats in Khurda during the last few years. The Island of Tumchar off the coast of Noakhali has been gazetted as a proposed reserved forest, and is now under settlement. The areas of forests in Palamau, Lohardaga and Manbhum have not yet been calculated, as the forest settlements in those districts are still pending.

3. *Settlements.*—The settlement of 191 square miles in Darjeeling district has been finally sanctioned since the close of the year. The settlement of three detached plots of 379 acres in all was also completed during the year, two in the Darjeeling and one in the Angul district. Progress was made in the settlements of forests in Chittagong, Manbhum and Palamau, which are proceeding concurrently with revenue settlements. Similar operations are also being conducted in the Kolhan tract of Singhbhum. The forest area in the last two districts cannot be calculated until the settlement of revenue is completed; the area under settlement in Chittagong is 842 square miles.

A plot of one square mile in Darjeeling is under settlement, and so also is the Island of Tumchar already mentioned, which is 5 square miles in extent. No progress was made during the year in the formation of fuel and fodder reserves.

4. *Working-plans.*—In accordance with the orders conveyed in paragraph 6 of last year's Resolution, an effort was made to accelerate the preparation of working-plans. Plans for 225 square miles in the Darjeeling and Tista Divisions were completed, though they have not yet been submitted to Government for sanction. In the latter part of the forest year, Mr. Haines was placed on special duty to prepare a working-plan for the Jalpaiguri forests, and it is hoped that his work will soon be finished. It is intended shortly to depute an officer to prepare a plan for the Singhbhum forest. The Lieutenant-Governor agrees with the remarks by Sir Charles Elliott in the Resolution on last year's report as to the backwardness of Bengal in the matter of working plans, and desires that the efforts which are being made in this direction should not be relaxed. Working plans are still required for 3,339 square miles of reserved forest.

5. *Buildings and Communications.*—The following statement shows the expenditure on roads, bridges, and buildings in the last two years, and the budget allotment for 1895-96:—

	BUILDINGS.			ROADS AND BRIDGES.			TOTAL.		
	1894-95.	1895-96.	Budget allotment for 1895-96.	1894-95.	1895-96.	Budget allotment for 1895-96.	1894-95.	1895-96.	Budget allotment for 1895-96.
1	2	3	4	5	6	7	8	9	10
New construction	Rs. 6,023	Rs. 18,507	Rs.	Rs. 10,227	Rs. 14,133	Rs.	Rs. 16,950	Rs. 32,640	Rs.
Repairs	9,410	8,929		7,045	9,317		10,450	18,240	
Unappropriated	314	571		93	1,011		407	1,582	
Total	16,347	28,007	28,450	17,365	24,461	24,900	27,713	52,462	53,380

There was a large increase of Rs. 11,660 in expenditure on buildings. Two inspection bungalows, the construction of which had been previously commenced, were completed during the year, and the construction of three others was taken in hand: two of them were finished. An office bungalow at Khurda and a new revenue station in the Sundarbans were constructed, besides smaller buildings of various descriptions.

The expenditure on roads increased by Rs. 7,095; and 97 miles of new road were made and 678 miles of old road kept in repair, against 73 miles made and 622 miles repaired in 1894-95. The expenditure on repairs per mile was Rs. 13-11-10½ against Rs. 11-5-3 in the previous year; no reason is assigned for the increase in the rate.

6. *Breaches of Forest Law.*—Two hundred and sixty-three cases were prosecuted in the courts, against 135 in 1894-95; 89·8 per cent. of the cases disposed of ended in conviction. Almost the whole increase in prosecutions is contributed by two divisions, the new division of the Sonthal Parganas, in which 83 cases were instituted, and the Singhbhum Division, where the number rose from 21 to 59. There was also, as last year, an increase in Chittagong.

The number of prosecutions for injury to forests by fire rose from 18 to 55; 33 of these cases were in Singhbhum. The Officiating Conservator reports that in respect of the classification of these offences, the practice varies in different divisions. A separate report on the matter should be submitted, and the orders of Government obtained with a view to securing uniformity.

Detailed information has been given regarding these cases as directed in paragraph 7 of last year's Resolution; the number of persons prosecuted was not completely shown in the Report, but it has been subsequently ascertained to have amounted to 143: 54 cases were disposed of, and 44 cases resulted in the conviction of 78 persons. The punishments inflicted were generally light especially in Singhbhum, where forest fires have been very frequent. Detection in these cases is difficult, and it is important where the offender is discovered and where there are no mitigating circumstances the punishment should be sufficient to deter others from following his example. Of the cases brought to trial, 33 came from Singhbhum, 11 from the Tista Division, 3 each from Chittagong and Angul, 2 from Palamau, and 1 each from Darjeeling, Buxa and Jalpaiguri: 96 cases remained undetected after enquiry, besides the 55 that were brought to trial.

The number of cases compounded by Forest Officers under section 67 of the Act was 1,163 involving 1,761 persons, against 958 cases and 1,502 persons in the previous year. The amount received as compensation was Rs. 6,241, or Rs. 5-5-10 for each case and Rs. 3-9 for each person. The orders of Government prohibiting the composition of the offence of injury to forests by fire were departed from in two cases in the Jalpaiguri and Buxa Divisions; the reason is not stated.

The number of offences of all kinds was greatest in the two Divisions (Darjeeling and Tista) which headed the list in the two previous years. The numbers were in the Darjeeling Division 482 cases and in the Tista 259, against 421 and 281 cases respectively in the previous year.

7. *Grazing.*—The whole area of protected and unclassed forests is open to grazing by all animals, except the forests in the Sundarbans, and 12 square miles elsewhere. In the reserved forests 300 square miles (177 square miles out of 188 in Palamau, and the whole of the Angul Reserved Forests) were thrown open to pasture by all animals for the whole or part of the year; the whole area so open is now 816 square miles, besides 20 square miles in Darjeeling open the whole year to all animals, except camels, sheep and goats. The total area in which there is pasture (the Sundarbans not containing any) is 3,785 square miles. The actual fees received for grazing in the reserved forests amounted to Rs. 11,943 against Rs. 10,022 in the previous year; the increase occurred chiefly in the Jalpaiguri Division. Similar fees in protected forests yielded Rs. 5,175; of this sum Rs. 4 were collected in the Sonthal Parganas and the rest in Puri. The receipts from this source amounted to Rs. 5,138 in 1894-95. In the Tista, Singhbhum, Angul, Chittagong and Sonthal Parganas Divisions no cattle were impounded. The total number of cattle impounded was 1,697 against 1,432 in 1894-95.

8. *Forest fires.*—As regards forest fires, the year was as disastrous, as the previous year had been exceptionally favourable in this respect but the

damage done was not so great as in the year 1893-94. In the year under report special protective measures against fire were taken in an area of 1,957 square miles of reserved forests, as compared with 1,874 square miles in the previous year. The apparent increase is mainly due to the recalculation of areas, the real increase being only 35 square miles. 584 square miles, or 29·84 per cent. of the area specially protected, were burnt down; the percentage in the previous year was exceptionally low, being only 0·49. In 1893-94 the area burnt was 689 square miles, or 37 per cent. of the specially protected area. In the whole forest area (excluding unclassified forests), so far as information is available, 667·08 square miles were burnt down, or 7·16 per cent. Much the greater part of the area in which special measures were taken, and also of the area burnt, was in the Singhbhum Division. Here attempts were made to protect an area of 732·5 square miles and 471·1 square miles, or 64·34 per cent. of this area was burnt down. The unprotected area in this Division also suffered very heavily, but it is not stated to what extent. The increase of fires is attributed, no doubt with justice, to the dryness of the year. It is also stated, and probably there is much truth in the remark, that there is a tendency for bad years in the matter of damage by fire to alternate with good years; because after a good year there is more forest to burn and there are fewer clear spaces to check the progress of fire.

9. *Yield and outturn of Forest Produce.*—The following statement gives details of the forest outturn during the year, including removals by privileged villagers:—

Class of forest and agency by which produce was removed.	Timber.	Fuel.	Total wood.	Bamboos.	Minor produce.
1	2	3	4	5	6
<i>Reserved.</i>	C. ft.	C. ft.	C. ft.	No.	Ra.
Government	194,585	95,606	290,191	14,757	242
Purchasers	4,461,933	12,266,470	16,718,403	7,142,692	1,01,843
Free grants	3,001	21,624	24,625	...	569
Right-holders	1,389,185	1,389,185	683,200	8,211
Total	4,649,519	13,772,885	18,422,404	7,840,649	1,10,855
<i>Protected.</i>					
Government	10,757	6,486	17,193	83,555	4
Purchasers	338,738	4,267,210	4,605,957	359,926	23,036
Free grants	5,083	...	5,083	900	19,361
Right-holders	184,030	14,463,312	14,647,342	4,060,000	1,67,259
Total	538,608	18,736,967	19,275,575	4,444,381	2,09,660
<i>Unclassed.</i>					
Government	9,483	2,837	12,320	6,725
Purchasers	359,870	172,270	532,140	8,408,808	8,349
Free grants
Right-holders
Total	369,353	175,107	544,460	8,415,533	8,349
GRAND TOTAL IN 1895-96	5,557,480	32,684,959	38,242,439	20,700,563	3,28,864
GRAND TOTAL IN 1894-95	4,498,234	30,195,622	34,693,856	22,019,274	2,72,942
Difference in 1895-96	+ 1,061,246	+ 2,489,337	+ 3,553,583	—1,948,711	+ 55,922

There was an increase in the outturn of every kind of produce except bamboos, which showed a falling off. The total yield of timber and fuel was 38,242,439 cubic feet, or 3,553,583 cubic feet more than the previous year's yield, being an average of 2,865·03 cubic feet per square mile.

The amount of timber removed from Reserved Forests by Government and by purchasers shows an increase of 1,106,359 cubic feet over the previous year. In the Singhbhum Division departmental operations were undertaken on a large scale, a contract having been entered into to supply the Rai Bareilly-Benares Railway with two lakhs of sleepers; 174,758 cubic feet of timber were cut for this purpose during the year, and furnished 47,232 broad-gauge sleepers. In the Kurseong and Angul Divisions, small quantities of sleepers were supplied to the Darjeeling-Himalayan and East Coast Railways, respec-

tively. The Department continued to supply the Jelapahar and Lebong cantonments with fuel; and the whole amount of produce removed by its own agency was 214,825 cubic feet of timber, 104,879 cubic feet of fuel, and 105,087 bamboos, besides minor produce to the value of Rs. 242.

Mr. Wild has recorded an interesting note, which is appended to the Report, on the utilization of certain descriptions of minor forest produce.

10. *Financial results.*—The receipts for the forest year amounted to Rs. 9,85,680, and the charges to Rs. 4,75,601; so that the net revenue was Rs. 4,60,079, or Rs. 43,962 more than in 1894-95, when the net revenue was the highest recorded. These results are very satisfactory. The following table shows the figures for the last six years according to the financial year:—

FINANCIAL YEAR.	Receipts.	Charges.	Net revenue.
1	2	3	4
	Rs.	Rs.	Rs.
1890-91	7,27,392	4,14,005	3,13,387
1891-92	7,89,553	4,22,030	3,66,623
1892-93	7,44,882	3,81,608	3,63,274
1893-94	8,01,611	4,04,043	3,97,568
1894-95	7,95,673	3,04,601	3,97,072
1895-96	9,18,709	4,66,068	4,52,641

The following table shows the results in each Division for the last two financial years —

DIVISION	Receipts		Charges.		Surplus		Deficit.	
	1894-95	1895-96	1894-95	1895-96	1894-95.	1895-96	1894-95	1895-96
	1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Darjeeling	73 181	79 632	57 509	72,717	15,679	6 082		
Alipata	2,754	26 708	2 814	21 148		3 876	114	
Kurseong	2,071	40,314	21 578	28,776	1,040	11 531		
Jaipuriguri	3,448	44 282	2 141	39,047	12,367	15 305		
Buxa	9 568	16 537	3,910	11,171			16 346	5,488
Sonthal Parganas		11 788		14 386				671
Direction	14 418	17,782	46 266	47,858			30,463	34 170
Palamau	2 700	1,683	1,297	15,014			6,519	13,381
Singhbhum	62 4	81 915	34 017	64 651	4 349			31,936
Angul	2 440	3 718	1 604	19 850			10,424	11,642
Puri	19 032	20 143	11,173	31,174	5 519			4 972
Sundarbans	4 66 01	5, 11 11	91 051	87 445	3,67 740	4 14 500		
Chittagong	2 067	8 558	90 076	87 727	6 686	6 881		
Total	7,95 673	9 18 709	3 96 611	4 66,068	4 61,389	5 17 10	66 287	1 01 009
Net surplus					3,97,078	47 641		

The profits of the Sundarbans Division show the very large increase of Rs. 1,04,819 on the revenue of the previous year, and were greater than the whole net surplus of the province. The Chittagong Division again comes next, but the decline in the revenue of this Division, which was noticed with regret in paragraph 12 of last year's Resolution, still continues. The deficit shown against Singhbhum is nominal, and is due to the initial expenditure on sleeper operations not having been recouped within the financial year; but it is feared that the Buxa, Sonthal Parganas, Palamau, Angul and Puri Divisions must continue for some time to be worked at a loss.

11. *Miscellaneous.*—Mr. Wild was on tour for 203 days and inspected 9 divisions; but the details and dates of his tours, which were called for in paragraph 13 of last year's Resolution, have not been furnished. Changes in the charge of divisions were, it is observed, less numerous than in the previous

year; but still there were changes in no less than eight out of the thirteen divisions. The Sundarbans Division was held by five Officers; and it is most satisfactory that it should nevertheless have produced the large revenue shown in the previous paragraph. Four Officers had charge of the Direction Division. The Lieutenant-Governor regrets to notice the death, while on duty, of Babu Kedar Nath Mazumdar, Extra Assistant Conservator of Angul.

The three cases of defalcation by Divisional Head-clerks, which have recently come to light at Angul, Puri, and Chittagong respectively, suggest that those officers are exposed to great temptations, and that there is room for improvement in the control of their transactions, and possibly in the departmental system of keeping accounts.

12. The Lieutenant-Governor's thanks are tendered to Mr. Wild for his efficient and successful management of the Department.

ORDER.—Ordered that the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Secretary to the Govt. of Bengal.

DISTRESS IN THE PATNA DIVISION.

No. 76 Agri.—Fam.—The 12th January 1897.—The following papers are published for general information.

M. FINUCANE,
Secretary to the Govt. of Bengal.

No. 75 Agri., dated Calcutta, the 12th January 1897.

From—M. FINUCANE, Esq., Secretary to the Govt of Bengal, Revenue Dept.,
To—The Commissioner of the Patna Division.

I AM directed to acknowledge receipt of your report No. 13G., dated 5th January 1897, under sections 13 and 24 of the Famine Code, for the weeks ending the 19th and 20th December 1896, and in reply to communicate the following observations and orders of the Lieutenant-Governor

2. In paragraphs 1 and 2 of your report you draw attention to the shortness of the time allowed for the submission of the fortnightly reports, and while promising that every effort will be made to secure punctuality, request that allowance be made for the difficulties experienced in attaining it. On this point, I am to say that the Lieutenant-Governor recognises the difficulty, but hopes that it will be found possible to submit these reports on the due dates. It is necessary that Government should have prompt information as to the state of districts afflicted with famine; and though the information that it is possible to give may not be quite up to date, it will be better to give the latest information available on the due dates, rather than delay the submission of the reports.

3. The Lieutenant-Governor is pleased to learn that, owing to the recent rainfall, the Patna and Gaya districts and nearly all of the Shahabad district are now safe from famine. His Honour goes with you, however, in thinking that fortnightly reports from all these districts should be continued for the present for the reasons given by you, and also because their capacity to export is an important factor in judging of the possible sources of food-supply to other districts.

4. *Saran.*—Having regard to the somewhat peculiar circumstances of Saran, as described in paragraph 24 of your report, the inversion of the ordinary sequence of relief measures suggested in that paragraph seems to be judicious. The Collector concludes, and you agree with him, that charitable relief should be extended, and the system of exacting relief work in the Saran district made more onerous. It is also suggested that a strict enforcement of a reasonable task by means of the free use of a penal wage should be insisted on. The Lieutenant-Governor agrees in these conclusions. They are clearly in accordance with the provisions of the Famine Code. It is observed that the daily "dole" of grain to persons on gratuitous relief in Saran cost 2 annas 2½ pies per day, and that the task of work exacted from each person during the fortnight under report was on an average only 25 cubic feet. The cost of the daily "dole" is excessive in itself and as compared with that in other districts, and the task of work is inadequate.

The Lieutenant-Governor approves of the proposal to open large central relief works in this district in place of many scattered small ones.

5. *Champaran.*—There was a great and sudden increase in the number of labourers on relief works during the second week of the period under report, their number being nearly 40,000, against only 4,500 in the corresponding period of 1873-74. It is, perhaps, inevitable that there should at first be some confusion when people flock in crowds on to relief works; but as Government had accepted the Collector's estimates, and sanctioned the entertainment of a strong establishment in anticipation of, and in order to be prepared for, a sudden rush of the kind, His Honour had hoped that effective arrangements for enforcing discipline from the outset and exacting a proper task of work would have been possible. The amount of work done during the fortnight under report was inadequate; but it is hoped that the arrangements, now made, will be sufficient to secure the enforcement of discipline and the exaction of a proper amount of work in future. The Lieutenant-Governor has no objection to the Collector arranging the areas of relief charges without

strictly adhering to the boundaries of thanas or outposts when that course is found to be convenient.

Sir Alexander Mackenzie agrees that poor-houses should be opened at once in this district, as proposed in paragraph 45 of your letter.

6. *Muzaffarpur*.—The daily task of work exacted in this district was fairly sufficient, being 77 cubic feet of earthwork per day per male unit.

No charitable relief was given, because it is said that the Collector is waiting till the organization of relief circles is complete. It is not clear why gratuitous relief should not be given in circles where the organization is completed, if it is required, without waiting for completion of the circle organization elsewhere.

7. *Darbhanga*.—Here, as in Champaran, there was a great and sudden increase of the numbers on relief works, for which the Collector was not altogether prepared. The sanctioned number of Relief Superintendents and of Circle Officers have now joined their appointments, discipline has been enforced, and a fair day's work is being exacted; but the Collector should take care to be prepared in future for any similar sudden rush of labourers to relief works.

It is stated in paragraph 57 of your letter that on the 26th (a fortnight from the 12th) there were 43,789 persons on relief works in this district. This, it is understood, is the total of the numbers on these works during the week, and not the number employed on any one day.

The numbers employed on relief works, undertaken by the Maharaja of Darbhanga and other private gentlemen, should, as you suggest, be obtained and shown, as far as practicable, in the returns.

Government awaits the complete list of relief charges and circles promised in paragraph 63 of your report.

8. *Prices and Stocks*.—In Part III of your report, you remark that prices were stationary on the whole during the fortnight, but that in Saran and Muzaffarpur the price of maize, the food-staple of the poorest classes, had risen, and approximates to that of rice. The new rice had been harvested everywhere, but yet the price of rice had not fallen. Exports had not risen to any great extent. From these facts you infer that the greater part of the lately harvested grain is being stored for local consumption. It may also be inferred that the stocks in hand from previous harvests are low. The Lieutenant-Governor notices that the Collector of Champaran has grave doubts on the point whether private trade will supply grain in certain tracts of his district in time to prevent loss of life. In connection with this matter I am to call your attention to the circular orders of Government No. 76Agri., dated 31st December, authorising the employment of contractors for the provision of grain for charitable relief doles, to His Honour's remark made at the Sonapore Conference to the effect that contractors might be employed for the supply of grain on relief works in areas in which private trade may fail to do so, and to paragraph 8 of the Government of India's letter No. 104F., dated 4th January 1897, in which it is also indicated that contractors may be employed for supplying grain on relief works in such cases.

9. *Task*.—With reference to the statement given in paragraph 68 of your report, I am to call your attention to the great differences in the amounts of task work exacted, in the daily wage earned, in the rates per 1,000 cubic feet of earthwork, and in cost of grain dole for gratuitous relief in the various districts of the Division. These differences cannot be accounted for by the variations in the price of food-grains in these different districts. I am to request that you will use your best efforts to secure greater uniformity in future and to make sure that an adequate task of work is enforced in the case, at least, of able-bodied persons accustomed to work, as a test of their being in distress. Those who are able to do a fair day's work and refuse to do so or refuse to submit themselves to discipline are presumably not in need of relief, and need not be admitted on relief works at all. If the task of work proposed by Mr. Glass is found to be too light, it can be increased; but it is clear that the task, such as it is, was not enforced during the fortnight.

No. 13G., dated Bankipore, the 5th—6th January 1897.

From—J. A. BOURDILLON, Esq., Offg. Commissioner of the Patna Division,

To—The Secretary to the Government of Bengal, Revenue Department.

I HAVE the honour to forward herewith my report under sections 13 and 24 of the Famine Code for the weeks ending the 19th and 26th December 1896.

PART I.—INTRODUCTION.

2. This report is again overdue in spite of every effort on my part and on that of the District Officers, and I am constrained to submit that the time allowed by the Famine Code in paragraph 13 is not sufficient. The statements received by the Collectors are often wrong, and have to be corrected with great labour, while those received in my office have all to be checked, scrutinised and compared with those of the previous fortnight. Even if the reports are received in time, this process occupies a considerable time, and the papers do not reach me in complete form till well into the second day. The time occupied in copying is also considerable. Every effort will always be made to work up to the dates prescribed; but I trust that if I fail to attain the desired punctuality, due allowance will be made for our difficulties.

3. Since the last report was written I have made a rapid tour in the Saran district, and I intend to start to-morrow for a week's tour in Champaran, returning in time to write the report for the fortnight ending the 9th January. As the next following Saturday is the 16th and District Officer's reports are due to me on the 18th, it is a physical impossibility that they should contain figures for any later date than the 9th instant. I am therefore issuing instructions that the next report shall be confined to the period ending on the 9th instant, and that the second report for January shall refer to the three weeks ending the 30th instant.

PART II.—DISTRICT REPORTS.

4. *Patna.*—The Collector's report is characterised by the same hopeful tone that has marked it on previous occasions, and the rain which fell during the last week of the year, though it was not nearly so plentiful in Patna as in other districts of the Division, justifies his confident attitude. On an average a quarter of an inch fell over half the district, and half an inch over the remainder. No alteration is made in the area and population likely to be affected, but it is obvious that these timely showers have greatly diminished the chances of scarcity becoming severe.

5. At the present moment the most important points to watch in the Patna district are the prices of food-grains and their movements by rail. The former show little variation. In the latter there has been on the East Indian Railway an increase in the balance in favour of the district, the excess of exports over imports having fallen from 85,431 to 56,433 maunds. This result has been produced both by an increase of imports (by 5,691 maunds) and by a decrease of exports (by 23,307 maunds). But the district figures are so largely affected by those of the great city itself that too much importance need not be attached to these fluctuations. The grain imported consists largely of rice, while the exports are mainly composed of Indian-corn.

6. The Collector reports that no relief works were open in the district, but Form No. 5 shows that four test works designed to afford relief, if needed, were open in the last week of the period under report. All the labourers are classed as A. The number of male units in the last week was 965 and in the former week 417: the rate was less than Rs. 2 per 1,000 cubic feet. The number of relief workers on the last day of the month was 311.

7. *Gaya.*—The Collector is able to report that his district is in better case than before, and he now anticipates a full *rabi* crop.

8. The explanation of these improved prospects is to be found here as in other districts in the welcome fall of rain which occurred in Christmas week. There was a slight shower on the 25th December in all parts of the district, except Nawada, which has all along been the most prosperous tract,

and on the 30th December about half an inch fell over the whole district. This, says Mr. Savage, "guarantees a bumper *rabi* crop. The *aghani* rice is nearly all cut, and has proved fully an 8-anna crop."

9. Prices, however, are still high; and though there has been in most grains either a maintenance of former rates or a slight fall, there has been in rice a slight advance, which is explained by Mr. Savage to be only temporary, and due to the smaller imports from the villages to the larger markets owing to bad weather on the last two days of the period under review.

10. Exports also have begun to rise again and imports to fall off, though the volume of both is exceedingly small, being only 1,792 maunds imports and 5,417 maunds exports, against 2,369 and 3,993 maunds in the previous fortnight. The imports are slightly larger and the exports considerably smaller than in the corresponding period of 1895.

11. In all other respects, save the two above stated, the condition of the district is excellent. No relief works are required, and Mr. Savage does not mention any applications for charitable relief. In these circumstances he asks permission to discontinue the submission of fortnightly reports; because in his opinion "there is not now the slightest fear of famine in the district," and because "as no operations under the Famine Code will be needed, it seems unnecessary to continue the submission of reports prescribed by that Code." Mr. Savage undertakes, if this be allowed, to watch the course of prices and to administer charitable relief when necessary.

12. I am not prepared at present to accept the Collector's recommendation. I am willing to grant that the crops are excellent, and that if an average or 16-anna *rabi* crop is harvested, the outturn of the district will be nearly two-thirds of the normal, i.e., 1,5,08,000 maunds against 2,44,01,000. Moreover, in this district, for reasons already stated elsewhere, the stocks in hand are probably larger than in other parts of the Division, and, lastly, in such a year of high prices the sale of their crops will bring in large sums of money to the agricultural community. But, on the other hand, the *rabi* crop is proverbially exposed to sudden calamity, and it is unsafe to count upon its ultimate outturn so early in this season. Moreover, even though Gaya itself be safe, it is surrounded by districts where scarcity prevails, and it is most necessary to watch the course of trade, for the temptation of high prices may lead to an undue depletion of stocks and to a consequent rise in prices.

13. For all these reasons I think that the fortnightly reports should not yet be discontinued, and I will ask the Collector to submit them, as at present, until further orders.

14. *Shahabad*.—From this district also the report is more favourable, due again to the rain which fell in the last week of the year. Bhabhua received more than four-tenths of an inch; and though no return has been received from Sasaram, there was nearly a quarter of an inch at Arrah and at Buxar. Mr. Marindin estimates an average, or 16-anna, *rabi* crop.

15. Prices are stationary, and the recent rain has not yet had time to affect them. The general state of the district is good, and the public health is said to be satisfactory.

16. In the matter of food-grain traffic it appears that the tide has now turned, and imports now largely exceed exports. The imports, which consisted almost entirely of rice, aggregated 26,356 maunds against 16,647, and the exports, which were almost exclusively Indian-corn, amounted to 14,810 maunds against 24,247. The Collector points out that as nearly the whole of the grain exported by rail from Bhabhua and Mohannia goes *via* Zamania in the Ghazipur district, his own returns are necessarily defective unless the figures for Zamania are included. On the other hand, the Zamania traffic necessarily includes much which comes from tracts not in the Shahabad district. I will ascertain whether the figures can be separated in any way.

17. As regards relief works, that on the Sabar tank has been closed, as promised in my last report. The Hati-Durgouti road is still open, and will remain open for the present for the reasons given in paragraph 14 of my last report. There has been a slight rise in the numbers on this road; but owing to the closing of the Sabar tank, the daily average of male units throughout the fortnight was 568 against 620. The outturn of work averaged 56 cubic feet against 50·5 cubic feet; but with so many A class labourers as are shown in

Form No. 5, the outturn should have been higher. The proportion of persons on daily wage irrespective of task is now not excessive. It is clear that the demand for work in this district is not urgent.

18. Paragraph 9 of the Collector's report deals with a subject which I shall refer to again in my concluding remarks, i.e., the short amount of work done by relief workers. In so far as this is due to a late commencement of work, the Collector will correct the fault, and I have issued orders already that for contumacious idleness the penal wage is to be given without hesitation.

19. As regards the circulation of a subscription list, I have desired the Collector to take no steps until some general orders are received from Calcutta. Meanwhile I have confirmed the orders reported by him in his final paragraph, and have urged him to complete his lists of persons likely to require charitable relief. If distress invades any of the South Bihar districts, it will be along this line.

20. *Saran.*—Mr. Earle submits a full and interesting report, most of the conclusions in which are based upon our joint observations and enquiries. I was on tour in this district with the Collector from the 29th December to the 1st January, both days inclusive. Leaving Bankipore the morning after the Accounts Conference, we travelled by train to Siwan, and thence drove to Hutwa (14 miles). Next morning, after a long conference with the Manager, we drove to Bhorey (14 miles), and thence to a relief work road some 2½ miles further on. Returning to Bhorey, we inspected the poor-house there, and drove on the Katiya (8 miles), arriving there at 1 P.M. In the afternoon we inspected the poor-house and rode 3 miles out to another relief work. On our return we drove back to Hutwa (18 miles) by another road, arriving at 8-30 P.M. after picking up on our way Mr. Buskin, Manager of the Sripur Circle under the Raj. On the 31st we inspected the poor-house at Hutwa and the tank which is being re-excavated as a relief work on behalf of the Raj. We then drove out to Thaway (9 miles) and back, to interview the widowed Maharani, and discuss certain points in Mr. Earle's programme of management, and finally reached Siwan (11 miles) in the afternoon. Next morning, January 1st, after inspecting the arrangements for relief works and a poor-house and looking into several local matters, I returned to Bankipore, leaving Mr. Earle at Chapra. The tour, though rapid, was full of interest, and as Messrs. Tytler, Knyvetts, and Lyall were at Siwan, and we saw Messrs. Twiddell and Garrett at Hutwa and Katiya, we learned the latest news of the state of the district at first hand.

21. The rain which fell before and during our tour has done much good to the *rabi*. The Collector suggests an average of half an inch all over the district, the heaviest falls being in the north, where the failure of the crops has been greatest. In the "rice villages" not much good can be expected, but the *rabi* elsewhere has been greatly refreshed.

22. Mr. Earle's report propounds yet another estimate of area and population to be affected based upon further enquiries, but it is unnecessary to notice this now, as it is only provisional. The Settlement Department, under the directions of Mr. Gauntlett, have been preparing a detailed scarcity map of the district; and when this is ready, a final estimate will be made and submitted with a revised map.

23. The Collector, with my sanction, is busy in developing and manning his circles, because, for reasons to be explained below, it has become necessary to prepare without delay lists of persons likely to require charitable relief. Mr. Earle, soon after joining the district, called for applications for employment as Circle Officer, and from the numerous applicants prepared a list of suitable candidates which has proved most useful.

24. Mr. Earle's remarks under the head "General state of the affected tracts" embody, for the most part, the conclusions at which we arrived during and after our tour, and should be studied. The key-note of the affected tracts in this district is acute distress for a very small number and serious inconvenience for a very large majority of the population. These features of the situation are caused by three peculiar conditions of the district, i.e., (a) its dense population, (b) the very large proportion of adult males who are absent in Lower Bengal or elsewhere, and (c) the fact that almost every one is accustomed to labour. The result is that throughout the affected area, especially

in the tracts where rice is the staple crop, there is in every village a small number of the labouring poor who must be relieved at once, and an immense number who are willing to earn a small wage if it can be obtained near home. They cannot go far, as, for the most part, they have their houses to look after, one man in the family being left to attend to the women, children and cattle. To meet fully the requirements of these people, we should need a relief work every few miles—an absolutely impossible task. It is for this reason that Mr. Earle has correctly stated that for his district the programme must be first poor-houses, secondly, charitable relief, and, thirdly, relief works.

25. From these premises he draws the conclusion that charitable relief should be largely extended, and that the system of exacting relief work should be made more onerous. It is quite certain that by adopting the first expedient he would greatly reduce the number of persons to be relieved, and the cost, and if our agents could be trusted, he would relieve only those who urgently require assistance. But this measure *alone* would involve to some extent the abandonment of self-acting tests, and it is essential that it should be supplemented by the second expedient, which should take a double shape, viz., (a) the strict enforcement of a reasonable task by means of the free use of a penal wage when necessary, and (b) the opening of large central relief works in place of many scattered small ones. The first expedient is absolutely essential in the interests of economy, order and discipline, and in order to make the relief works an effective test, and the result expected of the second is that the works will assist those who really need immediate relief, and are prepared to leave their homes to get it. Those who are not in such urgent need will stay away until, if ever, they are forced by hunger to seek work abroad. It is to be remembered that for the support of the home-staying folk large sums of money are now coming into the district by money-order at the rate of more than two lakhs a month as pointed out by Mr. Earle.

26. The above remarks explain the policy which will be followed in the Saran district, and I shall shortly be able to judge whether it should be followed in the remaining districts also. The other points in Mr. Earle's report which deserve notice may be more briefly treated.

27. As to traffic in food-grains, it will be noticed that the Collector's figures are a fortnight behindhand, and refer to the half-month ending December 15th. I hope that he will soon get his returns with greater punctuality; but taking them as they stand, it is clear that food stuffs are coming in more rapidly than before. The railway statistics in Forms Nos. 8 and 9 show that, as compared with the previous fortnight, imports have gone up almost 100 per cent. (76,155 maunds against 38,666), while exports have fallen from 14,644 maunds to 10,840. The balance in favour of the district is 65,315 maunds against 24,022. The Revelganj river and road returns show that the imports were 3,309 maunds up to the 31st December, and the exports 14,963, leaving a balance of 11,654 against the district. I shall endeavour to arrange that the period covered by the river and road figures shall tally with that of the railway returns.

28. The large number of deaths under "Other causes" in paragraph 10 of the Collector's letter need cause no alarm. Accuracy of description has long been a weak point in the vital statistics from the Saran district, and attention was drawn to the fact both in 1895 and 1896 by Mr. Forbes and myself when reviewing the annual returns.

29. As to relief works, I have not much to add to what has been said in paragraphs 24, 25 above. I can testify from personal inspection that Mr. Earle has spared no pains in endeavouring to make his subordinates understand and observe the principles of the Famine Code; but with the inferior material which is usually available, the task is stupendous. Fortunately, except in works executed by the Hutwa Raj officials, where a good deal of laxity has been shown, and the Famine Code has not been studied, the officers in charge have everywhere endeavoured to secure a fair day's work, and the result is that although the works are in an initial stage, the expenditure per 1,000 cubic feet has not been unconsciously high. The number of works, exclusive of those under the Hutwa Raj, increased from 3 to 6 during the fortnight, and the number of male units in the last week was 8,882, against 2,818 in the week ending 12th December.

30. Advances have been freely given under both the Agriculturists' Loans and Land Improvements Acts, and the Opium Department have from the first been most active in this direction. From the Hutwa Raj large sums have been advanced to raiyats for grain and wells. The amount sanctioned for these purposes by the Board is Rs. 25,000 in all. Little advantage has been taken of the proposed bounties for *kutchha* wells. Immense numbers of these have already been dug by the cultivators, and no more are required.

31. *Champaran*.—Mr. Macpherson's report is at once the most full and the most important of the present series. During the past fortnight the development of events has been much more rapid in Champaran than in any other district, and the Collector has entered into great detail in portraying the situation of affairs. The two leading features of the fortnight in Champaran have been the rainfall and the great increase in the number on relief works but many other points deserve notice.

32. In my last report it was stated that the area and population in Champaran in which immediate relief was required were 1,057 square miles and 601,149 persons. During the fortnight now under review these numbers have increased to 1,242 and 729,120, respectively, and the map which accompanies this report will show how rapidly the ominous brown tint is spreading over the district. In place of scattered areas the affected tracts now lie on the map in three large splashes of about equal size—one in North Bettiah (area 410 square miles), a second about the centre of the district with an area of 460 square miles, and the third to the east with an area of 372 square miles. Mr. Macpherson is justified in saying that these figures vindicate the accuracy of his earliest estimates of distress.

33. The general mapping out of the district into charges and circles has been completed, and is described in the Collector's report: briefly it may be stated that Champaran will be divided into 12 Superintendents' charges and circles. Six of these are already manned by the seven officers named by the Collector. Mr. Macpherson has broken the boundaries of outposts and thanas, in order to let indigo planters retain charge of their own *dehats*. The reasons he gives are weighty; but, before deciding finally whether to approve the arrangement, I will further discuss it with him when we meet at the end of the present week. Invaluable assistance has already been rendered by gentlemen who have been acting as Honorary Circle Officers.

34. The rainfall of Christmas week, if followed by ordinary weather, will, in the Collector's opinion, secure a fair *rabi* crop throughout the district, say from 10 to 12 annas; but, as he observes, the *rabi* crop, when a full average, is only represented by 21·02 per cent. of the food crop of the district.

35. The Collector has not been able to analyse and assimilate the numerous and discrepant reports he has received as to food stocks, and I fear that with the heavy work now on his hands, it will be long before he finds time to prepare this report.

36. In respect of food-grain traffic the tide seems to have turned, for the imports now for the first time exceed the exports. In last report I showed that the excess was only 59 maunds in favour of exports, now it is 1,861 maunds in favour of imports; but the volume of both is small, viz., imports 4,761 maunds and exports 2,900: both consisted almost entirely of rice. Clearly, the new rice has not yet been exported, and is being stored, and it is always to be remembered that these figures take no account of the imports from Nepaul, which, on the analogy of Darbhanga and Muzaffarpur, must be very considerable.

37. Prices have risen during the fortnight, as will be seen from the statement appended to the Collector's report; and it may be hoped that this fact will stimulate importations.

38. The public health is still fair: the death-rate is higher than in neighbouring districts, but this is always the case, and the statement given in the Collector's 14th paragraph shows that in only three thanas is the rate for November perceptibly above the average of the previous five years. The observations on prisoners admitted to jail also give no particular cause for anxiety. Crime, however, appears to be increasing to some extent.

39. In my last report I stated that for the second week of the period the numbers employed daily on relief works in the Champaran district were

about 20,000, of whom 4,292 were on Government works, and the remainder on private works opened by indigo factories. These numbers have greatly increased: instead of 11 Government relief works there are now 32 open, and whereas the number on Government works on the 12th December was 6,393, the number on the 26th idem was 39,796. In addition to all these, there are the labourers employed on private relief works during the fortnight. A separate statement gives the figures for these, and it shows that the daily average of male units was 9,316 for the week ending 19th December and 6,541 for that ending 26th December.

40. Taking the whole district and including those in the receipt of daily wage irrespective of task, the average daily numbers in each week were, as follows:—1st week, $12,945 + 9,315 = 22,260$; 2nd week, $22,997 + 9,014 = 30,011$: and the Collector states that the number employed all over the district on the last day of the fortnight must have been 55,000.

41. The result of this great rush of persons to the relief works has been what is always to be expected on such occasions, i.e., the temporary collapse of arrangements and an altogether inadequate outturn in return for the wages paid. But the officers in charge of the works seem to have done their best, and the expedient of paying every one the minimum wage until order could be restored has my full approval under the circumstances. However, even so the nett result of the two weeks' work was as follows. According to the Collector's 18th paragraph, in the week ending December 19th the average number of male units was 12,756, and each dug and carried on the average only 17·7 cubic feet of earth, and was paid 1 anna 2 pies, the cost per 1,000 cubic feet being Rs. 3-5-3. In the next week ending December 26th, the average number of male units per diem was 20,675, and each man dug and carried 12·5 cubic feet, so that the cost ran up to Rs. 5-15-3 per 1,000 cubic feet, the daily average wage remaining the same. The numbers on daily wage irrespective of task were well kept down, being on the average only 187 and 322 male units respectively.

42. The Collector in paragraph 23 of his letter makes a personal explanation, which may be accepted. Mr. Macpherson is not to blame for the confusion which occurred. His observations in paragraph 24 will be further discussed with him in person.

43. In paragraph 25 the Collector has been at some pains to defend his action in digging out tanks, which has, I believe, been attacked by officers of the Sanitary Department. I am strongly disposed to support Mr. Macpherson, but will look into the matter further on the spot.

44. Paragraphs 27 to 30 of the report deal with the important question of private relief works. In most of the factories where these were started Government relief works have now taken their place, but the thanks of Government are due to the gentlemen who came so cordially to the Collector's assistance.

45. No poor-houses have been opened, but this should be done at once. If the numbers employed on relief works are a true index of the distress in the district, poor-houses are urgently required.

46. Gratuitous relief has not yet been completely organised, partly owing to the sudden rush of relief workers, and partly to the late arrival of some of the Charge Superintendents. A good beginning has now been made, but this matter will be looked into further. The number relieved was 696 in the first and 1,395 in the second week, giving an average of 1,043 for the fortnight. The total cost was Rs. 724-10-11 for the same period.

47. *Muzaffarpur*.—Mr. Haro reports little change, and it would seem that, as in the preceding fortnight, affairs in his district are in a state of quiescence; but field work is coming to an end, and requests have been made to open relief works in all three subdivisions. The Muzaffarpur district shared in the rainfall which marked the closing week of 1896. The rain, as elsewhere, in North Bihar was heaviest in the north of the district which profited least by that of the 22nd November. The registered fall was as follows:—

Muzaffarpur	...	·22	Paru	...	·50
Sitamarhi	...	·73	Pupri	...	·50
Shiahar	...	·98	Mahnwa	...	} ·15
			Chitwara	...	

Much benefit is said to have resulted to the standing crops, and more *alua* will be sown in the moistened lands.

48. The price of rice is about the same, but those of the commoner food-grains have risen—a sure sign in particular that the stocks of the *bhadoi* harvest are coming to an end, and generally that scarcity is increasing, since one of its most characteristic symptoms is an approximation in the prices of all grains, whether fine or coarse. The rise in the price of Indian-corn finds a parallel in Saran.

49. Mr. Hare has given some calculations of the stocks in hand prepared partly from the reports of his subordinates and partly from figures of areas and crops supplied him by the Settlement Department. I defer comments on these until I receive reports from all District Officers, and I will only say here that Mr. Hare's two estimates of the stock on the 1st April next vary so widely as 21 and 141 lakhs of maunds. His remarks also on the difficulties which surround the calculation are sound and judicious.

50. The number of relief works open is now six, against two at the end of the preceding fortnight. In paragraph 15 of his report Mr. Hare states that the numbers paid by daily wage were 753, and by task work 12,063; but I cannot trace these figures in the statements appended to his report. Statement 5 is prepared on a wrong principle, since it shows the averages on each work, instead of the totals. However, it shows that the numbers on relief work are steadily increasing, the average number of male units engaged on task work and receiving a daily wage irrespective of task having been as follows for the last four weeks:—

Week ending.	Task work.	Wage without task.	TOTAL.
1	2	3	4
5th December 1896 ...	210	12	222
12th " " ...	335	25	360
19th " " ...	572	59	631
26th " " ...	854	60	914

The whole of the workers are entered as A class, and it is therefore not surprising that they have been able to do as much as 72·4 and 82·4 cubic feet, and that the cost per 1,000 cubic feet has been low. Mr. Hare apprehends, what is actually the case in Saran, that the absence of so many adult males in Eastern Bengal will seriously weaken the gangs when relief works begin in earnest.

51. In the food-grain traffic during the fortnight imports greatly exceed exports. The former have nearly doubled themselves, and the decrease in exports is 62 per cent. The balance in favour of the district was 22,107 maunds instead of 6,284. More than one-third of the imports consisted of rice (9,302 maunds), Indian-corn being next in volume (7,418 maunds). Mr. Hare remarks, as a curious fact, that within the district there has been no movement towards Sitamarhi as might have been expected. I suggest that the wants of the subdivision are met by smuggled grain from Nepal. The Collector is issuing the needful orders to warn Charge Superintendents and Circle Officers to be on their guard against a possible depletion of stocks.

52. I have sanctioned the opening of poor-houses at Muzaffarpur and Sitamarhi, and arrangements are being made for the purpose. No charitable relief appears to have been afforded so far, not even by the police. Mr. Hare reports, however, that his system of circles is not yet complete, and it may be presumed that he is waiting till they have been completed before relief is given.

53. *Kutcha* wells are being made largely in Sitamarhi, probably through the personal influence of the Subdivisional Officer, but not so much elsewhere.

54. *Darbhanga*.—Mr. Carlyle's report shows that the apprehensions of a rapid increase of relief workers expressed in my last report have been fully realised, and here, as in Champaran, events have moved very rapidly during the fortnight under report, as Mr. Carlyle points out this is doubtless due (as

in Saran and Champaran) to the termination of work in the field, for in other respects there has been no great deterioration.

55. The rain of Christmas week benefited the whole district, the fall having been, as in the margin. With ordinary weather, Mr. Carlyle now hopes for about an average *rabi* crop (16 annas) in the south of the district and fair crops elsewhere—we may say a 12-anna crop all round; but it is to be remembered that in a good year the *rabi* crop in this district only represents 21·05 of the whole district outturn.

56. The exports in this district still exceed the imports, but not to nearly so large an extent as in the previous fortnight. They have fallen off from 61,085 maunds to 24,218 maunds, while imports have decreased from 15,620 maunds to 1,622 maunds: the net balance against the district is 12,596 maunds against 45,465 maunds, and, as Mr. Carlyle observes, this is much more than covered by the smuggled rice from Nepal. Three-fourths of the exports consisted of "Other grains"; and a very large proportion of this amount went to Saran; very little of the paddy or rice imported from Nepal seems to have left the district by rail.

57. The number of relief works open was more than doubled during the fortnight under report, and the numbers employed increased in a still greater ratio. On the 12th December there were 5 relief works open, giving employment to 4,982 persons, while on that day fortnight there were 43,789 persons on 12 relief works, and 4 more have since been opened. It is clear from Mr. Carlyle's paragraph that in some places the rush was too great for proper control, and that for a short period the staff was insufficient and the exaction of a task impossible. These sudden rushes appear to be characteristic of famine relief work in Darbhanga, and they occurred both in 1866 and 1873-74. Order has, however, been restored, and Mr. Carlyle, taught by experience, is now arranging to send out to every new work a certain leaven of trained hands. In a subsequent letter he has informed me that he has been obliged to depute police to every work where large numbers of coolies are congregated. The precaution is obvious, and should prove effective; but the demands on the district police must be very heavy, and it will probably be found advisable to substitute temporary guards as matters settle down.

58. Turning to the statements it appears that in the first week of the fortnight the average number of male units per diem was 2,308, and in the second week 6,730: the amount of work turned out per man fell from 45 to 35 cubic feet, and the number on daily wage irrespective of task rose from nil to 1,314.

59. It will be observed that no returns for the relief works managed by the Darbhanga Raj have been furnished. I trust that the Manager will make no difficulty about supplying regularly such simple information as the Collector may ask for, since it is manifest that the district returns of relief will be very incomplete unless they include the operations of this rich and influential house. I have already arranged that the operations of the Hutwa Raj shall appear in the Saran returns.

60. The information as to the formation of circles and the arrangements for charitable relief is not very full: probably Mr. Carlyle, like Mr. Ilarc, is waiting till his arrangements are complete before he reports them. Forms Nos. 6 and 7, however, show that charitable relief being given, the total recipients being in the two weeks 3,399 and 3,726 adult units, and the amount expended Rs. 307 and Rs. 476. If a report detailing the arrangements is not received in the meantime, I will look into the details when I visit Darbhanga at the end of the month.

PART III.—CONCLUSION.

61. The leading features of the period which has elapsed since the submission of my last report have been the rapid rise in the numbers seeking relief in Saran, Champaran and Darbhanga and the rainfall which commenced on Christmas day. The District Officers' reports are appended, together with the required statements and a map (except for Patna and Gaya), since the period referred to is the second of the month of December. Those reports have been criticized above. The following remarks are intended to supplement those criticisms.

62. The rain which fell between the 25th December and the 1st of January, though not everywhere large in quantity was exactly of the kind which agriculturists desire at this season, viz., light drizzling showers, with an occasional downpour: moreover, the fall was heaviest along the north of the

Division, precisely in those tracts in which the November fall was deficient. For all these reasons the beneficial effect of the rain has been greater than would be supposed if its quantity alone were considered: the standing crops have been refreshed; the ground has been moistened for "catch crops" of vegetables, and even where the fall was very light, it was sufficient to form a basis for irrigation. Lastly, its moral effect has been great, inasmuch as it has put heart and courage into thousands of raiyats. The reported rainfall at each subdivision for the week ending the 2nd January is given below:—

Patna	...	Bankipore	...	23	Saran	...	Chapra	...	21
		Barh	...	22			Siwan	...	41
		Bihar	...	30			Copalganj	...	79
		Dinapore	...	15			Motihari	...	14
Gaya	...	Gaya	...	51	Champaran	...	Bettiah	...	33
		Jahanabad	...	15			Muzaffarpur	...	22
		Aurangabad	...	51			Sitamarhi	...	73
		Nawada	...	41			Hajipur	...	
Shahabad	...	Arrah	...		Darbhanga	...	Darbhanga	...	
		Buxar	...				Madhubani	...	
		Sasaram	...				Semastipur	...	
		Bhabhua	...						

63. No great change has occurred in the area affected except in Champaran: in Saran the area to be immediately affected has been somewhat contracted, but I have made no change in my estimates pending the receipt of a final scarcity map of the district, which is being prepared by the Settlement Department. The mapping out of the four northern districts has been nearly completed; but as my information on this point is not yet quite complete, I defer reporting on the matter. I hope before long to submit a complete list of charges and circles with the names of the officers in charge of the former. Circles are being filled up as rapidly as material is available, in order that the lists of persons requiring charitable relief may be completed as soon as possible.

64. Prices are stationary on the whole; but in certain districts, viz., Saran and Muzaffarpur, the price of maize has risen; and as this is the food chiefly consumed by the poorest of the people on account of its cheapness and its nutritive qualities, this rise in price is a serious matter. The new rice has been harvested everywhere, but the price of rice has not fallen. Seeing that exports of this grain and of paddy have not risen to any great extent, the inference is obvious that the greater part of the rice lately harvested has been stored for future need.

65. The crop prospects are distinctly better everywhere than they were a fortnight ago. In South Bihar they leave little to be desired: given ordinary weather for the remainder of the cold weather, we ought to reap a full average crop in the three southern districts, if not more than that in Gaya; while as regards the districts of North Bihar, my first estimate of 8 annas each for Saran, Champaran and Darbhanga, and 10 annas for Muzaffarpur is likely to be fully realized.

66. As to food-stocks, my information is still incomplete. I have drawn up a memorandum on the subject, but am awaiting the reports of my District Officers. An effort will be made to submit a full report within the current month. Now that the Government of India have again declared their policy of non-intervention in the grain trade, it becomes more than ever necessary to prepare as soon as possible an estimate of the requirements of each district.

67. Closely connected with this subject is that of the imports and exports of food-grains. The rail-borne traffic figures as reported by District Officers are summarised below, and they have already been noticed under each district:—

DISTRICTS	IMPORTS.		EXPORTS.		EXCESS—I. OR E.	
	FORTNIGHT ENDING—		FORTNIGHT ENDING—		FORTNIGHT ENDING—	
	December 12th.	December 20th.	December 12th.	December 20th.	December 12th.	December 20th.
1	2	3	4	5	6	7
	Mds.	Mds.	Mds.	Mds.	Mds.	Mds.
Patna	27,455	31,140	1,10,000	87,579	E. 55,311	E. 55,435
Gaya	3,361	1,793	3,093	5,417	E. 1,634	E. 3,624
Shahabad	10,647	28,356	21,347	14,510	E. 7,300	E. 11,546
Saran	38,600	76,155	14,644	10,840	E. 24,022	E. 65,315
Champaran	3,034	4,761	3,993	2,000	E. 89	E. 1,861
Muzaffarpur	13,025	24,811	7,341	2,788	E. 6,284	E. 22,107
Darbhanga	15,020	11,023	61,085	24,218	E. 45,465	E. 12,598

* These figures refer to the half-months ending November 30th and December 15th.

Four districts (Shahabad, Saran, Champaran and Muzaffarpur) now show an excess of imports, as against two (Saran and Muzaffarpur) in my last report, and the general balance of trade in the Division is now 28,775 maunds on the side of imports instead of 72,054 maunds on the side of exports. The measure of the change in the movements of grain during the fortnight is therefore 1,38,648 maunds or 4,951 tons; these figures, however, are not complete even for railway traffic, and they do not include traffic by road or river. I have lately addressed the Traffic Managers of both the East Indian Railway and the Bengal-North-Western Railway, and hope that, with their assistance, both I and all District Officers will receive reliable statistics with punctuality and regularity. As soon as I can procure the figures, I propose to submit a statement comparing the figures of each fortnight with those for that which preceded it, and with those for the same period in 1895.

68. The number of people on relief works and in receipt of charitable relief has very largely increased during the fortnight under report. The statistics of each district have already been discussed in the foregoing paragraphs, but I submit below an abstract statement showing side by side for each district in the Division some of its principal figures as compared with those for the preceding fortnight.

Comparative Statement of Relief Works and Gratuitous Relief for the present and past fortnights.

DISTRICT.	FORTNIGHT ENDING DECEMBER 12TH.								FORTNIGHT ENDING DECEMBER 26TH.								REMARKS.
	TASK WORK.				DAILY WAGES IRRESPECTIVE OF TASK.		GRATUITOUS RELIEF.		TASK WORK.				DAILY WAGES IRRESPECTIVE OF TASK.		GRATUITOUS RELIEF.

69. In the first place, the statement shows clearly the great developments that have taken place during the last fortnight, the average number of male units in receipt of all kinds of relief all over the Division for the period being 28,764 as against 5,501.

70. In the next place, it will be noticed that very great variations exist between districts in their administration of details. In three districts alone, viz., Saran, Champaran and Darbhanga, has gratuitous relief been given; but in Darbhanga the number of persons in receipt of charitable relief (3,563) is 61·08 per cent. of the average daily number on relief works, viz., 5,833, while in Saran the proportion is 5·91 per cent. and in Champaran 5·48. I am inclined to think that this has been overdone in Darbhanga. Next the proportion of those on daily wage irrespective of task varies greatly, being as before highest in Darbhanga and lowest in Champaran.

71. Turning next to statistics of outturn of work, daily wage and rate per thousand cubic feet, the signs of the sudden rush off labourers which occurred in Champaran and Darbhanga, and to a less degree in Saran, will be clearly observed, and their effects will be still more clearly visible if Form No. 7 in each case is referred to. It appears from the abstract above that the outturn of work per man fell in Champaran from 52 cubic feet to 17 cubic feet, and in Saran from 39½ cubic feet to 25 cubic feet. In Darbhanga the fall was only from 42½ cubic feet to 40 cubic feet, apparently because large numbers of the applicants either received charitable relief or the daily wage irrespective of task. The rate per 1,000 cubic feet rose in Saran from Rs. 2-3-11 to Rs. 3-7-0, in Champaran from Re. 1-13-8½ to Rs. 4-10-3, while in Darbhanga (for the reasons suggested above) it remained

practically the same in both periods. Violent oscillations such as these are inevitable at the first before the machinery gets into regular work, and I am confident that they will soon cease. All District Officers have now learned the lesson that when a work is opened, it must be officered much above its apparent requirements, and I trust that each succeeding fortnight will show a better control over the difficulties of the situation.

72. The general policy to be adopted in respect of relief works I have already discussed at length in noting on the Saran report. During my coming visit to Champaran I shall test the principles there enunciated, and shall also discuss them with the Hon'ble Mr. Glass and other officers of experience; but I feel pretty confident that the only way to avoid having almost the whole population on our hands, is to open large relief works in central places, and to enforce by penal wages the execution of as full a task as the relief workers are reasonably capable of doing. Every District Officer in North Bihar has discovered for himself, as Mr. Macpherson has reported, that the difference between the maximum and the minimum wage is too small, and that so long as the penal wage is not freely given for wilful idleness, thousands of villages will flock to the works for healthful employment to eke out their income, thus confounding all order and system, and leading eventually, unless the practice is prevented, to enormous expenditure.

73. In this connection I venture to think that the tasks propounded by the Hon'ble Mr. Glass are too easy, and I think that after he has visited Bihar again, he will be able to recommend to Government that they should be raised. The Resolution of the Government of the North-Western Provinces, dated the 5th December 1896, which I have received, but not had time to read, will doubtless afford much valuable instruction in the administration of relief works of all kinds.

74. Poor-houses have been opened in Saran by the Hutwa Raj and in Muzaffarpur and Darbhanga by Government. They will be largely developed in the current fortnight, for they are a necessary adjunct to the penal clauses of the Famine Code. Moreover, it is a patent fact that the condition of beggars and cripples, and such waifs and strays of the native community, is rapidly deteriorating from cold and hunger.

75. Loans have been given in most districts, but the figures are for the most part incomplete. As soon as the full complement of Charge Superintendents and Circle Officers is appointed, and the great rush to relief works is brought under complete control, an effort will be made to put in order all these matters of comparatively minor importance. The offer of bonuses for *kutcha* wells does not seem to have been fully appreciated, except in Muzaffarpur and parts of Champaran. Advances for agricultural improvements have been granted largely in Saran.

76. On the whole, the events of the past fortnight have not been unexpected. It was known that large numbers of persons would come on our hands in December; it remains to test them by the exaction of a fair task, and to organise more perfectly the employment of those who remain. Gratuitous relief requires to be more fully organised in most districts, and apparently to be somewhat restricted in Darbhanga. Lastly, the imports and exports have to be carefully watched, and instant notice given if stocks in particular places begin to run out; for although the Government have no intention of interfering, yet immediate intimation of this nature can be communicated to the grain dealers of the nearest large market, and charitable relief in grain can be freely extended till private trade comes to the rescue.

WATER-SUPPLY.

No. 152L.S.-G.—The 11th January 1897.—The following reports of the progress made in the several districts of the Dacca and Rajshahi Divisions in collecting and placing on record the chief facts regarding water-supply are published for general information.

H. H. RISLEY,
Secretary to the Govt. of Bengal.

No. 1765G., dated Dacca, the 31st December 1896.

From—G. TOYNBEE, Esq., Offg. Commissioner of the Dacca Division,
To—The Secretary to the Government of Bengal, Municipal Department.

I HAVE the honour to acknowledge the receipt of your Circular No. 58L.S.-G. of the 12th instant, asking for a quarterly report on the progress made in each district of this Division in collecting and placing on record the chief facts regarding water-supply, and the steps, if any, that have been taken by Municipalities and District Boards respectively to improve existing sources of water supply and to open new ones.

2. In reply, I beg to say that no report from Dacca and Backergunge is yet to hand, although Magistrates were asked to submit their reports so as to reach this office not later than the 28th instant.

3. The Magistrates of Mymensingh and Faridpur report that they have asked the panchayats under Act VI (B.C.) of 1870 to collect the necessary information, but that they have not yet supplied it.

4. As to the step taken by the District Boards and Municipalities:—

(i) The Magistrate of Mymensingh writes:—"The District Board is collecting information from Local Boards regarding the villages where wells and tanks are needed; lists have been prepared for each subdivision and are being copied out. Rs. 15,000 have been allotted for water-supply in this year's budget, divided equally among the five Local Boards. An additional sum of Rs. 14,000, the gift of Rai Jogendra Kisor Roy Chaudhury Bahadur, has also been allotted in equal shares to the Local Boards. Copies of Government letter No. 58L.S.-G. have been sent to the Chairmen of all Municipalities for report as to the steps taken by them to improve water-supply."

(ii) The Vice-Chairman of the Faridpur District Board writes:—"Rs. 4,420 was set apart by the three Local Boards in their current year's budgets for water-supply, and Rs. 3,000 has been allotted on the District Board budget for 1896-97 in addition to the original grant of Rs. 4,420 by transfer. As the season for excavation or re-excavation has not yet advanced, no work on that account has yet begun."

(iii) The Magistrate of Faridpur says that the Chairman of the Madaripur Municipality has not yet submitted his report.

A copy of the report submitted by the Chairman of the Faridpur Municipality on this subject is herewith submitted.

5. A further report will follow.

Statement showing the water-supply of the Faridpur Municipality.

Ward.	Tanks reserved for drinking and culinary purposes.			Tanks for bathing purposes.			Wells reserved for drinking and culinary purposes.			Other sources of water-supply.			REMARKS.	Steps taken to improve the existing sources of water-supply and to open new ones.

I	1	...	2	1	1	9	1	1	(1) Besides the tanks shown in the body of the statement, there are also 30 small tanks of various size, of which nearly 20 partially dried up in dry season. These tanks are used for miscellaneous purposes.	(1) A large tank called the Jubilee tank has been excavated in the heart of the town, which has benefited a good number of people of the central blocks of the town. One water filter is also being constructed in connection with this tank.
II	2	1	2	1	...	(2) There are 23 private wells within the Municipality used for miscellaneous purposes. They are generally 22 feet in depth, and in most of them water is found in hot weather.	(2) The Commissioners have sanctioned Rs. 275 for re-excavation of the Goulchamat tank in Ward No. I and tenders invited. The work will be taken up shortly.
III	1	3	(3) Certain portions of the river Padma, Khal and Jolla have been set apart, (1) for bathing, (2) for cattle watering, (3) for cloth-washing, and (4) for miscellaneous purposes. River water is also used for drinking and culinary purposes. The water of the Jolla is also used for drinking and culinary purposes. These are situated at a safe and convenient distance from each other.	(3) In mchulla South Allpur in Ward No. V, one eddy has been provided with raised embankments.
IV	1	1	...	1	2	Padma	1	...	(4) During the rains the municipal reserved tanks were cleansed and some of them were flushed with river water.	(4) During the rains the municipal reserved tanks were cleansed and some of them were flushed with river water.

No. 221, dated Faridpur, the 24th December 1896.

Memo. by—The Chairman, Faridpur Municipality.

SUBMITTED to the Magistrate of Faridpur, with reference to his memorandum No. 958G., dated the 23rd December 1896.

No. 14Mot.R., dated Darjeeling, the 1st January 1897.

From—P. NOIAN, Esq., Commissioner of the Rajshahi Division,
To—The Secretary to the Government of Bengal, Municipal Department.

IN reply to your Circular No. 58L.S.-G., dated the 12th December 1896,

1. Letter from the Magistrate of Rajshahi, No. 1350J., dated the 27th December 1896, and enclosure.
2. Letter from the Magistrate of Dinajpur, No. 14Jct., dated the 22nd December 1896.
3. Letter from the Deputy Commissioner of Jalpaiguri, No. 2131J., dated the 22nd December 1896, and enclosures.
4. Letter from the Deputy Commissioner of Darjeeling, No. 1847J., dated the 24th December 1896, and enclosure.
5. Letter from the Magistrate of Rangpur, No. 2951J., dated the 22nd December 1896, and enclosure.
6. Letter from the Magistrate of Bogra, No. 874J., dated the 22nd December 1896, and enclosures.
7. Letter from the Magistrate of Pabna, No. 1567J., dated the 26th December 1896.

I have the honour to forward in original the marginally noted letters, being quarterly reports of the progress made in the several districts of this Division in collecting and placing on record the chief facts regarding water-supply, &c.

No. 1350J., dated Boalia, the 27th December 1896.

From—N. K. BONE, Esq., Magistrate of Rajshahi,
To—The Commissioner of the Rajshahi Division.

WITH reference to your memorandum No. 549M.Cir., dated the 16th instant (Miscellaneous Department, General), I have the honour to submit copy of a report received from the Chairman of the District Board.

2. Further communication will follow as soon as the reports are received from the Municipal Boards.

No. 947, dated Boalia, the 21st December 1896.

From—N. K. Bose, Esq., Chairman, District Board, Rajshahi,
To—The Magistrate of Rajshahi.

With reference to your No. 1334J. of the 19th instant, forwarding copy of Government Municipal Department Circular No. 58L.S.-G. of the 12th December, calling for a report of the progress made in collecting and placing on record the chief facts regarding water-supply and the steps taken to improve existing sources of water-supply and to open new ones, I have the honour to state as follows.

2. I, as Magistrate, directed the panchayats to submit statements, through police in a prescribed form, of facts regarding water-supply. The statements received were arranged in alphabetical order thana by thana, and were forwarded to the Local Boards with a supply of Forms I and II, to prepare the registers.

3. I, as Collector, received a great many petitions praying for the re-excavation of tanks. I therefore called for the statements from the Boards' offices, and distributed them to the following officers for personal inquiry and report of the places requiring immediate attention :—

- | | |
|----------------------------------|-------------------------------|
| 1. The Subdivisional Officers. | 3. The Kanungoes. |
| 2. The Income-tax Assessor. | 4. The Excise Sub-Inspectors. |
| 5. The Sub-Inspector of Schools. | |

Their reports are due by the 7th of January next, on receipt of which it will be decided what works are to be taken in hand as relief works and for what advances are to be given under the Land Improvement Act.

4. The District Board has already decided to sink masonry wells at Baneswar, Kanpara, Manda, Dumecorahat, Dum-Duma, and one on the road from Haripur to Gangar, and works in some of them have already been taken in hand, and in one nearly completed. The Board has also decided to excavate a tank at Kandari village in thana Boraigram, to sink pottery wells in 20 villages, and to clear a tank in each of the following places to reserve for drinking purposes, viz.—

Hát Godagari.
Saipara.
Bansberia.

Bhalukpukhor.
Banbelghoria.
Chak Masura.

Bagadbari.

5. A tank at Parila, belonging to Rani Mon Mohini Devya of Puthia, is being re-excavated under the supervision of the District Engineer as a test relief work. Rani Hemanto Kumari Dehya of Puthia has made over to the District Board Rs. 500 for the re-excavation of her tanks at Sibpur and Dustanabad. These works also will shortly be taken in hand.

No. 14Jct., dated Camp Thakurgaon, the 22nd December 1896.

From—F. W. DUKE, Esq., Magistrate of Dinajpur,
To—The Commissioner of the Rajshahi Division.

In reply to your No. 549M. of the 16th instant I have the honour to report that so far as I know the water-supply of this district has not afforded special difficulties. It is largely derived from the rivers which do not dry up entirely, and, in places remote from the rivers, more from wells than tanks, and the wells also do not appear specially liable to dry up.

2. As regards progress made in systematizing information on the subject, the District Board has obtained lists of tanks and wells from 11 of the thanas. These lists are at present mostly under check by the District Engineer. The register in Form II has been opened and particulars entered so far as regards the Patiram thana.

3. As regards actual improvements, the District Board keeps all its own wells in repair, and in the current year there are six new ones under construction in different places. A tube-well is also proposed to be sunk at Hemtabad. A tube-well has been sunk at Thakurgaon near the dispensary.

4. The report from the Dinajpur Municipality is couched in general terms. It does not appear that anything systematic has been done there. There are abundant private wells. The Municipality also possess some pukka wells which it keeps in repair. It proposes also to sink a tube-well.

No. 2131J., dated Jalpaiguri, the 22nd December 1896.

From—LIEUT.-COLONEL A. EVANS-GORDON, Deputy Commissioner of Jalpaiguri,
To—The Commissioner of the Rajshahi Division.

With reference to your circular No. 549M., dated 16th instant, forwarding copy of Government, Municipal Department, Local Self-Government, Circular No. 58L.S.-G., dated 12th idem, calling for submission of quarterly reports of progress made in this district in collecting and placing on record the chief facts regarding water-supply, and the steps, if any, that have been taken by the Municipality and the District Board respectively to improve existing sources of water-supply and open new ones, I have the honour to submit herewith the copy of a letter, No. 297M., dated 21st instant, from the Vice-Chairman,

Jalpaiguri Municipality, together with a copy of letter No. 563D.B., dated 22nd idem, from the Vice-Chairman, Jalpaiguri District Board, with enclosure, stating the steps taken by those bodies in improving the water-supply and opening new ones.

No. 297M., dated Jalpaiguri, the 21st December 1896.

From—BABU TARINI PRASAD ROY, Vice-Chairman, Municipal Committee, Jalpaiguri,
To—The Deputy Commissioner of Jalpaiguri.

With reference to your memorandum No. 2118J. of the 18th instant, forwarding two copies of Government circular No. 58L.S.-G. of the 12th idem, on the subject of submission of quarterly reports of the progress made to improve the existing sources of water-supply and to open new ones, I have the honour to state that on receipt of Government circular No. 7T.M. of the 15th May 1896, the prescribed registers have been opened, from which it appears that the chief existing sources of water-supply in this Municipality are obtained from (1) the rivers Teesta and the Kurla, (2) from wells owned by the Municipality, and (3) from pucca and kutchra wells owned by private individuals. It has been ascertained that the sources of water-supply alluded to are sufficient to meet the requirements of each ward in this Municipality. Although the number of wells owned by this Municipality is seven, a provision of Rs. 200 has already been made in the budget estimate for 1896-97 for the purpose of sinking new wells to improve the water-supply in this Municipality. The work in that connection will be commenced in March next.

The civil medical officer of the station has also taken steps to improve the quality of water of the municipal wells by disinfecting the water with permanganate of potash.

No. 563D.B., dated Jalpaiguri, the 22nd December 1896.

From—BABU PREONATH BANERJEA, Vice-Chairman of the District Board,
Jalpaiguri,

To—The Deputy Commissioner, Jalpaiguri.

With reference to your memorandum No. 2117J. of the 18th instant, forwarding a copy of Government Circular No. 58L.S.-G., dated the 12th idem, regarding water-supply, I have the honour to state that the District Engineer reports that there is not a single village in the regulated portion of the district containing more than 100 houses, and information has been procured from your office that there are only two villages, viz. Alipur and Chuna-bhati in the Western Duars, containing more than 100 houses. The District Engineer has been asked to supply this office with the necessary information as regards these two villages for filling in the heads of the water-supply Registers Nos. I and II.

2. The District Board have provided a sum of Rs. 1,500 in their next year's budget estimate for the purpose of sinking wells in the regulated portion of the district, and the work will be commenced after 31st March next. It appears from the District Engineer's report that a sum of Rs. 3,760 will also be spent after 31st March 1897 in sinking ten Raniganj pipe-wells and two pucca wells from the funds at your disposal, for the purpose of supplying good drinking water to the people of Western Duars.

3. A copy of the District Engineer's report above alluded to is herewith submitted for your information.

No. 748, dated Jalpaiguri, the 21st December 1896.

From—BABU DURGA DAS DAS, Offg. District Engineer, Jalpaiguri,
To—The Chairman, District Board, Jalpaiguri.

With reference to your No. 551D.B., dated 19th-21st December 1896, forwarding Deputy Commissioner's memorandum No. 2117J. of 18th idem, giving cover to Government Circular No. 58L.S.-G., dated the 12th December 1896, regarding water-supply, in connection with the original circular No. 81P.M., dated 15th May 1896, from the Government of Bengal, on the subject, I have the honour to submit that, after due local enquiry and also consulting the census register of the district, I found not a single village in the regulation portion of the district as containing 100 houses or more, and consequently I beg to return the printed forms unfilled. I would, however, beg to inform you that notwithstanding the thin population in the villages, a provision of Rs. 3,760 for sinking ten Raniganj pipe-wells and two pucca masonry wells has been made during the year to give good supply of drinking water to the people residing at the following places, with funds at the disposal of the Deputy Commissioner:—

At Mynaguri	1	masonry well (pucca), 6 feet diameter.
„ Ramsaihat	1	Ditto ditto.
„ Mynatali	1	Pipe well, 21 inch diameter.
„ Deogaon	1	Ditto ditto.
„ Parengarpar	2	Ditto ditto.
„ Bhutniughat	1	Ditto ditto.
„ Magurmari	1	Ditto ditto.
„ Ultagram	1	Ditto ditto.
„ Joteswar	1	Ditto ditto.
„ Lasmirdabri	1	Ditto ditto.

I am afraid that the Bengal Government circular will not be applicable in this district.
I further beg to state that Rs. 1,500 have been provided in the next year's District Fund Budget for sinking wells in the regulation portion of the district.

No. 1847J., dated Darjeeling, the 24th December 1896.

From—The Deputy Commissioner of Darjeeling,
To—The Commissioner of the Rajshahi Division.

WITH reference to your No. 549 M.Cir., dated the 16th December 1896, I have the honour to report that there are no tanks, wells or khals in the hills. The people use the water of the jhoras or springs.

2. The Darjeeling Municipality is arranging to filter the water-supply of the town through a Pasteur filter at a cost of Rs. 68,000.

3. The town of Kurseong is supplied with water from permanent and wholesome springs which are under municipal control. The supply of water is at present sufficient for the requirements of the town.

4. The District Road Cess Committee which takes the place of the District Board in this district did not find it necessary to take steps to improve the existing sources of water-supply or to open up new ones, no need having been felt therefor.

5. For the Terai, a register in Form I, showing the existing sources of water-supply, has been opened. Copy is annexed.

WATER-SUPPLY FORM I, LOCAL SELF-GOVERNMENT.

LOCAL BOARD OR SUBDIVISIONAL REGISTER OF WATER-SUPPLY.

SHOSHI BHUSAN DUTTA,

Settlement Officer

No. 2951J., dated Rangpur, the 22nd December 1896.

From—E. GRAKE, Esq., Magistrate-Chairman of the District Board, Rangpur,
To—The Commissioner of the Rajshahi Division.

REFERRING to the Municipal Department, Bengal Government Circular No. 58L.S.-G., dated 12th December 1896, asking for a report on the progress made in collecting the statistics and opening out registers in regard to the sources of water-supply existing in the district, according to the instructions conveyed in the Municipal Department, Bengal Government Circular No. 8T.M., dated 15th May 1896, I have the honour to report that for the purpose lists have been made thana by thana separately for the whole district, of villages with 100 houses or more, and also of the population in such villages, that the forms annexed to the Government circular for the registers have been printed and both these village lists and the forms have been circulated with instructions to the overseers, sub-overseers and surveyors to collect the necessary statistics and to fill in the forms during their tour round their subdivisions of work in the present cold season, as in the rains most of the villages in the interior are not easily approachable.

2. The water-supply in the district is obtained entirely from sub-soil springs which are generally met with at a small depth below surface. This underground water at Rangpur is, with few exceptions, of very good quality and practically inexhaustible. The cost of pot wells in most places also is very small. Therefore there is nearly always one or more pot well at every house. Moreover, the district being a backward one and building materials not being available easily, there are very few masonry wells in the district, and those only at the houses of wealthy men and at some of the hâts and markets.

3. The sub-soil of the district, consisting mostly of pure porous sand, tanks cannot by ordinary means be dug very deep. Those few that have been dug by the people are mostly shallow and are overgrown with obnoxious vegetation. The tanks also, with few exceptions, are of small size, and the water in them is usually of bad quality and is not used by the people except for washing purposes, for growing fish, and for cattle. However, even for these purposes the number of tanks in this district is, as in the case of masonry wells, very small.

4. As I was not aware that a report of the progress made in collecting statistics and preparing the prescribed register would be required so speedily, I have not asked my subordinates to submit to me before December any report of the steps taken by them, but I believe some progress has been made by them, and that by the end of the cold season information regarding most of the few masonry wells and tanks existing in the district will be collected and the preparation of the register undertaken, so that at the next quarterly report some material progress may be shown.

5. As to the action taken by District Board to improve the existing sources of water-supply and to construct new ones where wanted, I beg to state that no dearth of water is ever known to have occurred in this district, owing to the small cost of sinking pot wells and the sufficiency of yield therefrom; still the District Board has in previous years repaired or constructed 52 masonry wells and 17 tube wells, and for the current year 16 estimates for repairs and improvement of existing masonry wells have been sanctioned by the Commissioner by his letter No. 416Met., dated 30th June 1896, and No. 466Met., dated 18th July 1896. Some other estimates are also under preparation and will soon be submitted. Estimates for construction in the current year, of some new masonry wells and a number of tube wells, in rural areas, were also submitted to the Commissioner for sanction, but these have been returned asking for site plans of those wells. These site plans are also being prepared, and the estimate for new wells will be submitted shortly.

A copy of the progress report received from the Municipality is herewith enclosed.

No. 226, dated Rangpur, the 22nd December 1896.

From—BABU RAJANIKANT BHATTACHARJEE, Vice-Chairman, Rangpur Municipality,
To—The Magistrate of Rangpur.

WITH reference to your No. 2914J., dated 17th instant, I have the honour to inform you that the following improvements were made in the existing sources of water-supply during the present quarter :—

(a) A tube-well at Mahiganj has been sunk 5 feet lower, with a view to obtain good water, and a reservoir with cover for storing drinking water is under construction.

(b) A reservoir has been constructed at Katkipara tube-well, and water is being stored there for drinking purposes.

(c) A tube-well 40 feet deep has been sunk at the charitable dispensary compound, and a reservoir to hold about 60 gallons of water has been provided for storing water.

(d) Nothing important has been done to improve the condition of public wells during this quarter, except that permanganate of potash was used for purifying water in almost all of them, and the result seemed successful.

No. 874J., dated Bogra, the 22nd December 1896.

From—UMES CHANDRA BATAYAL, Esq., Magistrate of Bogra,
To—The Commissioner of the Rajshahi Division.

WITH reference to your circular No. 549M., dated the 17th instant, I have the honour

1. Copy of a letter, No. 580, dated the 22nd December 1896, from the Chairman of the District Board.
2. Copy of a letter, No. 105M., dated the 22nd December 1896, from the Chairman of the Bogra Municipality.

to transmit the documents noted on the margin, and to state that the report from the Chairman of the Sherpur

Municipality has not been received yet.

2. The two municipalities in this district, Bogra and Sherpur, both lie on the bank of the Korotoya river, the water of which is considered good and healthy. The soil in both is what is known as *khiar*, in which well-sinking is very easy. A kind of *kutchra* well is sunk without any masonry or pottery-rings, at the cost of about one rupee or so, even by the poorest house-holder, which gives him a good supply of drinking water. In both the towns already a number of public wells have been made, and in Sherpur a shop-keeper is giving a good *indira* (a large well) for public use out of religious motives. None of these towns at present suffer from want of water in any season of the year.

3. As regards the district generally, the *khiar* tracts in thanas Sherpur, Bogra, Shibganj, Adamdighi and Khetlal are studded with old tanks, most of which, however, have run waste and are now used for irrigation only. Still there are other tanks in sufficient numbers and wells in private houses (and these wells are as easily made as in the towns of Bogra and Sherpur) which fully meet the requirements of the villagers. In fact the public wells which have been made here and there by the District Board are seldom resorted to by the villagers, and their use is mostly confined to travellers or people coming to markets on market days.

4. It is in the *Pali* tracts in thanas Panchbibi and Shariakandi and outpost Dhunnt and the eastern half of Bogra and Sherpur that tanks and well-sinking is a comparatively difficult affair. The soil is loose and sandy, and wells collapse after a short time. The tract on the east of the Korotoya is subject to annual floods, and no tanks can be maintained in most places. The important villages in these tracts, however, are mostly situated on the banks of the rivers (the Bengali, the Halhoha, the Phooljhor and the Iohamati), which contain a perennial supply of good potable water.

5. The want of the villagers in the *Pali* tracts as regards water-supply requires the gravest attention. The requirement of each such village is being recorded, and, as stated in the report of the District Board, five tube-wells have been kept in stock to supply urgent wants if any. An attempt was made to record these facts by questioning *chaukidars* in the police-stations at parade days. But I have directed the District Engineer and his subordinates to visit the villages personally and note the facts after personal inspection. The matter also receives my attention in the course of my tours.

6. A question has arisen, in preparing the two prescribed registers, whether every tank and well in each village with 100 houses or more is to be entered therein. I think that Government wants only tanks and wells supplying drinking water to be recorded, and that it is unnecessary to enter tanks or wells the water of which is not used for drinking purposes. Another question is whether all private tanks and wells need be entered. My idea is that tanks and wells open to general use in the village only are to be registered. To register every private well or tank would involve great labour. I have issued orders to make detailed entries about such tanks and wells in the villages only as are used for drinking water purposes by the villagers generally, and to make a note in the remarks column as to how many of the houses in the village have private wells and tanks and how many are without them. I solicit instructions whether I am correct or not.

No. 370, dated Bogra, the 22nd December 1896.

From—RABU N. K. CHAKRAVARTY, District Engineer, Bogra,
To—The Chairman, District Board, Bogra.

WITH reference to your memorandum No. 563, dated the 18th instant, I have the honour to report as follows regarding the action taken with respect to the water-supply in this district.

A register of tanks and wells in the villages containing 100 houses or more has been opened.

The following are the number of villages in each thana:—

Bogra thana	85
Shariakandi	39
Sherpur	16
Shibganj	6
Khetlal	3
Adamdighi	20
Panchbibi	16
Nawabganj	9

Nearly half of Bogra thana, half of Sherpur thana, and Shariakandi whole lie on the east of Korotoya and they become inundated during rains. The soil is *pali* (alluvial) and the number of tanks and wells are very small on account of bad soil, while the rest of the district is generally of red soil and contains a large number of tanks and mud wells, and each house has at least one earthen well which can be dug at a cost of Re. 1-4 only. The tanks are large in number all over the district, and they are mainly used for irrigation purposes than for drinking water. These wells are not registered, as it is difficult to ascertain their number. The people generally use well water and river water. The District Board have during 1895 and 1896 constructed 11 masonry wells at Dubohanchia, Khetlal, Buriganj, Mokamtola, Foolbari, Durgapur, Panchbibi, Baniadighi, Dargarhat, Jainagor and Jaiporchat, at a total cost of Rs. 5,090. The soil is so good that cutcha private wells are self-supporting in the *khair* land, i.e., they do not even require pottery rings inside to keep them standing.

Information as required in the forms of nearly all the thanas have been collected, and the work of checking them will be completed by the next quarter.

No. 580, dated Bogra, the 22nd December 1896.

Memo. by—UMES CHANDRA BATAVYAL, Esq., Chairman, Bogra District Board.

COPY forwarded to the Magistrate of Bogra, with reference to his memorandum No. 861J., dated 17th instant. Five tube-wells have been purchased at a cost of Rs. 273, and it is intended to supply them to villages on the east side of the Karatya river, where scarcity of water may be most apprehended.

No. 105M., dated Bogra, the 22nd December 1896.

From—BABU BUNI MADHAN CHAKI, Chairman of the Bogra Municipality.

To—The Magistrate of Bogra.

In compliance with your memorandum No. 862J., dated the 17th December 1896, forwarding therewith Government circular No. 58L.S.-G. of the 12th December 1896, I have the honour to inform you that steps have been taken to place on record (in forms prescribed by Government) the chief facts regarding the water-supply of this town.

No fresh steps have yet been taken to improve the existing sources of water-supply during the last months, as none were necessary. But the Municipal Commissioners will undertake to sink two masonry wells next dry season. I need hardly state here that the residents of this town are not, even under the present arrangements, likely to feel the want of good water.

No. 1567J., dated Pabna, the 26th December 1896.

From—W. MAUDE, Esq., Magistrate of Pabna,

To—The Commissioner of the Rajshahi Division.

With reference to your No. 549M., dated the 16th December 1896, I have the honour to submit the following report on the progress of recording and improving the water-supplies of this district.

2. Registers have been opened by the District Board, showing villages containing more than 100 houses, and all out-door officers under the Board have been ordered to collect and furnish information as to the water-supplies of these villages. The Magistrate has also been asked by the Board to direct the police and his own subordinate out-door officers to supply similar information. Some such information has already been collected.

Registers of existing sources of water-supply in the form prescribed in the Government Circulars Nos. 7T.—M. and 8T.—M., dated the 15th May 1896, have also been opened by the Municipalities of Pabna and Sirajganj, and statistics have been collected for the municipal areas.

3. With a view to improving existing water-supplies the District Board have arranged to construct this season 50 ring wells throughout the district. The rings are now in course of preparation, and will be sunk as soon as the proper time arrives at which they can be sunk to the requisite depth without encountering water. Materials have also been collected for constructing eight small masonry wells and one large masonry well. Steps are in hand also for cleaning out the 57 large and small wells constructed in previous years, for cleaning and deepening the Santipur tank, and cleaning the five other tanks which belong to the Board.

4. By the Pabna Municipal Commissioners five notices were issued recently under section 200 of the Municipal Act upon owners for cleaning and re-excavation of tanks in their possession. In accordance with these notices, Madhabi Sundari Dasya and Babu Tarak Nath Pramanik have commenced the work. The other owners are the Choudhuri Babus of Tantibandar. As they have failed to comply with the notices, the Chairman has asked me as Magistrate to prosecute them. I have suggested that it would be better to fill up the tanks or re-excavate them after due notice at the municipal expense, and levy the cost there-after from the owners under section 180 of the Municipal Act. Three other private tanks have been begun at the instigation of the Commissioners, and several works will, it is hoped,

be carried out in commemoration of the visit of His Honour the Lieutenant-Governor to Pabna in August last, including a large tank to be dug at a cost of Rs. 15,000, which has been promised by Babu Sarat Chandra Choudhuri of Parshadanga, and of which Rs. 5,000 has been already deposited.

5. In the Sirajganj Municipality there are seven tanks to which the public have access. There are also a number of private tanks. Where necessary, notices have been issued to compel the cleaning out of the above tanks, but the result has not yet been reported, it being yet early in the season for the effective cleaning and re-excavation of tanks. The chief efforts of the Sirajganj Municipal Commissioners are directed to the supply of wells, as the soil of the town is sandy and it is only in a few sites that tanks will hold their water. The Municipality have applied for and obtained from Government a loan of Rs. 5,000 for the purpose of sinking wells, and bricks are now being made for the purpose. The Chairman reports that, as far as he has been able to ascertain, there are 787 ring wells in the municipal area of 12 square miles, of which 16 were dug by the Municipality. There are also 47 masonry wells, of which 23 belong to the Municipality.

Imports —The following statement compares the total quantities of each kind of food-grains imported during the last 9 days of December 1895 and 1896:—

		22ND TO 31ST DECEMBER			
		1895.		1896.	
1		2	3	4	5
<i>Food-grains.</i>		Cwts.	Mds.	Cwts.	Mds.
Rice	...	13,728	18,085	43,953	59,825
Paddy	...	7,560	10,290	4,713	6,415
Wheat	219,883	2,99,285
Gram and pulses	...	2,661	3,622	9,099	12,385
Other food-grains, such as jowar, barley, oats, &c.	12,348	16,807
Total	...	23,949	32,597	289,996	3,94,717

The importation of rice showed an advance of 293·01 per cent. in comparison with the preceding year. The supplies drawn from Rangoon and Moulmein aggregated 26,344 cwts. against nil in 1895, while the quantities shipped from Chandbali and Balasore jointly showed an increase of 3,754 cwts. Following the large consignments from the United States of wheat during the previous week, so much as 219,340 cwts. of this article were for the second time received from San Francisco and Tacoma. The improvement under gram and pulses was chiefly due to large quantities having been received from Coconada and Madras against nil in 1895.

Exports.—As in previous weeks there has been a heavy falling off (64·49 per cent.), owing chiefly to the decline in the exports of rice and gram and pulses to both Foreign and Indian ports, as will be seen from the details given below :—

1	22ND TO 31ST DECEMBER			
	1895		1896.	
	2	3	4	5
	Cwts.	Mds.	Cwts.	Mds.
<i>Food-grains.</i>				
Rice	225,300	3,06,658	93,578	1,27,370
Paddy
Wheat	1,443	1,964	1,102	1,600
Gram and pulses	58,827	80,071	6,788	9,239
Other food-grains, such as jowar, barley, oats, &c.	5,321	7,242	1,226	2,486
Total ...	290,891	3,95,935	103,294	1,40,595

Compared with the preceding year, the falling off under rice was largest in the exports to Ceylon (25,890 cwts.), Mauritius (21,066 cwts.), the United Kingdom (20,881 cwts.), and Natal (7,472 cwts.); Port Elizabeth, Reunion, Aden, Maldives and New Zealand, which together imported 57,215 cwts. during 1895, received nothing during the year under report. On the other hand, there were small despatches to Zanzibar, Bassora, New South Wales and South Australia, places to which nothing was sent in the previous year. As regards Indian ports, the figures under Bombay showed an advance of 4,688 cwts., and those under Madras Presidency a decrease of 13,001 cwts., as compared with 1895. The chief fluctuations in the case of gram and pulses are a decrease of 28,291 cwts. in the consignments to the United Kingdom and of 15,771 cwts. in those to the Mauritius. The port of Madras received 5,515 cwts. during 1895, but there were no such exports during the period under report.]

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below:—

STATISTICS OF THE SEA-BORNE TRAFFIC OF THE MINOR PORTS IN BENGAL IN FOOD-GRAINS.

No. 64 Statistics.—The following memorandum and statements are published for general information.

STATISTICAL DEPARTMENT,
The 11th January 1897.

M. FINUCANE,
Secy. to the Govt. of Bengal.

MEMORANDUM.

THE import and export trade of the minor ports of Chittagong, Narayanganj, Balasore (including both Balasore and Chandbali), Cuttack and Puri during the first two weeks of December 1896, as compared with the trade of the corresponding period of 1895, are shown in the following statements:—

IMPORTS.

Ports.			From Foreign ports.	From Indian ports.	Total.	
					Cwts.	Mds.

	{ 1896
Total ...	{ 1895	29,179	51,153	80,332	109,340
	{ 1896	3,014	25,159	28,173	38,346

In the export trade, the chief falling off occurred in the shipments from Balasore ports and Cuttack. The consignments of rice and paddy to Calcutta from the former ports declined by 11,395 cwts. and 6,197 cwts. respectively, while in the case of gram and pulses, there was a decrease of 4,205 cwts. as compared with 1895. Mauritius received no rice from these ports, but last year the total supply amounted to 6,079 cwts. The total exports of rice from False Point showed a decrease of 20,086 cwts., owing to there being no shipments whatever to Mauritius, Madras, and Bombay, all which ports drew largely in 1895.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below:—

Statement showing the quantities of Food-grains imported into Chittagong from each Foreign and Indian Port during the first 14 days of December 1896, as compared with the trade of the corresponding period of 1895.

COMPARATIVE STATEMENT OF THE PRICES OF FOOD-GRAINS.

RETAIL prices of common rice and other food-grains in the several districts of Bengal and in the neighbouring districts of the North-Western Provinces during the first and second fortnights of November and December 1896, as compared with the corresponding periods of 1895, are published for general information. The latest available prices of common rice in Cachar and Sylhet are also published.

M. FINUCANE,

Secy. to the Govt. of Bengal.

WEATHER AND CROP REPORT.

For the week ending the 11th January 1897.

Burdwan.—Rainfall at Sadar ·06, Kalna nil, Katwa ·01, Raniganj ·03. Weather cold and fine. *Aman* harvest almost complete. *Rabi* prospects in Sadar subdivision fair; in Katwa subdivision *rabi* being irrigated; in Raniganj subdivision *rabi* badly in need of rain. Sugarcane wants rain. Fodder and water sufficient at present. Condition of cattle good. Common rice sells as follows:—

			Srs. c.	Srs. c.	
Sadar	10 0	to 12 0	} per rupee.
Kalna	9 8	to 11 0	
Katwa	10 10	to 10 15	
Raniganj	10	4	

Birbhum.—·03 rain on 3rd instant. Weather seasonable. Common rice sells from 9 seers 6 chitaks to 10 seers 4 chitaks per rupee.

Bankura.—Rainfall at Sadar ·02, Indas ·04, Khatra ·05, Onda ·08. Weather seasonably cold. Threshing of *aman* still continues. No improvement in *rabi* prospects. Fodder and water sufficient, except in portions of thana Gangajalghati. Cowpox appeared in Barjora. Rice selling at 11½ seers per rupee both at Bankura and Vishnupur.

Midnapore.—Rainfall at Sadar ·02 only. Weather seasonable. Harvesting of *aman* nearly finished. Transplantation of *boro* commenced in Ghatal and in some parts of thana Panskura. Prospects of indigo and *rabi* crops getting worse for want of rain. Fodder and water sufficient. Cattle-disease reported from Dantun, Binpur, Garhbeta, Keshpur, and Salbani. Common rice selling as follows:—

			Srs.		
Sadar	Old rice	9	} per rupee.
			New "	10	
Contai	12	to 13	
Tamluk	9	to 14	
Ghatal	11½	to 11½	

Hooghly.—No rain. Harvesting of *aman* going on. *Rabi* and sugarcane suffering for want of rain. Common rice sells from 8 to 11 seers per rupee.

Howrah.—Rainfall nil. Weather seasonable. Rain wanted for *rabi* crops. Harvesting of *aman* paddy continues. Fodder and water sufficient. Common rice sells from 9 to 11 seers per rupee.

24-Parganas.—Rainfall nil. Weather cool and bright. Harvesting of *aman* paddy nearly finished; it is estimated to yield 10½ annas. Prospects of *rabi* crops unfavourable. *Kalai* and mustard being harvested. Rice lands being ploughed. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

			Srs.		
Sadar	9	to 11½	} per rupee.
Barasat	10		
Basirhat	10		
Diamond Harbour	11		

Nadia.—Rainfall ·01. Weather cold. Gathering of *kalai* continues. *Rabi* crops want rain. Prospects not promising. Harvesting of *aman* going on in the Ranaghat subdivision. Fodder sufficient. Water in sufficient in places. Common rice sells from 8 to 11½ seers per rupee. Latest price of rice where test-works are open is 10 seers per rupee. Numbers attending test-works are as follows:—

1st January	272
2nd "	319
3rd "	406
5th "	429
6th "	464
7th "	529
8th "	1,031

Number of persons who received gratuitous relief at police-station Kaliganj is 111 from 2nd to 7th January, and at police-station Tehatta on the 6th January is 21.

Murshidabad.—Rainfall at Sadar ·01. Weather cold. Harvesting of *aman* nearly finished. State of *rabi* crops not good; that of sugarcane, mulberry, and indigo seems to be good. Fodder sufficient. Common rice sells as follows:—

			Srs.		
Sadar	9½		} per rupee.
Jangipur	10		
Kandi	11		

Jessore.—Weather seasonable. Harvesting of *aman* about to be closed. Rain badly wanted for *rabi* crops and for transplantation of *boro* seedlings. It drizzled in the Sadar and Narail subdivisions on 3rd instant. Fodder and water available. No cattle-disease. Common rice sells as follows:—

	Srs.	
Jessore	10	} per rupee.

Satkhira	Old rice 8	
	New „ 10	

Wages calculated at 10 seers for staple food-grain. Number of test relief-works opened, two. Number of men employed as follows:—

1st January	126
2nd „	177
3rd „	187
4th „	244
5th „	290
6th „	292

Number of persons who received gratuitous relief from 29th December up to 6th January—men 74, women 236, children 200.

Rajshahi.—Harvesting of winter rice not yet over. Prospects of standing crops not good. Cultivation going on for sugarcane in Sadar. Fodder and water available everywhere except in Rajapur outpost. Common rice selling from 8½ to 10½ seers per rupee.

Dinajpur.—Rainfall nil. Weather seasonable. The outturn of winter rice is estimated to be 10 annas. Condition of standing crops fair. No report of any cattle-disease. Fodder and water sufficient. Common rice sells from 9 to 12 seers per rupee.

Jalpaiguri.—Rainfall nil. Weather very cold and cloudy. Harvesting of *haimanti* paddy about to be finished. Standing *rabi* crops doing well. No complaint of fodder and water. Average price of common rice 8½ seers per rupee.

Darjeeling.—Rainfall at Sadar .05 Weather seasonable. Hills—Potatoes and *phaphur* being harvested; *tori* progressing favourably; wheat and barley flowering. Terai—*Haimanti dhan* almost harvested; mustard in flower; *kakai* and potatoes being harvested; tobacco plants coming up. Coarse rice selling:—

	Srs.	
Hills	8	} per rupee.
Terai	9	

Bhutla 14 seers per rupee.

Rangpur.—No rain. Harvesting of *aman* and sugarcane still going on. Ploughing for *aus* continues. *Rabi* crops progressing well. Prospects fair. Common rice selling at 8 to 10 seers per rupee. Fodder and water sufficient.

Bogra.—Rainfall nil. Weather cold and clear. Harvesting of winter paddy in progress. Ploughing for *aus* and jute going on in *pali* lands. Oilseeds and pulses doing well. Fodder and water sufficient. Common rice selling at head-quarters 9½ seers and in the interior from 9½ to 11½ seers per rupee.

Pabna.—Weather seasonable. Prospects of *rabi* crops fair, but rain wanted. Common rice selling from 9 to 10 seers per rupee. Fodder sufficient.

Dacca.—Rainfall nil. Weather seasonable. Prospects of *aman* not very favourable. *Rabi* crops thriving. Fodder available. No cattle-disease. Common rice sells from 10 to 12½ seers per rupee.

Mymensingh.—Harvesting of *aman* nearly finished. Prospects of *rabi* crops fair. Common rice selling between 8 and 11 seers per rupee.

Faridpur.—No rain. Weather seasonable. Prospects as before. Rain wanted for *rabi*. Common rice selling at 9½ to 11 seers a rupee. Fodder and water available.

Backergunge.—Rainfall nil. Weather fine. Harvesting of rice going on. Prospects of standing crops fair. No cattle-disease. Price of common rice (new *aman*) ranges from 9½ to 12 seers per rupee.

Tippera.—Weather seasonable. Cutting of *aman* over. Trans-plantation of *boro* approaching completion. Prospects of standing crops poor. No cattle-disease reported. Fodder and water available. Prices of new rice—

	Srs.
Sadar	11 to 12½
Brahmanbaria	8 to 12
Chandpur	10½ to 13

per rupee.

Noakhali.—No rain. Harvesting of *aman* and sowing of *rabi* crops nearly finished. No cattle-disease. Fodder and water available. Common rice sells at 10 to 11 seers per rupee.

Chittagong.—Rainfall nil. Weather dry. Reaping of *aman* finished. *Rabi* crops suffering for want of rain. Prospects bad. Water and fodder fairly sufficient. Rice selling at 8 to 10 seers per rupee.

Patna.—No rain. Prospects of *rabi*, poppy, and tobacco good. Harvesting and threshing of paddy proceeding. Prices generally stationary. Common rice at Patna 10½ seers per rupee. Fodder and water for cattle sufficient. Numbers on two test-works on Saturday, 9th January (figures for the third not received)—men 203, women 270, children 186—total 609. Gratuitous relief nil.

Gaya.—*Rabi* crops doing well. Prospects favourable. Price of common rice at Sadar 9½ seers per rupee.

Shahabad.—Rainfall nil. *Rabi* prospects continue favourable. Poppy doing well. Pressing of sugarcane continues. Fodder for cattle sufficient. Pea, *masuri* and *makai* selling at 10 seers per rupee. Number on relief works on Saturday, 9th January—men 560, women 626, children 294, total 1,480.

Saran.—Slight showers in parts. *Rabi* doing well. Sugarcane pressing continues. Average price of *makai* 10 seers 3 chitaks per rupee. Numbers on relief-works on Saturday, 9th January—men 1,101, women 1,949, children 1,416—total 4,466; gratuitous relief—men 782, women 2,259, children 728—total 3,769.

Champaran.—Rainfall nil. Weather cloudless. *Rabi* doing well. Weeding proceeding. Prices still rising. Common rice at Motihari 8½ seers and Bettiah 9½ seers, *makai* at Motihari 10 seers and Bettiah 10½ seers per rupee. Water and fodder sufficient. Numbers on relief works—men 31,014, women 27,483, children 20,557, total 79,054; gratuitous relief—men 744, women 1,460, children 1,203, total 3,407.

Muzaffarpur.—Prospects of standing crops good. Prices are—common rice 8 seers, wheat 8 seers, *makai* 10½ seers, barley 11 seers, gram 10 seers, *rahar* 12 seers. *Makai* and *rahar* fix the relief prices. Numbers on relief works on Saturday, 9th January—Sadar subdivision—men 833, women 113, children 128—total 1,074; Sitamarhi subdivision—men 762, women 233, children 271—total 1,266; Hajipur subdivision—men 25, women 39, children 37—total 101. Gratuitous relief—Hajipur subdivision—men 50, women 187, children 88—total 275.

Darbhanga.—Standing crops doing well except in Madhubani, where the prospects are bad. *Rahar* and rape seeds are excellent. Common rice selling at 9½ seers per rupee. Numbers on relief works on Saturday, 9th January—Sadar subdivision—men 9,819, women 10,793, children 4,738—total 25,350; Samastipur subdivision—men 569, women 82, children 48—total 699; Madhubani subdivision—men 10,799, women 6,784, children 2,500—total 20,083. Gratuitous relief—Sadar subdivision—men 762, women 1,480, children 625—total 2,823; Samastipur subdivision—men 55, women 125, children 15—total 195; Madhubani subdivision—men 2,833, women 7,179, children 4,133—total 14,145.

Monghyr.—Rainfall nil. Weather cold with occasional westerly breeze. Standing crops doing well. Prospects of wheat and poppy good. Harvesting of paddy and weeding of *rabi* continue. Sugarcane pressing going on. Cattle-disease reported from Begusarai. Sufficient fodder and water. Prices of common rice:—

	Srs.
Monghyr	9½
Begusarai	8½
Jamui	8 to 9½

per rupee.

Bhagalpur.—Weather cold and bracing. Westerly wind. Sky clear. Reaping of paddy completed. *Kurthi* and *kalai* being harvested. The late rain has improved the prospects of the *rabi* crops. Fodder and water sufficient. Price of coarse rice as stated below :—

	Srs.	c.	
Sadar	...	10 2	} per rupee.
Banka	...	10 0	
Madhipura	...	10 0	
Supaul	...	9 8	

There has been a slight rise in the price of food-grains at Banka and Supaul during the week.

Purnea.—No rain. Reaping of *aghani* paddy nearly finished. *Rabi* crops doing well. A few cases of cattle-disease in Araria. Fodder and water sufficient. Prices of common rice :—

	Srs.	
Sadar	...	10
Kishanganj	...	9½ to 10
Araria	...	10 to 11

Malda.—No rain. Harvesting of winter rice nearly finished. *Rabi* crops a little improved by the rain which fell last week. Common rice selling at Sadar 8½ seers per rupee.

Sonthal Parganas.—No rain. Dews scanty. Prices beginning to rise. Price of common rice 7½ seers per rupee at Rajmahal, and elsewhere 10 to 12 seers; maize 16 seers. Fodder and water sufficient.

Cuttack.—Rainfall nil. Weather seasonable. Harvesting of *guru sarad* going on. Transplantation of *dalia* in progress. Cattle-disease in a few places. Fodder sufficient. Common rice sells as follows :—

	Srs.	c.	
Cuttack	...	11 13	} per rupee.
Jajpur	...	14 7	
Kendrapara	...	14 7	
Banki	...	15 12	

Balasore.—No rain. Weather seasonable. Harvesting of *sarad* continues. *Rabi* crops being injured for want of rain. *Dalia* crop flourishing well. Sugarcane being pressed. Sporadic cases of cattle-pox occurring in some chaklas. Fodder and water sufficient. Coarse rice sells at 11 and 1½ seers per rupee at Balasore and Bhadrak respectively; in the interior the price of rice varies from 12 to 16 seers per rupee.

Angul.—No rain. Mustard, castor, *mug*, *kulthi*, and winter vegetables are on the ground. Sugarcane being crushed. Condition of cattle good. Coarse rice 18 seers per rupee in Angul and 20 seers in Khondmuls.

Puri.—No rain. Prospects of winter rice and *rabi* crops the same as reported before. Fodder sufficient. Price of common rice varies from 10½ to 15½ seers per rupee.

Hazaribagh. Rainfall nil. Prospects of sugarcane and poppy 10 to 12 annas. Harvesting of paddy finished; outturn 8 annas expected. Common rice selling from 6 to 9 seers per rupee.

Lohardaga.—Ploughing continues. Rice sells at head-quarters 9 to 9½ seers per rupee and in the interior from 9 to 12 seers. Fodder and water sufficient. No report of cattle-disease.

Palaman.—Rainfall nil. Weather warm for the season. Price of coarse rice very high, ranging from 8½ to 11½ seers per rupee in Mahuadanr only. Prices of gram, *marua*, and wheat also very high. Test-works shut up.

Manbhum.—Rainfall .03. Weather seasonable, but hot. The only crop on the ground is *rabi*. Prospects generally as before. Cattle-disease reported from thanas Bagmudi Raghunathpur, and Paru. Fodder and water sufficient at present. Common rice sells at :—

	Srs.	
Sadar	...	8 to 11
Gobindpur	...	8½
	...	10

Stock of food-grains sufficient at present.

Singhbhum.—Sugarcane and *rabi* not doing well. Price of rice 10 to 14 seers per rupee.

General Summary.—There was no rain during the week, with the exception of a few, slight showers in the Burdwan and Presidency Divisions. The harvesting of winter rice is still proceeding. In Bilhar (except in the Madhubani subdivision of Darbhanga) the *rabi* crops are generally doing well; in parts of North and East Bengal these crops are fair; elsewhere they are reported to be very poor and in need of rain. In Bihar and Hazaribagh the prospects of the poppy crop are favourable. Transplantation of spring rice is going on, but rain is required for it in some districts. Cattle-disease continues to be reported from Midnapore, Monghyr, Purnea, Cuttack, Balasore, and Manbhum. No important change in the price of common rice is reported except from Darbhanga and Purnea, where it fell from 8½ and 9 seers to 9½ and 10 seers respectively, and from Balasore, where it rose from 13 to 11 seers a rupee. The price of Indian-corn has risen in Champaran from 10½ to 10 seers per rupee, and in Saran from 10½ seers to 10 seers 3 chitaks. In the distressed districts the prices of the food-grains on which the relief wages are based are—Nadia (common rice) 10 seers, Khulna (common rice) 10 seers, Patna (common rice) 10½ seers, Shahabad (Indian-corn) 10 seers, Saran (Indian-corn) 10 seers 3 chitaks, Champaran (Indian-corn) 10 seers, Muzaffarpur (Indian-corn) 10½ seers, Darbhanga (common rice) 9½ seers. The numbers on relief works and in receipt of gratuitous relief on Saturday, the 9th January, were—

Table of Rainfall recorded at Stations

[illegible]

in Bengal in December 1896—concluded.

[illegible]

**SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS
TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS
TAKEN IN ASSAM, FOR THE MONTH OF DECEMBER 1896.**

The chief features of the weather in Bengal during the month of December were:—

1. The unsettled weather, which continued in the south of the Bay with but little interruption, never extended into Bengal or even into the north of the Bay. A storm of some severity developed suddenly in the south-east of the Bay in the early part of the month, and caused strong winds as far north as Diamond Island. As has been the case under similar conditions for some months, the storm was of much shorter duration than usual; and though the depression showed signs of moving into the north of the Bay, it filled up as quickly as it formed, leaving only squally weather over the south of the Bay.

The retreating monsoon current continued to blow strongly almost to the end of the month on the Madras Coast, but the area of rainfall was slowly contracting southwards, and towards the end of the month was confined to Ceylon and the extreme south of the Peninsula.

2. As no storms entered the north of the Bay, fine settled weather prevailed over the whole Province until the occurrence of the first disturbance of the kind usual in the cold-weather season, approaching the Province from the west.

The first shallow depression entered Bihar and Chota Nagpur on the 21st, and gave rise to a short period of cloudy unsettled weather over the greater part of the Province. The rainfall was fairly general in Bihar and Chota Nagpur on the 25th, but was in almost all cases very light, only seven rain-registering stations reporting more than a quarter of an inch.

A few days afterwards a second depression caused heavier and more general rain, most of which fell on the 31st. The influence of this second disturbance was less marked on the general weather in the south of the Province, as the sky was cloudy for a short time only, but it extended further eastward and caused light general rainfall in North Bengal.

3. Pressure was, on an average for the whole month, uniformly high by about .04 inch, and the prevailing wind directions were such as usually obtain in December, westerly in Bihar and Chota Nagpur, and north or north-east in Bengal proper.

For some considerable time temperature has been several degrees above the normal during the day and lower than usual at night. The average maximum and minimum values for December show the same peculiarity, but not so decidedly as in previous months. During the latter part of the month comparatively low temperature continued throughout the day.

At the beginning of the month weather was quiet in the south of the Bay, and rainfall had ceased on the Madras Coast. This was probably due to the slight pressure gradient caused by a shallow depression over Bengal and the north of the Bay. Defect in consequence of a brisk fall of pressure on the 1st was about a tenth of an inch over the whole Province, and readings in Bengal proper were less than those in the south of Madras. Temperature in Bengal at that time was much above the normal, especially in the west of the Province. Daily means were 8° above the normal in Orissa, Chota Nagpur, South Bihar, and the western half of South-West Bengal, while in the eastern half of the Province there was excess of from 2° to 4°. The rapid rise of pressure on the 2nd left the distribution almost normal, and as temperature fell several degrees, there was a large excess in Orissa only. Changes were of little importance till the 5th, when a further brisk rise of pressure led to a steepening of the gradient over the Bay and a renewal of north-east monsoon weather on the Madras Coast.

Pressure continued to rise on the 6th over both the Province and the Bay, but the change was greater in Bengal, and a considerable excess had accumulated. The rapid increase of wind velocity at Diamond Island and the rising sea showed that a disturbance had begun over the Bay. As a strong westerly wind was shortly afterwards reported from Colombo, the disturbance seemed to be caused by a wide-spread depression over the south of the Bay. Weather remained squally in the east of the Bay till the 9th, when the depression became more diffused owing to a fall of pressure, which went on slowly for several days. The squally weather spread south-westward, and was felt in Ceylon and Madras two or three days afterwards; but by that time the depression had altogether disappeared.

From the 12th any disturbance in the Bay was too far south to influence weather in Bengal, and the pressure oscillations usual in settled weather went on with no interruption. Temperature, however, which had been steadily above the normal in the west of the Province, began to fall, and comparatively cool weather became general over the whole Province about the middle of the month. The greatest defect was in Orissa and Chota Nagpur, and was at times as much as 3°. The cool wave spread eastward, and was most marked in East and North Bengal on the 21st, when defect varied from 4° to 7°.

On the 22nd the influence of the slight disturbance, which was advancing from the west, began to be felt in Bengal. It was shown more in the rising temperature and the shifting winds than in pressure changes, which were extremely small except on the 24th, when there was a fall of .05 inch. The large defect in temperature had disappeared by

the 24th, and there was a faint cyclonic circulation of winds, but the only sign of a low-pressure area was in readings being somewhat higher in the west and north-east of the Province than in the central districts. Cloudy weather was general on the 24th and 25th, and, as stated above, light rain fell in Bihar and Chota Nagpur on the latter date.

The disturbance had ceased on the 26th, pressure having risen moderately, and ordinary weather continued for two or three days. On the 28th pressure was again falling, especially in the northern districts, where the change was rapid, and winds were southerly in Chota Nagpur and, the west of Bihar. There was a good deal of cloud, but no further sign of unsettled weather till the 31st, when the irregular pressure changes caused a decided depression over Bihar. On that day there was a brisk rise in East Bengal and a slow to moderate rise in all other districts except Bihar, where there was a fall of .02 inch. Readings diminished from 30.12 inch in the south-east of the Province to 30.07 inch in North Bihar, and winds were east or south-east except in Lower Bengal, where they remained north. The depression had concentrated owing to these changes, and the rainfall was, in consequence, confined to the northern districts, and heavier than would have been the case but for the brisk increase of pressure in Lower Bengal. General rain fell in Bihar, North Bengal, and Chota Nagpur, the falls being more than half an inch in parts of Bihar, and between 1 and 2 inches at Pachumbha, Lohardaga, Onainpur, and Palamau.

Pressure changes have rarely been of much importance, the usual oscillations about the normal prevailing almost throughout the month. On one or two occasions there was excess of more than .1 inch; and as defect was always small, the effect of these comparatively high readings is shown in the means which are above the normal by .05 inch in North Bengal and about .03 inch in the other districts. The two shallow depressions which passed across the north of the Province at the end of the month were so slight that readings were nowhere below the normal.

Temperature.—Owing to the comparatively warm days in the early part of the month, the mean maximum temperature for the whole month is above the normal by rather variable amounts between a fraction of a degree in North Bengal and 3° in part of South-West Bengal and Chota Nagpur. Night temperature, on the other hand, was generally low, and the means are moderately in defect except in Orissa, Chota Nagpur, and the South of Bihar where there is a small excess. The mean monthly temperature is practically normal for the large divisions except in Orissa and Chota Nagpur, where there is excess of 1.8° and 2.3° respectively.

Rainfall.—In Orissa and Lower Bengal there has been no rain. In North Bengal there was general light rain on the 31st, and in Bihar and Chota Nagpur general but more variable falls were recorded on the 25th and 31st. The amounts reported from the various rainfall stations are given in the accompanying table, and need not be referred to more fully.

The average fall in Chota Nagpur was .45 inch, in Bihar .28, inch and in North Bengal less than .1 inch. As very little rain falls in any part of the Province in a normal year in December, the first two amounts are both above the normal—the former by a quarter of an inch and the latter by nearly a fifth.

The following table gives in a condensed form the summary of the rainfall information in Bengal for the whole year. It gives a comparison between the actual monthly and total rainfall of the year with the normal values in each of the six meteorological divisions of Bengal, the actual falls being expressed as percentages of the normal amounts:—

METEOROLOGICAL Divisions.	January	February	March	April	May	June	July	August	September	October	November	December	Actual rainfall of the year 1896 expressed as a percentage of the normal fall for the period.
South-West Bengal ...	81	18	18	36	97	128	95	71	66	1	4	7	81
North Bengal ...	8	5	2	68	142	49	106	39	109	26	50	70	78

METEOROLOGICAL OFFICE, BENGAL,
The 12th January 1897.

C. LITTLE,
Meteorological Reporter to the Govr. of Bengal.

Abstract of the results of Meteorological Observations taken at the Alipore Observatory in the month of December 1896.

	Inches.	Date.	Hour.
The mean pressure of the month	30·059		
The average pressure of December from 24 years' registers ...	30·027		
The highest pressure in the month	30·238	27th	10
The lowest pressure in the month	29·892	1st	16
The range of pressure	0·346		
The total number of hours of bright sunshine during the month	Hours. 250·2		
The maximum possible number of hours of sunshine ...	332·8		
The mean temperature of the month	65·4		
The average temperature of December from 24 years' registers	68·0		
The highest temperature in the month	83·7	1st	
The lowest temperature in the month	45·5	22nd	
The range of temperature during the month	38·2		
The mean daily range of temperature	23·3		
The greatest range of temperature in one day	29·1	22nd	
	Per cent.		
The mean humidity of the month	68		
The average humidity of December from 24 years' registers ...	71		
	Inches.		
The mean vapour tension of the month	0·417		
The average vapour tension of December from 9 years' registers	0·476		
The mean cloud proportion of the month	1·52		
The average cloud proportion of December from 19 years' registers	1·58		
	Ins.		
The total rainfall of the month	Nil		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground) .	Nil		
The average fall of December from 48 years' registers ...	0·23		
The greatest fall in 24 hours	Nil		
	Days.		
The number of rainy days in the month	Nil		
The average number of rainy days in December from 24 years' registers	1		
The mean maximum equilibrium temperature of solar radiation during the month	129·4		
The mean difference of sun and air temperatures	51·4		
The greatest sun temperature	137·7	5th	
The greatest excess of sun over air temperature	57·4	5th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	45·6		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	9·5		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	12·4	20th	
	Miles.		
The mean movement of the wind per day	56·1		
The greatest movement of the wind in one day	84·0	13th	
The greatest movement of the wind in one hour	10·0	1st, 2 to 3 and 5 to 4 p.m.	

The number of hours with winds from each of the 8 points—

N. 374, N.E. 24, E. 11, S.E. 1, S. 18, S.W. 20, W. 33, N.W. 161, Calm 102.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 2·3° lower; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

J. H. GILLILAND,

METEOROLOGICAL OFFICE, INDIA;
Calcutta, the 11th January 1897.

The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	72
The total fall of rain from 3rd to 9th January 1897	Inches.
The average fall of the corresponding period for 24 years, Surveyor-General's Office	Nil
The total fall from 1st to 9th January 1897	0.09
The average fall of the corresponding period for 24 years, Surveyor-General's Office	Nil
	0.09

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed, open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official Tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; d, drizzling rain; a dew.

Prices-current (retail) of Food-grains, Fire-wood and Salt in the Head-quarters Station Bazaars of the Districts of Bengal on the 15th January 1897	194		

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Indian Councils Acts, 1861 and 1892.

THE Council met at the Council Chamber on Saturday, the 2nd January, 1897.

Present:

The Hon'ble SIR ALEXANDER MACKENZIE, K.C.S.I., Lieutenant-Governor of Bengal, *presiding*.

The Hon'ble SIR CHARLES PAUL, K.C.I.E., *Advocate-General*.

The Hon'ble H. H. RISLEY, C.I.E.

The Hon'ble RAI DURGA GATI BANERJEA BAHADUR, C.I.E.

The Hon'ble NAWAB SYUD AMEER HOSSEIN, C.I.E.

The Hon'ble C. E. BUCKLAND, C.I.E.

The Hon'ble M. FINUCANE.

The Hon'ble C. W. BOLTON.

The Hon'ble W. H. GRIMLEY.

The Hon'ble J. G. H. GLASS, C.I.E.

The Hon'ble C. A. WILKINS.

The Hon'ble MAULVI MUHAMMAD YUSUF KHAN BAHADUR

The Hon'ble SURENDRANATH BANERJEE.

The Hon'ble A. M. ROSE.

The Hon'ble RAI ESUAN CHUNDR A MITTREA BAHADUR.

The Hon'ble GURU PROSHAD SEN.

The Hon'ble MAHARAJA BAHADUR SIR RAVANISHWAR PROSHAD SINGH, K.C.I.E., of Gidhaur.

The Hon'ble W. B. GLADSTONE.

The Hon'ble A. H. WALLIS.

NEW YEAR GREETING.

The Hon'ble THE PRESIDENT, on taking his seat, wished the Members of Council a very happy and prosperous New Year.

MR. LEA'S CASE.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

Whether the attention of the Government has been called to the case of one Mr. Lea, who was recently charged with having caused the death of a coolie, and, on being convicted of simple hurt, was fined fifty rupees? Is it true that in this case when the Head-Constable went to arrest Mr. Lea he was censured for so doing? Further, is it true that in the Lower Court, the prosecution was left to be conducted by an European Inspector of Police, and that notwithstanding the gravity of the case, the accused being charged with having caused the death of a coolie, the services of the Government Pleader or any other qualified lawyer were not engaged to conduct the prosecution? Whether it is not usual in a case of this nature to employ the Government Pleader or some duly qualified lawyer to conduct the prosecution? If so, will the Government be pleased to state why the practice was not followed in this case?

The Hon'ble MR. BOLTON replied :—

“A report has been received by the Government on the case referred to. In connection with the death of a gate-man on the East Indian Railway line, Mr. Lee, a Railway subordinate, was committed to the Sessions Court at Bhagalpur by the Subdivisional Officer of Pakour on a charge of having voluntarily caused grievous hurt under section 325, Indian Penal Code. He was tried before a Jury consisting of three European and two native gentlemen, the prosecution being conducted by the senior and the junior Government Pleader, and the defence by Counsel, and was found guilty, by the unanimous verdict of the Jury, of an offence under section 334, Indian Penal Code, that is, of voluntarily causing hurt on grave and sudden provocation, for which the maximum term of imprisonment is one month, and the maximum fine Rs. 500.

“No Head-Constable went to arrest Mr. Lee, but fault was found with a Head-Constable for having sent in a final report before the police investigation was completed.

“The European Inspector of Police in charge of the case assisted in the prosecution before the Magistrate in the usual way. It is not the practice in the Sonthal Parganas to employ the Government Pleader in the lower courts, and in the present instance the services of a lawyer were not necessary.

“It rests with the District Officers to consider whether the Government Pleader should be employed in any criminal case. He is not retained in cases of a simple nature.”

THE PREVAILING FAMINE.

The Hon'ble BABU GURU PROSHAD SEN asked—

I. Will the Government be pleased to state what is the amount of cash wage per day now paid to the famine stricken men in places where relief works have already commenced? At what price are rice and other food-grains selling in the local markets in those places?

II. Are there any other kind of works than digging earth in which any class of famine stricken men are being employed? Has the Government taken into consideration whether this is not possible, specially for the relief of such classes who cannot and will not dig earth?

III. Is any kind of gratuitous relief being given to people who cannot work in those places where relief works have been ordered to be opened?

IV. Why does Government look with disfavour on the system of relief adopted by some of the relief centres opened by private individuals, under which the poor people of the locality get for their money (only in small quantities for half or a quarter rupee at a time) a seer or two more in the relief depôts than they would get in the local markets? If any such relief depôts are found on enquiry to be working well, and under respectable volunteer agencies, will the Government be pleased to come in with grants-in-aid to extend the scope of their operation?

V. Has the Government information before it of the severe distress that is now being felt in parts of the Dacca, Backergunge and Krishnagar districts, in the Satkhira subdivision of the district of Khulna, as also in a great portion of the South Gangetic districts of Bihar? Will it please Government to make enquiries and to extend reliefs in those places?

The Hon'ble Mr. FINUCANE replied:—

Answer to Question No. I:—

“The principles on which wages are regulated are those laid down in sections 98 to 106 of the Famine Code. The amount of the wage has, so far as known to Government, been given in the reports published in the Gazette. It is not possible to give details of prices and wages on every relief work started throughout the province, but ample information on the subject has been given in the published reports.”

Answer to Question No. II:—

“Earthwork is the only kind of work on which famine labourers are now employed. Relief to persons of the respectable classes will be afforded by employing them as overseers of labour gangs and as muharrirs or clerks on the works. Relief to artisans may, when necessary, be afforded in the manner prescribed in sections 142, 143 and 144 of the Famine Code.”

Answer to Question No. III:—

“Gratuitous relief is being given as provided for in the Famine Code.”

Answer to Question No. IV:—

“Government does not view with disfavour the system of relief referred to in the question if given spontaneously by private persons, but does not view with favour the interference of Government officers in the system, as it tends to undersell private traders, and so to interfere with trade. Government does not propose to give grants-in-aid to the system.”

Answer to Question No. V:—

“Government has no information showing that there is any distress in Dacca or Backergunge. There is distress in Satkhira, and in parts of Nadia, and measures have been taken to meet it. There is not distress in a great portion of the South Gangetic districts of Bihar. In parts of the Bhabua subdivision there is some distress, and measures have been taken to relieve it.

“If the Hon'ble Member would read the papers published in the Gazette, and study the Famine Code, he would have all the information he can possibly require as to existing facts and the methods of meeting distress.”

ESTATE'S PARTITION BILL.

The Hon'ble Mr. Finucane moved that the Bill to amend the law relating to the Partition of Estates be referred to a Select Committee consisting

of the Hon'ble Rai Durga Gati Banerjee, Bahadur, the Hon'ble Mr. Bolton, the Hon'ble Mr. Grimley, the Hon'ble Mr. Wilkins, the Hon'ble Maulvi Muhammad Yusuf Khan Bahadur, the Hon'ble Babu Guru Proshad Sen, and the Mover. He said:—

“When moving that this Bill be read in Council, I endeavoured to explain its objects and reasons and the principles underlying it, and I hope I need not now repeat what I said on that occasion. It was then explained that the primary object of the Bill was to shorten, simplify, and cheapen the procedure for effecting partitions of estates. I conceive that there can be no difference of opinion as to desirability of attaining that object, and therefore that there can be no question as to the soundness of the cardinal principle of the Bill. At the present stage we are, under the Rules under which the proceedings of the Council are conducted, precluded from entering into a discussion of the details by which it is proposed to give effect to this principle. On some of those details there may be difference of opinion, and especially perhaps on the point whether the provisions of Chapter V, regarding the method of carrying out a survey, which is required under the present law, as well as under the Bill, for the purpose of ascertaining the assets, are the best that can be devised with a view to shorten, and cheapen, and simplify the procedure. Important criticisms have been received on that Chapter, and important changes and improvements will no doubt be made in it by the Select Committee, but this is not the occasion to discuss these changes, nor is it for me to anticipate what the judgment of the Select Committee may be. I may, however, say that Government will offer no objection to some important modifications in the Chapter as drafted.

“A secondary object of the Bill is, it will be remembered, to impose a higher limit than is now imposed on the partibility of revenue. When introducing the Bill, I stated that the limit of Rs. 100 would possibly be found to be too high. Since that time numerous and valuable opinions have been received on the Bill, and they have been circulated among Hon'ble Members. It will have been observed that the great preponderance of opinion of revenue officers is in favour of the view that a limit of Rs. 100 is not too high, but that the Hon'ble Judges of the High Court, while thinking that a higher limit than that now in force ought to be imposed, still think that the proposed limit of Rs. 100 is too high. The Bihar Planters' Association are of the same opinion.

“Some of the other public bodies and associations are opposed to the introduction of any limit other than that imposed by the law as it stands. These opinions are entitled to great weight, and, in deference to them, no objection will be made to a reduction of the limit proposed in the Bill. What the precise amount of that reduction should be is again a matter of detail on which it is for the Select Committee to suggest a conclusion and for the Council to settle at a subsequent stage of the proceedings.”

The Hon'ble BABU SURENDRANATH BANERJEE said:—“I quite accept the view which has been put forward by the hon'ble member in charge of the Bill that on a motion being made to refer a Bill to a Select Committee, we are entitled only to consider the questions of principle involved in the Bill and criticise matters of detail only so far as they involve considerations of principle. The hon'ble mover has referred to two matters which involve important questions of principle. One of these is the provision of the the Bill by which it is proposed to raise the qualification subject to which estates may claim partition from the present limit of Re. 1 to Rs. 100. If this part of the Bill is not modified, and considerably modified, the effect of the measure will be to preclude a large number of estates from availing themselves of the beneficent provisions of the Partition Law. In this connection I desire to call attention to the papers before the Council. It is remarkable that the Behar Planters' Association, which entirely accept the Bill in all its provisions, take exception to this part, and this part only, of the Bill. ‘The only section,’ writes the Secretary to the Behar Planters' Association, ‘to which I would draw attention is section 10A of Chapter II. This, I believe, would operate so as to

- prevent all partitions, except in isolated cases, and it might be advisable to lower the limit of Rs. 100.' I will not take up the time of the Council by referring to many of the opinions which have been received on this point, but there are two or three which are of great importance. We have a weighty expression of opinion from the Secretary to the Chittagong Landholders' Association, from which it appears that if this provision of the Bill is to be accepted, the Partition Act might as well not exist, so far as the Chittagong Division is concerned. In the second paragraph of his communication he says:—'In this district the revenue roll of the Collectorate consists mainly of numerous petty estates whose revenues do not exceed Rs. 10, not to speak of Rs. 100. The Bill, therefore, in restricting the partibility of estates to the amount of Rs. 100, has practically made the proposed Act a dead-letter in its application to this district.'

- "I come next to another important expression of opinion from the East Bengal Landholders' Association. In paragraph 8 the Secretary to that Association says:—'For these and other reasons it is clear that if the minimum limit of Government revenue in a separate estate is raised to over Rs. 100 (as proposed by section 10, partition of estates in many districts will be entirely put a stop to. This will be great hardship on the zamindars for no fault of their own.'
- Passing on from non-official to official opinion, we find a striking unanimity pointing to the same conclusion. The Director of Land Records and Agriculture (Mr. Lyall) says:—'Seeing that the main object of most proprietors in applying for partition now-a-days is not to obtain an adjustment of the revenue demand, but to obtain a separate share of their estate, it would perhaps be better to permit the partition of estates to an almost unlimited extent.' The Board of Revenue, the highest authority on such matters, is in favour of reducing the minimum. I am quite sure these expressions of opinion will be considered with the attention which they deserve, and I shall rejoice if the Select Committee see their way to revert to the existing law in this particular. For my own part I do not
- see any justification for the minimum limit that is now proposed. No doubt the law as it now stands is a source of considerable trouble and labour to executive officers, but that is nothing compared to the hardship to those who will be affected by the provisions of this Bill, and will be virtually denied the right of partition. Before I conclude, I wish to say one word with reference to the provision in the Bill regarding the necessity for a cadastral survey in certain cases—a matter which involves an important question of principle. Under this Bill, unless an estate can produce full and accurate measurement papers, it will not be in a position to claim partition, except after undergoing the harrassment of a cadastral survey. This will be a difficulty in the way of many estates, and I am glad that this matter also will engage the attention of the Select Committee. I congratulate the hon'ble member in charge of the Bill on the statement which he has been able to make, that the Government will be prepared to make considerable modifications in the provisions of the Bill by the light of the opinions which have been received, and I hope and trust that when this Bill emerges from the hands of the Select Committee, it will be so recast and modified as to commend itself to the approval of the Council and of the country at large."

- The Hon'ble RAI ESHAN CHUNDRA MITTRA BAHADUR said:—"The Bill before the Council is one of the most important Bills that have come before us during the present Session. It is a complex Bill, and contains many details. As far as this Bill professes to cheapen, shorten and simplify the procedure, I hail it with pleasure, but there are certain principles involved in the Bill which will require consideration at the hands of the Council; as, for instance, the provision contained in section 10, which raises a very important question. This section 10 limits the benefits of partition to estates, the annual revenue of which would not, after partition, be less than Rs. 100. It is a restriction, I submit, which is both against the letter and the principle of the proclamation of 1793, the charter of the rights of the proprietors of estates. No doubt that Regulation was passed when land was not valuable, when the population was sparse; and the Legislature of 1807 thought of placing a restriction on the partition of estates, the revenue of which was less than Rs. 500; but three years after this the Legislature in its wisdom thought fit to remove that restriction, and in the preamble of Regulation V of 1810 it is stated that the apprehension, which

was entertained at the time, did not exist, and that there was absolutely no necessity for that limitation. After that limitation was removed, there was a subsequent suggestion for legislation, allowing the proprietors a right of redemption of the revenue of estates which, after partition, would bear a revenue less than Rs 20. That was previous to the passing of the present law of partition, but the Government of India did not approve of that suggestion, and the proposal was not entertained. We have, lastly, the existing Act, which rather confers the privilege to zamindars of partitioning estates, if the revenue of the separate estate of the proprietor exceeds Re. 1, and I submit that the law as it was promulgated in the Regulations of the permanent settlement, stands virtually the same at the present day. There was no doubt that in 1807 it was thought necessary to enact a new law laying down a certain restriction, but that law was repealed. I take it that all statutory enactments proceed from the will of the Legislature, and that when enactments are repealed, they are to be taken as if they had never existed. They may have a certain historical value, but the Regulation of 1807 having been repealed, the law now is the same as it stood in 1793, subject to this condition—which I take to be rather a privilege—that every proprietor of an estate, paying less than Re. 1 revenue to Government, has the right to redeem. Therefore the question arises whether there is any necessity now of introducing the proposed restriction in section 10 after a century.

“I would invite the attention of Hon’ble Members to the fact that land has immensely improved in value since 1793, and that the population is increasing by rapid strides. With the influx of British Capital and the security of property, the value of land has greatly increased, and I submit that there is no necessity of the proposed restriction being laid down. It is said that the realisation of the Government revenue is in danger, but has it been in danger during all these years? No doubt, in certain districts, the number of partition cases is greater than in others. In Lower Bengal there have been very few, but in the Darbhanga and adjacent districts the number has no doubt been great, and this was due to the prevalence of the *bhaoli* system; but I am not aware of any statement which goes to show that the Government has suffered any appreciable loss of revenue. The Government has several remedies for the realisation of its revenue, the chief of which is the Sunset Law, and even if the revenue be not realised under that law, the Government can have recourse to the certificate procedure, and realise its revenue from any other property belonging to the defaulter. Therefore the question is whether there is any necessity for this Bill? If there were any reasonable chance of the Government revenue being in danger, I would be the last person to oppose a measure of this kind being introduced, but there must be something tangible to go upon. It has been said that if this limitation is imposed, there is section 93 of the Bengal Tenancy Act to fall back upon, under which the opening of separate accounts can always be effected, but if the provision in this Bill be passed, I may be permitted to say that section 93 of the Tenancy Act will afford no protection whatever to co-sharers in an estate; for that section contemplates a state of things which does not ordinarily occur. That section provides that when any dispute exists between co-owners of estates, and other contingencies mentioned in the section occur, recourse may be had to the section.

“It contemplates the existence of disputes between the co-owners of estates before the section will apply. There must be apprehension of a riot; there must be some public inconvenience before section 93 will give any assistance to co-sharers for the appointment of a common manager. That provision of the Tenancy Act is no new law. It is contained in the 22nd article of the Proclamation of 1793, whereby the owners of an estate are authorized to appoint a joint manager. I therefore submit, for the consideration of Hon’ble Members, whether section 93 of the Tenancy Act will afford any assistance to co-sharers if the provision of this Bill, to which I am referring, is passed.

“Then, in the opening of separate accounts the law does not contemplate the demarcation of lands; all that is recorded is the amount of each person’s share, as, for instance, that A has a 4-anna share, B 6-anna, and so on; but their joint liability is in no way affected, and the proprietors or tenants get no advantage from that section. Therefore it is a question for the consideration of the Council whether the opening of separate accounts by the co-sharers of an estate will be of any advantage to themselves or to their tenants. Then it has been said that peasant proprietors are not the

same as peasants and pauper landholders. Who are these pauper landholders? Is the Government a pauper landholder? For the Government holds shares in estates, and many big rajahs and zamindars also hold shares in estates, and they are not pauper landholders. I submit that if the time comes, when it may be necessary for the protection of the Government revenue to prevent the growth of plurality of estates, it will come to a state of things similar to the case of raiyatwari settlements. Consider the fact that lands are every day rising in value, and that the Sunset Law exists; so that there can be no fear of the Government revenue being endangered in any way. But if the time comes when such a law will be necessary, the state of things existing under raiyatwari settlements will come into operation, and the collection expenses will increase to a certain extent. But so long as the Sunset Law is in force there is no room for any apprehension of expenses of collection being increased.

"Then it has been said that if no limitation is put to the partition of estates, the administration charges will be increased; but it should be remembered that in different parts of this Province we have a system by which the Government revenue is remitted by chalans, and if the number of such chalans is somewhat increased, the expense to Government will only increase to the extent of appointing a few additional clerks; but is that any reason why a solemn compact, entered into a century ago, should be interfered with? I therefore submit that the collective wisdom of the Council will not consider it advisable to place any restriction upon the partition of estates. The real question seems to me to be whether there is any necessity for this provision of the law. Of course, if there is such a necessity, I would be the last person to advocate that there should be no such restriction; but if there is no necessity, if there is no danger to the public revenue at present, then the law cannot be necessary now. It appears to me that the necessity which is supposed to exist is merely theoretical.

"The advantages of partition to proprietors and tenants are manifold. At the present moment the country is suffering from a famine of water. Suppose a tenant or a co-proprietor wants to dig a tank; if the co-sharers will not give their consent, nothing can be done; but if the plot of land on which he wishes to dig a tank is his own, he can do as he likes. I therefore submit that the division of estates will not only improve the value of land, but will conduce to the advantage and convenience of the proprietors and the tenants. Suppose in an estate there are five co-sharers; the raiyat or tenant will have to go to the five different gomasthas of those co-sharers; he will have to keep separate accounts with each of them. But if a partition has been effected, the raiyat will know who his landlord is, and he will only have to keep one account. I think I am not wrong if I say that most agrarian disturbances arise from disputes between co-proprietors of estates; but if the partition of estates is allowed, these disturbances will cease, at least to a certain extent, so that the advantages of partition are manifold, and it is a question for consideration whether the Legislature should place any restrictions upon the right of partition.

"Then, again, I submit that proprietors and tenants will not be benefited by the provisions of Chapter V of this Bill, and I venture to say that this question of the record-of-rights is not one which is at all beneficial to raiyats. I am speaking from the raiyat's point of view. As pointed out by Mr. Hare in one of his letters, the raiyat has to go to the several shareholders to adjust his rent, and he has to spend some time in haggling, and has to go from one shareholder to another; therefore this particular provision of the Bill will not benefit tenants. Why are tenants therefore to be brought in? The interested parties are the Government and the co-sharers, who ask for partition among themselves. But why should the tenants be brought in? It is said that their rights in the land ought to be recorded; one tenant says, this is my land, a second says, I got it by will, a third, I got it by adverse possession. Are such questions to be decided finally by the Deputy Collector? Section 119 of the Bill provides that the judgment of the Collector is to have the full force of *res judicata*, but the principle of *res judicata* cannot affect a tenant. It is said that the raiyats are to be benefited by this record-of-rights; why then should they not bear a part of the expense; but why should these innocent persons be dragged into the quarrels of their landlords? It may be said that their lands are to be measured, and that it ought to be done in their presence; but that will

not prevent other people from claiming those lands, and the decision of the Collector cannot therefore operate as *res judicata*. That is a question of principle which ought to be settled by the Council.

"As regards the question of survey, it is one for the consideration of the Select Committee, but it cannot be denied that by a survey and record-of-rights the expenses will increase immensely; the proceedings will not be cheapened, and the delays will be greater than they are at present in ordinary partition cases. I therefore submit that Chapter V of the Bill ought to be considered very carefully for the procedure as to survey and record-of-right prescribed in that Chapter is too cumbersome to be fit for a special enactment. As to the question of restriction, one of the Collectors has given it as his opinion that even if the minimum revenue was fixed at Rs. 5, a vast number of estates will be disqualified, and another gentleman says that two-thirds of the estates will not come under partition. These are questions for the Select Committee to consider. But I submit that in a Bill like this, the procedure should be as simple as it possibly could be, and the expenses of partition as little as possible, and the proceedings should be completed with the utmost despatch."

THE Hon'ble BARU GURU PROSHAD SEN said:—"So far as the Bill seeks to simplify, cheapen and shorten the procedure for effecting partitions of estates in Bengal, it has my entire sympathy. In that matter in some respects the Bill does not go far enough, but that is a question of details, which will come out all right after the provisions of the Bill have received the due consideration of the Select Committee. On two points only I like to make some observations at the present moment—

1st.—The restrictions to the right of partition of estates (section 10 of the Bill).

2nd.—The introduction of what is called the procedure of Cadastral Survey in the butwarahs.

"I may premise by stating that many of those things which I intended to say have been ably said by the Hon'ble Eshan Chundra Mitta and the Hon'ble Surendranath Banerjee, and I shall not repeat those objections which they have already urged.

"On the first point it was said by the Hon'ble Mover of the Bill that the principle of restricting the right of partition had already been recognized so long ago as 1807, and again by Act VIII (B. C.) of 1876.

"The Regulation VI of 1807, which restricted the partition of estates, was very short-lived. In the early days of Regulations, on the recommendation of the Board of Revenue, the Regulation was enacted in 1807, and repealed only three years after, on the recommendation of the same Board on its gathering experience.

"The preamble of Regulation VI of 1807 states: 'Whereas under the Provisions contained in Regulations 1 and 25 of 1793, persons holding shares of estates paying revenue to Government are entitled to a separation of such shares, and on the completion of the butwarah by the officers of Government, and on the confirmation of the Governor-General in Council, to hold the same as distinct mahals, subject to the just proportion of the public assessment: and whereas considerable loss and inconvenience have been experienced in the collection of the public revenue from the too minute subdivisions of landed property, it was enacted, &c.'

"Two points are clear from this preamble, that the proprietors have under the Permanent Settlement a right to get the estates partitioned without any restrictions whatever, and, second, that it was only on the ground of inconvenience to the collection of revenue the restrictions were imposed and all other sides of the question ignored.

"In those halcyon days there were no long speeches and discussions, and the people affected could not be aware of the changes in our laws till the law was actually put into force.

"The preamble of Regulation 5 of 1810 states:—"The restrictions on the partition of small estates, being found productive of considerable injury to numbers of sharers in small estates, inducing a sacrifice of private rights which the degree of public inconvenience arising from the minute division of landed property did not appear to justify or require, it is enacted, &c.'"

"With this short interval, the right of complete partition of revenue-paying estates has remained unaffected till the year 1876.

"It is true that the thin end of the wedge was then sought to be introduced, but I cannot agree in thinking with the hon'ble mover of the Bill that the principle of restriction was accepted, but from the absence of all discussion on the point, it leads me to the inference that the matter was overlooked because of the right of redemption conferred. Hon'ble Krisnadas Paul said 'A simplification of the law of partition would be in unison with the improved ideas of the people regarding the possession and management of property. Many were the social advantages of the joint family system in this country, but the modern idea of individualism fostered by Western education and examples was sapping the foundation of that patriarchal state of society. There was now a spirit abroad that each should take care of himself; that each should employ his own talents, energies, and resources to the best advantages; that each should enjoy the fruits of his own capital and labour. We do not feel ourselves called upon to discuss here the moral aspects of the question—Whether the changed family would make man more selfish, and tend to destroy the many amiable virtues which the joint family system undoubtedly engendered and fostered. But it could not be denied that society would greatly gain by the dissemination of a spirit of self-reliance and enterprise, which was a natural sequence of the idea of individualism struggling for mastery over the native mind. The spread of this idea was a broad social fact which no one can gainsay and no one can resist, and it was therefore meet that the Legislature should second it by simplifying the law of partition.'

"These are words which apply strongly against the restriction now sought to be imposed, for if Hon'ble Krisnadas's authority can be cited in this connection, it is not as that of an authority favouring restrictions on divisions, but that of one who supported unlimited divisions.

"Again, there was no question of principle of limit of the right of partition involved in the Bill of 1875-76, as that Bill provided that "no application for separation should be entertained, the result of which would be to form one or more estates, each liable for an annual amount of land revenue less than 20 rupees, unless the proprietor of such small estates agreed to redeem his revenue." It was not therefore limiting the right, but the question of bringing it out of the partition in a better form of a revenue-free estate, by paying a certain sum of money to Government—I believe only 25 years' purchase. Who amongst the proprietors would not prize such a right, and thus be for ever free out of the trepidation of heart engendered by our sunset laws?

"As was well pointed out by the Hon'ble Eshan Chundra so far it was a privilege that was sought to be conferred, and not a deterioration of the right. The Government of India, however, vetoed the Bill on the ground of this redemption clause, and suggested that they would have no objection to the redemption clause if Rs. 20 were reduced to one rupee, and a Bill was brought forward in the form in which it now stands in Act VIII (B.C.) of 1876, and it was passed without opposition. It is not therefore right to say that the principle of limit had been accepted in 1876.

"This limit, without conferring the corresponding right of redeeming the Government revenue, was sought to be imposed in 1884. The limit proposed was to prevent creation of estates paying Government revenue less than Rs. 20.

"The late Hon'ble Hurbans Sahai, whose experience of mufassal, especially of Bihar districts, was great, and the Hon'ble Chandra Madhab Ghosh, who now adorns the High Court Bench, opposed the Bill. Amongst other grounds, the Hon'ble Hurbans Sahai opposed it on the ground that it did take away the right of the landlords under the Permanent Settlement to have the Government revenue partitioned. Said he:—

'Every joint proprietor had an inherent right to have the Government revenue partitioned. At present, a shareholder, however small his share might be, had every right to go to the Collector and ask for a partition of the land and the apportionment of the revenue payable by him, in order that he might not be any longer held responsible for the default of his co-sharers. This was a right which he justly had, and on what ground was he to be deprived of that right? It was not an imaginary right, but a substantial one.'

"These words prevailed. In withdrawing the Bill, the Hon'ble Mr. Dampier, whose knowledge of our revenue laws and administration of our revenues was always held to be of the best, said:—

'While the Bill for the amendment of estates Partition Act has been before this Council, a feeling has been expressed against any limitation which shall have the effect of restricting the right which proprietors of small interests in estates now have of obtaining a perfect partition of their interests, both as to land and as to the general liability for the payment of land revenue. That feeling has found expression not only in this Council, but also outside in the exponents of opinions of some classes of the public, and I found in personal discussions with some of the officers from the districts in which partitions are more common that they also share in the feeling. I submitted the objections to your Honour, and your Honour thought that the relief sought to be given would be met by the provisions of Bengal Tenancy Act.

'It is a pleasant thing to sail with the fair wind of popular opinion instead of being obliged to beat up against it.'

"It will gladden the proprietary body in the country if they were to receive the same announcement from the hon'ble mover of the Bill. This announcement was made in a full Council, when our highest authority in question of laws, our learned Advocate-General, was present.

"It is admitted to some extent by the hon'ble mover of the Bill in the Objects and Reasons that such a right exists. He says: 'It is true that the Permanent Settlement Regulation I of 1793, which declared the right of property in the soil to be vested in the zamindars, and fixed their revenue in perpetuity, also declared that they were to have the right to dispose of the whole or any portion of these estates in any way they pleased,' and get an apportionment of Government. In this summing up he might have added that these declarations were made subject to some reservations, and the right of partition and apportionment of Government revenue, which was expressly given under the said Regulation, was not subject to any limitation whatever.

"But he seems to think that this limit can be imposed, because (1) every bigha of land is hypothecated for the revenue; (2) the welfare and protection of the raiyats as well as the proprietors require it.

"The reply is that every bigha in an estate will remain hypothecated for the payment of Government revenue after the new estates, however small, have been formed.

"Secondly, if it be meant as an argument against the division of bighas into cottahs, why that has to be done in almost all partitions, small or great, and the argument would be applicable to all partitions; and again, when it was declared in some Regulations that every bigha of land was hypothecated for the protection of Government revenue, it meant 'every bit of land' in an estate, and we are not yet come to that pass when cottahs would form an estate; if so, section 10 of the present Act would prevent it. As to the next argument—welfare of raiyats and proprietors—the hon'ble mover of the Bill states the present rule of division without any limit 'is bad for proprietors, because it tends to foster the creation and growth of an infinite number of petty pauper landlords, who not being themselves able to cultivate the lands of their microscopically small estates (since there are tenants already on the land whom they cannot legally eject) are driven to screw up rents, and quarrel with their tenants and landlord neighbours, and thus bring discredit on their class.' My hon'ble friend forgets that under the operation of both the Hindu and Muhammadan laws an infinite number of petty pauper landlords are always being created, and the same state of things which he so graphically describes will follow the partition by the Civil Courts for which he provides; but unlike other microscopic beings of which we are now in daily dread, petty and pauper proprietorships, when they grow microscopic, under an economic law governing society, have a natural tendency to be extinct.

"Then as to the further result, it is a popular belief—and the belief is considered sound—that the man with the long purse and a good deal of influence can with impunity screw up rents, terrorize over raiyats and neighbours, and not the man who is a pauper. The fault therefore is not in unlimited partitions and creation of petty pauper proprietorships, but, with if the facts in the premises have not been readily assumed, in the lax administration of our laws.

"The further argument why unlimited partition is said to be bad is that 'it involves waste of time and labour from the proprietor's point of view, as the separate management of several petty estates must necessarily cause more trouble and expense than the joint management of petty estates.' The reply is to be found in the Hon'ble Krishnadas' speech, quoted above, on the subject of Individualism *versus* Communism.

"The Hon'ble mover's argument ought to lead us to Communism not only here but in many other matters; but in this matter, the saving is in the creation of petty estates, where the pauper landlord shall look to his own, without his paying for hired labour. I may also parenthetically state that even the Hindu lawyers, while they provided for joint estates, provided also for partitions at the will of a single proprietor, however infinitesimal his share might be, and in Mitakshara countries even the sons can enforce a partition against the father. So far, therefore, in the proprietors' point of view, it is the provision of the Bill, and not the law which it seeks to abrogate, which is clearly bad; at any rate it is not needed for their protection and welfare.

"As for the raiyats, the existing law is held to be bad, because (1) it leads to rack-rent; (2) it compels the raiyat to pay rent at different places, to keep several sets of accounts, and to deal with different landlords; to answer to separate rent suits, and to get his crops distrained by several sets of landlords.

"As to the argument of bringing in rack-rent, I have already said what I had to say on the point. As to the second argument, I have to observe that the separation of estates does not necessarily bring in the separation of the raiyat's holding, if he has one holding, which has been allotted to different separated estates; and there are separated collections of rents even in joint estates established with the consent of the raiyats, and then the raiyats have to pay separately, keep separate accounts, and to be sued separately. Ordinarily the raiyati holdings are liable to be split by the operation of Hindu and Muhammadan laws as revenue-paying estates, as also by transfers, and it is perhaps no disadvantage to them to have their holdings separated, and, after all, the result will be the same after a Civil Court partition.

"Lastly, it is said these petty partitions impose on administration an amount of labour in effecting them and subsequent expense altogether incommensurate with any advantage accruing from them. Now I don't see how the administration shall be relieved of this labour. What is proposed is simply to transfer the Collector's duty to the Civil Courts. The amount of partition work to be done will remain the same: the cost will remain the same. In case of transfer to the Civil Court, the Court fees shall have to be paid in addition.

"Whether the costs incurred are commensurate with the advantages gained is a matter for the parties to consider. Will there be any saving of labour in the Collector's office after the limit has been fixed? Parties even after that will be entitled to have a separation of accounts, and every one who knows the details of our Tausi Department, with their zamindari accounts and so forth, cannot but be aware of the fact that separated accounts give the Collector's amlas greater work and greater opportunity of dishonest practice than the accounts of complete separated shares, and the Collector has to look to many more things in cases of sales for default of these separated accounts, than in the sales of entire estates; and the sales in case of separated accounts are oftener set aside for irregularities than sales in case of entire estates. In cases of separate accounts, sold as they are, subject to all incumbrances, the incumbrances not being notified, no one cares to buy shares at their proper value, and there is a loss to the proprietors, if not ultimately to Government, whereas if the same share was an entire estate, an adequate value is always realised. But I hardly think this an objection. Parties pay for the labour of administration, and if they choose to pay, there can be no reason why the establishment should not be raised to the adequate strength to meet the proper requirements of the case.

"Then it is said that it brings on a greater number of boundary disputes, a great number ending in riots, more criminal cases, more civil suits, &c., &c., &c. But the creation of small properties cannot be absolutely prevented, and nay it is proposed to create them, therefore the apprehension of these, if well-founded, shall remain all the same; but it can be mathematically proved that the general body of tax-payers gain by multiplicity of civil suits, to which all

these disputes culminate at the end, and therefore there need be no apprehension on behalf of the general body of tax-payers.

"Turning to the statistics, we find that if this provision of the Bill be enacted, about 80 to 90 per cent. of the estates will remain as they are, and their proprietors shall be deprived of the right of partition: and of the rest, supposing even a fractional share-holder of an infinitesimal share of an estate paying, say Rs. 5,000 as Government revenue or more, was to be a separate applicant for partition of a share paying less than Rs. 100 in the course of batwara, the others paying Rs. 1,000 or more as Government revenue would not be entitled to claim a partition and the estate will remain as it is. This was a matter very fully brought to the notice of the Council, by the Hon'ble Mr. Ghosh, on the last occasion when the matter was brought before the Council in 1884.

"A distinguished zamindar, whose opinion deserves great weight, thus sums up the objections against this provision of the Bill. He states:—

'This would be a frightfully retrograde measure.

- (a) It goes against the grain of the policy which has been persistently followed by Government in this respect since 1793. In 1884 the Bengal Council wanted to prevent all partition which would reduce the revenue of a "separate estate" to less than Rs. 20, but the Bill was dropped by reason of the opposition it elicited.
- (b) It ignores the well-established principle that "in all cases of joint-ownership each party has a right to demand and enforce partition: in other words, a right to be placed in a position to enjoy his own right separately, and without interruption of interference by the other." 12 W. R. 160.
- (c) The Cess Act, 1840, the Public Demands Recovery Act, 1880, the Drainage Act, 1880, the Irrigation Act, 1876, and the Embankment Act, 1882, have saddled joint owners with liabilities which are widely felt to be extremely hard, unjust and harassing. Their only relief lies in partition. As some measure of compensation to joint owners, facilities should be given them for getting their estates partitioned, instead of throwing additional obstacles in their way.
- (d) It would increase the hardship and stringency of the Revenue Sale Laws, already very stringent.
- (e) The present limit of division of the land-revenue has not either reduced the security for the revenue, or increased the difficulties of collecting the revenue.
- (f) Owing to various causes, joint-ownership exists in most objectionable forms in these provinces. A co-sharer has, in some instances, an undivided share in all the villages comprising an estate, in some a share in only a number of villages, and in others a share in some villages and specific lands in those or in other villages. The Partition Law is the only measure which should remove this state of things by allotting to a share-holder a number of entire villages or specific tract of land in a village.
- (g) In spite of the low limit at present allowed, the number of estates has not enormously increased by partition. In Sylhet, Chittagong, and several districts in Orissa, the number of small estates is inconveniently large, but it is not owing to the operation of the Partition Laws.'

"I submit that Government revenue is not always a criterion of the value of estates, and if there is to be any limit, the limit ought to be the measure of acres it contains.

"The proviso in section 10 is liable to the objection that section 295 of the Civil Procedure Code prohibits the civil courts from making partition of estates paying revenue to Government, except through the Collector. The last case reported under section 295, the Council will find reported in the August number of the Indian Law Reports, Calcutta Series, for the present year. In 1884, the Hon'ble Mr. Dampier proposed to ask the Supreme Council to repeal this section. No such proposal has been brought forward this time; and it is only laid down that, notwithstanding the provisions of sections 205 and 315, the Civil Courts shall complete the partition; but I ask is this Council competent to set at naught a provision of a law which has been enacted by the Supreme Legislative Council; and, if so, will the number of Munsifs be raised and the proper agency provided? We ought to be as much tender to our judges and munsiffs as to our revenue collectors and Deputy Collectors.

"The last point, on which I beg leave to say a few words at this moment, is the introduction of cadastral survey in the butwaras. The arguments against it have been very ably and clearly urged by the Hon'ble Eshan Chandra Mittra.

- The primary object of the Bill, I understand to be to save delays in these butwaras by simplifying the procedure. The apportionment of Government revenue, the primary object of a completed butwara, is a matter only between Government and the proprietors. The raiyats are no way interested. The determination of assets is merely a secondary matter, only necessary to arrive at a correct apportionment. This was the law hitherto; to bring in the raiyats at a butwara will complicate the procedure, and, I believe, will be very prejudicial to the interests of the raiyatwari body. They shall in fact be forced to join in a proceeding in which they are not at all interested, and by which these rights are not touched. It will waste their time and substance and lead to their ruin.

- “The introduction of the Cadastral Survey, instead of expediting, will merely cause delay; for the raibundi will not be settled at all till all the raiyats or their landlords have fought out the question of their rights up to the High Court, in cases in which they think that the entry in the record of rights have not been properly made, and, what is more, those of the landlords who are not for partition, and in every case there is such a one to be found, will fight out the battle in the names of some tenants or others to the High Court, either to delay proceedings or to coerce his co-sharers to his terms. This is an evil which appears to have been overlooked.

- “I hope the point of limit will be left open till the Bill has been considered by the Select Committee in all its details.”

The Hon'ble Mr. FINUCANE said :—“ Before replying to the objections taken against the Bill, I desire to acknowledge the spirit of reason and moderation displayed by the Hon'ble Members who have spoken in this debate. Anticipating that the imposition of any limit on partitions would be objected to on the score of its being a violation of the terms of the Permanent Settlement, I have myself carefully looked into the authorities on the subject, and consulted the Hon'ble the Advocate-General, whose opinion will, I hope, be accepted by Hon'ble Members as one which, if not conclusive in a matter of this kind, is at least entitled to the greatest respect. Sir Charles Paul has authorised me to say that, in his opinion, the imposition of a limit would not involve any infringement of the terms of the Permanent Settlement. Then we have the opinion of the Hon'ble Judges of the High Court, who, it will be admitted, are always anxious to support all classes of the community in asserting and maintaining their civil rights.

- “The High Court have not said a word as to the imposition of a limit being an infringement of the Permanent Settlement, but, on the contrary, say that it is desirable to impose a limit, though they think that of Rs. 100 too high.

- “The Hon'ble Members, who oppose the imposition of any limit, rely on Article VIII, section 9, Article IX, section 10, of Regulation I of 1793. Now I would ask the attention of Hon'ble Members to the wording of these sections. Section 9, Article VIII, says in order that no doubt may be entertained whether proprietors are entitled, under the existing regulations, to dispose of their estates without the previous sanction of Government the Governor-General notifies to the zamindars, independent talukdars and other actual proprietors of the land that they are privileged to transfer to whomsoever they may think proper, by sale, gift or otherwise, their proprietary rights in the whole or any portion of their respective estates without applying to Government for its sanction to the transfer. All such transfers were to be held to be valid, provided they were conformable to Hindu or Muhammadan law, according to the religious persuasion of the parties, and that they were not repugnant to any Regulations at the time in force passed by the British Administration, or that they might afterwards enact. The next section 10, Article IX, says that it is essential that a Notification shall be made of the principles on which the fixed assessment charged upon any such estates will be apportioned in the event of the whole of it being transferred by public or private sale, or otherwise, in two or more lots, or of a portion of it being transferred in one or two or more lots, or of its being joint-property, and of a division of it being made among the proprietors. It will be observed, the section goes on to say, that as Government might sustain a considerable loss of revenue by disproportionate allotments of the

apportionment of it if left to the proprietors, the latter were *required* to notify to the Collector all such transfers by sale, gift or otherwise, or divisions made among the proprietors in order that the fixed *jama* assessed on the whole might be apportioned or the several parts of it, and that the names of the proprietors of each share might be entered on the public registers, and that separate engagements might be taken from them. If the parties to such transfers or divisions failed to notify them to the Collector, the whole of the original estate was to be held liable for the discharge of the whole revenue as if no such transfers or divisions had taken place.

"Now the points to which I would invite attention in these articles are these:—

"*1st.*—That the right conferred by these sections was the right to transfer the whole or any portion of the estate. That right admittedly is not touched by this Bill.

"*2nd.*—That as a condition precedent to the full exercise of that right, Government imposed on the proprietors the obligation to notify transfers and divisions when made by the proprietors themselves, and that obligation was, in the words of the section itself, imposed in order to guard Government against sustaining a loss of revenue. How then can it be said that the imposition of an obligation of this kind by Government on the zamindars, for the purpose of securing its own revenue, is tantamount to the conferring of a right on the zamindars to notify such transfers and divisions, or of a right on such notification being made to obtain a partition of the revenue, whether Government thinks the partition necessary in order to guard itself against loss or not? If Government no longer thinks it necessary to insist on the obligation to report such transfers and divisions, and no longer thinks the apportionment of the revenue necessary or even desirable, surely it is at liberty to withdraw the obligation and decline to make the partition of revenue which it formerly thought, but no longer thinks, necessary, in order to guard itself against loss, without being open to the charge of infringing on any of the rights conferred by the Permanent Settlement. That the partition of revenue was not a right conferred, but an obligation imposed, is further made clear by section 13. Regulation I of 1801, which enacted that if transfers were made without being reported and without being separately assessed, they were, as far as the rights of Government were concerned, to be considered altogether invalid. The preamble to the Regulation VI of 1807 is quoted by my hon'ble friend Babu Gurn Proshad Sen, as proving that co-sharers are entitled to a partition of revenue, but all that preamble says they are entitled to is a separation of their shares, which right is not affected by this Bill, that preamble specifically says that they are entitled to hold the separate shares as separate mahals only after a butwarrah or partition of revenue had been made by officers of Government, and as the Regulation itself imposed a limit on such butwarrahs, the preamble would be self contradictory if it meant that proprietors were *entitled* to partitions of revenue in every case and then proceeded to take away their rights in this respect.

"*3rd.*—The third point which I would submit for consideration in connection with the section of Regulation I of 1793, relied upon by the Hon'ble Members who have spoken on this subject, is this: admitting, for the sake of argument (and I only admit it for the sake of argument), that Article IX of the Permanent Settlement Regulation did give the proprietors the right to claim a partition of revenue in the cases mentioned in that Article, these partitions can only be claimed in two classes of cases, namely:—

- (1) Where the whole or only portion of the estate has been transferred by sale, gift or otherwise; and
- (2) Where all the proprietors have made a partition among themselves.

"Legislation subsequent to the Permanent Settlement permitted, and the present Bill permits, of partition in the far larger and more important class of cases where there has been no sale and no division among the proprietors themselves, but where any one of the co-sharers, for any reason whatever, chooses to apply for partition.

"If hon'ble gentlemen, who oppose the imposition of any limit, take their stand on the Permanent Settlement and on their own interpretation of it, then

it may be asked, are they prepared to go back to and abide by the provisions of that Settlement on which they rely? If they are, then the effect would be to put far more severe restrictions on partitions than are imposed by anything we contemplate under this Bill.

"But whatever interpretation may be put on section 10 of Regulation I of 1793, it cannot be denied that, as a fact, Government did impose a limit, and a very large limit too, on partitions by Regulation VI of 1807, which enacted that no partition was to be allowed which would have the effect of creating an estate with a revenue of less than Rs. 500.

"Nobody thought at that time of questioning the right of Government to impose such a limit. That Regulation of 1807 did not repeal sections 9 and 10 of Regulation I of 1793, for the simple reason that it did not affect the rights of the zamindars, but only their obligations to notify transfers by sale and divisions made among themselves, and to obtain a partition of them, in order to render the transfer valid as regards Government. It had the practical effect of making such notifications useless in cases where the *sadar jama* of the part of property transferred, or of any share of the estate divided, was less than Rs. 500. If Regulation VI of 1807, by imposing a limit on partitions, had been thought to be an infringement of, or to be inconsistent with, section 10 of the Permanent Settlement Regulation, obviously that section would have been then repealed; but it was not repealed, because it was held then, as we hold now, that the imposition of a limit involves no infringement on, or violation of, the terms of that Settlement.

"I have dwelt on this somewhat academic discussion of this part of the case at perhaps unnecessary length, because we desire to avoid even the semblance of anything which can, with any show of reason, be construed into a violation of that compact. If I have satisfied Hon'ble Members that no such violation is intended, and no infringement of the Permanent Settlement involved in our proposals, the time occupied on the discussion will not have been spent in vain.

"Assuming now that it is proved that Government can impose a limit on partitions of revenue without violating the Permanent Settlement Regulation, I next turn to the more practical question, is it expedient, politic and just that Government should do so? In introducing the Bill I gave three reasons for the proposal to put a restriction on partitions of revenue: first, that the multiplication of petty estates had gone on in certain districts to such an extent that it was believed, if allowed to continue, to become likely to be dangerous to the security of the revenue, and that it would add so seriously to the cost of the administration in permanently-settled districts (which has to be paid by the general tax-payer) as to be likely to bring discredit on the Permanent Settlement itself by adding an intolerable burden on the tax-payer of India generally.

"A second reason given for imposing restrictions on the multiplication of petty estates was that the creation of such separate petty estates was bad for the proprietors themselves; and a third was, it was bad for their tenants.

"Now, as to the first of these reasons, as I have already said, the great majority of Revenue Officers of the entire Province, and nearly all the officers of districts in which partitions are most common, agree in thinking that a limit ought to be imposed on partitions of revenue, and that the unrestricted divisibility of the public demand constitutes a serious danger to the security of revenue. I will only quote on this point a few opinions.

"Mr. Hare, who is one of our most experienced and ablest Collectors, and is District Officer of Muzaffarpur, where the evils of the present system are most prominent, says:—

"It must be remembered that with the infinite subdivision of mahals will come an increasing difficulty of recognising them and of recovering revenue from them if they are sold for land revenue. There is a danger that if estates are indefinitely reduced, they will become unrecognisable, and their sale will become more difficult to the detriment of Government and the proprietors."

"Mr. Toynbee, who was Commissioner of Bhagalpur when he wrote, says:—

"The present standard of limitation (Re. 1) causes an intolerable sum total of burden and expenditure on the Administration, and of litigation, oppression, and injustice on the cultivating classes."

"Mr. Savage, Collector of Gaya, writes:—

"Under the procedure which has been in vogue up to the present time, Government has been a loser, though not to any great extent, in consequence of the disappearance of lands formed by partition into small estates."

"The Collector of Shahabad says:—

"The ever-increasing number of petty estates by partition causes the entertainment of an enormous staff of clerks in the Revenue, Tauzi and Road Cess Departments to deal with accounts, and a huge cost falls on the general body of the rate-payers. The mistakes and frauds which occur in the Tauzi Department, an unfortunate instance of which recently occurred in this Collectorate [where there is defalcation of some lakhs in the treasury accounts], are in a very great measure due to this complication of numerous accounts."

"The Mymensingh Landholders' Association says:—

"It is expected that the increase in partition of estates will increase the work of the Collectorate, but this is inevitable. . . . The increase in establishment will be more than compensated by the increase in road and public works cesses which the apprehended increase of rent by landlords after partition will bring into the public treasury."

"This is to say, according to the Association, we ought to incur extra expense in order to obtain the increase of the road and public works cesses resulting from the extra-legal enhancement of rent that they tacitly admit is brought about by partitions."

"In Monghyr, as the papers circulated with the Bill show, the collection of certain cesses which are realisable as land revenue has become impossible, because, owing to the pettiness of the estates, the demand was in some cases one pie, that is to say, less than any coin current in the country."

"I need not go on multiplying quotations and instances. It is self-evident if we permit the multiplication of petty estates to go on in Muzaffarpur and other districts of Bihar especially, that the difficulty and expense of realising the revenue must be indefinitely increased, and that *tahsildari* establishments will soon have to be employed in the interior of districts, in order to obviate the inconvenience and confusion that must arise from having tens of thousands of proprietors congregated at district head-quarters in one place in one or two days when the kists fall due, to make payments of revenue under the sunset law."

"One of the great advantages of the Permanent Settlement is that under it the revenue is held to be absolutely secure, that it is realised without difficulty and at a comparatively trifling expense. But if estates are to become as small as ordinary tenants' holdings, if the cost of realising the revenue and of the administration generally is thereby to be increased, and the revenue itself is rendered insecure, the Permanent Settlement will then have all the disadvantages attendant on *raiyatwari* temporary settlements without any of the advantages from the general tax-payer's point of view resulting from such settlements."

"The Permanent Settlement would thus become an intolerable burden on the tax-payers of other parts of India, and be open to attacks to which it has not hitherto been exposed."

"I would ask Hon'ble Members who oppose the imposition of a limit on the partibility of revenue, to look at the matter from this point of view, and I would hope that if they do, they will see that this measure is a really conservative one, calculated in the long run to benefit the proprietors and secure the revenue from danger at the same time *"

"The second argument advanced in favour of the imposition of a limit on the subdivision of revenue was that the creation of petty estates or mahals is bad for the proprietors themselves. The overwhelming weight of official opinion is in favour of this view, but it cannot be denied that the Landowners' Association are generally opposed to any restrictions on partitions such as are proposed."

"It is said by them and some others that whatever the evils attendant on the creation of petty proprietors may be, they are not got rid of by refusing partition of revenue. These proprietors, it is said, exist whether we recognise them as owners of separate estates or not; but surely it is one thing to have a number of proprietors jointly owning and managing a comparatively large estate as one entity, with their tenants liable to pay rent to all the co-sharers in common at one place, and another to have the co-sharers owning a number of

smaller petty estates separately, managing them separately, and with the tenants liable to pay rent at several places to each of them individually. But it is said, if the infinite subdivisions of estates is bad for proprietors, why do they not themselves admit the evil and apply for a remedy? Further, my hon'ble friends say tenants are better off on small than on large estates. My answer is that proprietors admit the evil, but seek not the remedy provided in the Bill, but a law of Entail.

"On these points I may be permitted to quote the leading newspaper which represents the views of the most important proprietary Association in India, namely, the British Indian Association. The Editor of that paper, in a leading article, wrote on the 9th of May last as follows:—

'The large proprietor having a large surplus in hand year after year devotes a portion of it to founding schools and hospitals and to other objects of public utility, while at the same time keeping up the traditions of his house. Whereas the proprietor of a small estate would find it difficult to make both ends meet and would be absolutely powerless to help his tenants in times of need. Indeed, it is quite self-evident that the tenants on a large estate are sure to be better off than those on a small estate.'

'The Permanent Settlement has created a body of large landed proprietors in this Province. The law of partition has broken up many of these large estates into very small ones, but thank God! we still have a few large landed proprietors left amongst us. Now it is the resources of these large proprietors which have chiefly brought the waste lands into cultivation and which have covered the land with irrigation canals. It is a matter of common experience that the raiyats on large estates are generally better cared for than those on small estates, and every one who has any experience of Bengal raiyats will bear us out when we say that among the tenantry of large estates there is often noticeable a strong feeling of personal attachment to the proprietor which is almost conspicuous by its absence among the tenants of small estates. Of course a great deal depends upon the personal character of the zamindar, but as a rule the large proprietor usually has both the means and the will to be generous to his tenants. Looked at from this point of view, the law of partition can scarcely be regarded as an unalloyed blessing. It has certainly led to the ruin of many eminent and wealthy houses by minute subdivision of property. This result cannot be too much deplored, and as a remedy for this evil, we have been crying ourselves hoarse for the past quarter of a century for a law of entail.'

"I cannot give a more complete answer to these questions than is given in the extract just quoted by the proprietors' own newspaper organ.

"The third argument advanced in favour of imposing restrictions on partition is that these proceedings are made use of for the purpose of illegally and improperly enhancing raiyats' rents, and that they imposed on the raiyats behind their backs, and without their consent, liabilities to pay rent to different persons in different places without their being even told what their new liabilities are, how much they will have to pay to each of their new landlords, or where or to whom they will have to pay it. This is obviously so inconsistent with the most elementary principles of justice that it is difficult to see how any one can support the present system in this respect. That partition proceedings are made use of for the purpose of bringing about illegal and inequitable enhancements of rent was proved conclusively by the evidence circulated with the Bill, and has not in fact been denied by anybody. On the contrary, the volume and weight of that evidence, which I need not now refer to in detail, has been largely added to by the reports received. A reference to these reports, which have been circulated, will show how cogent and overwhelming the evidence on this point is. But it is said by hon'ble gentlemen the raiyats are not bound by anything entered in the partition papers; that they ought not to have been so foolish as to agree to submit to arbitrary enhancements; and therefore that there is no need to alter the law on this account.

"I would submit in reply that as practical men, we must legislate not for what *ought to be*, but for what *is*. If we find a crying evil in existence, we are bound to endeavour to apply a remedy to it even though there ought to be no such evil in existence. This is all we propose to do, and our remedy involves no sort of injustice or hardship to the proprietors concerned.

"Here, again, it is said the raiyats have not themselves complained of the abuses attendant on the present system. Why then interfere? It is true that the raiyats do not make known their grievances by public meetings and petitions. They suffer injustice in silence, but the grievances are there all the same, and there is irrefragible evidence of their existence in the papers that have been circulated.

"I hold in my hand a petition of one Kailash Chandra Deb and 88 other raiyats of mauza Jatra Siddhi in Mymensingh, praying that a survey be made and a record-of-rights prepared of estate No. 4735 in that district, on the ground that a partition has recently been made by the Collector; that their lands have fallen on different *pattis* or shares; that various disputes have arisen with the landlords in consequence of the partition concerning the boundaries, possession and rent of their lands. In order to prevent a breach of the peace and to determine the amount of the rent payable in the *sherikas* of the different maliks, they ask that a survey be made and record-of-rights be prepared, and they agree to deposit the necessary expenses. Their application was acceded to, and the necessary notification has been, or soon will be, published in the Gazette. This is a sample of the way in which the raiyats make known their difficulties and of the inconvenience and trouble to which they are sometimes subjected by these proceedings, and this, be it observed, has occurred not in Bihar, but in the Dacca Division. Is it right that they should be subjected to these things by proceedings which, according to some Hon'ble Members, in no way affect them?"

"My hon'ble friend Rai Eshan Chundra Mittra Bahadur asks what necessity there is for increasing the limit or bringing the raiyats into the proceedings at all. I have shown the necessity. The Hon'ble Member also says section 93 of the Tenancy Act gives no protection to a co-sharer landlord, because it comes into operation only when there are disputes, but he forgets that it also can be had recourse to in cases of injury to private rights. He has also overlooked the fact that this Bill does not debar any co-sharer from obtaining a partition of the land and separate possession of his share of the land, but only from obtaining a separate apportionment of his share of the revenue. Then the Hon'ble Member says the parties pay the cost of partition, why should they not be allowed to have as much subdivision of revenue as they please. It is true they pay the cost of the partition proceedings, but they do not pay the permanent increase in the cost of administration entailed by subdivision of revenue and of estates. My hon'ble friend, Babu Gura Proshad Sen, says that, as long as separation of accounts is allowed, the refusal to allow partition of revenue will not materially lighten the Collector's work. This is no doubt true to a certain extent, but then that is not an argument against this Bill, but against the system of separation of accounts which is not under consideration. The Hon'ble Member has drawn attention to a technical difficulty in connection with section 295 of the Civil Procedure Code. That difficulty has been considered and will be met.

"I have now touched as briefly as I could on the arguments advanced against the principles of the Bill. To answer every objection in detail would entail my trespassing at intolerable length on the time of the Council, but I hope enough has been said to show that the principles of the Bill are not so bad as to justify a refusal to refer it to the Select Committee.

"I agree with Mr. Dampier who has been quoted by my hon'ble friend that it is a pleasant thing to sail with the fair wind of popular opinion, but I hope that the breeze of popular favour will be with, and not against, us on the present occasion."

The Hon'ble THE PRESIDENT said:—"I do not think it necessary that I should review the debate at any length. It has been an extremely interesting discussion, and as the Hon'ble Mr. Finucane has observed, it has been characterised by moderation and has been well conducted, and I also think the Hon'ble Mr. Finucane's reply to the objections which have been raised has been full and complete. I have no doubt whatever myself of the right of the Government to impose a limit upon the partition of estates. The generation in which the permanent settlement was passed may fairly be supposed to have had a very good idea of what its intention and scope were, and we find that in that generation a limit was proposed which is far beyond anything which has ever been suggested since. Even in the Bill, which became the present law, the principle of a limit stands in the forefront, though, no doubt, the limit there imposed is a small one. The question of redemption does not in the least affect that principle. Redemption is a matter entirely for the Executive Government, and the Government of India very properly objected to its being provided by an enactment of this Council. Personally I myself have not the least objection to

revert to the provisions of the permanent settlement, and to enact that no partition shall be effected unless the whole of the proprietors concur in applying for it, or unless there have been an absolute transfer or sale of either the whole or some portion of the estate. But I have no doubt that Hon'ble Members who have spoken in opposition to the principle of our Bill will be the first to object to a limitation of that description. I have authorised the Hon'ble Mr. Finucane to tell you that the Government considers the limitation proposed in the Bill, which, as far as I am concerned, is an inherited measure, to be far too high. I specially object to the very high limit, because there is such a wide divorcement between the assets of estates in Bengal and the Government revenue. If we are to take a limitation of Rs. 100, we shall prevent many estates from being divided, and the shareholders from enjoying the benefits of partition, where there would be no risk to the Government revenue and no risk of any mischief to the tenants. I believe that the limitation of Rs. 20 previously proposed in this Council is a very practical working limit which I for one will be perfectly willing to stand by.

"I am not convinced that section 95 need make such elaborate provisions for measurement and a record of rights as it now does. What you want is to ascertain the true assets of an estate; then to see that the assets are properly distributed, and that those who will be affected by the distribution are made aware of their liabilities. I have no doubt that in Select Committee very material modifications will be made in this Chapter of the Bill, but I trust that the main object of the Bill, to simplify and cheapen the procedure, will be maintained.

"I have failed to follow the Hon'ble Rai Eshan Chundra Mittra Bahadur in his remarks about *res judicata*. I can find nothing which makes proceedings in Partition *res judicata*. I do not think it was ever intended to enact that the Deputy Collector should have power absolutely to settle all civil rights. That must be carefully left to the decision of the Civil Courts. The Chapter will in any case have to be recast to coincide with the amendments which we propose to make in Chapter X of the Tenancy Act.

"I do not think there is any other point upon which I need comment. I shall only express the hope that the Select Committee will carefully consider the very valuable opinions which have been received both from officials and from non-official bodies, and that when the Bill comes from their hands, it will be improved, and turn out to be a generally satisfactory measure."

The Motion was put and agreed to.

MURRAY TRUST BILL.

The Hon'ble Mr. FINNUCANE also introduced the Bill to enlarge the scope of the Charitable Trust created by the Will of the late Mrs. Sally Murray, and moved that it be read in Council.

The Motion was put and agreed to.

The Bill was read accordingly.

CHUTIA NAGPUR TENANCY BILL.

The Hon'ble Mr. Grimley moved for leave to introduce a Bill to regulate the enhancement of rents, the commutation of prædial conditions or services, and the registration and resumption of intermediate tenures in parts of Chutia Nagpur. He said :—

"In asking leave to introduce a Bill for the commutation of prædial services in Chota Nagpur, it seems desirable that I should explain the necessity for the measure. For some years past there have been agrarian disputes in Chota Nagpur, more especially in the Lohardaga district, between landlords and tenants, regarding rights to land and the conditions attaching thereto, which have from time to time caused much anxiety to the district

authorities and seriously interfered with the good government of the country. One of the chief causes of these disputes is the peculiar system of *bethbegari*, or labour rents, by which the tenant is bound to perform a certain amount of work for his landlord, such as tilling lands, building houses and carrying luggage on a journey without receiving wages; another is the numerous list of *rakumats* or cesses, uncertain in their incidence, which are payable sometimes in money, sometimes in kind, in addition to the regular rental. The last occasion on which there was any serious agitation was from 1887 to 1889, when the raiyats complained of the exaction by the zamindars of service and *rakumats* in excess of what was customary and proper, and began in some instances to put forward unreasonable claims to hold their lands irrespective of the zamindar, subject only to a quit-rent to be paid to Government. The present Bill is the outcome of the measures taken for repressing that agitation, and of the discussions which followed between the Commissioner of Chota Nagpur and this Government and the Government of India. The existing law [Act I (B.C.) of 1879] permits the landlord or tenant to apply for commutation of conditions or services to which the tenant is liable, but the provision is seldom used, the landlord preferring to take what service he can enforce by the rule of might, and the tenant sometimes refusing to render any service at all. In the Bill the provisions regarding voluntary commutation are retained, but power is taken to Government to direct that a record of conditions or services shall be prepared, and a commutation of them into money rents made by a Revenue Officer, whenever such a course may seem expedient, or, in other words, when found necessary for the preservation of the peace of the country. The Bill also provides for the registration of tenures and for the resumption of such tenures as are held conditionally on the survival of male heirs of the original grantee. Simultaneously with the passing of this Bill it is proposed to extend the Bengal Tenancy Act with certain modifications to the districts of Chota Nagpur, as it will be likely to effect a distinct improvement in the settlement of questions at issue between landlord and tenant.

"I have no desire to trespass on the time of this Council, but as some Hon'ble Members may not be familiar with the conditions of life and lands holding in Chota Nagpur, I propose to take a retrospect of the origin and history of the long series of disputes which culminated in the agitation which gave rise to the present Bill. Excluding the Native States, Chota Nagpur covers an area of 27,000 square miles, and consists of the districts of Lohardaga, Hazaribagh, Manbhum, Singhbhum and Palamanu. The Bill affects all these districts except Manbhum, while the Bengal Tenancy Act will be generally applicable. Chota Nagpur is far behind the rest of Bengal in point of civilisation, and, though brought a little nearer in recent times, has always occupied an isolated position.

"Its most striking features are its pleasant climate, the extensive plateaux rising in terraces one above another, the ranges of hills intermingled with plains and valleys, the vast forests, and what is more to our present purpose, the peculiar nature of the land tenures, the primitive inhabitants with their superstitions, their belief in demons and witch-craft, and their curious history and traditions. The country is undulating and in some parts extremely fertile, though requiring the expenditure of much labour to bring it into cultivation.

"Among the aboriginal races who have made a home in these remote plateaux are the Mundas and Uraons, both commonly described as Kols, though belonging to a different stock and speaking a different language; for, strictly speaking, the Uraons are of Dravidian origin, while the Mundas are Kolarians, to use the term invented by Sir George Campbell. Both, however, have the same kind of festivals and the same form of public worship, though they do not inter-marry, and at one time they had also the same form of government. From the traditions handed down, it appears that some eight or ten centuries ago, being driven out of Bihar, they sought refuge in the central table-land of Chota Nagpur, then known as the 'Jharkhand' or forest tract, which was well adapted for defence, the approaches to it being precipitous paths, narrow defiles, or the beds of rivers that have their source on the plateaux. This central portion is chiefly what is now known as the district of

Lohardaga and parts of Hazaribagh, and is Chota Nagpur Proper, as distinct from the rest of the Division.

"When the Mundaries first found an asylum there, it was covered with beautiful ~~and~~ forests, but in process of time they cleared the jungle and securely established themselves as the first settlers, and under a system of village communes lived in a state of primitive contentment and simplicity, without being subject to any Raja or landlord of any description, and mostly freed from the unpleasant obligation of paying rents. Each village was presided over by a headman or Munda, and a collection of 12 villages, called a *parha*, by a Manki, who was chosen from among the village Mundas. These Chiefs had no superior proprietary rights in the soil to the rest of the villagers; but in common with other persons in authority, to whom the administration of the village affairs was entrusted, received service lands as remuneration. These colonists, when they first came, seem to have acted on Manu's principle: 'the cultivated land is the property of him who cut away the wood or who cleared and tilled it,' and therefore they all claimed equal rights in the soil, but made provision for the support of the heads of the villages and the Manki. The service lands allotted to the Munda and Manki were called Mundai and Mardana, respectively. These Mankis or Parha Chiefs in course of time developed into titular Rajas. Owing to causes which I shall explain on another occasion, this system has been broken up in many parts of the province; but in the Kolhan of Singhbhum and certain five parganas of the Lohardaga district, the village commune still obtains in a modified form. Some lands were also assigned for the support of the priest called pahanai, and others termed bhut-khetta, or devil's acre, were set apart for the propitiation of the local deities, who require a large share of attention. Every village has its sacred grove, wherein the tutelary deity is supposed to sojourn, and being particularly responsible for the crops, he is especially honoured at the great agricultural feasts. They are, indeed, rich in sylvan gods, naiads and dryads, who are regarded as presiding over pools, rivers, rocks and mountains, and there is hardly a family that cannot boast of a ghost or ancestral shade in proof of its high antiquity. These shades serve a useful purpose as, when any misfortune or calamitous visitation arises, they are made to bear the blame. There was an official in every village—a Baiga—whose duty it was, in Psalmist's phrase, 'to keep the village' and to propitiate the invisible spirits in order to ward off blights, droughts, diseases, and other calamities. The office remains to the present day not only in Chota Nagpur Proper, but in the Native States, and on any visitation of pestilence or famine, he has an uncommonly bad time of it, worse than that of the Calcutta Health Officer, and sometimes an iron scourge is kept in the rustic temple at the entrance of the village with which he is supposed to castigate himself when things are at the worst. He sometimes omits this part of his duty, and tries to shift the blame on to other shoulders. I have, indeed, known him by the aid of a Special Committee of Diviners to be successful in fixing the responsibility on to a witch who was scourged instead with lamentable results.

"But to return to the main subject. At some period in their history* the Kols came under subjection to the Nagbansi family, the Raja of Chota Nagpur, whom they agreed to serve and support. It is not quite clear how the Nagbansi family came on the scene, and it is too long a story to examine closely the different theories that have been set up to account for this. According to one tradition the progenitor of the race was sprung from the union of a snake with the daughter of a Benares Brahmin, and was selected by the people to become their Raja because of his supernatural or miraculous origin. Another theory is that he was a superior Manki who, by his intelligence, tact and prowess, had raised himself above the rest, and that when the Kols, like the children of Israel, desired a King to rule over them, the lot fell upon the chief of the Nagbansi family. Whichever of these theories may be correct, it is clear that they accepted him as their Raja, and gave him lands from every village for his maintenance. The people in each village were divided into two classes—the more privileged called 'Bluinbars,' breakers of the soil, held their lands rent-free and had to render honorary service, such as attendance at darbars and marriages, and, like Norval, following to the field their warlike lord. The inferior class supplied food and

raiment; but this obligation was eventually commuted to a money payment, and the cultivated lands they held were termed rajas or rent-paying, in contradistinction to the Bhuinhari tenures which were held rent-free. The Raja was also allowed to hold in each village a certain amount of land termed 'majhihas,' or 'the headman's share, which was held for his benefit or that of the person who looked after his interest, and the persons who cultivated it received assignments of land in return for their services, called *bethkheta*, which they were allowed to hold rent-free. Thus a system grew up hardly distinguishable from the feudal system in Europe in the middle ages, and under it the raiyats were fairly well content and happy, and in this condition of Arcadian simplicity, I propose to leave them until our next meeting, when I will explain the causes of their transition, amid much tribulation, to the state which gave rise to the Bill which I now ask leave to introduce."

The Motion was put and agreed to.

The Council adjourned to Saturday, the 16th January, 1897.

CALCUTTA;
The 18th January, 1897. }

F. G. WIGLEY,
Offg. Asst. Secy. to the Govt. of Bengal,
Legislative Dept.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Indian Councils Acts, 1861 and 1892.

THE Council met at the Council Chamber on Saturday, the 16th January, 1897.

P r e s e n t :

- The Hon'ble W. H. GRIMLEY, *presiding*.
- The Hon'ble H. H. RISLEY, C.I.E.
- The Hon'ble RAI DURGA GATI BANERJEA BAHADUR, C.I.E.
- The Hon'ble NAWAB SYUD AMEER HOSSEIN, C.I.E.
- The Hon'ble C. E. BUCKLAND, C.I.E.
- The Hon'ble M. FINUCANE.
- The Hon'ble C. W. BOLTON.
- The Hon'ble C. A. WILKINS.
- The Hon'ble SURENDRANATH BANERJEE.
- The Hon'ble A. M. BOSE.
- The Hon'ble RAI ESHAN CHUNDRA MITTRA BAHADUR.
- The Hon'ble GURU PROSHAD SEN.
- The Hon'ble MAHARAJA BAHADUR SIR RAVANESHWAR PROSHAD SINGH, K.C.I.F.,
of Gidhaur.
- The Hon'ble M. S. DAS.
- The Hon'ble A. H. WALLIS.
- The Hon'ble SAHIBZADA MAHOMED BAKHTYAR SHAH.

NEW MEMBER.

The Hon'ble SAHIBZADA MAHOMED BAKHTYAR SHAH took his seat in Council.

THE PRESIDENT'S OPENING STATEMENT.

THE Hon'ble the President, in taking his seat, said: "I regret to have to inform the Council that His Honour the Lieutenant-Governor is unable to attend to-day owing to indisposition, and as the Hon'ble the Advocate-General is absent from Calcutta, it devolves upon me as the official Member next in rank to preside on this occasion."

TRAFFIC IN GIRLS IN DACCA AND NARAINGUNGE.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

Has the attention of the Government been drawn to a complaint made by the *East* newspaper regarding the traffic in girls who are often minors, carried on at Dacca and Naraingunge? Whether it is true that in one case a girl named Sashi Mukhi, aged about 8 or 9 years, was brought down from Garifa near Hooghly, and the girl even in that tender age was compelled to carry on her nefarious calling, against which she protested; and whether in another case in which the victim was a girl named Basanta, aged about 12 or 13 years, criminal proceedings having been instituted, the Deputy Magistrate who tried the case remarked:—

"On account of the public notoriety of the town of Dacca as regards the traffic of minor girls and the attempt of the Sub-Inspector, Giraja Kanta Pal, to suppress it, that this case has no doubt arisen."

And again:—

“The evidence collected here is of Benodine, another girl who is no doubt being maintained for purposes of prostitution. She is aged about 12 years.”

Having regard to the facts disclosed above, will the Government be pleased to take requisite steps for the suppression of this traffic in girls.

The Hon'ble Mr. BOLTON replied:—

“From reports which have been received from the local officers, it appears that the two cases mentioned by the Hon'ble Member occurred two and two-and-a-half years ago, respectively. The girl Sashi Mukhi was, it is true, brought down from Garifa for immoral purposes. Her age appears to have been about 11 years. The extracts from the judgment of the Deputy Magistrate in the second case have been correctly quoted by the Hon'ble Member.

“During a period of two years, August, 1894 to September, 1896, six cases, three in the town of Dacca and three in Narainganj, were brought to trial under sections 372 and 373 of the Indian Penal Code. Convictions were obtained in five cases, but on appeal the order of the Lower Court was confirmed in only one case, and was modified in another, and set aside in two cases. Satisfactory evidence is not generally procurable in these cases, and it is difficult for the Police to deal successfully with them. The local officers report that the evil has shown no tendency to increase in recent years, and the Lieutenant-Governor does not consider that any special measures on the part of the Government are needed. Any cases reported will be carefully investigated as hitherto, and guilty parties will be prosecuted whenever evidence is obtained.”

REDUCTION OF EDUCATIONAL EXPENDITURE.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

(a) Whether the attention of the Government has been drawn to a letter, No. 819L. S.-G., dated Calcutta the 16th November, 1896, written by Mr. Westmacott, Commissioner of the Presidency Division, addressed to the Magistrate and Chairman of the District Board, Nadia, asking him to reduce the educational expenditure by Rs. 3,179, and to spend this amount upon medical relief and other minor charges for the current year (these charges being hitherto met from other sources of the Board's income), and to give notice to the Secretaries of the middle English and middle vernacular schools that their grants would be stepped from April next?

(b) Whether the attention of the Government has been drawn to a subsequent letter of the same Commissioner, addressed to the same officer, asking the Nadia District Board to increase the primary education grant from next year to Rs. 20,000 and reduce the secondary school grant, with a view to meet the cost for dispensaries and other medical charges out of the proceeds of pounds and ferries, and to give a similar notice to the Secretaries of the secondary schools within the district of Nadia?

(c) Does the Government approve of this proposed reduction of secondary school grants and the consequent abolition and ruin of several secondary schools founded by the people and maintained by Government and the people for nearly a quarter of a century or more? Will the Government be pleased to direct the withdrawal of these orders passed by Mr. Westmacott, and which, if enforced, would prove disastrous to the interests of education in the Nadia district?

(d) Is the Government aware that Mr. Macaulay, the then Chief Secretary, in his letter No. 1451, Municipal Department, dated the 5th May, 1888, popularly called “The Model Educational Budget,” fixed the educational expenditure of the Board, and asked the Board to spend at least Rs. 10,008 upon secondary and about Rs. 13,000 upon primary education, and placed in the hands of the Board the proceeds of all pounds and some ferries with a view to meet the educational expenditure, taking all minor educational charges into his consideration?

(e) Is the Government further aware that Mr. Cotton, the then Secretary to the Government of Bengal in the Municipal Department, in his letter No. L $\frac{B}{9}$ 2, dated Calcutta, December, 1888, in order to show the equilibrium between the receipts and charges of the Board for educational purposes, did not consider medical charge as a charge to be met from the income from pounds and ferries, but laid down that the charge for secondary and primary education and some other minor charges should be met from those proceeds, the receipts being Rs. 33,186 and the charges for education and pounds and some other minor matters being Rs. 33,163, leaving a balance of Rs. 23 only?

(f) Does the Government approve of the principle as laid down in the above two letters? Does the Government approve of the action of Mr. Westmacott in throwing an additional burden of medical charges upon the proceeds of pounds and ferries, and in asking the Board to reduce its educational expenditure and the grants for secondary education?

The Hon'ble Mr. RISLEY replied:—

“A representation was received from the Nadia Branch of the Indian Association, protesting against the action of the Nadia District Board in reducing their expenditure on secondary education in order to provide for distress medical relief during the current year. In accordance with standing orders this was returned to the Association for submission through the District Board and has not yet reached Government. The Lieutenant-Governor approves of the principle that the claims of primary education to support from public funds should generally take precedence over those of secondary education, but no hard-and-fast rule can be laid down as to the application of this principle to individual cases. When the facts of the present case are reported, the Lieutenant Governor will consider whether the orders passed by the Commissioner involve a serious loss of efficiency or conflict with any understanding implied in the transfer of charges to District Boards, which was carried out in 1858. By Mr. Macaulay's letter of the 5th May, 1858, the improvable income of the pounds and certain ferries was made over to the District Board of Nadia to meet expenditure on education, pound, ferries and medical purposes. No mention was made of medical charges in Mr. Cotton's letter of 4th January, 1889, because no medical expenditure was then incurred by the Board.”

DIVERSITY OF WEIGHTS AND MEASURES IN BIHAR.

The Hon'ble MAHARAJA BAHADUR SIR RAVANESHWAR PROSHAD SINGH OF GIDHAUR asked—

Is the Government aware that a great diversity of weights and measures prevails in the districts of Bihar as well as of Bengal to the great inconvenience of the public? If so, is the Government prepared to take steps to secure the uniformity of weights and measures in the country?

The Hon'ble Mr. RISLEY replied:—

“The Lieutenant-Governor is aware of the great diversity of the weights and measures used in the mufassal districts of Bihar and Bengal. The difficulty, however, of introducing uniform standards and enforcing their use is extreme, and it is for this reason that no action under Act XXXI of 1871, the Indian Weights and Measures of Capacity Act, has hitherto been taken by the Government of India. The Lieutenant-Governor is not prepared to move the Government of India to put the Act in force.”

DELAY IN THE DELIVERY OF JUDGMENTS BY SUBORDINATE MAGISTRATES

The Hon'ble MAHARAJA BAHADUR SIR RAVANESHWAR PROSHAD SINGH OF GIDHAUR asked—

Is the Government aware that a great inconvenience is very often caused to the public by the Subordinate Magistrates reserving judgments for

long periods, litigants being made to attend the Courts from day to day, and that such inconvenience may be avoided if the Government, would, by a rule, fix a time by which judgments should be delivered after the hearing of the case?

The Hon'ble Mr. BOLTON replied:—

“Complaints have not been made to the Government of inconvenience caused to parties by undue delay in the delivery of judgments by subordinate Magistrates; but the Lieutenant-Governor considers it desirable that the attention of the Magistrates should be drawn to this matter, and a Circular will accordingly be issued, with the view of ensuring that judgment shall be delivered in criminal cases without unnecessary delay.”

MURRAY TRUST BILL.

The Hon'ble Mr. Finucane moved that the Bill to enlarge the scope of the Charitable Trust created by the Will of the late Mrs. Sally Murray be referred to a Select Committee consisting of the Hon'ble Sir Charles Paul, the Hon'ble Nawab Syud Ameer Hossein, the Hon'ble Mr. Wilkins, the Hon'ble Mr. Wallis and the Mover.

The Motion was put and agreed to.

PUBLIC DEMANDS RECOVERY ACT, 1895, AMENDMENT BILL.

The Hon'ble Mr. Finucane also moved that the Hon'ble Rai Eshan Chundra Mittra Bahadur be added to the Select Committee on the Bill to amend the Public Demands Recovery Act, 1895.

The Motion was put and agreed to.

ESTATE'S PARTITION BILL.

The Hon'ble Mr. Finucane also moved that the Hon'ble Rai Eshan Chundra Mittra Bahadur be added to the Select Committee on the Bill to amend the law relating to the Partition of Estates.

The Motion was put and agreed to.

CHUTIA NAGPUR TENANCY BILL.

The Hon'ble Mr. Grimley introduced the Bill to regulate the enhancement of rents, the commutation of preclal conditions or services, and the registration and resumption of intermediate tenures, in parts of Chutia Nagpur, and moved that it be read in Council. He said:—

“It will be in the recollection of the Council that when I last had the honour of addressing them on the subject of the Chutia Nagpur Bill, I left the Kols in a condition of pastoral freedom and independence. But this pleasing state of things only lasted for a time, for gradually the Raja's family came under the influence of Brahminism, and, as their power increased, they began to look down on the Kols, to treat them with degradation, to deprive them of their rights, and eventually reduced them almost to a state of serfdom. Their descent may be traced through the following stages: encroachment on their rights by the Raja, who distributed whole parganas and villages among Kunwars, Thakurs, Lallas and other members of his family as maintenance grants; their revolt and final subjugation with loss of lands and diminution of rights through the instrumentality of foreign mercenaries who were retained in the Raja's employ and received jagirs of land in return for their services; the introduction of Brahmins into the country to carry out innovations desired by the Raja, and later on of a lower order of persons, Musalman and Sikh horse-

dealers, shawl and silk merchants, and other adventurers, to whose influence, owing to pecuniary difficulties, the Nagbansi Chiefs became subservient, and to whom they granted farms of land for goods supplied or loans advanced. The oppression of these middlemen gradually broke down the authority of the village Chiefs in many parts of the country and ended in their disestablishment, and eventually drove the Kols into rebellion in 1831, the upshot of which was unfavourable to them and was accompanied by a great disturbance of peasant proprietary rights. Many of the Kols were compelled to leave their country, but after a time they returned to claim their lands. The jagirdars, however, objected to their re-entry, and disputes and contests were renewed and continued for many years.

“Meanwhile the Christian Mission was established in Chota Nagpur in 1845. The Missionaries took the Kols by the hand, and their teachings fostered a spirit of independence among them, developed their crude traditions regarding their rights in olden days, when each person was in a manner the proprietor of the soil which he cultivated, and encouraged aspirations which were not likely ever to be realised. The result was a great accession to the ranks of nominal Christians. In the Mutiny the Christian Kols suffered persecution, and conflicts arose, which had to be put down by a military force. This was followed by operations intended to secure the measurement and registration of tenures and matters quieted down for a time, and the disputes were not revived until 1867, when a monster petition was presented to Government by Native Christians complaining of systematic oppression on the part of their landlords. The disputes related to encroachments on both sides, to the absorption by zamindars of bhuinhari and bothketa lands into the rajhas or majhihas lands, and to the exaction of services in excess of the customary modes. This led to the passing of the Chota Nagpur Tenures Act, II (B.C.) of 1869, and the appointment of the Bhuinhari Commissioners to define and record tenures and to register all rights, privileges, immunities, and liabilities affecting the holders. The Act also provided for the restoration of land, of which the owners might have been dispossessed within the twenty years preceding the date of the passing of the Act. These operations, though unquestionably beneficial as far as they went to all concerned, fell short of securing perfect harmony and peace, owing to the exclusion from the enquiry of rajhas lands and of certain descriptions of tenures called korkar and khuntkati, in which the holders claimed rights of occupancy; and, in the second place, neither it, nor the rent law which was passed some ten years later, rendered the commutation of predial services into money payments compulsory.

“Finding no claims would be heard by the Special Commissioners, unless the same had reference to bhuinhari lands, the rajhas lands were claimed by the tenants in a wholesale way as bhuinhari, and the result was much disappointment and an increase of bitterness and strife between them and their landlords. The customary service, which the landlord was entitled to receive in respect of the cultivation of his manjhihas or khas lands, was three days' ploughing, three days' digging, three days' sowing, and three days' cutting, with one or two days for threshing and storing grain; the raiyats had also to bring grass and bamboos for thatching his house, and when on a journey to carry his banghees; this constituted the recognized *bethbegari*, which was to be commuted under the law where practicable; but, as already remarked, the law did not provide for the compulsory commutation of these services, and the complaint now is that they are levied in respect of lands not subject to them and from persons who are not liable to render them, and that the zamindar is no longer content with the customary rate, but takes as much as he is able to enforce. This is a burning question, one of the chief grievances of the Kols, and the problem to be solved is how to deliver them from the burden of *bethbegari*, without inflicting injustice on the land-holding classes. The Kols are by nature singularly tenacious of purpose, and under the spirit of independence, inculcated by the teachings of Christianity, have been most persistent in asserting their claims. They are well versed in the old traditions of their race, and seem to have dwelt so much on the story of their past wrongs that they have worked themselves into the belief in the possibility of reverting to the old order of things, and of going back to the time when their forefathers lived in a state of primitive simplicity under a village commune; for, in 1887, we find

them seriously asserting a claim to hold the land as proprietor, without the intervention of Rajas, zamindars, or middle-men of any kind.

"There are three Christian Committees working side by side in Chota Nagpur, namely, the Anglican, German Lutheran, and Roman Catholic Missions, and the history of the agitation that has been going on among the Kols intermittently since 1867, when the Memorial from some 14,000 Native Christians was presented to Government, affords ground for the belief that many persons conceived the idea that, by embracing Christianity, they would be entitled to the support not only of their spiritual pastors, but also of Europeans generally in the settlement of their grievances and vindication of their rights. It was matter too for observation that those who became Christians escaped the obligation of making contributions for the propitiation of the local deities. Between 1867 and 1885 various petitions were made to Government by the Kols, setting forth claims in respect of the tenure of land more or less extravagant and unreasonable. The most important was a Memorial from the Missionaries of the German Lutheran Church, stating the grievances under which the Christian Kols were labouring in connection with the operations under the Chota Nagpur Tenures Act. These Memorials were considered by Government, and eventually the matter was laid before the Secretary of State, who in 1882 issued orders declaring that the results of the proceedings under that Act should be considered final. The agitators, however, did not choose to remain quiet, but still went on memorialising, being encouraged in their action by certain legal advisers, who found it to their interest to excite the people to raise subscriptions for the prosecutions of their claims. A few years ago a party calling themselves the 'Children of Israel,' and headed by 'John the Baptist,' banded together and set up a 'Raj' at a place which was a former seat of the Raja of Chota Nagpur. This absurd movement gave some trouble to the district authorities, but was promptly and firmly checked.

"The action taken by a prominent leader of the agitation at one time would have been intensely ludicrous but for its serious aspect. He wrote to the Deputy Commissioner informing him that he and others intended going to England to lay the Kol grievances before the Queen, and he solemnly desired that officer to issue a *parwana* to Her Majesty to supply tents and *rasad* for his party during their stay in England. Having brought down events to 1887, I propose to resume the story on a future occasion, but will now merely introduce the Bill which has been prepared with the object of settling these disputes which I have described and ask that it may be read in Council."

The Motion was put and agreed to.

The Bill was read accordingly.

The Council adjourned to Saturday, the 6th February, 1897.

CALCUTTA; }
The 19th January, 1897. }

Offg. Asst. Secretary to the Govt. of Bengal,
Legislative Department.

PURCHASE OF STORES FOR PUBLIC WORKS.

No. 261A.

GOVERNMENT OF BENGAL—PUBLIC WORKS DEPARTMENT.

ACCOUNTS.

Dated Calcutta, the 18th January 1897.

RESOLUTION.

READ—

- (1) Letter from the Government of Bengal, Public Works Department, No. 5462A., dated 2nd November 1896, submitting to the Government of India, Public Works Department, the statement of expenditure on stores in the General and Irrigation Branches of the Public Works Department in Bengal for the year 1895-96.
- (2) Letter from the Government of India, Finance and Commerce Department, No. 1426S.R., dated 25th March 1895, pointing out that, as it is understood, several of the principal engineering firms in India now possess the apparatus necessary for the proper testing both of the raw material and of the finished product, the fullest use should be made, subject to the prescribed precautions, of the liberty to procure supplies in India.
- (3) Resolution on the operations of the Public Works Department, Bengal, in 1894-95, in respect of purchases of stores in England and locally.

REMARKS.—The following information is published, showing the operations of the Public Works Department of this Province in 1895-96 in respect of purchases of stores in England and locally.

2. The total cost of stores entirely obtained from England was Rs. 1,53,046, as against Rs. 1,45,966 in 1894-95. The following is a list of the principal items :—

	Rs.	
A {	Pump, suction, complete	1,827 This was required for the water-supply scheme for the Buxar Central Jail. It was sent out whole, i.e., rivetted together.
	Boiler for steamer ...	8,902 This was required by the Dehri Workshops Division for the casual steamer <i>Bumas</i> . It was sent out complete, and had to be only put into the steamer by those Workshops.
B {	Rolled-iron joists ...	11,598 These were required for use in the additional Record-room, Opium Godown, Calcutta; Wards in Buxar Central Jail; Chest Shed, Abkari Shed, and Leaf Godown at Goolzarbagh; and Barisal Courts; for quadrennial repairs to buildings in the Eastern Sone Division and for general purposes in the 2nd Calcutta Division.
	Steel joists ...	39,345 These were required for the new Forms Block, Stamp and Stationery Office, and Hostel attached to the Madrasa College, Calcutta; Jahanabad Munsifi; Boys' School, Kurseong; treble Munsifi, Howrah; Dacca Madrasa; Barisal Courts; Zilla School, Purnea and Combined Post and Telegraph Office, Mymensingh; quadrennial repairs to Dhuramtala Press Buildings, and special repairs to Combined Post and Telegraph Office, Darjeeling, and for general purposes in the 2nd Calcutta Division.
	T-iron bars ...	10,895 These were obtained for use in the additional Record-room, Opium Godown, new Forms Block, Stamp and Stationery Office, and Hostel attached to the Madrasa College, Calcutta; and Barisal Courts.

		Rs.	
B	T-iron	... 7,709	These were required for treble Munsifi Howrah; Jahanabad Munsifi; Dacca Madrassa; Zilla School, Purnea, and for works done in the Government Workshops at Dehri and Sibpur.
	Wrought-iron bars	... 3 432	These were required for use in the Hostel attached to the Calcutta Madrassa and in the Purnea Zilla School.
	Bed-plates	... 2,994	These were required for the additional Record-room, Opium Buildings, Calcutta; Forms Block, Stamp and Stationery Office; and the Hostel attached to the Madrassa College, Calcutta; Dacca Madrassa; Barisal Courts; Jahanabad Munsifi; and treble Munsifi, Howrah.
	Leather belting	... 1,614	These were required for use in the Workshops and dredgers in the Dehri Workshops Division; a good deal is also used in other Divisions.
	Candles	... 2,005	These were obtained for use in the Jablockhoff system of lighting in the Eden Gardens, Calcutta.
	Carpet	... 1,577	This was required for the stairs of Government House, Calcutta.
	Cooking stove	... 2,536	This was required for the Viceregal kitchen, Calcutta.
	Paving tiles	... 1,039	These were required for use in reconstructing servants' quarters, attached to Government House, Calcutta.
	Flange pipes	... 1,353	These were required for the water-supply scheme for the Buxar Central Jail.
	Hose with couplings, complete	... 2,199	
	Canvas	... 1,908	These were required for purdahs and roof covering of the canal steamers in the Dehri Workshops Division, and for repairs to sails and awnings of boats and steamers in the Orissa Circle.
	Angle-iron	... 4,028	These materials were brought on to stock when sent out, and were used as required on various works executed at the Government Workshops at Sibpur, Dehri, and Cuttack.
	Round "	... 1,011	
	Flat "	... 1,649	
	Chain "	... 2,946	This was obtained for use in the dredgers in the Dehri Workshops Division, and steamers, dredgers and ferry boats in the Orissa Circle.
	Copper tape	... 2,633	These materials were obtained for use in the various new works and repairs executed to Government buildings.
	Cement	... 7,129	
	Paints	... 32,717	

None of the articles named in group A, nor of the materials detailed under group B, could have been entirely manufactured in India, nor are they, as far as Government knows, even sent out in a rough state to be finished at workshops in this country.

3. The total cost of stores of European manufacture purchased in India on the score of urgency was Rs. 79 089, as against Rs. 33,684 in 1894-95. The principal items which make up this total are the following:—

		Rs.	
	Rolled-iron joists	... 23,290	These were required for the Anatomical Block of the Medical College, Calcutta; Servants' and Military Secretary's quarters attached to Government House, Calcutta; Mail van-shed, General Post Office, Calcutta; Lying-in ward and Lady Elliott Hostel, Campbell School and Hospital, Sealdah; additions and alterations to the Custom House, Calcutta, and to ground floor, jailor's quarters, Alipore; a second storey to the Zilla School at Arrah; extension of the school building at Chapra; staircases for the extension of Indian Museum, Stamp and Stationery Office; and for repairs to the Civil Engineering College, Sibpur, and to Imperial and Provincial buildings in the 2nd Calcutta and Nadia Rivers Divisions.
	White glazed wall tiles	4,725	These were urgently required for fittings in connection with the extension of the new East Block, Indian Museum, and for the construction of the Anatomical Block of the Medical College, Calcutta.
	Portland cement	... 3,578	This was required for the water-supply at Kalimpong in the Dooars Division, and to meet the demands of other Divisions of the Department.

Dynamite	...	Rs. 1,780	This was urgently required for the construction and maintenance of roads in the Darjeeling Division, and chiefly for removing rock slips caused by storm damages.
T-iron bars	...	5,868	These were required for the construction of the Lying-in ward and Lady Elliott Hostel, Campbell School and Hospital, Scaldah; Mail van-shed in the General Post Office, Calcutta; and for carrying out urgent orders received in the Sibpur Workshops.
Cast-iron pipes	...	1,164	These were required for constructing Tiffin-room, Treasury Buildings; East Block, Indian Museum; Anatomical Block, Medical College; and additional Record-room, Opium Godown, Calcutta.
Galvanized iron pipes	...	15,612	These were required for the construction of various new works carried out in the 1st Calcutta Division, and for extending the hot and cold water-supply in Government House, Calcutta, and the supply of filtered water to the Viceregal stables and coachman's bungalow in the Barrackpore Park; Small-pox ward, Campbell Hospital, Scaldah; South Calcutta Hospital at Bhawanipore; Lying-in ward and Lady Elliott Hostel, Campbell School and Hospital, Scaldah; water-supply at Kalimpong; and repairs to Principal's quarters, Calcutta Madrasa, Intally police-station, Presidency Jail and St. James's Personage.
Angle-iron	...	4,878	These materials had to be purchased locally for the Sibpur Workshops in connection with urgent orders, which could not have been foreseen and which could not, without causing delay and inconvenience, have been kept in abeyance to allow of the articles being indented for from England.
Plate iron	...	3,608	
Round "	...	1,774	
Flat "	...	3,828	
Square "	...	1,206	
Pig "	...	1,439	
Zinc sheets	...	1,600	
Yellow sheeting	...	1,018	
Iron screws	...	1,492	
Steel plates	...	2,179	

Taking the India Office prices and adding freight and other incidental charges, the cost of these articles, if purchased in England, would have been only Rs. 75,242, so that Government paid 5.1 per cent. more through buying them in India than it would have paid in England. The corresponding loss in 1894-95 was 6.4 per cent.

4. The total cost of stores manufactured in India, partly from imported material and partly from indigenous material, and substituted for stores formerly imported, was Rs. 50,658, as against Rs. 1,17,034 in 1894-95. The principal items were as follows:—

Wrought-iron girders.	built	Rs. 6,223	These were made at the Sibpur Workshops for the Anatomical Block, Medical College, Calcutta, from materials obtained from England.
Wrought-iron work for trusses, roof.	for	14,462	These were made at the Sibpur Workshops for the Boys' School, Kurseong, and the Ganja Godown and Weighment Shed, Nowgong.
Trusses	...	8,063	These were prepared at the Sibpur Workshops for the Boys' School, Kurseong, Mail van-shed, General Post Office, Calcutta, and Tolly's Nala Godown.
T-iron bars	...	1,767	These were required for reconstructing Military Secretary's quarters and servants' quarters, Calcutta Government House; and reconstructing Anatomical Block, Medical College, Calcutta; and Record-racks, Stamp and Stationery Office, Calcutta.
Iron rivets	...	1,548	These were needed for works made up at the Government Workshops at Sibpur from imported material worked into its finished shape in this country.
Bolts and nuts	...	1,161	
Brass tower bolts	...	1,557	These were required for the new east wing of the Indian Museum; Stamp and Stationery Office; and Madrasa Hostel, Calcutta.

		Rs	
Brass butt hinges ...	5,525	} These were required for doors and windows made at the Sibpur Workshops for various buildings in the Province.	
Glass panes ...	1,690		
Galvanised wire-netting ...	1,290		
		This was required for the Stamp and Stationery Godown; Opium Godown, Calcutta; and Sait Golahs, Sulkea.	
Pig-iron ...	2,646	Used for cast-iron work done in the Sibpur Government Workshops.	
Cast-iron pipes ...	1,410	These were required for the water-supply scheme for the Buxar Central Jail.	
Leather-belting ...	2,296	This was for use in the Sibpur Workshops.	
Buff Terra-cotta bricks ...	1,020	These were required for constructing the new Forms Block, Stamp and Stationery Office, Calcutta.	

5. The policy prescribed by the Government of India in their Resolution No. 1426S.R. of 25th March 1895, quoted above, continues to receive the attention of the Local Government.

ORDER—Ordered, that a copy of this Resolution be published in the Supplement to the next issue of the *Calcutta Gazette*.

Ordered also that a copy of this Resolution be forwarded to the Bengal Chamber of Commerce, the Calcutta 'Trades' Association, and the Bengal National Chamber of Commerce.

By order of the Lieutenant-Governor of Bengal,

J. G. H. GLASS,

Secretary to the Government of Bengal.

WATER-SUPPLY.

No. 233L.S.-G.—The 16th January 1897.—The following reports of the progress made in the several districts of the Dacca, Burdwan, Bhagalpur and Rajshahi Divisions in collecting and placing on record the chief facts regarding water-supply are published for general information.

H. H. RISLEY,
Secretary to the Government of Bengal.

No. 1806G., dated Dacca, the 4th January 1897.

Memo. by—The Commissioner of the Dacca Division.

Copy of the following submitted to the Government of Bengal, Municipal Department, in continuation of this office No. 1765G., dated the 31st December 1896.

No. 962G., dated Barisal, the 31st December 1896.

From—W. N. DELEVINGNE, Esq., Joint Magistrate in charge,
To—The Commissioner of the Dacca Division.

With reference to your No. 1635G. of the 16th instant, forwarding Bengal Government Circular No. 58L.S.-G. of the 12th idem, anent the progress made in collecting and placing on record the chief facts regarding water-supply, &c., I have the honour to report as follows.

2. The Local Boards were requested to prepare the registers in Forms I and II, as prescribed by Government in its Circular No. 8 T.N.O. of the 15th May 1896, on the subject of improvement of water-supply in this district. The Bhola Local Board has already prepared both the registers, and Patuakhali Local Board has prepared only Register I. Register No. II of Patuakhali subdivision and both the registers for Sadar and Pirojpur subdivisions are under preparation by the Local Boards concerned.

3. The municipalities of the district were also requested to prepare the registers in Forms I and II, as prescribed by Government in its Circular No. 7 T.N.O. of the 15th May 1896, on the subject of improvement of water-supply. Replies from all municipalities have been received, but they make no reference to the preparation of the registers. They have been asked to supply the information which will be communicated hereafter. As regards improvement of existing sources of water-supply and to open new ones, their replies are summarised below.

4. The Chairman of Barisal Municipality stated that the jail tank has been re-excavated and reserved for drinking purposes during 1896; 26 notices have been issued to the owners of private tanks requiring them to improve their tanks; six tanks have been re-excavated.

5. The Chairman of the Nalchiti Municipality states the water-supply of the town is sufficient for the requirements of the population of each ward. There are two reserved tanks in the heart of the town set apart only for drinking purposes, and they have been thoroughly cleansed. In every ward there are several tanks with excellent water which have been carefully cleansed twice within the last six months by the owners on notice under section 200 of the Bengal Municipal Act.

6. In Jhalakati Municipality none of the owners of private tanks are willing to allow their tanks to be reserved for drinking purposes. The Municipal Commissioners are therefore trying to improve existing sources of water-supply by taking action under section 200 of the Municipal Act. There is only one reserved tank in the town, and the Commissioners have resolved to make another tank this year. Action has been taken for the acquisition of land necessary for the purpose.

7. The Chairman of the Pirojpur Municipality states that the Municipal Commissioners have allotted a sum of Rs. 200 in the current year's budget for the purpose, and also in the next year's budget an equal amount has been provided. They have contemplated digging new tanks or re-excavating the old existing reserved tanks within the municipality. There are four reserved tanks within the municipal area, and one of them which is close to the subdivisional office has been twice cleansed.

8. The Patuakhali Municipality sanctions Rs. 650 for the excavation of a sweet water tank in the rural area within the municipal limit. The work is not in progress. It will be taken in hand after the reopening season is over, as labourers are not easily procurable there at this season of the year.

No. 24L.S.-G., dated Ohinsura, the 9th January 1897.

From—C. E. BUCKLAND, Esq., C.I.E., Offg. Commissioner of the Burdwan Division,
To—The Secretary to the Government of Bengal, Municipal Department.

With reference to your letter No. 58L.S.-G., dated 12th ultimo, calling for a report of the progress made in the districts in this Division in collecting and placing on record the chief facts regarding water-supply, and the steps taken by

municipalities and District Boards respectively to improve the existing sources of water-supply and to open new ones during the past quarter of the year, I have the honour to report that on receipt of your letter No. 8T.—M., dated 15th May last, directing the preparation of registers in Forms I and II annexed to that letter, and the submission of a statement with the annual report, instructions were issued to the Magistrates in this Division to render every assistance to the District Boards in the matter, through Government establishments of all descriptions. The chaukidari panchayats and the police were also ordered to cooperate in the collection of statistics and the maintenance of the registers prescribed.

2. The information called for is, however, of so voluminous a character, and the nature of the agency by which it is to be collected is so varied, that the progress actually made has been so far very meagre. It will be seen from the following account that this remark applies particularly to Burdwan and Hooghly, where it would seem that a start has just been made, and that, in the case of the other districts, operations have to some extent advanced.

3. *Burdwan*.—The Magistrate of Burdwan reports that the district staff was so fully occupied during the past few weeks in preparing food-stock estimates, that they had little time to attend to the collection of statistics relating to water-supply. In the Kulna subdivision Form No. II, prescribed in Government order No. 8T.—M., dated 15th May, will, it is expected, be completely written up by the end of the current financial year. The statistics for 39 villages only were collected by the Subdivisional Officer of Ramganj by the middle of December last. The Subdivisional Officer of Katwa and the Chairman of the Local Board are stated both to have gone out into camp to collect the required information—a duty in which the District Board subordinates are also reported to be busily engaged.

4. A list showing the District Board wells excavated during 1896-97 is appended. The Magistrate promises to furnish full details of the progress made by the municipal authorities in the next quarterly report.

5. *Birbhum*.—In Birbhum the Suri Municipality and the District Board have opened the prescribed registers. The former has since the receipt of the Government Circular excavated two new wells in the Shehara ward, and acquired lands in the Chandni and East Khotta bazar wards for the purpose of sinking wells.

6. Out of the District Board's sanctioned budget allotment of Rs. 1,511 for water-supply for the year 1896-97, Rs. 864-10-6 have been expended under this head up to December 1896. The details of the expenditure are as follows:—

	Rs.	A.	P.
(1) Repairs to a well at Sainthea ...	8	0	0
(2) Re-excavating a tank in the reserve lines, Suri ...	100	0	0
(3) Contribution to the sinking of a well in the premises of the Bolepore Munsifi ...	80	14	0
(4) Sinking of a well at Rajnagore ...	170	11	6
(5) Sinking of nine kuteha wells in the Rampur Hât subdivision for supply of water to the people ...	68	9	0
(6) Sinking of a well at Loghta ...	408	8	0
(7) Deepening four wells in Bolepore ...	28	0	0
Total ...	864	10	6

The sinking of two wells, viz. one at Ahmadpur and the other at Dubrajpur, is in progress.

7. *Bankura Municipality*.—Registers in forms Nos. I and II have been duly opened. There are 29 big tanks and 93 petty excavations within the Municipality, besides 395 wells, of which 13 are public wells. The Commissioners possess no tanks of their own. The existing water-supply is said to be adequate, the two rivers Gandheswari and Dwarikeswar and almost all the public wells supplying good drinking-water. As regards water for other purposes also, the sources of supply do not appear to be insufficient, but most of the tanks require thorough re-digging. The Municipal Commissioners have therefore, under section 200 of the Municipal Act, required the owners and occupiers of eight of the important tanks to have them deepened. They have also sunk two masonry wells and are making arrangements for sinking another shortly.

Vishunpur Municipality.—The registers in Forms I and II have been opened, but are not complete in all their columns. The town is provided with six “bandhs” or large reservoirs of water, excavated by the former Rajas of Vishunpur, from which, as well as the river Birai running on the north of the town, a fairly adequate supply of water is derived. There are also minor tanks which are only resorted to for domestic purposes and not for drinking.

Sonamukhi Municipality.—The prescribed registers have been opened. The town is well provided with tanks, many (90) of which have been reexcavated or cleaned this year by the owners, to whom notices under section 200 of the Municipal Act were issued. It is, moreover, expected that some new tanks will be excavated this year. A part of the town obtains its drinking water from the river Sali which forms its northern boundary. Four tanks are reserved for drinking purposes.

8. *The Bankura District Board.*—The registers in Forms Nos. I and II have been opened. The district consists of 380 villages containing numerous houses, in regard to which information as to water-supply is required to be recorded. The panchayats of all these villages were called upon to submit lists of tanks and wells within their respective localities. Out of 380 villages, returns from 293 have been received and are being entered in the register. In the remaining cases urgent reminders have been sent to the defaulting panchayats for the speedy submission of the returns. Police officers in charge of stations and all touring officers of the district have been directed to secure the submission of these returns without loss of time, and check them as far as practicable by personal enquiries.

9. I quote below the remarks made by Mr. Manisty in submitting his report—

“I am now in camp by the worst part of the district for crop failure, and am receiving numerous applications for loans to re-excavate tanks. It is, in my opinion, highly desirable to encourage the taking of these loans, as thereby Government finds funds for private persons and gets some interest on the money, whereas otherwise it may be necessary later on for the District Board or Government or both to spend money without getting any interest, simply in order to furnish employment to persons in need of it. I notice that wherever a wealthy person lives there is usually at least one good tank in which the water never runs dry.”

10. As directed by Government orders, a list of villages containing 100 houses or more has been prepared and forwarded by the Midnapore District Board to each Local Board with instructions to get the information required to fill in Registers Nos. I and II from the members living in the interior of the subdivisions. Similar instructions have also been sent to Union Committees through the Local Boards. These bodies have already opened both the registers referred to in their offices, and are collecting the information required to fill them up.

11. In the Contai subdivision comprehensive schemes for the improvement of water-supply have been prepared. The Contai Local Board has prepared and submitted a list of 18 important villages in the subdivision, in each of which it proposes to sink a well at a cost of Rs 250. These will be taken in hand one by one as the funds annually allotted to the Local Board for the purpose permit.

12. A list of tanks and wells to be constructed in thanas Jhargram, Binpur and Grrhbeta of the Sadar subdivision has also been prepared; most of the villages to which this list refers stand in urgent need of good drinking water. Estimates and further information in connection with some of the proposed tanks and wells have been called for. The Local Boards of Tamluk and Ghatal have also been requested by the District Board to submit similar lists.

13. Managers of aided schools situated in villages containing 100 or more houses have also been asked by the District Board to fill in and submit forms Nos. I and II, giving the necessary information regarding the existing sources of water-supply in their villages. Most of the managers have already complied with the Board's requisitions. The District Board has also sent these forms to the Magistrate for distribution to the police and chaukidari panchayats to have them duly filled in and returned to the Board's office within a month.

14. As regards the steps taken by the District Board to improve existing sources of water-supply and open new ones, the Magistrate reports that the

allotment for the improvement of water-supply for the current year is Rs. 5,000, of which Rs. 1,296 have been allotted to the Union Committees, Rs. 1,850 to the Sadar subdivision in view of the fact that the late scarcity of water was worst in that subdivision, and Rs. 480 will be spent in constructing a pukka well at Potaspur in the Contai subdivision, and Rs. 250 in excavating a well at Belaspur in that subdivision, which was dug but not paid for last year. The sum of Rs. 1,124 was spent on temporary wells, &c., in the Sadar and the Ghatat subdivisions during the late scarcity.

15. Progress reports have been called for by the Magistrate from the municipal bodies in Midnapore, but he has not yet received any.

16. In Hooghly the Magistrate reports that preliminary arrangements are being made for the preparation of Registers Nos. I and II, and that lists of villages in each thana containing more than 100 occupied houses with population according to last census are in course of preparation.

17. It appears from the report submitted by the Magistrate of Howrah that instructions were issued in that district to the police for the preparation of lists of tanks and wells, and that these lists have been forwarded to the District Board, under whose supervision registers in Forms Nos. I and II are being written up. When these registers are complete, additions to and alterations in them will be reported by the police to the Board.

18. The District Engineer of Howrah has been desired to inspect all the villages and to submit a statement of places where tube-wells can and should be sunk. The Local Boards have also been asked to suggest means for dealing with the apprehended water scarcity.

19. As regards municipal areas in the Howrah district, both the municipalities in the district, viz. Howrah and Bally, are on the Hooghly river, from which the water-supply of the latter is principally derived. The former has now been for the most part supplied with filtered water from the water-works.

20. The Bally Municipality is preparing the registers in Forms I and II. The Municipality is also taking steps to improve some of the existing tanks, and has taken action under section 200 of the Municipal Act in several instances. Many of the tanks in this Municipality have dried up for want of sufficient rain during the last two years, and many of the rate-payers have applied for the excavation of new and the deepening of old tanks which have silted up.

21. In the Ulubaria subdivision of the district of Howrah four tanks have been excavated and some tube-wells sunk at the cost of the District Board. Government has also sunk three wells and excavated a tank on the side of the Cuttack road. The Subdivisional Officer has called the attention of the zamindars and well-to-do persons to the necessity of excavating tanks.

List of wells excavated by the District Board during the current year 1896-97.

HARI DAS PAL,
District Engineer.

* Including Rs. 150 contributed by a private gentleman.
† Do. „ 88 ditto ditto.

No. 1807G., dated Dacca, the 4th January 1897.

Memo. by—The Commissioner of the Dacca Division.

Copy of the following submitted to the Government of Bengal, in continuation of this office No. 1806G. of this day's date.

No. 114, dated Madaripur, the 29th December 1896.

From—BABU DINA NATH SEN, Chairman, Madaripur Municipality,
To—The Magistrate of Faridpur.

With reference to your No. 959, dated the 23rd instant, I have the honour to state as follows:—

2. (a) In the Municipality the rivers Kumar and Arialkhan and the Amirabad khal supply good drinking-water.

(b) There are 12 public tanks, of which one has been reserved for drinking purposes only.

(c) There are some 58 private tanks, but none of them has been reserved.

3. Here the people prefer river water, and that is sufficient for the population.

No. 976G., dated Faridpur, the 31st December 1896.

Memo. by—BABU K. P. SARKAR, Magistrate in charge.

Copy forwarded to the Commissioner of Dacca, in continuation of this office No. 960G., dated the 26th instant.

No. 1855G., dated Dacca, the 6th January 1897.

Memo. by—The Commissioner of the Dacca Division.

Copy of the following submitted to the Government of Bengal, Municipal Department, in continuation of this office No. 1806G., dated 4th January 1897.

No. 963G., dated Barisal, the 31st December 1896.

From—N. D. BRATSON-BELL, Esq., Officiating Magistrate of Backergunge,
To—The Commissioner of the Dacca Division.

In continuation of the Joint-Magistrate's letter No. 962G. of 31st instant, on the subject of water-supply, I have the honour to state that the District Board have in their current year's budget provided the sum of Rs. 8,000 for the construction of tanks. A list of the tanks which will be constructed is annexed, thana by thana.

2. I also give a similar list in respect of khas mahals where Rs. 5,394 have been set aside for tanks this year from the Improvement Fund.

List of tanks provided for in the Khas Mahal Budget for 1896-97.

	Patuakhali	1 tank at Denli.	
	Gulsakhali	1 tank at Kachupatana.	

GANENDRA NATH PAL,
Deputy Magistrate, for Offg. Magistrate.

BACKERGUNGE MAGISTRACY,
The 31st December 1896.

No. 1864G., dated Dacca, the 7th January 1897.

Memo. by—The Personal Assistant to the Commissioner of the Dacca Division.

Copy of the following submitted, in the absence of the Commissioner on circuit, and to avoid delay, to the Government of Bengal, Municipal Department, in continuation of this office No. 1765G., dated 31st December 1896.

No. 80, dated Dacca, the 6th January 1897.

From—L. P. SHIRRES, Esq., Magistrate of Dacca,
To—The Commissioner of the Dacca Division.

WITH reference to the Government Circular No. 58L.S.-G. of the 12th ultimo. copy of which was forwarded with your No. 1685G., dated the 16th idem, asking for quarterly reports of the progress made in this district in collecting and placing on record the chief facts regarding water-supply and the steps taken by District Boards and Municipalities respectively to improve existing sources of water-supply and to open new ones. I have the honour to submit the following first report.

2. The necessary statistics for preparing the registers in Forms I and II to be kept by the District Board are being collected through the agency of the panchayats, and it is expected that the registers will be complete in the present quarter.

As regards the registers to be kept by the municipalities, the Dacca Municipality has employed ticca men to prepare them by making the requisite enquiries. The Chairman of the Narayanganj Municipality has not reported whether he has prepared these registers for his municipality. He has been asked to supply the omission.

3. As to the steps taken by these bodies to improve existing sources of water-supply and to open new ones, I beg to submit herewith copy of a note received from the District Board, dealing fully with the works executed or being executed by it, as also by the Local Boards.

The Dacca Municipality has allowed four additional house-connections, and a few more will soon be allowed by them. A scheme for the supply of unfiltered water by a separate line of pipes for watering the streets and flushing drains and replacing the main pipes of the water works by larger pipes, is also under the consideration of the Commissioners, and they have raised the rate of the house-tax from 8 to 10 per cent., the maximum rate permitted by law, in order to carry out that and other improvements.

4. The Chairman, Narayanganj Municipality, reports that the chief source of drinking water-supply in that municipality is the river Lakhya, which runs through the middle of the town and its khals, and there are five municipal tanks, two Government, three railway and 73 private tanks, and one well within the limits of the municipality. One of the municipal tanks has been reserved for drinking purposes, and the Municipal Commissioners are gradually taking steps under section 200 of the Municipal Act to cleanse, re-excavate or fill up the private tanks, many of which are unfit for drinking purposes and some of which are in a very unwholesome state. They are also trying to introduce tube-wells for the supply of pure drinking water.

5. I beg to report also that steps are being taken to prevent the pollution of some of the smaller rivers and khals of this district through dead bodies and carcasses of animals.

NOTE.

THE works executed by the District Board and the Local Boards of this district in connection with water-supply from the beginning of this year up to date are as follows:—

Ten tube-wells were sunk at the places noted below:—

1. Munshiganj	...	} Munshiganj subdivision.
2. Chatfatia	...	
3. Ichapura	...	
4. Srinagar	...	
5. Dassora	...	} Manickganj subdivision.
6. Dhalairtek	...	
7. Lalitganj	...	
8. Paikarchar	...	} Narayanganj subdivision.
9. Topra	...	
10. Shealo	...	} Manickganj subdivision.

All these tube-wells were successful and supplied good water, except the one at Munshiganj, which was driven through a layer of very fine sand which choked up the pioneer tube and interfered with the flow of water through the tube-well. In addition to the above, four more tube-wells have been lately driven in the Baroni mela ground. They are working very well and supplying good water to the traders and shopkeepers of the Baroni Fair. The total expenditure incurred up to date on tube-wells is Rs. 1,488-14-9.

The Local Boards of Narayanganj, Manickganj and Munshiganj have incurred an expenditure of Rs. 966-4, as detailed below, in excavating tanks and wells within their respective areas:—

	Rs.	A.	P.
Excavation of a well at Putia Bazar by the Narayanganj Local Board	175	0	0
Excavation of a well at Saladah by the Narayanganj Local Board	100	0	0
Excavation of a tank at Rathura by the Manickganj Local Board	500	0	0
Excavation of Madgao tank by the Munshiganj Local Board	191	4	0
Total	966	4	0

The Narayanganj Local Board have also incurred a further expenditure of Rs. 150 in re-excavating old tanks within their respective areas, as detailed below:—

	Rs.
Re-excavation of chur Baghar chur tank	50
Ditto of Satpaika tank	50
Ditto of Goaribhangor tank	50
	150

The Sadar and the Narayanganj Local Boards have allotted further sums of Rs. 300 and Rs. 1,250, aggregating to Rs. 1,550, for improving the existing sources of water-supply, as shown below:—

Sadar Local Board.

	Rs.
Re-excavation of an old tank at Kylih	200
Ditto of a tank at Fatehnagar	106
	306

Narayanganj Local Board.

				Rs.
Re-excavation of a tank at	Majherchar	140
Ditto	ditto	Bawaibs	...	140
Ditto	ditto	Kernogope	...	137
Ditto	ditto	Nayanpura	...	180
Ditto	ditto	Kanchan Rampura	...	140
Ditto	ditto	Salten Sahadi	...	147
Ditto	ditto	Garbari	...	140
Ditto	ditto	Dhanna	...	140
Ditto	ditto	Govindpur	...	136
				1,250
Total				1,556

The Manickganj Local Board have allotted a sum of Rs. 500 for re-excavating the Jenkin's Tank and uniting it with the Civil Court Tank at Dassora, the head-quarters of the Manickganj subdivision. They have also allotted Rs. 600 and Rs. 450 for the re-excavation of two more tanks at Baruna and Baslakol, respectively.

Further sums of Rs. 1,000, Rs. 994 and Rs. 1,250, aggregating to Rs. 3,244, have been allotted by the District Board and the Sadar and Munshiganj Local Boards for opening out new tanks and wells, as detailed below—

				Rs.
Excavation of wells and tube-wells by the District Board	1,000
Ditto	of 40 wells by the Sadar Local Board at 40 different villages	994
Ditto	of 5 tanks by the Munshiganj Local Board at Hachara, Birtara, Deobhog, Dalchatra and Narjananda, at Rs. 250 each	1,250
				3,244

Justice Chandra Madhab Ghosh has expressed his willingness to place his tank at his native village Sologhar, in the Munshiganj subdivision of this district, at the disposal of the District Board, and proposes to contribute half the cost of reclaiming the tank, which has been estimated at Rs. 4,998.

Babu Janaki Nath Rai and Raja Srinath Rai of Bhagyakul have promised to excavate, at a cost of Rs. 5,000, two tanks at Bamankhola and Patabhog in the Munshiganj subdivision.

Raja Rajendra Narayan Rai Bahadur has promised to spend a sum of Rs. 15,000 for improving old tanks and excavating new ones in the Bhowal pargana for the supply of drinking water. It will thus be seen that the total expenditure already incurred and proposed to be incurred amounts to Rs. 33,953-2-9.

S. B. MITTAL,
District Engineer.

No. 814Met., dated Camp Pabna, the 8th January 1897.

From—P. NOLAN, Esq., C.S., Commissioner of the Rajshahi Division,
To—The Secretary to the Government of Bengal, Municipal Department.

- In continuation of this office letter No. 14Met.R., dated the 1st January 1897
- I have the honour to forward in original a further report received from the, Magistrate of Rajshahi, showing the progress made in his district in collecting and placing on record the chief facts regarding water-supply, &c.

No. 1385J., dated Baolia, the 2nd January 1897.

From—N. K. Bose, Esq., Magistrate of Rajshahi,
To—The Commissioner of the Rajshahi Division.

In continuation of this office letter No. 1350J., dated the 27th ultimo, I have the honour to forward copies of the reports submitted by the Municipal Board in this district, regarding the steps they have taken to improve existing sources of water-supply, &c.

No. 173, dated Nator, the 21st December 1896.

From—BABU MOHIM CHUNDER ROY, Chairman of the Nator Municipality,
To—The Magistrate of Rajshahi.

With reference to your memorandum No. 1334J., dated the 19th current, forwarding a copy of Government Circular No. 581.S.-G., dated the 12th instant, I have the honour to state that, as instructed in circular No. 7T M., dated the 15th May last, two registers in Forms Nos. I and II have already been prepared. It will be seen in Register No. I, copy of which is submitted herewith, that in all the wards except the last there are wholesome tanks. To remove this want of Ward No. XII, the Collector of the district was requested, in February 1895, to take steps under the Land Acquisition Act for acquiring a plot of land which had been selected for a tank. The case is, I think, still pending in the Court of the District Judge. The Municipal Commissioners will commence excavation as soon as the plot is acquired.

2. I further beg to add that the Municipal Commissioners, at their meeting held on the 19th current, resolved that another tank should be dug in Ward No. X, and have applied to the Subdivisional Officer of Nator for acquiring a plot of land selected for the purpose with as little loss of time as possible.

MOHIM CHANDRA ROY,
Chairman.

The 21st December 1896.

No. 214M, dated Rampur Boalia, the 28th December 1896.

From—SYED TURFUZUL HOSEIN, Vice-Chairman, Rampur Boalia Municipality,
To—The Magistrate of Rajshahi.

WITH reference to your memorandum No. 1334J., dated 19th instant, I have the honour to submit herewith a statement in Form I, prescribed by Government Circular No. 7T.M., dated 15th May last, showing the sources of water-supply in each mahallah of this municipality. With a view to improving the existing sources of water-supply, the Municipal Commissioners are trying to take on lease one or two tanks in each mahallah, in order to set apart the same for drinking or bathing purposes under section 199 of the Municipal Act. Notices under section 200 of the Act have been issued to the proprietors of most of the unwholesome tanks, and in compliance with the requisition of the said notice a big tank situated in a crowded locality is being re-excavated. Steps are also being taken to enforce compliance in many other cases. The Commissioners have also sunk a well in a place where the want of good drinking water had been keenly felt. I beg further to state that, situated as this town is on the bank of a large river (Padma), the residents of many mahallas obtain their water-supply from it. But since last year a big *chur* having been formed in front of the town after the flood season, the people of those mahallas are being put to great inconvenience for water-supply. The Commissioners, last year, made arrangements for the supply of drinking water from the main stream by putting up a bamboo bridge over the stagnant channel below the town, so as to enable people to draw water from the flowing stream as well as by bringing water therefrom by boats.

Statement showing the sources of water supply in each mahalla of the Rampur Boalia Municipality.

Serial number of mahalla.	Population by last census.	NAME OF MAHALLA.			SOURCES AND CHARACTER OF UNFILTERED WATER-SUPPLY.										OWNERSHIP OR CONTROL.										Is permanent supply adequate to population.	REMARKS.

RAMPUR BOALIA,
The 28th December 1896.T. HOSEIN,
Chairman.

No. 1098L., dated Bhagalpur, the 13th January 1897.

From—W. B. OLDHAM, Esq., Commissioner of the Bhagalpur Division and Sonthal Parganas,

To—The Secretary to the Government of Bengal, Municipal Department.

WITH reference to Government Circular No. 58L.S.G., dated the 12th December 1896, calling for the submission of the first quarterly report regarding water-supply in each district of this Division by the 1st instant, I have the honour to explain that the delay in this instance has been caused by the non-receipt of the report from the Bhagalpur District Board until the 9th instant.

2. *Preparation of Registers.*—The two registers in Forms I and II, prescribed by paragraph 2 of Circulars Nos. 7T.M. and 8T.M., have been prepared by the District Boards of Monghyr and Malda as well as by all the Municipalities of this Division (unless those of Monghyr and Old Malda, from which no report on this point has been received, are exceptions).

The Purnea District Board obtained the details of sources of water-supply from the police, but the Magistrate-Chairman found them, while on tour, defective in many particulars, and they are being revised. Mr. Bernard thinks it will take some time to prepare correct lists. In the district of Bhagalpur the registers are being prepared by the Local Boards. The Deputy Commissioner of the Sonthal Parganas has not as yet submitted any report of the action taken by him with respect to the area outside the Municipalities.

3. *Water-supply and improvements.*—The District Board of Monghyr have instructed the Local Boards to construct wells in the localities where the want of water is greatest. A sum of Rs. 7,900 has been set aside in the current year's budget for the purpose. It is also proposed to excavate certain tanks as test relief works during the current year. It is reported that the existing sources of water-supply in the Jamalpur Municipality are quite sufficient to meet all the requirements of the town. The Magistrate has not stated anything about the Monghyr Municipality, but the Commissioners of this Municipality are considering the question of having water-works for the town.

4. The Magistrate of Bhagalpur has not yet submitted any official report as to the sufficiency of the water-supply in the District Board area, but I am aware that he considers no deficiency to exist. In Bhagalpur there are the water-works. Wards Nos. 1 to 3 and part of Wards Nos. 4 and 6 of this Municipality have been supplied with filtered water from some time past. The water-works are being extended to the other wards, and the extension is likely to be completed within this month. The Chairman of the Colgong Municipality reports that "most of the people of that small town use Ganges water for drinking purposes. The permanent water-supply is quite sufficient for the inhabitants of the Municipality, and the scarcity of water is never felt here." The Magistrate considers that the water-supply in both these Municipalities is sufficient.

5. The District Board of Purnea has in the current year's budget "provided Rs. 3,000 for repair of wells and Rs. 300 for new wells. Some wells have been cleaned and some estimates for putting up tube-wells have lately been sanctioned. Mr. Bernard writes: "The District Board's object in spending money on water-supply will probably be to provide purer water than is contained in the village wells in which everybody indiscriminately dips his *lota*. There cannot be dearth of drinking water for human beings in this district. Different kinds of tube-wells have been set up in order to see whether any will be suitable for use in villages, the object being that when the District Board know where to begin it may know what kind of well to dig or put down."

In the Purnea Municipality several wells were cleansed in the beginning of the last hot weather. The Magistrate reports that there is no scarcity of water in this Municipality. The number of wells in each ward of the Kishanganj Municipality is said to be sufficient. In this Municipality two masonry wells and two ring wells have been sunk during the current year.

6. The Magistrate of Malda reports that "steps are being taken by the District Board for the preparation of estimates for excavation of certain tanks in the Barind tracts." These works it is proposed to carry out under the Famine Code rules. At present there is no scarcity of water in the district. The Chairman of the English Bazar Municipality in this district reported that

there is no scarcity of water in that town, "the usual supply of water being met from the river Mahananda." The Chairman of the Old Malda Municipality also writes that "as the permanent supply of water of this town is good and quite adequate to population, or rather abundant in every ward of the Municipality, it has hardly been necessary to take any steps to improve existing sources of water-supply or to open new ones."

7. In the district of Sonthal Parganas, in the Deoghur Municipality the existing sources of water-supply are said "to be sufficient and do not admit of improvements at present." The Chairman of the Sahebganj Municipality reports that "no difficulty is felt by the people for the supply of water; it is obtained both from the Ganges river and wells, but the latter are chiefly depended on when the river recedes." "In a large number of houses," the Chairman adds, "the residents have wells of their own, some of which are pucca and others kutcha, but the owners are being induced to make them all pucca gradually. General supervision is kept over all the wells in the town, and every possible care taken as regards the wells in private houses." A certain portion of the fund is set apart every year to meet the wants. There are two tanks, one of which belongs to the Municipality and the other to a private resident. The water of the former is unfit for use, and steps are being taken to fill it up, while that of the latter is, in the local opinion, fit for use. The Deputy Commissioner is being written to for early report on the area outside the Municipalities.

The foregoing, however, shows meanwhile of how much less importance the whole subject is in this Division than in Western and Central Bengal, or, to take four districts which I know very well, than in the Burdwan, Midnapore, Birbhum and Nuddea districts. The southern part of the Division is all rolling country with springs in every prolonged depression. In the northern part the water lies very near the surface. The drought in the first-half of 1896 caused no inconvenience in this Division, except in some small areas in the Sonthal Parganas which approach to the Birbhum and Murshidabad districts in character.

Secretary to the Government of Bengal.

STATISTICS OF THE SEA-BORNE TRAFFIC OF CALCUTTA IN FOOD-GRAINS.

No. 131 Statistics.—The following memorandum and statements are published for general information.

STATISTICAL DEPARTMENT,
The 18th January 1897.

M. FINUCANE,
Secy. to the Govt. of Bengal.

Memorandum.

The sea-borne import and export traffic of Calcutta in food-grains during the week ending the 7th January 1896 and 1897 are shown in the following statement:—

		1ST TO 7TH JANUARY			
		1896.		1897.	
1		2	3	4	5
		Cwts.	Mds.	Cwts.	Mds.

Imports.—The different staples comprising the import traffic are shown in the table below, and the figures for the week are compared with those for the corresponding period last year:—

		1ST TO 7TH JANUARY			
		1896.		1897.	
1		2	3	4	5
		Cwts.	Mds.	Cwts.	Mds.
<i>Food-grains.</i>					
Rice	...	18,295	24,901	69,184	94,167
Paddy	...	6,586	8,964	6,695	9,113
Wheat	...	758	1,032
Gram and pulses	...	515	701	16,661	22,677
Other food-grains, such as jowar, barley, oats, &c.	...	2	3	1,809	2,462
Total	..	26,156	35,601	94,349	1,28,419

Out of the total traffic, 73·32 per cent. appertain to cleaned rice, of which 61,357 cwts. were imported from Burma alone. Between 1st November 1896 and 7th January 1897, so much as 163,510 cwts., or 222,555 maunds of cleaned rice, were shipped from Burma for Calcutta, and this grain is now being carried by rail to all parts of the country. The imports from Chandelali were less than half those in 1895. Under gram and pulses, the Madras Presidency imported the largest quantity, viz., 15,713 cwts., against nil in 1896.

Exports.—In the following statement the total quantity of each kind of food-grains exported by sea during the 1st week of January 1897 is compared with the figures for 1896:—

1	1st to 7th JANUARY			
	1896.		1897.	
	2	3	4	5
	Cwts.	Mds.	Cwts.	Mds.
<i>Food-grains.</i>				
Rice	99,702	1,35,705	46,205	62,890
Paddy	169	230
Wheat	993	1,352	563	766
Gram and pulses	18,030	24,541	6,130	8,344
Other food-grains, such as jowar, barley, oats, &c.	21	28	44	60
Total ...	118,915	1,61,856	52,942	72,060

The decrease in the rice trade with foreign ports was merely 19·16 per cent., although there were heavy fluctuations in individual items; the details show that to nine ports small shipments were made during the period under report, against nothing in 1896, while in the case of five ports there was no export whatever, against small consignments in 1896. In the coasting trade, the falling off amounted to no less than 92·63 per cent., chiefly to Bombay (21,033 cwts.) and Madras (20,576 cwts.). As regards gram and pulses, the Madras Presidency, which imported largely during 1895, became the chief exporters during the period under report.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below.

STATISTICS OF THE SEA-BORNE TRAFFIC OF THE MINOR PORTS
IN BENGAL IN FOOD-GRAINS.

No. 132, Statistics.—The following memorandum and statements are published for general information.

STATISTICAL DEPARTMENT,
The 18th January 1897.

M. FINUCANE,
Secy. to the Govt. of Bengal.

MEMORANDUM.

THE comparative statements below give statistics of the import and export trade of the minor ports of Chittagong, Narayanganj, Balasore (including both Balasore and Chandbali), Cuttack and Puri during the week ending 21st December 1896, as compared with the trade of the corresponding period of 1895 :—

IMPORTS.

Ports			From Foreign ports.	From Indian ports.	Total.	
					Cwts.	Mds.
Chittagong ...	{ 1895	792	792	1,078
	{ 1896	358	358	487

	{ 1896	580	580	789

EXPORTS.

Ports.			To Foreign ports.	To Indian ports.	Total.	
					Cwts.	Mds.
Chittagong ...	{ 1895	66,291	66,291	90,229
	{ 1896
Narayanganj ...	{ 1895
	{ 1896
Balasore ports...	{ 1895	5,335	39,482	44,817	61,001
	{ 1896	14,329	14,329	19,503
Cuttack ...	{ 1895	7,343	10,066	17,409	23,696
	{ 1896	14,113	14,113	19,209
Puri ...	{ 1895
	{ 1896
Total ...	{ 1895	12,678	1,15,839	1,28,517	174,926
	{ 1896	14,113	14,329	28,442	38,712

The largest decrease occurred in the exports from the Chittagong port, which supplied 29,686 cwts. of rice and 34,869 cwts. of paddy to Coochin in the Madras Presidency in 1895, but nothing was shipped to any port during the period under report. From Balasore ports shipments of rice to Mauritius were nil, while Calcutta received only 10,806 cwts. of rice and 3,213 cwts. of paddy, against 19,730 cwts. and 6,473 cwts., respectively, in the preceding year. Transactions in Cuttack were limited to Mauritius alone, which received 14,113 cwts. of rice, against nil in 1895. In the case of Narayanganj and Puri, there was no trade whatever in food grains during the periods under report.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below:—

WEATHER AND CROP REPORT.

For the week ending the 18th January 1897.

Burdwan.—Rainfall nil. Weather hotter than usual at this time of year. *Aman* harvest practically over. *Rabi* crops want rain. Fodder and water sufficient at present. Common rice selling as follows:—

			Srs. a.	Srs. c.	
Sadar	10 0	to 12 0	} per rupee.
Kalna	10 0	to 11 0	
Katwa	10 10	to 10 15	
Raniganj	10 4	

Birbhum.—No rain. Weather seasonable. Price of common rice at Sadar 9 seers 6 chitaks, and Rampur Hat 10 seers 4 chitaks per rupee.

Bankura.—Rainfall nil. First part of the week cold, latter part hot. Threshing of *aman* continues. Prospect of *rabi* not favourable. Sugarcane doing well. Fodder and water sufficient, except in portions of thana Gangajalghati. Sporadic cases of cow-pox in Gangajalghati. Rice selling at 11½ seers per rupee both at Bankura and Vishnupur.

Midnapore.—No rain. Weather seasonable. Harvesting of *aman* not quite finished. Indigo, linseed, and rape-seed have dried up in Jhargram for want of rain. Prospects of *rabi* and other crops getting worse. Cattle-disease reported from Bampur, Naraingarh, Keshpur, Dantan, and Garhbata. Common rice selling as follows:—

			Srs	
Sadar	{ Old rice 9 New „ 10	} per rupee.
Contai	12 to 13	
Tamluk	9 to 12	

Hooghly.—No rain. Harvesting of *aman* going on. *Rabi* and sugarcane suffering for want of moisture. Common rice sells from 8 to 11 seers per rupee.

Howrah.—Rainfall nil. Weather seasonable. Rain wanted for *rabi* crops. Harvesting of *aman* paddy still continues. Fodder and water sufficient. Common rice sells from 9 to 11 seers per rupee.

24-Parganas.—Rainfall nil. Weather cool and bright. Harvesting of *aman* paddy nearly finished; it is estimated to yield 10½ annas. Prospects of *rabi* crops and sugarcane unfavourable. *Kala* and mustard are being harvested. Lands in places are being tilled for vegetable cultivation. Fodder and water sufficient. No cattle-disease. Common rice sells as follows:—

			Srs.	
Sadar	8 to 11	} per rupee.
Barasat	10	
Basirhat	10	
Diamond Harbour	11	

Nadia.—Rainfall nil. Want of rain greatly felt by the standing *rabi* crops. Prospects bad. *Mug*, *kala*, and *arhar* are being harvested. Water scarcity felt in places. No want of fodder yet. Cattle-disease reported from Meherpur subdivision. Common rice sells at 8 to 11 seers per rupee. Latest price of rice where test-works are open is 10 seers per rupee. Numbers attending test-works are as follows:—

9th January	768
10th „	974
11th „	1,171
12th „	1,291
13th „	1,401
14th „	1,437

Number of persons who received gratuitous relief at police-station Kaliganj is 233 from 8th to 14th, at Tehatta 419 from 8th to 17th, and at Daulutpur 35 from 11th to 16th January. Number on relief works on Saturday, 16th—Sadar subdivision—men 1,601, women 284, and children 880—total 2,765; Meherpur subdivision—men 699, women 104, and children 608—total 1,411; gratuitous relief—men nil, women 12, children nil—total 12.

Murshidabad.—No rain. Weather seasonable. Harvesting of *aman* finished. State of *rabi* crops not favourable. Indigo and mulberry doing well. Fodder sufficient. Common rice sells as follows:—

			Srs.	
Sadar	9½	} per rupee.
Jangipur	10	
Kandi	10½	

Jessore.—Mornings foggy and days hot up to 16th; clear and colder since then. Harvesting of *aman* almost completed. Rain badly wanted for *rabi* crops and for transplantation of *boro* seedlings. Fodder and water available. No cattle-disease. Common rice sells as follows:—

				Srs.	
Jessore	10	} per rupee.
Jhenida	9	
Magura	9 to 9½	
Narail	10	
Bongaon	10	

Khulna.—Rainfall nil. *Aman* harvest nearly over; crop below the average. Rain wanted for *rabi* and *boro* crops. Common rice sells as follows:—

				Srs.	
Khulna	9 to 11	} per rupee.
Bagerhat	11	
Satkhira	10	

Wages calculated at 10 seers for staple food-grain. Number of relief-works open, two. number of persons employed on relief-works in Satkhira subdivision for week ending 13th—men 94, women 24, children 103—total 221; Gratuitous relief—men 10, women 48, children 42—total 100.

Rajshahi.—*Boro* paddy being sown in thana Manda. Cultivation going on for sugar-cane and jute. Prospects of standing crops not good. Fodder and water available. Common rice selling from 8½ to 10 seers per rupee.

Dinajpur.—No rain. Weather seasonable. Harvesting of winter rice nearly over. Condition of standing crops fair. No report of any cattle-disease, nor any complaint for fodder and water. Common rice sells from 9 to 12 seers per rupee.

Jalpaiguri.—Rainfall nil. Weather cold. Harvesting of *haizanti* paddy finished. average outturn 7 annas. *Rabi* crops doing fairly well. No want of fodder and water. Average price of common rice 8½ seers per rupee.

Darjeeling.—Rainfall at Sadar 01, Kurseong 04. Weather seasonable. Hills—Barley and wheat progressing favourably; *tori* coming to maturity; potatoes being taken up. *Teras*—*Haizanti* paddy almost harvested; mustard progressing favourably; tobacco doing well. Coarse rice selling:—

					Srs.	
Hills	8	} per rupee.
Tera	9	

Bhutia 14 seers per rupee.

Rangpur.—No rain. Harvesting of *aman* still going on. Ploughing for *aus* continues. Rain much wanted. Common rice selling at 8 to 10 seers per rupee. Fodder and water sufficient.

Bogra.—No rain. Weather clear and cold. Harvesting of winter rice finished. Oil-seeds being gathered. Rain much wanted for the maturity of the late sown oilseeds and pulses. Fodder and water sufficient. Common rice sells at head-quarters 9½ seers, and in the interior from 8½ to 10½ seers per rupee.

Pabna.—Weather seasonable. Prospects of *rabi* crops unchanged. Rain required. Rice selling from 8 to 10 seers per rupee. Fodder sufficient.

Dacca.—Rainfall nil. Weather seasonable. Prospects of *aman* not very favourable. Transplantation of *boro* paddy going on. Fodder available. No cattle-disease. Common rice sells at 10 to 11 seers per rupee.

Mymensingh.—Rainfall nil. Weather seasonable. Harvesting of *aman* paddy finished; average outturn 10 annas. Prospects of standing crops fair. Common rice sells between 8 and 11 seers per rupee.

Faridpur.—No rain. Weather seasonable. Prospects as before. Rain badly wanted for the *rabi*. Common rice selling at 8 to 11 seers a rupee. Fodder and water available

Backergunge.—Rainfall nil. Weather foggy in morning. Prospects of standing crops fair. *Rabi* crop requires rain. No cattle-disease. Price of common rice (new *aman*) varies from 8 to 11½ seers per rupee.

Tippera.—Weather cooler. Transplantation of *boro* still continues. Prospects of *rabi* crops not improved. Fodder and water available. Prices of rice—

	Srs.	
Sadar	11 to 12½	} per rupee.
Brahmanbaria	10 to 12	
Chandpur	10 to 12	

Noakhali.—No rain. Harvesting of *aman* completed. Prospects of *rabi* crops not good. Fodder and water available. No cattle-disease. Price of rice 10½ to 12 seers per rupee.

Chittagong.—Rainfall nil. Weather dry. *Rabi* crops suffering for want of rain. Prospects unchanged. Water and fodder fairly sufficient. Rice selling at 8 to 10 seers per rupee.

Patna.—Harvesting of paddy finished; threshing in progress. Prospects of *rabi*, poppy, and tobacco favourable. Millets being sown. Water and fodder for cattle sufficient except green fodder in Bihar. Price of common rice at Patna 10½ seers per rupee. Number on test-works on Saturday, 16th—men 306, women 194, and children 109—total 609. Gratuitous relief nil.

Gaya.—Prospects of *rabi* and poppy good. Price of common rice at Sadar 9 seers per rupee.

Shahabad.—No rain. Prospects of *rabi* continue favourable. Poppy doing well. Prices are—Common rice 10 seers, pea 10 seers, *khasra* 12½ seers per rupee. Number on relief works on Saturday, 16th—men 559, women 613, children 268—total 1,440.

Saran.—Prospects of *rabi* good. Average price of *makai* 10 seers 3 chitaks per rupee. Numbers on relief-works on Saturday, 16th—men 4,411, women 6,347, children 5,761—total 16,522; Gratuitous relief—men 901, women 3,015, children 794—total 4,710. Hathwa relief-works—men 1,105, women 1,251, children 730—total 3,086. Poor-houses 301; doles 577; Manjha poor-house 66. Chapra town gratuitous relief—men 255, women 472, children 210—total 937; Revolganj gratuitous relief—men 45, women 200, children 6—total 251.

Champanan.—Rainfall .05 at Motihari and .07 at Bettiah. *Rabi* crops well promising, though very backward, except where sown on irrigation. Weeding going on. Prices practically same as last week. Common rice and maize sell at Motihari 8½ and 10 seers per rupee respectively, and at Bettiah 8½ and 10½ seers respectively. Relief returns not all received; those received show on works—men 43,866, women 37,566, children 26,854—total 107,786; gratuitous relief—men 1,044, women 2,001, children 1,099—total 4,144.

Muzaffarpur.—No rain. Standing crops doing well. Prices are—Common rice 8 seers, wheat 8 seers, *makai* 10 seers, barley 10 seers, gram 10 seers, *rahar* 11 seers. *Makai* and *rahar* fix the relief prices. Numbers on relief works on Saturday, 16th—Sadar subdivision—men 1,084, women 221, children 350—total 1,655; Hajipur subdivision—men 684, women 826, children 683—total 2,193; Sitamarhi subdivision—men 681, women 204, children 242—total 1,127; Gratuitous relief—Sitamarhi subdivision—men 505, women 244, children 165—total 914.

Darbhanga.—Rainfall at Sadar on 15th .02, Madhubani .05. *Rabi* crops continue favourable. Prospects of standing crops have since improved in Madhubani. *Rabi* flowering. Pressing of sugarcane continues. Numbers on relief works on Saturday, 16th—Sadar subdivision—men 14,559, women 14,527, children 5,507—total 34,593; Madhubani subdivision—men 33,845, women 21,681, children 7,642—total 62,168; Samastipur subdivision—men 1,018, women 183, children 100—total 1,356; Gratuitous relief—Sadar subdivision—men 1,205, women 2,233, children 1,109—total 4,567; Madhubani subdivision—men 6,081, women 15,131, children 7,573—total 28,785; Samastipur subdivision—men 317, women 755, children 119—total 1,191; Darbhanga Raj relief works—men 1,103, women 167, children 168. Raj returns incomplete.

Monghyr.—No rain. Very cold with strong west wind. Standing crops doing well. *Rabi* prospects fair and weeding continues. Sugarcane pressing in progress. Sufficient fodder and water. Prices of common rice:—

	Srs.	
Monghyr	9 to 9½	} per rupee.
Begusarai	9½	
Jamui	8 to 9½	

Bhagalpur.—No rain. Weather seasonable. Harvesting of winter rice is at an end. Wheat, barley, gram, linseed, *arhar*, *khasra*, and *kurthi* are not in bad condition. No cattle-disease. Fodder and water sufficient. Coarse rice sells as follows:—

	Srs. c.	
Sadar	10 2	} per rupee.
Banks	10 0	
Madhipura	10 0	
Supaul	10 8	

Purnea.—No rain. Reaping of paddy completed. Standing *rabi* crops doing fairly well. A few cases of cattle-pox reported from Araria subdivision. Fodder and water sufficient. Common rice selling as follows:—

				Srs.	
Sadar	10	} per rupee.
Kishanganj	9 to 10	
Araria	11 to 12	

Malda.—No rain. Weather seasonable. Threshing of winter paddy about to be finished. Standing *rabi* crops doing well. Fodder, and water sufficient. Common rice selling from 9 to 11 seers per rupee.

Sonthal Parganas.—No rain. Dews scanty. Prospects of crops unchanged. No cattle-disease. Fodder sufficient. Prices everywhere on the rise. Rice 10 to 11 seers per rupee except in Rajmahal, where it is 7½ seers; maize 12 to 16 seers except in Dameer, where it is 10 seers.

Cuttack.—Rainfall nil. Weather seasonable. Harvesting of *guru sarad* and *rabi* still going on. *Dalua* being transplanted. Condition of cattle generally good. Fodder sufficient. Common rice sells as follows:—

				Srs. c.	
Cuttack	11 13	} per rupee.
Jajpur	14 7	
Kendrapara	14 7	
Banki	15 12	

Balasore.—Rainfall nil. Weather seasonable. Threshing of *sarad* rice continues. *Rabi* crops withering for want of rain. *Dalua* crop flourishing. Sugarcane being pressed. Price of rice varies from 10 to 16 seers per rupee in the mufassal. Rice sells at 1½ and 14 seers per rupee at Balasore and Bhadrak respectively. Sporadic cases of cattle-pox in some chaklas. Fodder and water sufficient.

Angul.—No rain. Prospects of crops, condition of cattle, and prices of rice same as in last week.

Puri.—No rain. Prospects of winter rice and *rabi* same as reported before. Fodder sufficient. Price of common rice stationary.

Hazaribagh.—No rain. Weather cool. Prospects of sugarcane and poppy fair. Common rice (new) 8 to 9 seers and (old) 6 to 7 seers per rupee.

Lohardaga.—Ploughing stopped for want of moisture. Rice sells at Ranchi 8½ to 9 seers per rupee, and in the interior from 9 to 10½ seers. Fodder and water sufficient. No report of cattle-disease.

Palamanu.—Rainfall nil. Weather very warm for the season. *Rabi* doing well. Prices much the same as reported last week. Common rice sells from 8 to 11 seers per rupee. Cases of want being reported and enquired into.

Manbhum.—Rainfall nil. Weather seasonable. Prospects of crops on the ground as before. Cattle disease reported from thanas Ohas, Purula, and Raghunathpur. Fodder and water sufficient at present. Average prices of common rice:—

				Srs	
Sadar	8 to 10	} per rupee.
Gobindpur	Old rice 9	
				New " 10	

Stock of food-grains sufficient at present.

Singhbhum.—No change in prospects or prices. Rice plentiful.

General Summary.—Except for light showers in the districts of Darjeeling, Champaran, and Darbhanga, there was no rain during the week. The harvesting of winter rice is being completed. In Bihar the *rabi* and poppy crops are generally reported to be doing well. Elsewhere the *rabi* crops are said to be very poor save in portions of the Rajshahi and Dacca Divisions, where they are expected to yield a fair outturn. Oilseeds and pulses are being gathered. Sugarcane pressing is going on in some districts. Spring rice is being transplanted, but wants rain in parts. The price of common rice shows a tendency to fall in some districts and to rise in others. In the distressed districts the prices of the food-grains on which the relief wages are based are—Nalia (common rice) 10 seers, Khulna (common rice) 10 seers, Patna (common rice) 10½ seers, Shahabad (common rice) 10 seers, Saran (Indian-corn)

10 seers 3 chitaks, Champaran (Indian-corn) 10 seers, Musaffarpur (Indian-corn) 10 seers, Darbhanga not reported. The numbers on relief works and in receipt of gratuitous relief on Saturday, the 16th January, were—

Relief works—

Nadia	...	4,176 (men 2,300, women 388, children 1,488).
Khulna (13th)	...	221 (men 94, women 24, children 103).
Patna	...	609 (men 306, women 194, children 109).
Shahabad	...	1,440 (men 559, women 613, children 268).
Saran	...	16,522 (men 4,411, women 6,347, children 5,764).
Champaran	...	107,786 (men 43,366, women 37,566, children 26,854).
Muzaffarpur	...	4,975 (men 2,449, women 1,251, children 1,275).
Darbhangha	...	98,117 (men 49,422, women 35,391, children 13,304).

Total for the whole Province ... 233,846, against 136,979 in the previous week.

Gratuitous relief—

Nadia	...	12 (women).

The mean pressure of the seven days 29.932

The average pressure of the corresponding period for 24 years, Surveyor-General's Office 30.028

The total number of hours of bright sunshine 58.7

The maximum possible number of hours of sunshine 75.8

The mean temperature of the seven days 69.8

The average temperature of the corresponding period for 24 years, Surveyor-General's Office 66.7

The extreme variation of temperature 35.2

The maximum temperature 87.7

The highest velocity of the wind in one hour 10

The mean relative humidity 71

The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office 70

The total fall of rain from 10th to 16th January 1897 Nil

The average fall of the corresponding period for 24 years, Surveyor-General's Office 0.04

The total fall from 1st to 16th January 1897 Nil

The average fall of the corresponding period for 24 years, Surveyor-General's Office 0.13

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed, open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official Tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

Δ dew; \equiv fog;

SCARCITY IN BENGAL.

No. 162 Agri. (Fam.).—The 22nd January 1897.—The following paper is published for general information.

M. FINUCANE,
Secretary to the Govt. of Bengal.

No. 118 Fam. (Agri.), dated Calcutta, the 15th January 1897.

From—M. FINUCANE, Esq., Secretary to the Govt. of Bengal, Revenue Dept.,
To—The Secretary to the Government of India, Revenue and Agricultural Dept.

IN continuation of this office letters No. 5259 Agri., dated 16th December 1896, and No. 5552 Agri., dated the 30th December 1896, I am directed to submit herewith a copy of a report from the Commissioner of the Patna Division, No. 13G., dated the 5th January 1897, with enclosures, and statements A and B required by section 29 of the Bengal Famine Code, containing information regarding famine and relief operations during the four weeks ending 26th December 1896 in the districts of the Patna Division, together with the following remarks on the present position of affairs in that Division. I am also directed to append in paragraphs 11 to 15 below a brief statement of the prospects in other Divisions.

2. *The recent rainfall and its effects.*—As the Government of India are aware, rain fell in all the districts of the Patna Division between 25th December and 1st January. The following statement shows the rainfall during the period at each head-quarters and subdivisional station:—

Patna	Bankipore	... 23	Saran	Clapra	... 21
	Barh	... 22		Siwan	... 41
	Bihar	... 30		Gopalganj	... 79
	Dinapore	... 15		Motihari	... 14
Gaya	Gaya	... 51	Champaran	Bettiah	... 38
	Jahanabad	... 15		Muzaffarpur	... 22
	Aurangabad	... 51		Sitamarhi	... 73
	Nawada	... 41		Hajipur	... 17
Shahabad	Arrah	... 23	Darbhanga	Darbhangha	... 09
	Buxar	... 37		Madhubani	... 23
	Sasaram	... 36		Samastipur	... 29
	Bhabhua	... 35			

The rain fell in those light and broken showers which are especially beneficial to *rabi* crops, and, as a consequence, the Commissioner is able to repeat with greater confidence his estimate of the outturn of these crops which was reproduced in paragraph 3 of my letter of the 16th December, and which was based on the hope of a normal winter rainfall such as has now

	Annas.
Patna	... 13
Gaya	... 16
Shahabad	... 16
Muzaffarpur	... 10
Champaran	... 8
Saran	... 8
Darbhangha	... 8

commenced and may be hoped to continue. That estimate is repeated in the margin for facility of reference. The rainfall has not, however, had the effect of lowering the prices of food-grains. These are on the whole stationary, but in Saran, Muzaffarpur, and now in Champaran the price of maize has risen and approximates closely to that of rice. It is consequently impossible to reduce, but has rather been found necessary to increase, the estimates of areas likely to be affected by distress. These tracts depend for the most part upon the rice crop, and for that the recent rain was of course much too late to be of any benefit. It may be said, in short, that prospects in the Division are generally unchanged since the submission of the last monthly report, but that the timely rainfall has tended to confirm the previous forecast of the *rabi* crop.

3. *Estimates of areas and population affected.*—*Patna district.*—The area of 229 square miles, with a population of 420,092, which was reported as affected by distress in paragraph 5 of my letter of 16th December, must still be so regarded. Four test works were open in this tract during the last week of the period now under report.

Shahabad district.—In paragraph 4 of my letter of 15th December it was stated that the rainfall of November might possibly be found to have removed from the fear of distress an area in the Bhabhua subdivision of Shahabad, which was then being visited by Mr. Bourdillon; this area, of 400 miles with an estimated population of 115,000, was, however, included in Famine Statement A for November. This area and population have again been included in the statement now submitted; but only one relief work was open in the tract on the last day of the period under report, with 795 labourers, and it is clear that the demand for work there is not now urgent.

Saran district.—In paragraph 6 of my letter of 15th December, the affected area in Saran was estimated to be 766 square miles, with a population of 665,830. Mr. Earle, the Collector, and Mr. Bourdillon, the Commissioner, have now raised their estimate to an area of 880 square miles, with a population of 779,705. The increase in area is due chiefly to the inclusion of certain scattered rice-producing tracts in the Sadar subdivision, but the present estimate is only provisional, pending the completion of a detailed scarcity map which is being prepared by the Settlement Department, and as such the Lieutenant-Governor has accepted it.

Champaran district.—This district continues to be the most seriously affected of all. In paragraph 7 of my letter of 15th December it was reported that three tracts (Ramnagar, Araraj, and Madhuban), with an area of 570 miles and a population of 271,415, required immediate relief; and an area of 2,022 square miles, practically the whole remainder of the district, was placed in the "less seriously affected" class. The local officers now

estimate the area immediately affected at 1,242 square miles, with a population of 729,120; and the Lieutenant-Governor is compelled to accept that estimate. This area is more than one-third the total area of the district, and is of the same general description as the three tracts in which serious distress first appeared; it is divisible into three well-defined portions, each of which has one of the three tracts above mentioned for its centre.

Muzaffarpur and Darbhanga districts—The estimates of area likely to be affected in these districts have not been changed since the previous month.

A revised famine map of the Division is annexed.

4. *Relief works in the four northern districts*.—During the last week of the period under report there was a great and sudden increase in the numbers employed on relief works in the districts of Champaran and Darbhanga, with the result that the arrangements for the maintenance of discipline were to some extent thrown out of gear, and that the tasks exacted were consequently insufficient. Maximum and minimum wages are being paid, which are calculated in accordance with section 104 of the Famine Code upon the prices of food-grains shown in columns 12 to 16 of Famine Statement A hereto annexed. When the people flock in crowds to relief works there must inevitably be some confusion at first; but every effort has been made to restore discipline, and Sir Alexander Mackenzie understands that this end has now been generally attained. The Lieutenant-Governor has, in my letter No. 75 Agri., dated 12th January, 1897, of which I am directed to submit a copy herewith, passed orders which he trusts will secure that sufficient, and as far as possible uniform, tasks will be exacted in all the affected districts, and that the provisions of the Famine Code will be strictly adhered to in all respects. Tables of tasks prepared by the Hon'ble Mr. J. G. H. Glass, C.I.E., Chief Engineer to this Government, have recently been circulated. His Honour has also, in the letter of the 12th January, accepted the view of the Commissioner and Collector, that, having regard to the peculiar circumstances of Saran—its dense population and the very large proportion of its adult males who are absent at work in other districts—the programme of relief should there be, first, poor-houses, secondly, charitable relief, and thirdly, large central relief works.

The number of relief works open in the four districts at the close of the period was 56, and on the 2nd January, 84; they consisted mostly of road-making and the excavation of tanks.

The mapping-out of relief charges and circles has been completed in Champaran and Darbhanga, and practically completed in Saran and Muzaffarpur. The Collectors of the two former districts have had some difficulty in securing Circle Officers of the proper stamp.

5. *Private relief works*.—Private relief works were established on a large scale and at their own cost by leading indigo-planters and by the Bettiah Raj in Champaran, as was reported in paragraph 7 of my letter of 16th December. A daily average of 9,165 persons was relieved at these works during the second fortnight of December. These works, which were opened temporarily in order to provide for the immediate necessities of the people, are now being replaced by works carried on at the public expense; but Government is under an obligation to the gentlemen who came forward to fill the gap before its own arrangements could be completed. In Darbhanga district relief works have been opened by the Maharaja, but returns are not yet available. In Saran, the Hutwa Raj (now under the Court of Wards) has opened six works, and a few small works have been opened by zamindars in this district and in Muzaffarpur.

6. *Poor-houses and village relief*.—No Government poor-houses were working during the period under report, but some have been opened since its close, and more are being actively organized. They are especially needed in Saran, as has above been observed. Private poor-houses have been opened in a few places. Measures are being organized for the provision of work to artisans and women in their own homes.

7. *Charitable relief*.—Gratuitous relief was, at the close of the period under report, being distributed to 5,214 male units in the three districts of Saran, Champaran, and Darbhanga. In Darbhanga the average daily number of persons in receipt of charitable relief was 61·08 per cent. of the average daily number on relief works, and the Lieutenant Governor sees reason to fear that in that district

gratuitous relief may have been given on too large a scale. The matter is being enquired into. A further contribution of Rs. 4,000 (in addition to Rs. 30,000 already sent) has been received from the Bengal Distress Relief Fund, and a sum of Rs. 500 from Syud Huzoor Meerza of Murshidabad. These sums have been sent to the Commissioner of Patna for distribution in charitable relief.

8. *Physical condition of the people.*—No deaths from starvation are reported, and the distress has not as yet had the effect of increasing the death-rate anywhere. The mortuary returns for the month of November represent the state of things usual at that season of the year. It is thought, however, that the very poor classes begin to show signs of deterioration, and this opinion is to some degree supported by the slightly inferior condition of prisoners admitted to the jails at Motihari and Darbhanga.

9. *Loans.*—Advances both for agricultural improvements (permanent as well as temporary) and for the purchase of *rabi* seed have been freely given in Saran and Champaran, but the returns are incomplete. The Lieutenant-Governor has recently, with the sanction of the Government of India, conveyed in Mr. Ibbotson's No. $\frac{8F}{46-13}$, dated 22nd December 1896, issued orders relaxing for the distressed tracts the conditions upon which loans are granted under the Land Improvement Loans Act.

10. *Food-stocks and importation of grain.*—The general balance of the food-grains traffic in the Division is now on the side of imports which, during the fortnight ending 26th December, for the first time exceeded the exports (by 28,775 maunds). In the previous fortnight the exports exceeded the imports by 72,054 maunds. These figures are unfortunately, it must be noted, incomplete even as regards the rail-borne trade. Sir Alexander Mackenzie has already, in my letter No. 25Fam., dated the 7th January 1897, placed before the Government of India his apprehension that the stocks of food in remote areas, such as the Ramnagar tract in north-east Champaran, may not be sufficient to support the population. His Honour is satisfied that the Commissioner and District Officers are alive to the necessity for the most careful watching of the movements of food-grains, and has, in my letters No. 76Agri., dated 31st December 1896, and No. 75Agri., dated 12th January 1897, drawn their attention to the provisions of section 35 of the Bengal Famine Code, under which they have power to appoint contractors for the supply of grain for gratuitous charitable relief, and to the orders of the Government of India, conveyed in paragraph 8 of their letter No. 104F., dated 4th January 1897, in which it is indicated that contractors may be similarly employed for the supply of grain on relief works in areas in which private trade may fail to do so, on the principle enunciated by the Famine Commissioners in paragraph 159 of their report.

The following paragraphs deal with the other Divisions:—

11. *Orissa Division.*—Except as regards Angul, no further communication has been received from the Commissioner of the Orissa Division since the date of the last report of this Government; but information received from officers of the Settlement Department and other sources goes to show that the situation has not yet undergone any change for the worse. In Angul, which has been recently visited by the Commissioner, Mr. R. C. Dutt, the local stocks of food-grains are considered sufficient for the requirements of the people. Exports are, however, still going on, and may cause some deficit and consequent distress among the landless classes who, happily, do not number more than twenty thousand in this part of Orissa. The Commissioner sees no reason to apprehend anything more serious than some slight pinch among these classes in April, May and June next.

12. *Rajshahi, Chittagong and Dacca Divisions.*—In the Rajshahi Division, Rajshahi and Pabna are still the only two districts where distress requiring relief measures is considered likely to appear. In Pabna loans are being given under the Land Improvement and Agriculturists' Loans Acts, and a grant of Rs. 10,000 has recently been made for this purpose. The worst tract in the district of Rajshahi is the Gangetic tract, consisting of *deara* lands bordering on the rivers Padma and Barrul. The total area is about 700 square miles with a population of about 500,000 persons. The outturn of the winter rice crop in this area has not been more than 4 annas, but the inhabitants are fortunately somewhat above the average of Bengal in wealth, and during a recent

visit paid by him to this tract the Commissioner observed that they were greatly and really alarmed, but that the signs of actual suffering were few. Distress may also appear in parts of another tract called the Barind, with a total area of about 500 square miles, the soil of which is stiff red clay, and where the outturn of the winter rice crop has been from 6 to 8 annas. No actual relief measures, beyond the grant of loans, were found necessary in any part of the district of Rajshahi during December 1896, but the Collector intends starting relief works about the middle of the present month.

No change in the position, as regards the Dacca and Chittagong Divisions, has come to the notice of this Government.

13. *Presidency Division*.—The tracts mentioned in paragraph 15 of my last report, in the districts of Khulna and Nadia, have recently been visited by Mr. B. C. Basu, Assistant to the Director of Land Records and Agriculture, who was specially deputed by Government to make careful enquiries as to the outturn of the crops and the condition of the people. This officer's reports and those received from the local officers leave no room for doubt that a part of the population of these tracts is really in distress. The Commissioner and the Collectors have not yet submitted reports and statements under Part II of the Famine Code, but these have now been called for. In the Satkhira subdivision of Khulna, the re-excavation of two khals has been taken in hand by the Public Works Department, in order to afford employment to the needy, and the District Board has opened works of its own. Measures have been taken for the distribution of gratuitous relief, and to ensure effective administration of famine relief, Mr. C. A. Bell, I.C.S., has been placed in charge of the Satkhira subdivision, and has been directed to give his entire attention to this work. In the Nadia district the affected area is confined to the north-west portion of the district bordering on Murshidabad. Loans are being given freely, and works have been open for some time, on which the number of labourers is rapidly rising. In Jessore the only tract in which relief is immediately needed is the north-east part of the Magura subdivision. Mr. B. C. Basu will soon visit the tract, and the local officers have been called upon to submit full reports, as required by the Famine Code.

14. *Bhagalpur Division*.—No distress has yet made its appearance in any part of the Bhagalpur Division, but there may be partial distress later on in all the districts of the Division. Purnea, Malda and Monghyr will, it is believed by the local officers, be able to meet their requirements from their own local funds. In parts of the district of Bhagalpur and in the Sonthal Parganas it is reported that there is likelihood of more widespread distress which will require Government aid.

15. *Chota Nagpur Division*.—It has just been reported to this Government by the Commissioner of the Chota Nagpur Division that there is no reason for any apprehension in regard to the three districts of Singhbhum, Manbhum and Lohardaga. The districts of Hazaribagh and Palamau are still giving cause for anxiety, although in Hazaribagh some test relief works which were opened failed to attract labourers and have for the present been closed. In Palamau some relief works recently opened are not now attended by any considerable numbers.

REPORT ON THE INDIGO CROPS OF BENGAL
FOR 1896.

The following is published for general information.

REV. DEPT., M. FINUCANE,
The 26th January 1897. Secretary to the Govt. of Bengal.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

*Report on the Indigo Crops of the Lower Provinces of Bengal
for the year 1896.*

Explanatory.—Estimates of the areas cultivated with indigo and of outturn have been hitherto shown in the reports issued by this Department for the *bladoi* crops of these Provinces. In accordance with recent orders of Government, a separate report for this crop is now published for the first time by this Department.

Area under cultivation—Indigo is cultivated in 23 of the 45 districts of these Provinces over an aggregate area estimated, as shown in the attached returns for 1893, at 530,500 acres, but in five districts, viz, Dinajpur, Faridpur, Patna, Gaya and Cuttack, the district cultivation is from 100 to 500 acres only, and in six more districts, viz., Burdwan, Bankura, Rajshahi, Rangpur, Shahabad and the Sonthal Parganas, the district cultivation is from 2,200 to 8,000 acres only.

About 247,000 acres of the cultivation are contained in the Saran (51,000), Champaran (48,000), Muzaaffarpur (65,500), Darbhanga (70,300), Monghyr (11,900) districts; Bhagalpur,* Purnea* and Malda* have, respectively, 12,300, 46,000 and 20,000 acres; and Midnapore, Nadia, Murshidabad and Jessore have, respectively, 48,100, 57,300, 51,300 and 17,500 acres.

Comparing the total area cultivated in 1896, viz., 530,500 acres against 552,700 cultivated last year, a decrease of nearly 22,000 acres is shown. The only noticeable falling off is in Darbhanga, and it is probable that the decrease there shown is due rather to correction of estimates than to a real falling off in cultivation.

2. *Character of the season of 1896.*—In North Bihar the sowings are made in February and March. In Lower Bengal sowings are made in *char* or *deara* lands when the floods subside in October, and a sowing is made on higher lands in April.

The crop is cut from June to September.

* These three districts are grouped with Lower Bengal districts in Messrs. W. Moran and Company's Market Reports.

On account of the early cessation of the monsoon of 1895 and the scantiness of the showers of the early months of 1896, moisture was generally deficient in the indigo districts at the time of sowings. In May rainfall was generally normal, but from May onwards rain was deficient in most of the indigo-growing districts.

In Bihar the first cuttings were generally poor, but the dry weather gave unusually good second cuttings (*Khunti*.)

3. *Outturn of crop.*—From the district returns appended, it will be seen that four districts, viz., Burdwan, Faridpur, Gaya and Bhagalpur, return the crop as 14 annas. Four districts (Rajshahi, Champaran, Sonthal Parganas and Cuttack) return the crop as varying from 12 to 13 annas; and the ten districts, viz., Bankura, Midnapore, Nadia, Jessore, Dinajpur, Patna, Saran, Darbhanga, Purnea and Malda, estimate the crop at 10 to 11 annas. In Murshidabad, Rangpur, Shahabad, Muzaffarpur and Monghyr the crop is returned as less than 10 annas.

On the whole, and allowing for a tendency to underestimate outturn which has been generally observed in crop reports, an outturn of 14 annas may be roughly estimated for the whole Province. A statement is appended showing the outturn of indigo in the last 14 years in these Provinces as returned in the General Administration Reports. It will be noticed from the appended statement that the North Bihar crop of 1896 is in fact not far short of the average of 14 years, and that the Bengal crop is considerably the shorter of the two.

It has been usual in this Department to assume as the average outturn of indigo to the acre the figures of yield given by Dr. G. Watt, Economic Reporter to the Government of India, in his Pamphlet on Indigo, viz., 12lbs. an acre in Bengal and 20lbs. an acre in Bihar.

Applying these figures of yield district by district to the areas under cultivation in 1896 as shown in the present returns, and diminishing them in proportion to the amount by which the yield is estimated to fall short of 16 annas, or an average yield, the following results are obtained:—

For North Bihar, viz., Saran, Champaran, Muzaffarpur, Darbhanga and Monghyr (as included in Messrs. Moran's return), 3,158,700lbs., or about 1,410 tons, or 42,300 factory maunds. For the remaining districts 2,514,200lbs., or about 1,122 tons, or 33,660 factory maunds. But I have no doubt that this is too high. Whether the acreage under indigo has been overstated on the average yield I am unable to say.

In their Circular No. 58 of the 30th September, Messrs. Moran and Company estimate the outturn for 1896 as follows:—

				Factory Mds.
For Bihar	60,000
For Bengal	17,000

This Department is not in a position to make so good an estimate of the crop as made by Messrs. Moran. There is no sufficient guarantee that the returns of cultivation and estimates of outturn of the indigo crop as furnished by District Officers for Bihar and Bengal are even approximately correct; and I have no hesitation in recommending that Messrs. Moran's estimate of outturn be accepted, rather than the estimate resultant from the District Officers' returns.

W. C. MACPHERSON,

Director of the Dept. of Land

Records and Agriculture, Bengai.

CALCUTTA.

The 8th January 1897.

Report on the Indigo Crop of Bengal for 1896.

District.	ACREAGE.						TAKING 16 ANNAS TO REPRESENT THE AVERAGE OUT-TURN PER ACRE, HOW MANY ANNAS WILL REPRESENT THIS YEAR'S OUTTURN (1896)?						TAKING 16 ANNAS TO REPRESENT THE AVERAGE OUT-TURN PER ACRE, HOW MANY ANNAS REPRESENTED OUTTURN LAST YEAR (1895)?						AVERAGE OF ANNUAL OUTTURN OF TWO PRECEDING YEARS (VIZ., 1893 AND 1894).						AVERAGE (VIZ., 16 ANNAS) RATE OF YIELD PER ACRE IN 1896.						UTTERED IN 1896.			Remarks by the Department of Land Records and Agriculture, Bengal.	Remarks by District Officers.
	Of current year's crop (1896).	Of previous year's crop (1895).	Average of two preceding years (viz., 1893 and 1894).	Column 8.	Column 6.	Column 4.	Taking 16 annas to represent the average out-turn per acre, how many annas will represent this year's outturn (1896)?	Taking 16 annas to represent the average out-turn per acre, how many annas represented outturn last year (1895)?	Average of annual outturn of two preceding years (viz., 1893 and 1894).	Average (viz., 16 annas) rate of yield per acre in 1896.	Estimated yield of current year, i.e., of area in column 8.	Yield of previous year, i.e., of area in column 8. Chatteran		44,000	54,000	54,000	11	14	16	20	701,200	1,025,000	892,500	31.5	21.43	Mr. E. Macnaghten, Secretary, Indigo Planters' Association, says that the approximate area under indigo in this district is 75,000 bighas equivalent to 65,500 acres, and the season in 1896 being less favourable than in 1895, the normal year, column 7, shows a less outturn. The decrease in the outturn is due to deficient rain during the sowing season and to the drought following afterwards. Mr. Macnaghten reports the outturn as 10,100 factory maunds, or 753,500 lbs. = 880 tons, against an average yield of 11,500 maunds.	
Munshipur		65,500	63,500	65,500	12	9	20	655,000	952,500	777,500	33.31	19.79	Mr. E. Macnaghten, Secretary, Indigo Planters' Association, says that the approximate area under indigo in this district is 75,000 bighas equivalent to 65,500 acres, and the season in 1896 being less favourable than in 1895, the normal year, column 7, shows a less outturn. The decrease in the outturn is due to deficient rain during the sowing season and to the drought following afterwards. Mr. Macnaghten reports the outturn as 10,100 factory maunds, or 753,500 lbs. = 880 tons, against an average yield of 11,500 maunds.	
Darbhanga		70,300	94,300	91,500	10	16	14	20	578,700	1,880,000	1,658,400	53.41	47.01	Mr. E. Macnaghten, Secretary, Indigo Planters' Association, says that the approximate area under indigo in this district is 75,000 bighas equivalent to 65,500 acres, and the season in 1896 being less favourable than in 1895, the normal year, column 7, shows a less outturn. The decrease in the outturn is due to deficient rain during the sowing season and to the drought following afterwards. Mr. Macnaghten reports the outturn as 10,100 factory maunds, or 753,500 lbs. = 880 tons, against an average yield of 11,500 maunds.	
Monghyr		11,800	12,000	12,000	9	16	9	20	143,800	230,000	147,600	37.48	2.31	Mr. E. Total		530,500	552,700	544,500	16	16	...	5,572,900	8,191,000	7,556,900	30.74	21.80	Mr. E. Macnaghten, Secretary, Indigo Planters' Association, says that the approximate area under indigo in this district is 75,000 bighas equivalent to 65,500 acres, and the season in 1896 being less favourable than in 1895, the normal year, column 7, shows a less outturn. The decrease in the outturn is due to deficient rain during the sowing season and to the drought following afterwards. Mr. Macnaghten reports the outturn as 10,100 factory maunds, or 753,500 lbs. = 880 tons, against an average yield of 11,500 maunds.	

* Estimated by the Director of the Department of Land Records and Agriculture, Bengal. The arithmetical means resultant from the District Officers' returns would be 10 1/2 and 10 1/4 for Bihar and Bengal, respectively.
 † Taken from Messrs. Moran's returns compared with average of 14 years' field, as shown in Bengal General Administration Report.
 ‡ Obtained by addition—area x yield, as explained in paragraph 3 of note. But the area returned are probably excessive, and it is advised that Messrs. Moran's figures should be accepted, in preference.
 § For 1,08,700 factory maunds as against Mr. Moran's final estimate of 99,173 factory maunds. No doubt Messrs. Moran's returns is the more correct.

Statement showing outturn of indigo in factory maunds as shown in Bengal Administration Reports for 14 years.

DISTRICT ROAD FUND.

No. 299 R.C.

GOVERNMENT OF BENGAL—PUBLIC WORKS DEPARTMENT.

Road Cess.

Dated Calcutta, the 19th January 1897.

RESOLUTION.

READ—

Letter from the Accountant-General, Bengal, No. 845L.F., dated 11th January 1897, submitting an abstract of receipts and expenditure of the several District Road Committees in Bengal for the quarter ending 30th September 1896.

RESOLUTION.—The Lieutenant-Governor directs that the accounts of the receipts and expenditure of the several District Road Committees in Bengal, for the 2nd quarter of the year 1896 97, be published in the *Calcutta Gazette* and circulated to the officers concerned.

ORDER.—Ordered that a copy of this Resolution, together with a copy of the abstract of receipts and expenditure, be published in the Supplement to the *Calcutta Gazette*.

Ordered also that a copy of this Resolution, and of the abstract referred to, be forwarded for information to the—

Commissioners of the Rajshahi, Chittagong, Bhagalpur, and Chota Nagpur Divisions;

Superintending Engineer of the Northern Circle;

Inspectors of Works, Eastern and Western Circles;

Financial Department of this Government.

By order of the Lieutenant-Governor of Bengal,

J. G. H. GLASS,
Secretary to the Govt. of Bengal.

R. E. HAMILTON,
Accountant-General, Bengal.

WATER-SUPPLY.

No. 335 L.S.-G.—The 21st January 1897.—The following reports of the progress made in the several districts of the Chittagong and Dacca Divisions in collecting and placing on record the chief facts regarding water-supply are published for general information.

H. H. RISLEY,

Secretary to the Government of Bengal.

No. 37M., dated Chittagong, the 11th January 1897.

From—The Commissioner of the Chittagong Division,

To—The Secretary to the Government of Bengal, Municipal Department.

WITH reference to Government Circular No. 58L.S.-G., dated the 12th

No. 1M., dated the 2nd January 1897, from the
Magistrate of Tippera.

No. 21M., dated the 6th January 1897, from the
Magistrate of Tippera.

No. 1440, dated the 23rd December 1896, from the
Magistrate of Noakhali.

Magistrates of Tippera and Noakhali with enclosures in original.

2. The report from Chittagong has not yet been received. The delay has been explained by the Collector, a copy of whose letter is enclosed.

No. 1M., dated Comilla, the 2nd January 1897.

From—J. KENNEDY, Esq., Officiating Magistrate of Tippera,

To—The Commissioner of the Chittagong Division.

WITH reference to your memorandum No. 1318M., dated the 16th December 1896, forwarding copy of Government Circular No. 58L.S.-G. of the 12th idem, I have the honour to submit the following report, showing the progress made in the district in collecting and placing on record the chief facts regarding water-supply, and the steps taken by the District Board to improve the existing sources of water-supply, and to open new ones.

2. *Register No. I.*—There are 710 villages, containing more than 100 houses each. The tahsil panchayats of these villages were furnished with a form for compiling the information required for filling up the register. Information regarding 630 villages has been received, the defaulting panchayats of the remaining 30 villages having been ordered to submit their returns at once.

3. *Register No. II.*—There is only one tank in Chandirchar, which has been set apart for drinking purposes under section 90 of the Local Self-Government Act.

4. A sum of Rs. 6,000 has been sanctioned for the Paster Filter at Chandpur. A further allotment of Rs. 1,100 will be required for bringing in the water from the river, the present source of supply being a very filthy tank. This point will be considered in the next meeting of the District Board on the 4th January 1897.

5. The reports of the two municipalities have not been received yet. They will be submitted as soon as received.

No. 21M., dated Comilla, the 6th January 1897.

From—J. KENNEDY, Esq., Officiating Magistrate of Tippera,

To—The Commissioner of the Chittagong Division.

In continuation of my report No. 1, dated the 2nd instant, I have the honour to submit

Nos. 396 and 136L.F., dated the 31st December 1896, from
the Comilla and Brahmanbaria Municipalities, respectively.

the information regarding water-supply.

copies of the letters noted in the margin,
from the two municipalities in this district,
reporting the progress made in collecting

No. 396, dated Comilla, the 31st December 1896.

From—BABU MOHINI MOHAN BARDHAN, Chairman of the Comilla Municipality.

To—The Magistrate of Tippera.

WITH reference to your memorandum No. 1908, dated the 22nd instant, I have the honour to report that, during the quarter ending 31st December 1896, a list of the tanks and *shaas* under Government Circular No. 7, dated 15th May 1896, have been prepared.

2. There are four tanks already in existence, set apart for drinking purpose, which I think sufficient at present for this municipality, the area of which is only four square miles. Besides these tanks, there is the Gumpti river on the north of the town, which is also used by

the people of ward (c). The water of some tanks besides the reserved tank is also good and used for drinking purposes.

- 1. Bhatpara tank.
- 2. Jail tank.
- 3. Municipal Office tank.
- 4. Tank in Kandirpar, situated to the south of Beraja Babu's house.

3. One of the municipal tanks, called Meherjan's tank, in Kandirpar, has been set apart under section 199 for washing animals and clothes, &c., and the other four municipal tanks marginally noted for bathing purposes.

4. Under section 119A, the Civil Surgeon has been requested to examine the water of the tanks situated within the municipality and to certify as to which of the tanks may be used for drinking purposes, and which of them, if used for drinking, would engender or cause the spread of any dangerous disease.

5. As an experimental measure, some notices were served upon the owners of certain tanks and *khoas* to re-excavate them and some notices for filling them up. Of these tanks, one has already been re-excavated and one filled up. Most of the owners have come forward with petitions of objection, which are now under the disposal of the Joint Committee formed under section 37A of the Municipal Act. Steps have been taken by some of the owners to re-excavate their tanks.

No. 136L.F., dated Brahmanbaria, the 31st December 1896.

From—The Chairman of the Brahmanbaria Municipality,
To—The Magistrate of Tippera, through the Subdivisional Officer.

REFERRING to your memorandum No. 1909M., dated the 22nd December 1896, I have the honour to report as follows.

There are twenty mahallas in all in this municipality, in none of which tanks and other sources of water-supply are insufficient. The quality of water, however, is not good in all the tanks. Two municipal tanks and seven private tanks containing pure water have been reserved for drinking purposes. In wards where there is no tanks containing drinkable water, wells would be soon sunk. Moreover, one tank is to be soon excavated in Kasharypatty for supplying drinkable water to the inhabitants thereof. Water-supply Form No 1 is annexed herewith.

No. 1806G., dated Brahmanbaria, the 1st January 1897.

Memo. by—The Subdivisional Officer of Brahmanbaria.

COPY, with the General Register of Sources of Water-supply, submitted to the Magistrate of Tippera.

No. 1440, dated Noakhali, the 28th December 1896.

From—S. K. AGASTI, Esq., Officiating Magistrate of Noakhali,
To—The Commissioner of the Chittagong Division.

WITH reference to your No. 1319M., dated the 16th December 1896, forwarding, for report, copy of Government Circular No. 58L.S.-G., dated 12th idem, on the subject of water supply in the district, I have the honour to state as below.

2. Within the municipal area there are three reserved tanks under the direct management of the Municipal Commissioners and one under the District Board, which supply good drinking water to the rate-payers. One of these tanks, known as Baradigi, situated in the circuit-house ward of the town, is a splendid one. This is very close to the Fakirtala ward. The second is also one of considerable dimensions in the Kalitara ward, which is protected from pollution from surface drainage by an embankment of a moderate size. The third tank, known as Bruce's tank, is situated in the Barabazar section of the town. The District Board tank, otherwise known as the Dispensary tank, although situated in the Kalitara ward, is very close to the Taltala ward. From this it will appear that there is a copious supply of good drinking water for the rate-payers of all the five wards in the town. The municipal reserved tanks are carefully guarded by men appointed for the purpose at the expense of the municipality. The dispensary tank is also very scrupulously looked after.

3. Besides the four tanks mentioned above, there are upwards of 300 tanks which are resorted to by the people of the municipality for bathing, culinary and other ordinary purposes. Of these latter there are some 50 tanks, which are of considerable size, and are resorted to by a large number of inhabitants. Of the smaller ones, there are many which are of no good, and there are others which are decidedly unwholesome.

4. The Municipal Commissioners have for the last seven or eight years been pressing upon the rate-payers the necessity of re-excavating or filling up those tanks which were found to be a source of permanent nuisance, and during the above period, 44 tanks have been re-excavated, and a few have been filled up. The town abounded in cesspools and *dobas* of various sizes. Some 51 of the more offensive ones have been filled up, either by the Municipal Commissioners or by the owners thereof at their requisition.

5. The extensive ditches in front end in the south of the big house of Maharaja Durga Charan Law, c.i.e., formerly owned by Mr. Courjon, have almost been filled up on the Chairman's issuing a requisition to that effect last year. The little that remains to be done will very likely be completed during the current year. During the present year, the Administrator-General of Bengal, who is in the executor of the estate of the late Kumar Indra Ohandra Sinha Bahadur, has undertaken to re-excavate three of their tanks and

fill up one, which latter was a permanent source of nuisance to the people in the neighbourhood. The work has been already commenced.

6. The Chairman has also issued notices on the proprietors of five tanks in four wards to re-excavate them, and also on the owner of another tank to have it filled up, as they are in a filthy state. The work will be commenced in the course of a short time.

7. There are no wells in the town. In my opinion there is an abundant source of water-supply within municipal limits. We have only to see that the unwholesome tanks and *dobas* are gradually made into wholesome ones. Some of them also may be filled up with advantage. To both these points the Municipal Commissioners have directed their special attention for the last few years. No new source of water-supply in my opinion need be opened. Two registers in Forms Nos. I and II in connection with water-supply have been maintained in the Municipal Office, and they are examined by the Chairman at intervals.

8. The works executed up to date during the current year by the District Board in improving the existing sources of water-supply are shown below.

The following tanks have been cleared :—

- (1) Jubilee tank at Lakhipur.
- (2) Thana tank at Lakhipur.
- (3) Tank at Raipur.
- (4) Tank at Begamgunj.
- (5) Tank at Ramganj.
- (6) Tank at Chandraganj.
- (7) Rajajhi tank at Feni (being cleared).
- (8) Tank at Fenny ghat.
- (9) Tank at Chhagalnaia.
- (10) Tank at Munsir Hat, Parashuram Road (being cleared).
- (11) Tank at Sundip (being cleared).
- (12) Tank at the compound of the Noakhali Dispensary.

I have seen 10 out of these 12 tanks (excluding Nos. 9 and 10) in the course of my tour, and I have found the water generally good.

9. Estimates for excavating new tanks at Ichakhali and Nadona have been sanctioned, but the work could not be taken in hand, as the land will have to be acquired under the Act. Estimates for clearing some other tanks are in preparation.

10. Tube-wells have been tried many times, but they do not succeed here.

11. Apprehending scarcity of drinking water at least in certain parts of the district during the next summer season, I have had orders issued to get number of tanks informally reserved (without the owners definitely making over the control of the water in them to the District Board). A copy of my note is forwarded for your perusal. I have also had a vernacular letter of instruction freely circulated among the people of the district. Copy of this is also enclosed for your information. Action is being taken in this direction, and progress made will be reported in due course.

12. Registers in Forms I and II are under preparation.

The rainfall has been very short this year, and serious scarcity about drinking water is apprehended, at least in certain parts of the district during the next summer season. It is reported from Hatiya that difficulty is already beginning to be felt. An additional reason in the case of Hatiya and also of Sundip is the salt-water inundation of 27th July last, which overflooded many tanks. The water of these was never baled out, and is decidedly brackish even now, and would soon become unfit for drinking. Similar difficulties may be experienced in Siddhi, Ramgati, parts of Bamni, south-western side of Fenny and in the littoral tract, generally more or less.

2. About improving water-supply, it should be borne in mind that wells never succeed in this district. Experiments have been made with tube-wells at head-quarters on many occasions, but without any satisfactory result. If these wells do not succeed in Sudharam, they will never do in Hatiya, which is of still more recent (alluvial) formation. Even in Sundip which is of older origin, work with tube-well would be uncertain. The leather of the pumps gives way very soon in these sandy soils, and altogether the experiment must fail from one cause or another in this district. The Sanitary Commissioner is also of opinion that tube-wells are not suitable to alluvial soils like those of Noakhali, Backergunge, Chittagong, &c.

3. Masonry wells have been suggested as a mode of improving water-supply. This is both expensive and uncertain. One well of even moderate size would cost at least Rs. 500, and it is evident that we cannot do much in this way. It is even doubtful how far well-water would be or continue to be potable. The people again are so lazy that they will never care to fetch water from a well which may be good, if they have even a dirty tank close by, which can satisfy their immediate wants. They may do well in parts of Fenny and Chhagalnaia, but this last thana is very well off as regards tanks, and these are both big and in fair preservation generally. Digging tanks will not do as a mode of improving the general water-supply of this district, except, of course, in selected localities where the difficulty is chronic, and where the District Board should have tanks of its own reserved for drinking purposes. This must in any case be a work of time. Our needs are pressing however, and something should be done to enable the people to tide over the difficulty that is apprehended in the next summer.

4. The number of tanks in the district is extremely large. Indeed, so far as number is concerned, there is absolutely no reason to complain. Throughout large tracts in several thanas it might almost be said that almost every family, of any importance, has got a tank of its own. Excepting therefore in certain selected localities and at hâts, markets, and such like public places, new tanks are not at all necessary.

5. The only method that suggests itself to me, after careful consideration of the whole question, of improving the water-supply of the district and enabling the people to meet the coming difficulty, is to make the most of the existing sources; and that can be done by leaving a selected number of tanks reserved for drinking purposes for each locality. Tanks with fairly good water should be selected, at least one should be reserved for each moderate-sized village of, say, 80 to 100 families living fairly closely together; for sparsely populated villages of, say, 80 to 100 families, and for larger villages, two or three or even a larger number may be necessary. I believe that, on proper enquiry being made, it will be found that almost every village has got at least one fairly good tank that can be reserved. But the difficulty is that the owner of the tank will not allow it to be reserved. He will use the water both for drinking and for other purposes; and though he may not object others using the water for drinking, he does not wish to part with his full control over his property. It is not easy to persuade the people to make a little sacrifice for the public good, for public spirit is all but unknown here, and every one's concern is for himself. The idea that by having the general water-supply deteriorated, the risk to public health, and necessarily to every individual's health, is increased, never finds a place in the minds of the vast majority of the people in this district.

6. The District Board has been trying for several years past to get a number of tanks reserved, on which it would spend for cleaning and occasional bank repairs, &c., but hitherto without any marked success.

7. I think the question should now be approached from another point of view. Irrespective of the provision of the law, let a number of fairly good tanks be selected and informally reserved for drinking purposes. Unless we went to the length of appointing a guard for each tank, adequate precaution could never be taken to prevent pollution; but this of course is out of the question. Let a signboard, declaring the tank to be reserved, be hung up at a conspicuous part of the bank, and the police, panchayats, and chaukidars be directed to see, so far as possible, that those tanks are kept free from all grosser form of pollution. Letting loose cattle should of course be prohibited, so also bathing; but if an individual dips his feet when fetching water, this will have to be connived at, until at least a little idea of sanitation prevails among the people; also fishing will be allowed, as at present, without any restriction. I hope the owners will not object to such an arrangement.

8. I think the District Board has got lists of tanks supplied by the police and the Department of Public Works staff under Government Circular issued last year (1895-96). Each police officer in charge of a thana or outpost will now, in consultation with panchayats, chaukidars, &c., and after such enquiries as appears suitable to him, report the names (with owners' names) of tanks which in his opinion may be reserved in the way indicated above. He will be supplied with an equal number of signboards (to be hung up in a conspicuous part of the bank), and the panchayats and chaukidars will be required to see that the water is preserved, so far as possible, from pollution. It is not to be understood that I wish to throw the brunt of the burden of this work on the police, but they must take the initiative. The subordinates of the District Engineer's Department will be principally in charge of the supervising work. The help of the District Magistrate will be necessary at almost every step, and this of course will be willingly rendered.

9. It is necessary that this order should be freely circulated among the police, panchayats, and through them to chaukidars, also among zamindars, khas mahal and Court of Wards officers. The co-operation of all departments will be absolutely necessary for the purpose. All inspecting officers of whatever department in the district will be required to pay attention to this matter and report instances of default, when, so far as possible, suitable measures will be taken by the Magistrate-Chairman to remedy the defects.

10. The District Engineer will please let me know what would be the best and cheapest material for sign-boards. These should have some simple and suitable direction painted on them, such as "this tank is reserved for drinking purposes, and letting loose of cattle on it, washing clothes, household utensils, &c., is prohibited, &c., &c."

11. A copy of this note will be forwarded to the District Superintendent of Police, Noakhali, Subdivisional Officer, Fenny, Sub-Deputy Magistrate-Collector, Sundip, Munsif, Deputy Magistrate, Hatya, Khash Tahsildar and Manager, Wards Estates, for information and guidance.

12. I think a Bengali parwana, giving the substance of the above, should be got printed and circulated widely among the people. We can have 500 copies printed for the present. The Head Clerk, Magistracy, will please see to this. The order in the meantime should be circulated to the Police and Sub-Overseers of the District Board.

S. K. AGASTI,

Magistrate and Chairman.

The 1st November 1896.

No. 1617K., dated Chittagong, the 31st December 1896.

From—J. D. ANDERSON, Esq., Collector of Chittagong,
To—The Commissioner of the Chittagong Division.

WITH reference to your reminder No. 1362M., dated 28th December 1896, I have the honour to report that registers, showing the sources of water-supply, have been opened in the various Tahsil offices. But as there are at least 70,000 tanks in this district, it will take some time to submit the first progress report, inasmuch as it cannot be compiled, unless all such tanks have been inspected by responsible officers, and the requisite information collected in the form prescribed by Government. I have asked the khas tahsildars to expedite the matter, and shall submit my report as soon as possible.

Personally, I venture to doubt whether the collection of these figures is worth the labour involved in a district where there are only too many tanks, and where no deficiency of drinking water has been felt even in this year of unexampled drought.

No. 1936G., dated Dacca, the 19th January 1897.

Memo. by—G. TOYNBEE, Esq., Officiating Commissioner of the Dacca Division.

SUBMITTED in original to the Government of Bengal, Municipal Department, in continuation of this office No. 1864G., dated the 7th instant.

No. 356, dated Narainganj, the 7th January 1897.

From—H. F. WILSON, Esq., Chairman of the Narainganj Municipality,
To—The Magistrate of Dacca.

WITH reference to your No. 92 of the 6th instant, and in continuation of this office No. 343 of the 2nd instant, I have the honour to report that registers in Forms I and II have been prepared.

No. 135, dated Dacca, the 11th January 1897.

Memo. by—The Magistrate of Dacca.

COPY submitted to the Commissioner of the Dacca Division, in continuation of this office No. 80, dated the 6th instant (paragraph 2), for information.

STATISTICAL DEPARTMENT,
The 26th January 1897.

**STATISTICS OF THE SEA-BORNE TRAFFIC OF CALCUTTA
IN FOOD-GRAINS.**

No. 194 Statistics.—The following memorandum and statements are published for general information.

STATISTICAL DEPARTMENT,
The 26th January 1897.

M. FINUCANE,
Secy. to the Govt. of Bengal.

Memorandum.

The sea-borne import and export traffic of Calcutta in food-grains during the week ending the 14th January 1896 and 1897 are shown in the following statement:—

		8TH TO 14TH JANUARY			
		1896.		1897.	
1		2	3	4	5
<i>Imports.</i>		Cwts.	Mds.	Cwts.	Mds.
From Foreign Ports
„ Indian „	...	22,127	30,117	95,066	1,29,395

Other food-grains, such as jowar, barley, oats, &c.	1	1
Total	...	22,127	30,117	95,066	1,29,395

During the week under report, 52,506 cwts. of rice were imported from Burma alone. Between 1st November 1896 and 14th January 1897, so much as 2,16,016 cwts., or 2,94,022 maunds of cleaned rice, were shipped from Burma for Calcutta, and this grain is now being carried by rail to all parts of the country. Shipments of rice and paddy from Balasore showed an increase of 19,988 cwts., while those from Ohandbali exhibited a decrease of 5,740 cwts. as compared with 1896. Under gram and pulses, the Madras Presidency exported the largest quantity, viz., 3,791 cwts., against only 72 cwts. in 1896.

Exports.—In the following statement the total quantity of each kind of food-grains exported by sea during the 2nd week of January 1897 is compared with the figures for 1896 :—

	8TH TO 14TH JANUARY			
	1896.		1897.	
1	2	3	4	5
	Cwts.	Mds.	Cwts.	Mds.
<i>Food-grains.</i>

Paddy	217	295
Wheat	883	1,202	107	146
Gram and pulses	18,447	25,109	4,598	6,258
Other food-grains, such as jowar, barley, oats, &c.	88	120	16	22
Total ...	212,604	2,89,378	84,404	46,828

In 1896 large shipments of rice were made to Germany, Abyssinia, Aden, Arabia, and Ceylon, but during the week under report nothing was exported. The quantity sent to the United Kingdom showed an increase of 10,936 cwts., while in the case of the Maldives, New Zealand, and Fiji Islands small quantities were despatched against nothing in 1896. Of the Indian ports, there were heavy decreases in the consignments sent to Bombay and Madras Presidencies. The decrease under gram and pulses was due to smaller shipments to the United Kingdom, Madras, and Burma.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below.

STATISTICS OF THE SEA-BORNE TRAFFIC OF THE MINOR PORTS IN BENGAL IN FOOD-GRAINS.

No. 195, Statistics.—The following memorandum and statements are published for general information.

STATISTICAL DEPARTMENT,
The 26th January 1897.

M. FINUCANE,
Secy. to the Govt. of Bengal.

MEMORANDUM.

THE comparative statements below give statistics of the import and export trade of the minor ports of Chittagong, Narayanganj, Balasore (including both Balasore and Chandbali), Cuttaek and Puri during the 10 days ending 31st December 1896, as compared with the trade of the corresponding period of 1895 :—

	{ 1896	26,110	26,110	35,538

In 1895, Trinidad received 21,990 cwts. of rice from Chittagong, while 24,461 cwts. of rice were shipped from Cuttaek for Columbo, Galle, and ports in Madras, Bombay, and Travancore, but nothing was shipped from either Chittagong or Cuttaek during the period under report. The exports to Calcutta from the Balasore ports showed a decrease of 8,725 cwts. of rice, and an increase of 4,069 cwts. of paddy, and of 443 cwts. of gram and pulses. In the case of Narayanganj and Puri, there was no trade whatever in food-grains during the periods under report.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below:—

STATISTICS OF THE FOOD-GRAIN TRAFFIC OF CALCUTTA CARRIED BY ALL ROUTES (INCLUDING SEA).

No. 196 Statistics.—The following memorandum and statements are published for general information.

M. FINUCANE,
Secy to the Govt. of Bengal.

STATISTICAL DEPT.,
The 26th January 1897.

Memorandum.

The total quantity of food-grains carried to and from Calcutta by internal routes and by sea during the 10 months from January to October 1896, as compared with the figures for the corresponding period of 1895, was as follows:—

Specification of routes.	Imports.		Exports.	
	1895. Mds.	1896 Mds.	1895 Mds.	1896. Mds.
By internal routes, i.e., by rail, road, river (country boat and steamer) and canal ...	2,14,10,452	1,76,32,848	18,26,173	39,83,110
By sea (both foreign and coast g) ...	9,25,331	21,80,618	1,44,73,038	91,92,783
Total ...	2,23,35,783	1,98,13,466	1,63,04,211	1,31,75,893

Imports.—The decline in the import trade was 11·2 per cent., and it would have been even greater but for the large imports by sea, the figures for which were 130·6 per cent. in excess of those for 1895. The following statement compares the total quantities of each kind of food-grains imported during the periods under review:—

	1895. Mds.	1896. Mds.
Rice ...	1,36,44,542	1,12,63,848
Paddy ...	14,68,923	19,20,320
Wheat ...	31,80,657	19,62,068
Gram and pulses ...	37,42,202	41,91,125
Other food-grains, such as barley, <i>ko lo</i> , <i>shama</i> , <i>marwa</i> , Indian-corn, oats, millets, &c. ...	2,99,459	4,71,105
Total ...	2,23,35,783	1,98,13,466

As was to be expected, the largest falling off occurred in the rice trade. The decline was general, and not limited to any one part of the Lower Provinces. The largest decrease is shown in the consignments from Backergunge, namely, 26,18,585 maunds against 44,78,681 maunds in 1895, and the largest increase in those from Midnapore, which contributed 23,58,972 maunds against 15,03,046 maunds. The only other district from which the imports were larger than in the preceding year was Balasore, which supplied 14,99,806 maunds against 8,82,194 maunds in 1895. Practically the entire traffic from this district was sea-borne. In the case of all other districts, there were decreases more or less, the most prominent among them being 24-Parganas (1½ lakhs maunds), Burdwan (4 lakhs maunds), Noakhali (nearly 3 lakhs maunds), Khulna (2 lakhs maunds), Jessore (1½ lakhs maunds), Faridpur (1½ lakhs maunds), and Dinajpur (nearly 1 lakh maunds). In the case of paddy, the supplies from the Balasore district rose from 63,772 maunds to 7,12,766 maunds, and those from Midnapore from 1,52,393 maunds to 5,74,854 maunds. From the 24-Parganas there was a falling off of 2½ lakhs maunds, and from Jessore, Khulna, and Burdwan, a lakh of maunds each.

Compared with 1895, the importation of wheat from the North-Western Provinces fell off by 8½ lakhs of maunds, and that from the Panjab by 1 lakh of maunds. Of the Bengal districts, the Presidency and the Bhagalpur Divisions showed a decline of nearly 2 lakhs maunds and 1½ lakhs maunds, respectively. Concerning gram and pulses, there were increases in the shipments from Nadia (9 lakhs maunds), Faridpur, Patna, and Monghyr (a lakh of maunds in each case), Murshidabad (½ lakh of maunds), and Rajshahi (nearly ½ a lakh of maunds), while the despatches from the North-Western Provinces and the Panjab together fell off by 9½ lakhs of maunds. The advance under Miscellaneous food-grains is attributable to increased despatches from Nadia, Murshidabad, and Patna.

Exports.—The decrease under this head aggregated 19·1 per cent., the falling off being most conspicuous under rice and wheat, as will be seen from the details given in the following table :—

				1895.	1896.
				Mds.	Mds.
Rice	1,19,62,042	92,59,699
Paddy	8,17,758	11,77,101
Wheat	14,95,659	2,03,680
Gram and pulses	18,94,014	23,70,867
Other food-grains, such as barley, <i>kodo</i> , <i>shuma</i> , <i>marua</i> , Indian-corn, oats, millets, &c.	1,34,738	1,64,648
Total				1,63,04,211	1,31,75,995

The bulk of the exports shown above relates to the sea-borne trade, in which the total decrease during the past 10 months amounted to 36·49 per cent. The falling off in the exports to Foreign ports was 35·28 per cent., and to Indian ports 40·61 per cent. The places of destination in respect of this section of the traffic have already been published in the *Calcutta Gazette* of the 25th November 1896. As regards the trade with the interior, the chief feature is the distribution of rice and paddy to almost every district in the Lower Provinces, the total quantity carried from Calcutta being 11,67,165 maunds of rice and 11,23,661 maunds of paddy, against 3,05,848 maunds and 6,15,993 maunds, respectively. Assam also was supplied largely, viz, 7,08,794 maunds of rice against 70,702 maunds in 1895. The fluctuations in the case of the other articles call for no special notice.

Detailed statements, showing the source of supply and the places of destination, as well as the various channels through which the supplies were carried, are published below.

Statement showing the Import and Export traffic of Calcutta in food-grains, month by month, during the 10 months from January to October 1896, as compared with the corresponding months of 1895.

WEATHER AND CROP REPORT.

For the week ending the 25th January 1897.

Burdwan.—Rainfall nil. Weather cold and fine. *Aman* harvesting nearly over. Prospects of *rabi* in Sadar and Kalna subdivisions reported to be fair. In Katwa and Raniganj rain is wanted. Fodder and water sufficient. Condition of cattle good. Common rice selling as follows:—

	Srs.	c.		Srs.	c.
Sadar	10 0	to 12 0
Kalna	10 0	
Katwa	10 10	to 10 15
Raniganj	10 4	

} per rupee.

Birbhum.—No rain. Weather cloudy. Price of rice at Sadar 9 seers and Rampur Hat 10 seers per rupee.

Bankura.—No rain. Weather hot during the day; cool at night. Threshing of *aman* not yet finished. No improvement in *rabi* prospects. Fodder and water sufficient at present, except in a few places. Sporadic cases of cow-pox reported. Rice selling at 11½ seers per rupee both at Bankura and Vishnupur.

Midnapore.—No rain. Weather seasonable. Threshing of paddy going on. Transplantation of *boro* almost finished. Prospect of *rabi* not good, except in Tamluk. Sugarcane is being pressed. Cattle-disease reported from Garhbeta, Keshpur, Salboni, and Naraingarh police-stations. Fodder and water sufficient. Common rice selling as follows:—

	Srs.	c.		Srs.	c.
Sadar	{ Old rice	9	
	{ Now „	10	
Contai	12	to 13
Tamluk	9	to 12
Ghatal	10½	to 12

} per rupee.

Hooghly.—No rain. Weather seasonable. *Rabi* and sugarcane suffering for want of moisture. Common rice sells from 8½ to 10½ seers per rupee. Fodder and water sufficient.

Howrah.—Rainfall nil. Weather seasonable. Harvesting of *aman* finished. Prospects of *rabi* not good. Fodder and water sufficient. Common rice sells from 9 to 11 seers per rupee.

24-Parganas.—Rainfall nil. Weather cool and bright. Harvesting of *aman* not quite finished; it is estimated to yield 10½ annas. Prospects of *rabi* crops and sugarcane unfavourable. *Kabri* and mustard are being harvested. Land in places are being tilled for vegetable cultivation. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	c.		Srs.	c.
Sadar	9 to 11	8
Barasat	10	0
Basirhat	9	0
Diamond Harbour	10	10

} per rupee.

Nadia.—No rain. Weather seasonable. Standing crops deteriorating for want of rain. Cutting and pressing of sugarcane going on. Water-supply deficient in many places. Fodder ample. Cattle-disease in Sadar subdivision. Common rice sells at 8 to 11 seers per rupee. Latest price of rice where test-works are open is 9 seers per rupee. Numbers attending test-works are as follows:—

15th January	1,295
16th „	1,309
17th „	1,443
18th „	1,466
19th „	1,483
20th „	1,620
21st „	1,378

Number of persons who received gratuitous relief at police-stations 967 from 18th to 23rd January. Number on relief works on Saturday, 23rd—Sadar subdivision—men 1,464, women 349, children 1,063—total 2,876; Moherpur subdivision—men 800, women 190, children 944—total 1,934. Gratuitous relief—men 170, women 600, children 142—total 912.

Murshidabad.—No rain. Weather seasonable. Transplantation of *boro* paddy has commenced in Kandi subdivision. State of *rabi* crops not favourable. Indigo and mulberry doing well. Fodder sufficient. Common rice sells as follows:—

	Srs.	c.		Srs.	c.
Sadar	10	
Kandi	11	
Jangipur	11	

} per rupee.

Jessore.—No rain. Weather seasonable. Harvesting of *aman* over. Rain badly wanted for *rabi* crops and for transplantation of *boro* seedlings. Fodder and water available. No cattle-disease. Common rice sells as follows :—

				Srs. c.	
Jessore	10 0	} per rupee.
Jhenida	9 0	
Magura	9 6	
Narail	10 0	
Bongaon	10 0	

Khulna.—No rain. Weather fine. Harvesting of *aman* paddy nearly over. Rain wanted for *boro* crop, which is now being transplanted. Common rice sells as follows :—

				Srs.	
Khulna	9 to 11	} per rupee.
Bagerhat	10½	
Satkhira	10	

Wages calculated at 10 seers per rupee for staple food-grain. No cattle-disease. Fodder and water available. Number of relief-works opened, two. Number of persons employed on relief-works in Satkhira subdivision for week ending 20th—men 20, women nil, children 17—total 37; gratuitous relief—men 33, women 60, children 45—total 138.

Rajshahi.—Lands are being ploughed for sowing *aus*. Prospects of standing crops not good. *Boro* paddy being sown in some places. Cultivation for sugarcane and jute going on. Rain badly wanted. Fodder and water available. Average price of common rice 9½ seers per rupee. Four test-relief works started. Numbers employed on Saturday, 23rd—men 852, women nil, children 39—total 891. No gratuitous relief.

Dinajpur.—No rain. Weather seasonable. Condition of standing crops fair. No report of any cattle-disease, nor any complaint for fodder and water. Price of common rice 9 to 12 seers per rupee.

Jalpaiguri.—Rainfall nil. Weather cold. Preparation of land for *bitri* (*aus* rice) going on. Standing crops doing well. No complaint of want of fodder and water. Price of common rice 8½ seers per rupee.

Darjeeling.—Rainfall nil. Weather seasonable. Hills—Wheat and barley progressing; *phap'ur* and *tori* coming to maturity; potatoes being harvested. Terai—*Hamanti dhan* completely harvested; mustard coming on; tobacco and potatoes doing well. Coarse rice selling :—

					Srs.
Hills	8
Terai	9

Bhutla 13 seers per rupee.

Rangpur.—No rain. Harvesting of *aman* nearly finished. Land is being prepared for *aus* crop. *Rabi* crops progressing well. Harvesting of mustard commenced; prospects fair. Common rice selling at 8 to 10 seers per rupee. Fodder and water sufficient.

Bogra.—No rain. Weather cloudy. Early oilseeds being gathered. Fodder and water sufficient. Common rice selling at head-quarters 10½ seers per rupee, and in the interior from 8½ to 11½ seers per rupee.

Pabna.—Weather seasonable. No change in the prospects of the crops since last week. Common rice selling from 8 to 9 seers a rupee. Fodder available.

Dacca.—Rainfall nil. Weather seasonable. Prospects of *aman* crop not very favourable. Transplantation of *boro* paddy going on. Fodder available. No cattle-disease. Common rice sells at 10 to 11 seers per rupee.

Mymensingh.—Rainfall nil. Weather seasonable. Harvesting of *aman* paddy finished; average outturn 10 aunas. *Rabi* crops being harvested. Price of common rice between 8 and 12 seers per rupee.

Faridpur.—No rain. Weather seasonable. Prospects as before. Rain badly wanted for *rabi*. Common rice selling at 8 to 11 seers a rupee. Fodder and water available.

Backergunge.—Rainfall nil. Weather warm for the season. Rain is badly wanted for the *rabi* crop. No cattle-disease. Common rice sells at 9½ to 12 seers per rupee.

Tippera.—Weather seasonable. Transplantation of *boro* over. Prospects of *rabi* not favourable. Prices of common rice—

				Srs.	
Sadar	11	} per rupee.
Brahmanbaria	8 to 12	
Chandpur	10½ to 11½	

Noakhali.—State of *rabi* crops bad for want of rain. Fodder and water available. No cattle-disease. Rice sells at 10½ to 12 seers per rupee.

Chittagong.—Rainfall nil. Weather dry. *Rabi* crops suffering for want of rain. Prospects unchanged. Water and fodder fairly sufficient. Rice selling at 8 to 11 seers per rupee.

Patna.—Threshing of paddy in progress. Prospects of *rabi*, poppy, and tobacco favourable. Millets being sown and those shown before germinating well. Fodder and water for cattle sufficient, except green fodder in Bihar. Price of common rice at Patna 11 seers per rupee.

Gaya.—*Rabi* and poppy doing well. Price of common rice at Sadar 9½ seers per rupee.

Shahabad.—Weather cloudy. Prospects of *rabi* continue favourable. Slight damage reported from frost. Poppy doing well. Prices stationary. Number on relief works on Saturday, 23rd—men 702, women 896, children 442—total 2,040.

Saran.—Rainfall at Gopalganj .23 and Siwan .07. *Rabi* doing well. *Rahar* damaged by frost in places. Average price of *makai* 10 seers 1 chitak per rupee. Numbers on relief works on Saturday, 23rd—Sadar subdivision—men 443, women 797, children 1,061—total 2,301; Gopalganj subdivision—men 973, women 1,201, children 988—total 3,162; Siwan subdivision—men 1,932, women 3,133, children 2,046—total 7,116; Gratuitous relief—Sadar subdivision—men 182, women 2,259, children 305—total 2,746; Gopalganj subdivision—men 693, women 1,747, children 778—total 3,218; Siwan subdivision—men 292, women 833, children 224—total 1,349. Chapra town—Gratuitous relief—men 181, women 755, children 176—total 1,112; Revilganj town—Gratuitous relief—men 48, women 208, children 6—total 262. Hatwa Raj—Poor-houses 392, doles 750, relief works 2,548. Manjha poor-house 92. Chapra poor-house 42. Siwan poor-house 108.

Champaran.—Rainfall at Sadar .10, Bettiah .40, Bagaha .56. Slight rain general. *Rabi* and poppy much improved. Prices—common rice at Sadar 8½ seers and Bettiah 9½ seers; maize at Sadar 10½ seers and Bettiah 10½ seers. Numbers on relief works on Saturday, 23rd—men 50,638, women 40,031, children 25,101—total 115,770; gratuitous relief—men 1,383, women 2,475, children 1,980—total 5,838.

Muzaffarpur.—No rain. Prospects good. Prices are—Burma rice 9 seers, common rice 8 seers, wheat 8½ seers, *makai* 10 seers, barley 11 seers, gram 10 seers, *rahar* 12 seers, *marua* 12 seers. *Makai* and *rahar* fix the relief prices. Numbers on relief works on Saturday, 23rd January—Sadar subdivision—men 2,593, women 1,042, children 1,443—total 5,078; Hajipur subdivision—men 451, women 422, children 2,063—total 2,936; gratuitous relief—Hajipur subdivision—men 2, women 26, child 1—total 29.

Darbhanga.—Standing crops promising well. Harvesting of rape-seeds commenced in places. Common rice is selling at 9 seers per rupee. Numbers on relief works on Saturday, 23rd—Sadar subdivision—men 19,336, women 21,726, children 4,993—total 46,055; Samastipur subdivision—men 1,220, women 744, children 596—total 2,560; Madhubani subdivision—men 28,372, women 17,922, children 8,672—total 54,966; Gratuitous relief—Sadar subdivision—men 2,915, women 5,922, children 4,035—total 12,872; Samastipur subdivision—men 452, women 773, children 487—total 1,712; Madhubani subdivision—men 8,836, women 19,148, children 8,966—total 36,950. Only one Raj Circle has sent figures—namely 3,689 on gratuitous relief.

Monghyr.—No rain. Occasionally cloudy with gusts of westerly breeze. Standing crops doing well. Pressing of sugarcane going on. Rain wanted. Fodder and water sufficient. Prices of common rice:—

				Srs.	
Monghyr	8 to 10	} per rupee.
Begusarai	8	
Jamui	8 to 10	

Bhagalpur.—Weather cold and cloudy. Wind easterly. *Rabi* crops continue to promise well. There has been a slight fall in the price of rice in the Banka and Supaul.

subdivisions; elsewhere it remains stationary. Fodder and water sufficient. No cattle-disease reported. Common rice sells as follows:—

				Srs. c.	
Sadar	10 2	} per rupee.
Banka	10 10	
Madhipura	10 0	
Supaul	11 0	

Purnea.—No rain. Harvesting of winter rice finished. *Rabi* crops doing fairly well. Lands being ploughed for next *bhadra*. Cattle-pox reported from Araria. Fodder and water sufficient. Common rice sells as follows:—

				Srs.	
Sadar	10	} per rupee.
Kishanganj	9½ to 10	
Araria	10 to 12	

Malda.—No rain. Standing *rabi* crops doing well. Lands are being prepared for *bhadra* paddy. Common rice selling from 9 to 11 seers per rupee. Fodder and water ample.

Sonthal Parganas.—No rain. Dews scanty. Prospects of crops unchanged. Common rice 9½ to 11 seers per rupee. Prices rising. No cattle-disease. Fodder and water sufficient.

Cuttack.—Report not received.

Balasore.—No rain. Weather reasonable. *Sarad* rice being threshed. *Rabi* crops suffering for want of rain. *Dalua* crop flourishing. Sugarcane being pressed. Price of rice varies from 10 to 16 seers per rupee in the interior. Rice sells at 11½ and 13 seers per rupee at Balasore and Bhadrak respectively. Sporadic cases of cattle-pox occurring in some chaklas. Fodder and water sufficient.

Angul.—No rain. Prospects of crops the same as before. Cattle-disease reported from Ohhendipoda. Rice sells at 11½ seers at Angul and 16½ seers at Khondmala, showing a rise of price in both the subdivisions.

Puri.—No rain. Prospects of winter rice and *rabi* same as reported before. Fodder sufficient. Price of common rice varies from 10 seers 8 chitaks to 11 seers 7 chitaks per rupee.

Hazaribagh.—Weather getting warm; cloudy. *Rabi* crops doing well. Rice lands being ploughed. Sufficient supplies in bazar, except in south of district. Rice sells (average) 8 seers per rupee. No applicants for relief work. Some beggars and travellers get gratuitous relief.

Lohardaga.—State of standing crops poor in some places and fair in others. Rice sells at head-quarters 8 to 9 seers per rupee, and in the interior from 10 to 12 seers. Fodder and water sufficient. No report of cattle-disease.

Palamanu.—Rainfall 0.01. Weather reasonable but cloudy. Prices rising. Thirty-three markets selling at under 9 seers, against 11 in preceding week. *Rabi* in danger from cloudy weather. Relief works about to be undertaken.

Manbhum.—No rain. Weather reasonable. Prospects of crops on the ground as before. Cattle-disease reported from thanas Ohas, Purulia, and Raghunathpur. Fodder and water sufficient at present, but diminishing. Common rice sells as follows:—

				Srs.	
Sadar	8 to 10	} per rupee.
Gobindpur	Old rice 9	
				New „ 10	

Stock of fowl-grains sufficient at present.

Singhbhum.—Old rice out of market. New rice plentiful, but the price has risen—10 to 12 seers per rupee.

General Summary.—There was some rain in Champaran (Sadar 10, Bettiah 10, Bagaha 56) and parts of Saran (Gopalganj 22, Siwan 07), but practically none in any of the other districts during the week. The rain in Champaran has done much good to the *rabi* and poppy crops. These crops are generally promising throughout Bihar. The *rabi* crops in North Bengal are fair, but in almost all other parts they are poor. The harvesting of winter rice is not yet over. Oilseeds and pulses are being gathered, and the pressing of sugarcane is in progress. Transplantation of spring rice is going on. Ploughing for autumn rice has begun in North Bengal. Prices have not generally risen during the week. Slight

fluctuations in the price of common rice reported from some districts. In Patna the price of common rice fell from $10\frac{1}{2}$ to 11 seers, in Gaya from 9 to $9\frac{1}{2}$ seers, and at Bettiah (Champaran) from $8\frac{3}{4}$ to $9\frac{1}{2}$ seers per rupee. In the distressed districts the prices of the food-grains on which the relief wages are based are—Nadia (common rice) 9 seers, Khulna (common rice) 10 seers, Rajshahi (common rice) $9\frac{1}{2}$ seers, Patna (common rice) 11 seers, Shahabad (common rice) 10 seers, Saran (Indian-corn) 10 seers 1 chitak, Champaran (Indian-corn) $10\frac{1}{2}$ seers, Muzaffarpur (Indian-corn) 10 seers, Darbhanga (common rice) 9 seers. The numbers on relief works and in receipt of gratuitous relief on Saturday, the 23rd January, were—

Relief works—

Nadia	... 4,810 (men 2,204, women 539, children 2,007).
Khulna	... 37 (men 20, women nil, children 17).
Rajshahi	... 891 (men 852, women nil, children 39).
Patna	...
Shahabad	... 2,040 (men 702, women 896, children 442).
Saran	... 12,579 (men 3,318, women 5,136, children 4,095).
Champaran	... 115,770 (men 50,638, women 40,031, children 25,101).
Muzaffarpur	... 8,014 (men 3,044, women 1,464, children 3,506).
Darbhangha	... 103,581 (men 43,928, women 40,392, children 14,261).

Total ... 247,722, against 233,816 in the previous week.

Gratuitous relief—

Nadia	... 912 (men 170, women 600, children 142).
Khulna	... 138 (men 33, women 60, children 45).
Patna	... 5 men (in Bihar).
Saran	... 7,313 (men 1,167, women 4,839, children 1,307).
Champaran	... 5,838 (men 1,383, women 2,475, children 1,980).
Muzaffarpur	... 29 (men 2, women 26, child 1).
Darbhangha	... 51,534 (men 12,203, women 25,843, children 13,488).

Total ... 65,769, against 44,423 in the previous week.

Private relief—

Relief works—

Hatwa Raj	... 2,548
Darbhangha Raj	... Figures not complete.

Gratuitous relief—

Hatwa Raj	... 1,112.
Rest of Saran district	.. 1,508.

The total fall from 1st to 23rd January 1897 Nil

The average fall of the corresponding period for 24 years, Surveyor-General's Office 0.17

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed, open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official Tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph

The mouth of the rain-gauge is one foot above the ground.

WATER-SUPPLY.

No. 487 L.S.-G.—The 28th January 1897.—The following reports of the progress made in the several districts of the Presidency and Orissa Divisions in collecting and placing on record the chief facts regarding water-supply are published for general information.

H. H. RISLEY,

Secretary to the Government of Bengal.

No. 133G.—L.S.-G., dated Calcutta, the 21st January 1897.

From—E. V. WESTMACOTT, Esq., Commissioner of the Presidency Division,
To—The Secretary to the Government of Bengal, Municipal Department.

With reference to your No. 58 L.S.-G. of the 12th December 1896, asking for a quarterly report on the progress made in each district of this Division in collecting and placing on record the chief facts regarding water-supply, and the steps, if any, that have been taken by Municipalities and District Boards respectively to improve existing sources of water-supply and open new ones, I have the honour to submit as follows.

2. The Magistrate and Chairman of the District Board of the 24-Paraganas reports that the register in Form I has been prepared in accordance with the instructions laid down in Government Circular No. 8 T.M. of the 15th May 1896, and that the District Engineer has been directed to prepare a map of each thana, showing the number of tanks in each village. This work,

he says, has been done for some thanas, and it is reported that the registers are being checked. I have called for a report as to how and by whom the work is being checked. As regards the improvement of water-supply, the Chairman states that a sum of Rs. 6,631 has been spent since last April, as detailed in the margin.	
	Rs.
(1) For digging 25 wells, 2 in Sadar, 22 in Barasat, and 1 in Basirhat subdivision	1,065
(2) For completing excavation of a tank at Kawrapukur in Barasat subdivision	724
(3) Grants for making excavation in the beds of 194 dried-up tanks	4,842
Total	6,631

3. The Magistrate and Chairman of the District Board of Nadia states that no steps have been taken by the District Board for improving existing sources of water-supply, but that it will, as usual, construct some masonry wells this year. The water-supply registers are being prepared through the Police Sub-Inspectors of the respective thanas. The reports of 16 thanas out of 21 are said to have been received. The reports are said to be fairly reliable, but the Magistrate intends to defer taking any action upon them until he can have them checked, which he thinks will not be possible until the famine is over.

4. The Magistrate and Chairman of the District Board of Murshidabad reports that during the quarter ending 31st December 1896, the sinking and construction of five masonry wells of 6 feet in diameter were taken in hand by the District Engineer for improving the water-supply. Of these, three wells are almost completed. Besides this, arrangements have been made by the District Engineer to manufacture and burn 3,000 earthen rings for wells. Necessary steps have been taken for the due preparation of the Registers I and II, and the work is still going on. It is stated that by the end of the rains the lists will be sufficiently complete to enable the District Board to decide what work should be taken up during the next cold weather, and to arrange a future plan of action.

5. The Chairman of the District Board of Jessore reports that steps have been taken for the due preparation of the two registers in Forms Nos. I and II, that the necessary information has already been collected by all the Local Boards except the Sadar, and that the register in Form I has been received lately from some of them. The work is expected to be finished shortly. As regards the progress made towards the improvement of water-supply, he states that the District Board, in consideration of the reports from the Sub-

(1) Opening out of the Bhowanipur khal in the Jhenida subdivision	Rs. 2,000
(2) Sinking wells in Bongaon	1,500
(3) Ditto in Magura	3,000
(4) Ditto in Jhenida	2,000
(5) Ditto in Sadar	3,000
(6) Re-excavation of a tank at Dourra in Bongaon	500
(7) Ditto ditto at Sakole in Narail	850
(8) Ditto ditto at Dowlutpur in Sadar	480
(9) Ditto ditto at Madghope in "	150

divisional Officers regarding the scarcity of water-supply in some villages, and on the application of some villagers, has provided funds in the budget estimates for 1896-97 and 1897-98 for the purposes noted on the margin, to improve the existing sources of the water-supply of the district.

6. Zamindars, merchants and respectable villagers have promised subscriptions towards project No. I, viz. the opening out of the Bhowanipur khal, and the work has been commenced. Further steps for the improvement of other water-supply will be taken soon.

7. Sufficient progress does not appear to have been made in the matter in the district of Khulna. The District Board requested the Magistrate to furnish them with the necessary information. Up to this time the latter has been able to supply information only from six unions and three thanas. It is reported that the information is still being collected in other thanas through thana officers and panchayats. I have asked the Magistrate to report as to the manner the information is being collected, and whether it can be relied on.

8. As to the steps taken by municipalities, I beg to enclose copies of the reports noted in the margin, which contain in detail particulars of each municipality in the district of the 24-Parganas, Nadia, Murshidabad and Jessore. No report has yet been received from the Magistrate of Khulna on the subject. It will be submitted to Government as soon as received.

(1) Letter No. 235M., dated the 5th January 1897, from the Magistrate of the 24-Parganas.

(2) Letter No. 9J.M., dated the 6th January 1897, from the Magistrate of Nadia.

(3) Letter No. 486M., dated the 4th January 1897, from the Magistrate of Murshidabad.

(4) Letter No. 131J., dated the 8th January 1897, from the Magistrate of Jessore.

No. 2357M., dated Alipore, the 6th January 1897.

From—E. W. COLLIN, Esq., Magistrate of the 24-Parganas,
To—The Commissioner of the Presidency Division.

With reference to your No. 36M., dated the 14th December last, forwarding Government Circular No. 58L.S.-G., dated 12th idem, regarding water-supply in the municipalities and in places under the jurisdiction of the District Board, I have the honour to submit the following report as to the progress made in each of them in collecting and placing on record the chief facts concerning water-supply and the steps taken to extend or improve it. As there has not been time to call for reports from the municipalities, this report is compiled from such information as is available in the office. I have the honour, further, to report that in the beginning of November I issued a circular to all municipalities, urging them to consider the question of water-supply, and, if necessary, to apply for loans, so that tanks might be re-excavated and work thereby provided for those in want.

2. With regard to the preparation of Registers I and II, they have been compiled in ten municipalities, viz., Naihati, Garulia, Baraset, Barrackpore, Baduria, Maniktollah, North and South Dum-Dum, Taki, and Joynagore. Register II has been prepared in Baranagore. The Chairmen of the Basirhat, South Barrackpore, Goberdanga, and Titaghur Municipalities are preparing the registers. The Chairmen of the South Suburban, North Barrackpore, and Rajpore Municipalities have not submitted any reports. Of the municipalities in this district, Cossipore-Chitpur and Maniktolla have a filtered water-supply, which is fairly adequate.

Baranagore.—Register II has been opened. Information for Register I is in progress of collection. The wards lying near the river draw their supply from it. There are a number of tanks with wholesome water in the garden-houses owned by some wealthy residents of Calcutta from which the inhabitants are allowed to draw water. Sixty-five private tanks were filled with river-water last April and May by the Manager of the Baranagore Jute Mills. Proposals have been accepted by the Commissioners at a meeting for spending Rs. 30,000 on the acquisition and improvement of tanks. They are under consideration in this office.

Titaghur.—The registers are under preparation. The water-supply for drinking purposes is chiefly derived from the River Hooghly, and filtered water is laid on by the mills in the bazar. The supply is adequate.

Garulia.—Registers I and II have been opened. This is a riparian municipality, and draws its water from the river. There are 13 private wells and 16 private tanks, but they are not much used for drinking water. The Dunbar Cotton Mills provide filtered water to the public from a small hydrant connected with their mill filters. The supply is adequate.

South Barrackpore.—Registers are under preparation. The river-side wards draw water for drinking purposes from the river. The rural tracts are well provided with tanks in the gardens of wealthy residents, which do not dry up during hot weather. Their condition is fair, but they are not strictly reserved. This question is under consideration. The supply is not adequate.

Goberdanga.—Registers are under preparation. The source of supply is the River Jamuna, private tanks, and municipal wells. The latter cost Rs. 750, but they are not used, as the people prefer the tanks and river. Measures were taken this year to prevent steeping of jute in the river. The tanks have been reported by the Sanitary Department to be good. The Commissioners have submitted a proposal to take a loan of Rs. 2,000 from Government to acquire a piece of land and to excavate a tank on it.

Baduria.—Registers I and II have been opened. The river-water is used for drinking and culinary purposes, and there are three private unreserved tanks. The Commissioners report that there is no lack of drinking-water, but the Deputy Sanitary Commissioner does not agree with this view. The Commissioners have allotted a sum for re-excavating a tank to be reserved for drinking purposes. The subject of water-supply is under consideration.

South Dum-Dum.—Registers I and II have been opened. The water-supply is from tanks, and the Commissioners are endeavouring to get an extension of the filtered water-supply from the Cantonment Reservoir. The tanks are fairly adequate. The Commissioners have submitted a proposal for the acquisition of a tank in the Digla busti.

North Dum-Dum.—Registers I and II have been opened. There are 49 perennial tanks and 35 intermittent. Of these, 35 are wholesome. There are 8 wholesome wells. The Commissioners have resolved to sink 6 wells at a cost of Rs. 250, and to excavate 5 tanks in Wards Nos. I and II. They intend also to apply for a loan of Rs. 2,000 for re-excavation and acquisition of tanks. The present water-supply is not adequate.

Basirhat.—The Registers are under preparation. The supply is from the Ichamatty river and from tanks. There are said to be six small wells, five reserved municipal tanks, one reserved tank belonging to the Public Works Department, and 196 non-reserved private tanks. The municipal tanks are reported by the Sanitary Department to be inadequately reserved, and the same authority reports the supply to be inadequate. The Commissioners, however, consider it to be sufficient, and do not propose to take any steps except to attempt to induce the owners of some of the existing tanks to re-excavate them under section 200 of the Municipal Act. A tank was cleansed and a new tank dug in 1895-96 at a cost of Rs. 250.

Baraset.—Registers I and II have been opened. The existing sources of supply are tanks and five Norton's tube-wells, which were introduced last March. Of these, three are working well. There are altogether 18 wells, of which 15 are unreserved ring-wells. There

are two reserved tanks and 26 unreserved. The Commissioners are preparing schemes for the acquisition and re-excavation of one tank in each ward of the Municipality, and propose to take a loan for the purpose. In spite of considerable activity last hot season, there is still an insufficient supply of water.

Rajpore.—The Registers have not yet been prepared. The chief sources of water-supply are some tanks formed out of the old bed of the Ganges. There are other tanks, but they have not been reserved. The present supply is inadequate. There is at present a scheme before the District Board to open up the silted bed of the Ganges so as to make it a connected free channel. Steps are being taken to induce the persons who have encroached upon the bed to remove the obstructions. The Municipality proposes to excavate five tanks at a cost of Rs. 8,000, and is preparing plans and estimates.

Baruipur.—Registers I and II have been opened. There are three municipal tanks, of which one is reserved, but the others are not good. There are a number of private tanks, some of which contain good water. Suggestions have been made to acquire some tanks with a view to reserving them for drinking purposes, and the Commissioners, acting on those suggestions, have proposed to acquire lands for their tanks, and to sell the municipal tanks, which do not contain good water.

Naihatty.—Registers I and II have been opened. Water is supplied from the Hooghly. In the north and south filtered water is supplied from the Gowripur and Kakinarah Jute Mills. There are thirteen wells belonging to the Municipality. There are also some tanks which do not contain good water. The Commissioners have resolved to acquire several tanks with a view to re-excavating them, and propose to take a loan from Government for the purpose. The present supply is fairly adequate.

Joynagore.—Registers I and II have been opened. There are many private tanks in the Municipality which contain a fair supply of water, but which are not reserved. The Commissioners do not appear to have yet taken any steps to improve their condition, but no complaints have been received that the supply is inadequate.

South Suburban.—Registers are under preparation. The chief source of supply is from private tanks, but water is also taken from the River Hooghly and from Tolly's Nullah. The supply, though not insufficient, is not good. Attempts were unsuccessfully made to have the Calcutta pipes extended to some parts of this Municipality. No further efforts appear to have been made to improve the condition of the present supply. The inhabitants of wards which adjoin the Calcutta Municipality make use of the hydrants of that Municipality.

North Barrackpore.—The Chairman reported that the Commissioners passed a resolution to give effect to the Government circular No. 7T.M. The people draw water for drinking purposes from the river as well as from the tanks. The supply is not adequate.

Taki.—The Chairman has not submitted a report, but it is understood that Registers I and II have been prepared. There are 8 private wells and 57 private tanks, but none are reserved. The supply is deficient in one ward, but elsewhere adequate. The Deputy Sanitary Commissioner reports the supply as bad, but I find from my notes that it is fairly good except in one ward. The Commissioners have provided Rs. 400 for a new tank, but have not yet been able to select the site.

3. As regards the water-supply in places within the jurisdiction of the District Board, a separate report will be submitted from the office of the District Board.

No. 9J.M., dated Krishnagar, the 6th January 1897.

From—W. MAXWELL, Esq., Joint-Magistrate, in charge, Nadia,
To—The Commissioner of the Presidency Division.

In reply to your circular letter No. 36M., dated the 18th December last, and annexure, calling for a report showing the progress made in collecting and placing on record the chief facts regarding water-supply in the municipalities of this district, I have the honour to refer you to this office letter No. 769J.M., dated the 20th August last, submitting a statement showing the existing sources of water-supply of the municipalities in this district. As regards the steps taken to improve them, I have the honour to report as follows:—

1. *Nadia Municipality.*—The Chairman reports that owing to want of funds no steps have yet been taken to improve the water-supply of this town. The Commissioners intend to construct 3 masonry wells as soon as their budget for the ensuing year is sanctioned.

2. *Kushtia Municipality.*—The Vice-Chairman reports that no fresh improvement has been made except that one new tank is under excavation solely for drinking purposes. Steps are being taken for sinking as many tube-wells as are convenient in suitable places.

3. *Krishnagur Municipality.*—The Chairman reports that an improvement in respect of water-supply has been made in the following way. The engine and pumping gear of Babu Nafar Chandra Pal Chowdhuri were recently utilized in lifting water from the Jalanghi River into the tanks in the bed of the Anjoona Khal by the existing drain of the Municipality, and also to the tanks on the eastern portion of the town at an estimated cost of Rs. 2,200. This has been of great benefit to the residents of Krishnagur.

4. *Santipur Municipality.*—The Chairman reports that Rs. 2,000 has been sanctioned towards the improvement of the present sources of water-supply and opening new ones. Five new pucca wells are going to be sunk very shortly by the District Engineer, Nadia, who has undertaken the work.

5. *Ranaghat Municipality*.—Only one masonry well has been added this year to the existing sources of water-supply of the Municipality. It is in contemplation to re-excavate one tank and sink four masonry wells in the beginning of the next year.

6. *Birnagar Municipality*.—The District Engineer, Nadia, has been requested to sink as early as possible two masonry wells of his own patent in those parts of the town where the water-supply is deficient, as the Deputy Sanitary Commissioner recommended wells in preference to tanks.

7. *Meherpur Municipality*.—Two masonry wells and three ordinary *kutcha* wells have been added to the existing sources of water-supply of the Municipality.

8. *Kumarkhali Municipality*.—The Chairman reports that no progress could be made this year for want of funds. It has been determined to sink two masonry wells at the Durgapur and Elangi Wards, which are far off from the Gorai River. Adequate provision in the next year's budget will be made for this purpose.

9. *Chakilah Municipality*.—One *pucca* well has been made at Ghosepura, and other *kutcha* and *pucca* wells are being fully cleansed.

No. 486M., dated Camp Hariharpara, the 4th January 1897.

From—E. V. LEVINGE, Esq., Magistrate of Murshidabad,

To—The Commissioner of the Presidency Division.

WITH reference to your circular No. 36M., dated the 18th December 1896, regarding the improvement of the existing sources of water-supply in the municipalities of this district, I have the honour to report as follows.

2. All municipalities have prepared registers in the forms (I and II) annexed to the letter from the Government of Bengal in the Municipal Department, No. 7T.M., dated the 15th May 1896. Generally speaking, the municipalities of this district are favourably situated as regards the supply of drinking-water, as four out of the five are on the River Bhagirathi. The Kandi Municipality is the only one which is at a distance from that river, and the Municipality is chiefly dependent on wells and tanks for its supply of drinking-water.

3. The following progress reports have been submitted by the different municipalities:—

Berhampur.—The Chairman reports that the existing sources of water-supply are sufficient for the present requirements of the people. As the proposed scheme of water-works, the cost of construction of which will be borne by the Maharani Surnomaye of Cossimbazar, will be taken in hand at once, no further steps are necessary for any extension or improvement of the water-supply. The cost of maintenance of the water-works will be borne by the Municipality.

Murshidabad.—The supply of drinking-water in this Municipality is reported to be sufficient, as all parts of the Municipality are easily accessible to the River Bhagirathi. There are also 16 wells and 14 tanks in the Municipality, the water of which is reported to be wholesome. The Chairman reports that he will spend Rs. 30 in cleaning some wells in a few weeks before the close of the year. Notices will also be issued on the proprietors to clean some of the other wells. I think that a good deal more might be done in the way of issuing notices on the proprietors of wells and tanks, but it is useless issuing such notices unless proper steps are taken to see that the orders are carried out. I will instruct the Chairman accordingly.

Azimganj.—The Chairman says that the water-supply is sufficient, as the municipal jurisdiction extends on both sides of the river. A few wells might with advantage be sunk in the outlying portions of the Municipality, and this will be done in the present year.

Jangipur.—The Chairman reports that he has recently sunk two wells, and that others will be sunk in the present year. The Municipality is situated on both sides of the River Bhagirathi. Babu Jogendra Narain Roy of Lalgola has promised to excavate a tank within the municipal limits. The Chairman does not say whether he is issuing notices on the owners of wells and tanks to keep them clean. He will be reminded of the necessity of doing this.

Kandi.—The Municipality depends chiefly for its water-supply on wells and tanks. The tank-water is generally very good, but in some tanks it has been very low owing to the dryness of the season. Enquiries are being made with a view to acquiring the rights in one or two tanks, and reserving them solely for drinking purposes. Several notices have recently been issued on proprietors of tanks to keep them clean, and in some instances the proprietors have been prosecuted for failing to comply with the orders. Two wells have lately been sunk, and a Norton's tube-well has been ordered as an experimental measure. I lately inspected the Municipality, and I think that the Commissioners are taking proper steps to improve the water-supply.

No. 13L.F., dated Jessore, the 8th January 1897.

From—BABU SASI BHUSAN BOSE, Deputy Magistrate in charge, Jessore,

To—The Commissioner of the Presidency Division.

WITH reference to your No. 36Cir.M., dated the 18th December 1896, regarding quarterly progress report about improvement of the existing sources of water-supply in the

municipalities, I have the honour, in the absence of the District Magistrate on tour, to report as follows :—

1. *Jessore Municipality*.—Since the previous report there have been no further additions to the sources of water-supply. Attempts were, however, made to sink four tube-wells in accordance with Government circular No 22L.S.-G., dated the 2nd April 1896, but none of them proved successful. The Chairman intends to introduce a few of these wells to a certain part of the Municipality to see how they work.

2. *Kotchandpur Municipality*.—The Chairman writes that no action was required to be taken to improve the existing sources of water-supply within the Municipality. A private tank was re-excavated by the owner after he had been served with a notice under section 200 of the Municipal Act. The River Bhairab supplies good water.

3. *Maheshpur Municipality*.—One tank in the Municipality has been cleared of the rank vegetation and earthwork done on its bank, and attention has been paid to prevent two other tanks and a reserved tank from pollution of their water. Besides, the owner of a private tank has been served with a notice to either re-excavate or fill up his tank, the water of which has become unwholesome.

No. 318.-G., dated Cuttack, the 22nd January 1897.

Memo. by—H. G. COOKE, Esq., Commissioner of the Orissa Division.

COPY, with that of its enclosure, forwarded to the Secretary to the Government of Bengal for information, with reference to his circular No. 58L.S.-G., dated the 12th December 1896.

2. Reports from other districts will be submitted on their receipt.

No. 309, dated Balasore, the 24th December 1896.

From—**BARU RADHA CHARAN DAS**, Vice-Chairman in charge, Balasore Municipality,
To—The Magistrate of Balasore.

WITH reference to your memorandum No. 2071, dated the 21st instant, I have the honour to report that, with regard to the water supply in this town, the Municipal Commissioners have taken strict measures to keep the tank reserved for drinking purposes from being polluted, and no new works have been done in the current quarter, as there has been no necessity for them.

No. 1013, dated Balasore, the January 1897.

From—**RAJA BAIKUNTHA NATH DE BAHADUR**, Vice-Chairman, District Board,
Balasore,
To—The Magistrate of Balasore.

WITH reference to your memorandum No. 2071, dated the 21st ultimo, forwarding Bengal Government circular No. 58L.S.-G., dated the 12th December 1896, I have the honour to state that the District Board has allotted Rs. 2,000 for the improvement of existing sources of water-supply and to open new ones, and have arranged to take up the following works in hand during the current year :—

- (1) To dig a tube-well in Bhogra. Estimate for the work has already been prepared, and the work will be taken up in January 1897.
- (2) To re-dig two tanks near Ohandbally. Estimates are under preparation.
- (3) To re-dig a tank at Jagannathpur. Work partly done.
- (4) To re-dig a tank at Gopalpur, pargana Remna. Work just commenced.
- (5) To re-dig a tank at Gabgan. Estimate under preparation. Work will be commenced in the latter part of January 1897.
- (6) To re-dig a tank at Talpada. Estimate under preparation.

As to the progress made in collecting and placing on record the chief facts regarding water-supply, I beg to state that the information received up to date from the Local Boards is incomplete, and so fresh reports have been called for.

Besides the above allotment from the District Board fund, there exists an endowment fund of Raja Baikuntha Nath De Bahadur and Babu Satyendra Nath De, which is to be spent for the above tank-digging purpose before the close of the year.

No. 43, dated Balasore, the 6th—7th January 1897.

Memo. by—**BARU RASHI BHARI NAIK**, for the Magistrate of Balasore.

COPY, together with copy of the Vice-Chairman in charge, Municipality's No. 309 of the 24th ultimo, forwarded to the Commissioner of Orissa Division, Cuttack, for information, with reference to his No. 398S.-G. of the 17th idem.

INDIAN FAMINE CHARITABLE RELIEF FUND.

BENGAL PROVINCIAL COMMITTEE.

The following papers are published for general information.

M. FINUCANE,
Secretary to the Govt. of Bengal.

Dated Calcutta, the January 1897.

From—E. N. BAKER, Esq., Honorary Secretary, Bengal Provincial Executive Committee of the Indian Famine Charitable Relief Fund,
To—The District Magistrate and Deputy Commissioner of

I AM directed by the Executive Committee for Bengal, of the Indian Famine Charitable Relief Fund, to invite

Resolution :—That the meeting recognise the fact that the time has come when a Charitable Fund should be formed for the relief of distress in the famine-stricken districts of India, such relief being supplementary of the operations of Government and designed to meet cases not clearly or adequately covered by those operations, and that to this end subscriptions should be invited from the well-to-do throughout this country, and contributions from abroad be thankfully received.

Resolution :—That this meeting accepts the statement of the objects to which private subscriptions may legitimately be devoted, as set forth by Government in the *Gazette of India* of the 9th January, and the organization there suggested for the collection and administration of subscriptions to the Fund; and resolves that a General Committee composed of the following gentlemen* be appointed with power to add to their number, and to appoint an Executive Committee to administer the Fund.

* *Vide list annexed.*

your attention to the proceedings of a public meeting held in Calcutta on the 14th instant, over which His Excellency the Viceroy presided, and at which the Resolutions quoted in the margin were unanimously passed. The proceedings of that meeting have been reported in the public press, and will doubtless have been perused by you.

2. At the instance of the Central Executive Committee which was appointed under the second of the two Resolutions referred to, a meeting was held on the 22nd instant, under the presidency of His Honour the Lieutenant-Governor of Bengal, at which it was resolved to form a Provincial Committee for Bengal composed of the gentlemen named in enclosure

sure A of this letter; and an Executive Committee composed of the gentlemen named in enclosure B was appointed to administer the Charitable Relief Fund in Bengal.

3. The Executive Committee for Bengal would now request that steps may be taken for the formation of Local Committees in each district of the Province and for the raising of subscriptions to be administered by those Committees in accordance with the principles approved by Government and accepted by the Central Committee. Enclosure A contains the names of gentlemen resident in your district who are on the Provincial Committee, who it is thought may appropriately be invited to serve on the Local Committee for () with any others who may be co-opted by them. It will be understood that this list is a nucleus only. The Executive Committee have no doubt that in the district of () there are many other gentlemen of good position who will be willing to serve, and they regard it as important that the co-operation of all such should be secured, in order that the Local Committee may be as strong and representative as possible. In the opinion of His Honour the Lieutenant-Governor, in which the Executive Committee fully concur, the Local Committee should be essentially non-official in character, and this should be borne in mind when determining its composition. It should, however, be associated with the district and subdivisional officials. This is considered desirable in order to ensure that funds supplied by private charity shall not interfere with or overlap the operations of Government officers, who are responsible for doing all that is necessary to save the lives of the people in tracts in which famine prevails. The Executive Committee hope that no time may be lost in arranging for the appointment of a Local Committee for () in accordance with these suggestions, and

they request that, when this has been done, the names of the gentlemen of whom it is composed may be communicated to them. Any changes in its composition from time to time should be similarly reported.

4. In addition to the Local Committee for the district, it will probably be desirable to form one or more Sub-Committees to deal with subdivisions or other smaller areas. This is a point on which your experience and the views of the leading residents will be the best guide. If you should consider this course desirable, the same principles which have been indicated in respect of the district committee should, *mutatis mutandis*, be observed. The Executive Committee would be glad to be informed what course is decided on in this matter.

5. As soon as the Local Committee has been appointed, it is desirable that a meeting should be called at a very early date, at which you should explain the place which it will hold in the machinery for dispensing charitable relief, the objects with which it has been formed, and the principles to be observed by it in the discharge of its functions. In this connection, your attention is invited to enclosures C and D of this letter. The first of these contains a sketch of the organisation which has been devised for the collection and administration of private subscriptions: the second is a statement of the objects to which private subscriptions may legitimately be devoted.

6. The primary objects with which it is proposed to establish Local Committees are (a) the raising of subscriptions, and (b) the detailed administration of the relief funds raised by private charity in concert with the local authorities. With regard to the former, the Executive Committee suggest that subscribers should be informed that their subscriptions can be devoted (i) to the needs of all parts of India which may be distressed, or (ii) specially to meet the needs of the province of Bengal, or of any particular district or area. His Honour the Lieutenant-Governor has expressed the opinion that, having regard to the circumstances of the case, it is preferable that subscriptions raised in Bengal should be applied to the relief of distress in this province, and the Executive Committee desire to endorse this view. Effect will, however, be given to any wishes that may be expressed by individual subscribers in this matter. The local knowledge and influence of the District Committee should be invaluable in inviting subscriptions and administering the funds; and the Executive Committee rely confidently on their assistance in making the appeal successful. The authority of Government has been obtained to depositing all sums received in the district treasury to credit of an account to be entitled the "() Branch, Indian Famine Charitable Relief Fund." An account should be submitted at the end of each fortnight, beginning from the 1st February 1897, in the form hereto annexed (enclosure E), showing the amounts collected from time to time. Each Committee should keep a register in a suitable form showing separately all sums received by it under each of the three heads of enclosure E, and the corresponding remittances to the Executive Committee, and other expenditure. At the end of each fortnight all sums designated by the subscribers as devoted for the needs of India generally, or to those of the province of Bengal, should be remitted to the Executive Committee by Remittance Transfer Receipt.

7. The funds to be administered by the Local Committee will consist of (i) subscriptions designated by the donors as intended for the relief of distress within the district: and (ii) sums allotted by the Bengal Executive Committee. The objects on which these funds may properly be expended are set forth in enclosure D of this letter and are four in number. It is considered that the Local Committee should have a free hand in the administration of these funds, and there is no intention to dictate any course of action beyond laying down the general injunction that the principles formulated in enclosure D should be observed. I am directed, however, to invite special attention to the third clause of the enclosure, which runs as follows, viz.:—"In relieving the numerous poor but respectable persons who will endure almost any privation rather than apply for Government relief, accompanied as it must be by official inquiry into and by some kind of test of the reality of the destitution which is to be relieved." His Honour the Lieutenant-Governor and the Executive Committee believe that in present conditions the funds at the disposal of the Local Committee can be most usefully laid out in this manner, and I am to suggest that applications for aid under the three other permissible heads may

properly be deferred until the Committee has dealt with all reasonable claims on behalf of the respectable poor, and of *purdah* ladies and other persons who, by the custom of the country, are unable to apply for Government relief.

8. In order to ensure that, as far as possible, no case of these kinds shall be overlooked, I am to suggest that each member of the Local and Sub-Committees should be invited to take personal charge of a suitable area, and that he should arrange to visit, either in person or through some reliable agent, every village in such area at frequent intervals. For this purpose the Committee will no doubt be able to enlist the services of members of Local and District Boards and Union Committees, members of panchayets, and the like. It cannot be doubted that such visits will bring to light many persons whose caste, usages and feelings preclude the application of a labour test—women of good family and others—who may be in great though silent distress. In dealing with cases of this class, the Local Committee may find it advisable to provide light forms of employment, such as spinning, weaving, and the husking of rice, occupations which can be carried on in the people's own homes. In some cases relief might most conveniently take the form of selling grain, under due precautions, at less than cost price. This system should, however, it is considered, only be sparingly resorted to. Grain should not of course be sold in this way to the public generally, but only to persons of the class described in this paragraph, *i.e.*, to the respectable poor and to ladies, who, in the opinion of the Local Committee, are unable to come on to the State Relief Works.

9. The extent and intensity of distress vary in different districts of Bengal, and are greater in some places than in others. If your district is among those which are more severely affected, it is probable that whatever sums may be subscribed within it, and more, will be required for local expenditure. If, on the other hand, it is happily among those which are more fortunately circumstanced, the Local Committee will, it is hoped, recognize the justice of setting free much of what they are able to collect for the relief of more pressing necessity elsewhere. Even in those districts which are least affected by the failure of the rains, the high range of prices must be the cause of some distress, and occasions will still arise for the issue of relief in the manner described above.

10. In addition to the fortnightly statement of subscriptions collected (enclosure E), the statements in the annexed forms F and G should be submitted at the end of each fortnight, beginning from the 1st February next. These are required for transmission to the Central Committee.

11. An early opportunity should be taken by each Local Committee to appoint office-bearers, including a Chairman, Secretary, and Treasurer, who will be responsible for the keeping up of the necessary accounts, for submitting the prescribed returns, and making the authorised disbursements.

ENCLOSURE A.

BENGAL PROVINCIAL COMMITTEE.

Hon'ble Sir F. Maclean, K.T., Q.C., *Chief Justice.*
 The Most Revd. the Lord Bishop of Calcutta.

Mr. T. W. Spink.

Babu Kali Nath Mitter.

Mr. E. N. Baker, *Secretary.*

ENCLOSURE C.

Sketch of the organisation which is suggested for the collection and administration of private subscriptions.

- (1) A Central Committee, to be termed the Indian Committee for the provision and administration of Charitable Relief, to be established in India. The General Committee to be unlimited in numbers, and nominations of representatives from each Province likely to be affected by famine to be invited. The General Committee to nominate an Executive Committee consisting of not more than _____ members to undertake the actual administration of the business of the Committee. The head-quarters of the Committee to be at Calcutta. The functions of the Central Committee will be—
 - (a) To receive moneys transmitted from England or other countries, and also moneys that may be subscribed in India for the general purposes of the Committee. The fund so created to be termed "The Indian Famine Charitable Relief Fund, 1897."
 - (b) to apportion these moneys between the different Provinces;
 - (c) to arrange, in concert with the Government, the system upon which charitable relief is to be applied.
- (2) A Committee to be formed in each Province, which will receive the moneys apportioned to that Province by the Central Committee, and also any moneys subscribed specially to meet the needs of the Province, will distribute these moneys to Local Committees, and will generally direct the action of the Local Committees. The Provincial Committee will act in concert with the Local Government, and will be responsible for seeing that the money allotted by the Central Committee is spent on the declared objects of the Fund and with the approval of the Local Government.
- (3) Local Committees to be formed as the Provincial Committees may determine. The detailed administration of the Relief Funds will be in the hands of these Local Committees acting in concert with the local authorities.
- (4) The collection of money in England to be in the hands of a Committee or other agency which will be set on foot in such manner as the Secretary of State may deem advisable.

ENCLOSURE D.

Statement of the objects to which private subscriptions may legitimately be devoted.

GOVERNMENT fully accepts general responsibility for saving the lives of the people in tracts in which famine prevails; and it is essential that private charity, while working side by side with, should not interfere with or overlap the operations which are organised for this purpose. There is, however, ample scope for its exercise in supplementing these operations, in mitigating suffering, and in relieving distress which falls just short of absolute destitution. Especially, private contributions might usefully be expended on the following objects:—

Firstly: in supplementing the subsistence ration which alone is provided from public funds by the addition of small comforts, whether of food or of clothing, for the aged or infirm, for the patients in hospitals, for children, and the like.

As guardian of the public purse, and in view of the magnitude of the calamity, Government is obliged to limit its assistance to what is absolutely necessary for the preservation of life.

Secondly: in providing for the maintenance of orphans.

Every famine leaves behind it a number of waifs who have lost or become separated from those who should be responsible for them and for whose maintenance it is necessary to provide till they are of an age to support themselves.

Thirdly: in relieving the numerous poor but respectable persons who will endure almost any privation rather than apply for Government relief, accompanied as it must be by official enquiry into, and by some kind of test of the reality of the destitution which is to be relieved.

The feeling of the sacredness of the "purdah" or domestic privacy is intensely strong in India; and it is most difficult for any official organisation to reach, or even to ascertain with certainty the existence of, distress of this nature.

Fourthly: in restoring to their original position, when acute distress is subsiding, those who have lost their all in the struggle, and in giving them a fresh start in life.

The peasant cultivator may often thus be saved from losing his holding, through sheer inability to cultivate it, and from sinking to the position of a day-labourer.

ENCLOSURE E.

Statement of subscriptions collected.

I. Amount subscribed in the district for the needs of India generally, and remitted to the Bengal Executive Committee—

- (a) Up to date of last report.
(b) Since date of last report.

II. Amount subscribed for expenditure within Bengal only and remitted to the Bengal Executive Committee—

- (a) Up to date of last report.
(b) Since date of last report.

III. Amount subscribed for expenditure within the district, and credited in the District Treasury—

- (a) Up to date of last report.
(b) Since date of last report.

Gram and pulses	...	995	1,354	4,412	6,005
Other food-grains, such as jowar, barley, oats, &c.
Total	...	40,988	55,789	105,262	1,43,273

Burma rice is coming in plentifully, and is being carried by rail all over the country. During the period under report the total quantity received was 75,300 cwts., against nil in the preceding year. The imports from Chandbali were limited to 6,056 cwts. of rice and 172 cwts. of paddy, against 30,495 cwts. and 9,498 cwts., respectively, during the corresponding week last year. A supply of 5,156 cwts. of rice and 10,017 cwts. of paddy was received from Balasore, but in the previous year there were no such imports. Out of the total increase shown under gram and pulses, Coconada in the Madras Presidency contributed 3,115 cwts.

Exports.—In the following statement the total quantity of each kind of food-grains exported by sea during the third week of January 1897 is compared with the figures for 1896:—

1	15TH TO 21ST JANUARY			
	1896.		1897.	
	2	3	4	5
<i>Food-grains.</i>	Cwts.	Mds.	Cwts.	Mds.

Wheat	4,630	6,302	170	231
Gram and pulses	28,902	39,339	8,790	11,964
Other food-grains, such as jowar, barley, oats, &c.	350	476	182	248
Total ...	232,492	3,16,447	194,938	2,65,332

The shipments of rice to foreign ports were very brisk during the week under report, the total increase amounting to 22·10 per cent., in comparison with the figures for the corresponding period of 1896. The aggregate quantity exported to Germany, Abyssinia, West Indies, and Arabia (other than Maskat) amounted to 96,222 cwts., against nil in the preceding year. There was, however, a cessation of exports to Zanzibar, Natal, Demerara, Surinam and Persia, all of which imported largely in the previous year. Muscat in Arabia received 34,567 cwts., against only 2,771 cwts. in 1896. The falling off in the exports to Ceylon amounted to 17,077 cwts., while the trade with the United Kingdom was practically unchanged. With the Indian ports, however, there was little or no trade, the total quantity shipped during the week being only 490 cwts., against 46,726 cwts. in the preceding year. Under gram and pulses the largest fluctuation occurred in the consignments to the United Kingdom, which received only 1,175 cwts., against 18,783 cwts. in 1896.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below.

STATISTICS OF THE SEA-BORNE TRAFFIC OF THE MINOR PORTS IN BENGAL IN FOOD-GRAINS.

No. 290 Statistics.—The following memorandum and statements are published for general information.

STATISTICAL DEPARTMENT,
The 2nd February 1897.

M. FINUCANE,
Secy. to the Govt. of Bengal.

MEMORANDUM.

THE comparative statements below give statistics of the import and export trade of the minor ports of Chittagong, Narayanganj, Balasore (including both Balasore and Chandbali), Cuttack, and Puri during the week ending 7th January 1897, as compared with the trade of the corresponding period of 1896 :—

Total ...	{ 1896	31,107	47,190	78,297	106,571
	{ 1897	748	22,249	22,997	31,301

The falling off under Chittagong is due to the cessation of exports to Cochin, which received 16,871 cwts. of paddy in 1896. Similarly the ports of Columbo and Mauritius, which together were supplied with 31,107 cwts. of rice from Cuttack in 1896, imported nothing during the period under report. The fluctuations in the exports from the Balasore ports are mainly due to smaller despatches of rice and paddy to Calcutta this year.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below:—

Statement showing the quantities of Food-grains imported into Chittagong from each Foreign and Indian Port during the week ending 7th January 1897, as compared with the trade of the corresponding period of 1896.

WEATHER AND CROP REPORT.

For the week ending the 1st February 1897.

Burdwan.—Rainfall, nil in Sadar, Kalna, and Katwa; .03 in Raniganj. Weather seasonable. *Aman* being threshed. Sugarcane being pressed. Potatoes being harvested. Harvesting of *rabi* crops commenced. Rain wanted in Raniganj and Katwa for *rabi* crops; elsewhere *rabi* prospects fair. Condition of cattle good. Fodder and water sufficient. Common rice selling as follows:—

			Srs. c.	Srs. c.	
Sadar	10 0	to 12 0	} per rupee.
Kalna	10 0	
Katwa	10 10	to 10 15	
Raniganj	10 4	

Birbhum.—Weather cloudy with drizzling rain. Pressing of sugarcane going on. Price of rice at Sadar 9 seers and at Rampur Hât 10 seers per rupee.

Bankura.—No rain. Weather seasonable. Threshing of *aman* nearly finished. Prospects of *rabi* not favourable. Fodder and water sufficient at present, except in a few places. Sporadic cases of cow-pox reported. Rice selling at 11½ seers per rupee at Sadar and 11½ seers at Vishnupur.

Midnapore.—Weather seasonable. Threshing of *aman* going on. Prospects of indigo, linseed and *rabi* not good. Cattle-disease reported from Keshpur, Binpur, Salbani, Jhargram, and Dantan. Common rice selling as follows:—

			Srs.		
Sadar	10	} per rupee.
Contai	12 to 13	
Tamluk	9 to 11	
Ghatal	10 to 12	

Hooghly.—Want of rain felt throughout the district. Slight rain falling to-day (1st February). *Rabi* and sugarcane suffering for want of moisture. Common rice sells from 8 to 10 seers per rupee.

Howrah.—Rainfall nil. Weather seasonable. Prospects of *rabi* not good. Fodder and water sufficient. Common rice sells from 9½ to 11 seers per rupee.

24-Parganas.—Rainfall at Sadar .04. Weather cloudy and warm. Prospects of standing crops poor. Harvesting of *aman* finished. Land in places being tilled for vegetable cultivation. Peas being harvested. Fodder and water sufficient. No cattle-disease. Common rice sells as follows:—

			Srs. c.		
Sadar	9 to 10 0	} per rupee.
Barasat	10 0	
Basirhat	10 0	
Diamond Harbour	10 10	

Nadia.—No rain during the week. Slight north-wester now on. Early oilseeds being gathered. Rain badly wanted for *rabi* and for cultivation of *aus* lands. Water-supply generally deficient. Fodder ample nearly everywhere. Common rice sells at 8 seers to 10 seers 12 chitaks per rupee. Latest price of rice where test-works are open is 9 seers per rupee. Numbers attending test-works are as follows:—

22nd January	1,353
23rd "	1,645
24th "	1,623
25th "	1,744
26th "	1,763
27th "	1,976

Number of persons who received gratuitous relief at police-stations are 1,750 from 24th to 27th January. Number on relief works on Saturday, 30th January—Sadar subdivision—men 1,681, women 386, children 1,165—total 3,232; Meherpur subdivision—men 835, women 250, children 1,040—total 2,125; Kushtia subdivision—men 473, children 230—total 703. Gratuitous relief—men 141, women 539, children 90—total 770.

Murshidabad.—No rain. Weather seasonable. Transplantation of *boro* going on. Prospects of *rabi* crops not favourable. Pressing of sugarcane continues. Indigo and mulberry doing well. Fodder sufficient. Common rice sells as follows:—

			Srs.		
Sadar	10	} per rupee.
Kandi	11	
Jangipur	10½	

Jessore.—Days hot, nights cold; mornings less cloudy and foggy but two days *Rabi* crops suffering from want of moisture. Harvesting of *aman* completed. No cattle-disease. Fodder and water available. Common rice sells as follows:—

				Srs.	
Sudar	9 to 10	} per rupee.
Jhenida	9	
Magura	9 to 9½	
Narail	10	
Bongaon	10	

Khulna.—No rain. Weather dry; cold at night. *Aman* harvest completed. Transplantation of *boro* paddy in progress. *Rabi* and *boro* crops not doing well owing to want of rain. No cattle-disease. Fodder and water available. Common rice sells as follows:—

				Srs.	
Khulna	9 to 11	} per rupee
Bagerhat	11	
Satkhirā	10	

Wages calculated at 10 seers per rupee for staple food-grain. Number of relief-works open, two. Number of persons employed on relief-works in Satkhira subdivision for the week ending 27th January—men 105, women nil, children 42—total 147; gratuitous relief—men 4, women 9, children 8—total 21.

Rajshahi.—Prospects of *rabi* crops not good. Transplantation of summer rice going on. Sugarcane being planted in some places. Fodder available. Want of drinking-water reported from some parts. Price of rice has somewhat fallen, ranging between 9½ and 11 seers per rupee. Five test-relief works opened during the week. Number of persons employed on Saturday, 30th January—men 504, women nil, children 32—total 536; gratuitous relief nil.

Dinajpur.—No rain. Weather seasonable. Condition of standing crops fair. No report of any cattle-disease, nor any complaint for fodder and water. Common rice sells from 9½ to 12 seers per rupee.

Jalpaiguri.—Rainfall nil. Weather cold and cloudy. Prospects of *rabi* crops continue favourable. Preparation of land for *betri* paddy is going on. Fodder and water sufficient. Average price of common rice 8½ seers per rupee.

Terai—Harvesting of *haumanti dhan* completed; mustard and potatoes being harvested; tobacco doing well; ploughing for sugarcane and jute in some places commenced. Coarse rice selling as follows:—

					Srs.
Hills	8
Terai	9

Bhutta, 13 seers per rupee.

Rangpur.—No rain. Land is being prepared for *aus* crop and jute. Harvesting of mustard continues. Prospects fair. Common rice selling from 8 to 10½ seers per rupee. Fodder and water sufficient.

Bogra.—No rain. Weather a little cloudy now and then. Oilseeds being gathered. Fodder and water sufficient. Common rice selling at head-quarters, 10½ seers per rupee, and in the interior from 7½ to 12 seers.

Pabna.—Weather seasonable. No change in condition of standing crops. Common rice selling from 8 to 10 seers per rupee. Fodder plentiful.

Dacca.—Rainfall nil. Weather seasonable. Prospects of standing crops not very favourable. Rain wanted. Fodder available. No cattle-disease. Price of common rice, 10 to 12 seers per rupee.

Mymensingh.—Rainfall nil. Weather fine. Lands are under preparation for *aus* paddy and jute. Mustard being harvested. Common rice sells from 8 to 11 seers per rupee.

Faridpur.—No rain. Weather seasonable. Prospects as before. Rain wanted. Common rice selling at 9 to 11 seers a rupee. Fodder and water available.

Backergunge.—Rainfall nil. Weather occasionally cloudy. Prospects of spring crops not good for want of rain. Price of rice stationary.

Tippera.—Weather seasonable. Prospects of *rabi* not favourable. Water and fodder available. Price of common rice 10 to 11 seers per rupee.

Noakhali.—Prospects of *rabi* crops not good. Rain badly wanted. No cattle-disease. Fodder and water available. Price of rice ranges from 10 to 12 seers per rupee.

Chittagong.—Rainfall nil. Weather dry. *Rabi* crops suffering for want of rain. Prospects unchanged. Water and fodder sufficient. Rice selling from 8 to 10 seers per rupee.

Patna.—Prospects of *rabi* crops continue favourable. Threshing of paddy in progress. Poppy and tobacco doing well. Fodder and water for cattle sufficient. Price of common rice at Patna 10½ seers per rupee. Numbers on test-works on Saturday, 30th January—men 299, women 209, children 79—total 587; gratuitous relief—men 14, women 14, children 8—total 36.

Gaya.—*Rabi* doing well. Price of common rice at Sadar, 9 seers per rupee.

Shahabad.—*Rabi* prospects continue favourable. Slight damage reported to have been caused by frost. Poppy doing well. Pea selling at 10½ seers per rupee at Bhabhua. Number on relief works on Saturday, 30th January—men 793, women 999, children 482—total 2,274.

Saran.—*Rabi* doing well. It is coming into ear. Average price of *makai* 9 seers 14 chitaks per rupee. Numbers on relief works on Saturday, 30th January—Sadar subdivision—men 365, women 662, children 943—total 1,970; Gopalganj subdivision—men 1,580, women 1,954, children 1,601—total 5,135; Siwan subdivision—men 2,002, women 2,905, children 1,799—total 6,706. Gratuitous relief—Sadar subdivision—men 889, women 3,199, children 797—total 4,885; Gopalganj subdivision—men 847, women 2,952, children 1,644—total 5,443; Siwan subdivision—men 390, women 1,061, children 291—total 1,742. Chapra town—Gratuitous relief—men 197, women 793, children 198—total 1,188; Revilganj town—Gratuitous relief—men 47, women 63, children 51—total 161. Chapra poor-house 49. Siwan poor-house 55 (men 13, women 21, children 21). Hatwa poor-houses 442; doles 219. Manjha poor-house 103.

Champaran.—No rain. Spring crops doing well after last month's rain. Prices fallen somewhat. Common rice sells at Motihari at 8½ seers and maize at 10½ seers per rupee. Numbers on relief works on Saturday, 30th January—men 40,438, women 35,417, children 21,294—total 97,149; gratuitous relief—men 1,345, women 2,619, children 1,844—total 5,808.

Muzaffarpur.—No rain. Prospects of *rabi* fair. *Rahar*, *suthni* and *alua* in Mahua thana slightly affected by cold. Prices are—common rice 8 seers, Burma rice 9 seers, wheat 8 seers, *makai* 10 seers, barley 13 seers, gram 11 seers, *rahar* 12 seers, *marua* 12 seers *makai* and *rahar* fix the relief prices. Numbers on relief works on Saturday, 30th January—Sadar subdivision—men 2,986, women 745, children 774—total 4,505; Hajipur subdivision—men 500, women 565, children 694—total 1,759; Sitamarhi subdivision—men 406, women 108, children 133—total 647. Gratuitous relief—Hajipur subdivision—men 19, women 367, children 10—total 396; Sitamarhi subdivision—men 481, women 429, children 397—total 1,307.

Darbhanga.—Prospects of standing *rabi* crops fair. Mustard and rape seeds are being harvested in places. *Rahar* excellent. Coarse rice selling at Sadar to-day (1st February) 9½ seers per rupee. Numbers on relief works on Saturday, 30th January—Sadar subdivision—men 20,633, women 26,162, children 6,485—total 53,280; Samastipur subdivision—men 995, women 1,654, children 556—total 3,205; Madhubani subdivision—men 40,942, women 25,086, children 13,131—total 79,159. Gratuitous relief—Sadar subdivision—men 2,050, women 3,826, children 1,817—total 7,693; Samastipur subdivision—men 264, women 646, children 349—total 1,259; Madhubani subdivision—men 8,606, women 23,302, children 14,423—total 46,331. Darbhanga Raj—Numbers on relief-works on Saturday, 30th January—men 10,689, women 3,766, children 1,898—total 16,353; daily number in receipt of charitable relief, 3,518.

Monghyr.—No rain at Monghyr and Begusarai; 0.02 at Jamui. Weather cold with high west wind. Standing crops doing well. Prospects of *rabi* good. Sugarcane pressing still in progress. Cattle-disease reported from Begusarai. Sufficient fodder and water. Prices of common rice:—

				Sra.	
Monghyr	9 to 10½	} per rupee.
Begusarai	8 to 10½	
Jamui	8 to 10	

Bihar figures not received.

Bhagalpur.—Weather cold and occasionally cloudy. Direction of wind changeable. Harvesting of *kurthi* has commenced. Prospect of *rabi* continues to be hopeful. No cattle-disease. Fodder and water sufficient. There has been a slight fall in the price of grain in the Banka, Supaul, and Sadar subdivisions. Common rice sells as follows:—

	Srs.	c.	
Sadar	10 2
Banka	11 4
Madhipura	10 0
Supaul	11 8
			} per rupee.

Purnea.—No rain. Harvesting of mustard and tobacco in progress. Standing *rabi* crops doing well. Cattle-disease reported from Araria and Raniganj thanas. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar	...	10
Kishanganj	...	10
Araria	...	10 to 11
		} per rupee.

Malda.—No rain. Weather seasonable. Standing *rabi* crops doing well. Common rice selling from 8 to 11 seers per rupee. No cattle-disease. Fodder sufficient. Want of drinking-water reported from certain places in Shibganj thana.

Sonthal Parganas.—Weather seasonable. Slight rain at head-quarters this day (1st February). Prospects of crops unchanged. Price of common rice 8½ to 12 seers per rupee and of Indian-corn 11 to 15 seers. Dews scanty. Fodder and water still sufficient.

Cuttack.—Rainfall nil. Weather getting hot. Harvesting of *sarad* and *rabi* continues. *Dalua* growing. Condition of cattle fair. Fodder sufficient. Common rice sells as follows:—

	Srs.	c.	
Cuttack	11 13
Jajpur	14 7
Kendrapara	14 7
Banki	14 3
			} per rupee.

Balasore.—Weather seasonable. *Sarad* being harvested. *Rabi* crops withering. *Dalua* crop flourishing in some places and suffering in others owing to water used for irrigating it having become brackish. Sugarcane being pressed. Price of rice varies from 12 to 16 seers per rupee in the interior. Rice sells at 12 and 13 seers per rupee at Balasore and Bhadrak respectively. Sporadic cases of cattle-pox occurring in some chaklas. Fodder and water sufficient.

Angul.—No rain. The winter crops on the ground are *kulthi*, mustard, castor, and garden vegetables. *Kulthi* is being reaped. Cattle-disease reported from two parganas in Angul. Condition of people good. Coarse rice sells at 11½ seers per rupee at Sadar and 16 seers in the mufassal markets.

Puri.—Rainfall (·03) reported from station Banpur. Prospects of winter rice and *rabi* same as before. Affairs becoming strained in tracts adjoining Chilka, and relief works are necessary. Price of common rice stationary.

Hazaribagh.—Weather cloudy and cold. *Rabi* doing well. Prices unchanged. No applicants for relief works.

Lohardaga.—State of standing crops unchanged. Rice sells at Ranohi 8 to 9 seers per rupee, and in the interior from 8 to 12 seers. Fodder and water sufficient. Grain in stock for present requirements.

Palamanu.—Rainfall ·40. Weather seasonable. *Rabi* prospects fair. Great rise in prices. Forty-three markets selling under 9 seers per rupee, against 33 in previous week; 18 against 20 at 9 seers; 10 against 20 above 9 seers but below 10 seers; 3 against nil at 10 seers; 1 against 6 over 10 seers but below 11 seers; 1 at 11 seers. Relief work commenced.

Manbhum.—Slight rain in thana Chandil. Weather cold. Prospects of crops on the ground as before. Cattle-disease reported from thanas Ohas, Raghunathpur, Chandil, and Purulia. Fodder and drinking-water both running short in thanas Raghunathpur and Jhalda; sufficient at present in rest of district. Average price of common rice:—

	Srs.	
Sadar	...	10
Gobindpur	...	8
		} Old rice
		} New „
		} per rupee.

Stock of food-grains sufficient at present.

Singhbhum.—Rain (0·16) has benefited *rabi* and sugarcane. Prices stationary. Rice plentiful.

General Summary.—Slight rain fell in parts of Lower Bengal, Bihar and Chota Nagpur during the week. Calcutta received 1·26 inches on the 1st instant. The winter rice harvest is practically over, and threshing is going on. The *rabi* and poppy crops in Bihar continue to promise well. In Northern Bengal and parts of Chota Nagpur the *rabi* crops are reported to be fair. In all other parts of the Province the prospects of the *rabi* crops are poor. Oilseeds and other early *rabi* crops are being gathered, and sugarcane is being pressed. Spring rice is doing well, but wants rain in parts. Ploughing for autumn rice and jute is going on in parts of North Bengal and in Mymensingh. Prices remain almost stationary. In the distressed districts the prices of the food-grains on which the relief wages are based are—Nadia (common rice) 9 seers, Khulna (common rice) 10 seers, Rajshahi (common rice) 9½ to 11 seers, Patna (common rice) 10½ seers, Shahabad (pea) 10½ seers, Saran (Indian-corn) 9 seers 14 chitaks, Champaran (Indian-corn) 10½ seers, Musaffarpur (Indian-corn) 10 seers, Darbhanga (common rice) 9½ seers. These prices show slight falls in Shahabad, Saran, and Champaran, and a slight rise in Patna. In the other affected districts there has been no change.

The numbers on relief works and in receipt of gratuitous relief on Saturday, the 30th January, were—

Relief works—

Nadia	... 6,060 (men 2,989, women 636, children 2,435).
Khulna	... 147 (men 105, women nil, children 42).
Rajshahi	... 536 (men 504, women nil, children 32).
Patna	... 587 (men 299, women 209, children 79).
Shahabad	... 2,274 (men 793, women 999, children 482).
Saran	... 13,811 (men 3,947, women 5,521, children 4,343).
Champaran	... 97,149 (men 40,438, women 35,417, children 21,294).
Musaffarpur	... 6,911 (men 3,892, women 1,418, children 1,601).
Darbhangha	... 135,644 (men 62,570, women 52,902, children 20,172).

Total 263,119, against 247,327 in the previous week.

Gratuitous relief—

Nadia	... 770 (men 141, women 539, children 90).
Khulna	... 21 (men 4, women 9, children 8).
Patna	... 36 (men 14, women 14, children 8).
Saran	... 12,070 (men 2,126, women 7,212, children 2,732).
Champaran	... 5,808 (men 1,345, women 2,619, children 1,844).
Musaffarpur	... 1,703 (men 500, women 796, children 407).
Darbhangha	... 55,283 (men 10,920, women 27,774, children 16,589).

The mean pressure of the seven days Inches. 29.979

The average pressure of the corresponding period for 24 years, Surveyor-General's Office 29.996

The total number of hours of bright sunshine Hours. 59.3

The maximum possible number of hours of sunshine 77.1

The mean temperature of the seven days ° 70.0

The average temperature of the corresponding period for 24 years, Surveyor-General's Office 68.7

The extreme variation of temperature 30.7

The maximum temperature 85.9

The highest velocity of the wind in one hour Miles. 12

The mean relative humidity % 62

The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office 70

The total fall of rain from 24th to 30th January 1897 Inches. 0.04

The average fall of the corresponding period for 24 years, Surveyor-General's Office 0.13

The total fall from 1st to 30th January 1897 0.04

The average fall of the corresponding period for 24 years, Surveyor-General's Office 0.30

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed, open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official Tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken respectively from the Munro's anemometer and a dial anemometer by L. Casella.

The mouth of the rain-gauge is one foot above the ground.

—, dew; d, drizzling rain.

Note — The daily movements of the wind from the 28th to 30th are from 8 A.M. to 8 A.M.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,

Calcutta, the 1st February 1897.

J. H. GILLILAND,

For Meteorological Reporter to the Govt. of India.

Results of the Barometrical and Thermometrical Observations taken at the Meteorological Office, Ohowringhee, from 24th to 30th January 1897.

THE BUBONIC PLAGUE.

THE following translation of the chapter on Bubonic Plague in "The Diseases of Tropics, a Manual for Medical Men," by Dr. B. Scheube, Government Physician and Sanitary Councillor at Greiz, formerly Professor at the Medical College at Kioto, Japan, is published for general information.

H. H. RISLEY,
Secretary to the Government of Bengal.

DEFINITION.

While in classical times and in the middle ages the word "plague" had an indefinite pathological meaning, as it was applied according to the definition of Galen to every epidemic disease which carried off many human beings, it has latterly been confined to a distinct disease, the Bubonic Plague. This is an infectious disease, running a very acute course, which is distinguished by the appearance of inflammation of the lymphatic glands, development of carbuncles, and general high fever.

SYNONYMS.

Loimos; Pestis, Pestilentia, Febris pestilentialis, Pestis bubonica, Clades inguinalis, glandularia, Beulen-pest, Orientalische pest, Indische pest, Pal-pest

Schwarzer Tod, Plague; Peste; Mahamari "the great sickness," Ghant-ka-rog "Boil-disease," Hokla-ka-rog or Tao-ka-rog "the coughing disease" (India); Yangtsu, Luentau (China).

HISTORY AND GEOGRAPHICAL DISTRIBUTION.

The history of the bubonic plague can be traced back to the end of the second or the commencement of the third century before Christ. In one of Oribasius' medical writings from Rufus of Ephesus, a contemporary of the Emperor Trajan (98-117) the plague-boils are described, and their occurrence in ancient times in Egypt and Syria is alluded to. The first accurate description of the plague, which exists in that of the great epidemic in the year 542, which ravaged almost the whole of Europe during Justinian's reign, is given by Procopius, who has particularly described as Justinian's plague, and which has been the subject of the following centuries Europe was frequently visited by epidemics of plague. None, however, was more terrible or spread farther than the pandemic of the 14th century, known under the name of "The Black Death." No part of the then known world escaped it; even far-away Greenland fell a victim and was depopulated. According to Hecker's estimate, 25 millions of human beings succumbed to it in Europe, equal to about one-fourth of its population at that time. From the end of the 17th century epidemics began to occur less often in Europe, and since the middle of the 18th, Western Europe has escaped them altogether. In Germany the plague occurred for the last time in the first and second decennium of the last century. The south-eastern part of Europe, Turkey, the Caucasus, South Russia, Italy, Dalmatia, Greece and the Mediterranean Isles were, however, still visited from time to time by epidemics during the 19th century, for the last time in 1841. Since then Europe has remained free from the plague, of with the exception of a small epidemic in Astrachan (Wetljanka) in 1878-79.

All the European epidemics of plague of former centuries were probably imported from the East, as can conclusively be proved with regard to those of later times. It has always been Turkey where they originated. Egypt, which was formerly also very frequently affected by plague, played the same part for the northern coast of Africa—the Berber states of Tripoli, Tunis and Algiers—as Turkey did in regard to Europe as the starting point for epidemics. Since 1844 the plague has also altogether disappeared from Egypt.

Though Europe and Egypt have ceased to be the scene of plague epidemics, the disease has not been extinguished, but has shown itself down to the present time in several countries, particularly Asiatic ones. We have, indeed, only lately obtained cognizance of hitherto unknown centres of infection, which are probably, however, of old standing. The countries in which the plague has occurred since the middle of the present century, and where probably it must be assumed to be more or less endemic, are—

- (1) Tripoli, where in 1856-59 and in 1874 sundry epidemics were observed in the country about Benghazi without any ascertained origin.
- (2) Arabia, in the mountainous tract of Assir, on the West Coast, where plague epidemics occurred in 1853, 1874, 1879, 1889, 1890, 1892, 1893, and 1895.
- (3) Mesopotamia, which was visited by severe epidemics in the years 1867-68, 1873-74, 1875-77, 1880-81 and 1892, after a period between 1856 and 1865, during which the disease prevailed in the milder form of bubonic fever, and less widely diffused.
- (4) Persia, chiefly in the province of Aderbeijan, where the plague appeared in epidemic form in 1863-64, 1870-71, 1873-74, 1876-78, 1881-83, 1885-86, 1890-91, and 1892, (the first historically recorded epidemic both in Persia and Mesopotamia occurred at the end of the 16th century).
- (5) Turkestan, where the plague, imported from Persia, showed itself in 1892.
- (6) Upper India; and
- (7) Southern China.

The first epidemic known in Upper India began in 1815 on the Island of Kutch, situated south-east of the mouth of the Indus, spread in the following years to Guzerat, Scindh, and the Coast of the Ran, and lasted till 1821.

Other centres of disease are the provinces of Kumaon and Gharwal, situated on the south-western slopes of the Himalayas, where outbreaks of plague occurred in the years 1823, 1831-37, 1846-53, 1876, and 1884. The plague further occurred epidemically in 1828-29 at Hansi in the district of Delhi, in 1836 round about Bareilly in Rohilkund and at Pali in Rajputana, and spread thence to Jodpore, the capital of Marwar, and to the State of Mewar, disappearing only in 1838.

In Southern China, plague has long been endemic, although the fact was only determined in 1878 by Rocher, an official of the Chinese Customs, in the mountain valleys of the province of Yunnan, and has shown itself from time to time also at Lienchau and Pak-hoi on the Gulf of Tong-king. From Pak-hoi it was carried in March 1894 to Canton, where it carried away within a few weeks 60,000 souls, and in May also extended to Hong-kong, and later on to Amoy. In Hong-kong, during three to four months, about 2,500 souls succumbed to it. In 1895 Swatau, Foochow, Macao, and other places of Southern China were visited by it.

On the southern hemisphere and in the new world the plague has never been observed.

It remains a mere matter of conjecture which of the countries in which plague has occurred ought to be regarded as its proper home. Some suspect it to be in Mesopotamia; Hirsch is inclined to place it in India. Up to the present time we are as ignorant of the disease-conditions prevailing throughout the area intervening between India and Persia as we were until recently in regard to the Chinese plague-centres. There is no doubt that a very dangerous system of transporting corpses goes on between India, Southern Turkestan, Persia and Mesopotamia in connection with the desire of every Shia to be buried in Nejed and Korbela, where the tombs of Ali and Husein are situated, by means of which plague may readily be introduced. Thus Roux affirms that on an average 4,000 Persian corpses are imported every year into Nejed, and that in 1894, after the Persian famine, the number amounted to over 12,000.

The disease is said to have been carried from India to Southern China by way of Tibet. It is interesting that the Black Death of the 14th century was traced by contemporaries partly to Cathay, i.e., China, and partly to India.

CAUSATION.

The Bubonic Plague is caused by a specific poison. If the investigations made by Yersin and Kitasato during the latest epidemic at Hong-kong turn out to be correct, the cause of the plague has been discovered, simultaneously and independently, by these two inquirers in the form of a short, thick bacillus with rounded ends, which shows very little power of movement. It is easily coloured by aniline dyes, unless treated by Gram's method (Yersin); its ends take the colouring easier than the middle. According to Kitasato it possesses a more or less distinguishable capsule. It is found in the bubos, in the blood, in all the internal organs, and also in the intestinal canal (Kitasato). The bubos contain the bacilli in very large numbers and without intermixture. In the blood, however, they mostly occur so sparsely that, in order to discover them, one has to look over several preparations. The bacillus has been successfully cultivated artificially (in bouillon, blood serum, most favourably at 37° Celsius, agar-agar, agar-gelatine, potatoes), and on transfer to animals (mice, rats, guinea-pigs and rabbits) has produced morbid phenomena similar to those of plague.

Already in 1844, Jablonowski discovered in the bubonic pus very active bacteria which could be cultivated in meat extract. They showed the greatest vitality at 17 to 23° Reaumur, which gradually decreased at a higher temperature up to 39°.

The plague bacilli show, according to Yersin, white transparent colonies in gelatine, with iridescent edges when looked at in reflected light. The bacilli assume the form either of slender threads or of long chains. In bouillon lumps settle on the sides and at the bottom of the glass, while the fluid remains clear.

If mice, rats or guinea-pigs are inoculated with the bubonic pulp they are sure to die—mice after 1 to 3 days, guinea-pigs after 2 to 5 days, and numerous bacilli are found in the lymphatic glands, the spleen, the liver and the blood. Many of the bacilli lie in uninuclear leucocytes, but not in multinuclear ones. The site of inoculation shows widely extended light red oedema with sanguineous effusion round the adjoining lymph gland, which has become very large and is full of bacilli. The intestinal canal, kidneys and suprarenal bodies are often hyperaemic; the liver enlarged and red; the spleen very large and frequently permeated by a sort of small miliary tubercle (lymphoma?). In the pleura and peritoneal cavity there is a little fluid containing bacilli.

Transfers of the splenic pulp and of blood from one guinea-pig to another and inoculations from cultivated bacilli are also successful. Mice frequently, and rats almost invariably, succumb when fed with cultivated bacilli and with bits of spleen or liver taken from animals which have died of the plague, and at the autopsy the blood, liver and lymphatic glands are found to be filled with bacilli.

Yersin also confined healthy and inoculated mice in the same glass chamber. The latter died first, but during the following days the former succumbed as well, and contained bacilli in their organs. The existence of bacilli could also nearly always be demonstrated in rats, which during an epidemic were found in heaps in houses and in the streets, and which often showed real bubos; likewise in flies, which had died in Yersin's laboratory. The plague bacillus was also found in the soil of a house where an attempt at disinfection had been made, but it was no longer in a virulent condition; and of several animals which Kitasato inoculated with dust from houses infected with the plague, one guinea-pig died with the symptoms of the disease.

The plague bacillus is, according to Kitasato, killed if dried for four days; also in 30 minutes by heating up to 80° Celsius, in a few minutes by heating up to 100° Celsius, in one hour by 1 per cent. carbolic acid, and in two hours by 1 per cent. quick-lime.

Yersin, Calmette and Borrel succeeded in protecting animals, specially rabbits, by inoculation with cultivations sterilized by heating up to 58° Celsius, against subsequent inoculation with virulent cultivations, and the serum of the same proved to have both a protecting as well as a healing effect. Subsequently they succeeded likewise in protecting a horse by inoculation with virulent cultivations and obtained like results.

Kitasato encountered bacilli in the blood of convalescents from the plague even three four weeks after all symptoms had disappeared.

The plague, is in the opinion of most authors, a contagious disease, and this view obtains further support through Yersin's investigations. Some, among them Hirsch and Liebermeister, take it to be contagious miasmatic. The latter assumption is based on the often observed fact that medical men and the clergy, who by their avocations are brought into close contact with those who are affected with or have died of the plague, have escaped the disease, and in this view no value attaches to the positive attempt to transfer the disease by the English doctor Whyte, who in 1802 fatally infected himself by means of inunction and inoculation with bubonic pus, nor to the less disastrous results attending the inoculation of two condemned criminals in Cairo in 1835 with blood from plague patients, because these experiments were undertaken under conditions which did not exclude infection by other methods, and because the positive and negative results stand opposed to each other. According to my judgment, one must altogether agree with Greisinger, who says: In order to prove contagiousness, it is not necessary that intercourse with an infected person should be invariably followed by acquisition of the disease, but only that it should be liable to be so followed. Apparently the contagiousness differs according to the seriousness of the cases.

Infection can probably take place by the air or by touch, consequently the poison may gain access to the body by the respiratory organs or by the skin.

The time of incubation ranges from two to seven days. In particularly virulent epidemics it may take only a few hours; quite exceptionally it may last for so long as 15 days.

The poison may be spread by persons in good health as well as by lifeless objects, by personal effects which have been used by diseased persons, such as

linen, clothes, bedding and the like, also by goods, and it seems to remain active for a long time (compare the conflicting results of Kitasato's investigations). A pregnant example of the transfer of the plague by infected effects is given by Hirsch from the epidemic at Wetljanka in 1878-79. The case was that of a girl ten years of age, in the house of whose parents a box of clothing had been deposited, coming from a house in which all the inhabitants had died about two months previously. The girl opened the box, which up to that time had remained untouched and was now about to be burnt. She took a piece of clothing out and set to work on it, and four days later, when the epidemic had disappeared, the first symptoms of the disease showed themselves in her. Trincavelli reports that a servant, after handling some ropes which 20 years previously had been used in the burial of plague corpses, took the disease and died of it (Netter.)

Plague is also, according to Yersin's investigations, apparently spread and transferred by animals (rats, insects, &c.) According to Jablonowski, a particular species of flies played an important part in the epidemic in Irak Arabi (Mesopotamia) in 1884, their appearance and disappearance coinciding with that of the epidemic.

The poison seems to be attached to the soil, which would account for the occurrence of the plague at the outbreak of an epidemic, in animals which live in or on the ground, as has repeatedly been observed in India and China. On the occasion of the last epidemic in Canton, the seizure of human beings was preceded for two or three weeks by a great mortality among the rats, and this repeated itself in each newly attacked quarter of the town. Moreover, women and children, chiefly girls, who generally stay indoors, as well as the occupants of ground-floors, were chiefly affected. The floating population escaped almost entirely, so that many people took to living on the river. As already stated, Yersin also found plague bacilli in the soil, but not in a virulent condition.

In the countries where the plague is epidemic, the poison is probably propagated between one epidemic and the next one by sporadic mild cases of disease, which by reason of their mildness easily escape attention.

If the plague is imported anywhere, for the first three or four weeks isolated cases occur in the neighbourhood of the imported case, and subsequently dissemination of the contagion and a general spread of the disease take place. An epidemic will at times last only a few weeks or months, but may extend over several years. The abatement generally comes rapidly, but sporadic cases will still occur at times for years, and the epidemic may break out again without a renewed importation of cases from outside. The seasons of the year and the temperature have a certain influence on the initiation and development of an epidemic. A moderate warmth in conjunction with dampness seems to be the most favourable condition for it. In the cooler parts of the East, and formerly in Europe, the epidemics occurred mostly in summer. In middle Egypt, particularly in Cairo, the epidemics used to cease in the height of summer at the time of the excessive dry heat; an epidemic never commenced at that time of the year. In Mesopotamia it appears mostly in the temperate season, and totally ceases during the hot one. In the tropics proper the disease has hitherto been comparatively seldom studied (on the Western Coast of Arabia, in the Island of Kutch, in Guzerat and Southern China); the climate is rather one of the temperate than of the hot zones. By severe cold the spread of the disease seems to be restricted, but nevertheless epidemics have occurred during the severe cold of winter (at Moscow in 1771, at Astrachan in 1878-79), as well as during the greatest summer heat (at Smyrna in 1735, in Malta in 1812, in Kumaon 1850).

Neither the geological character of the ground nor its altitude has any influence on the initiation of the disease.

On the other hand, the development and the spread of it are in a high degree favoured by bad hygienic conditions, specially connected with social misery, such as accumulation of dirt in the dwellings and on the streets, deficient removal of faecal matters and other animal dejecta, overcrowding and insufficient ventilation of dwellings. The poorer classes of the inhabitants are always affected the most, at times even exclusively, by the disease, causing Cabiadis to describe it as "*miseriæ morbus*." If among the mixed

population of a town or a country the different races and nationalities are affected by it in a different degree, this is to be ascribed less to race differences than to the different hygienic conditions in which they live. During the latest epidemic at Canton the foreigners living in favourable hygienic conditions with their native servants on the Island of Shamien altogether escaped the contagion, while across the river only 50 feet wide, which separates the island from the town, many Chinese were attacked. In Hong-kong, according to Ayres and Lowson, the well-housed and cleanly Europeans were attacked most rarely and comparatively lightly; the Chinese, surrounded by dirt and afraid of washing suffered the most; and between them, in respect of mortality, came the Japanese, Portuguese, Manila people and Indians. In the disappearance of the plague from Europe, the increase of cleanliness and the improvement of public and private hygiene has decidedly played an important part.

Sex is of no predisposing importance in the matter; both sexes are attacked equally. Pregnancy and lying-in afford no protection.

As regards age, those from 10 to 30 years are attacked most frequently; but younger children do not escape; and carbuncles and bubos are said to have been observed on the bodies of children prematurely born from plague-stricken mothers (Russel, Aubert-Roche). After the 50th year the disease seldom occurs.

Occupation is mostly considered as having no influence. Griesinger calls attention to the immunity of certain callings. People who have much to do with water, such as water carriers, attendants on baths, &c., and, still more, oil-carriers, dealers in oil and fat, are said to be seldom attacked.

In cases of survival of one attack the predisposition to a second usually ceases; re-infection seldom occurs, and when it does the disease usually runs a mild course.

As predisposing causes, all those evils are cited which predispose to other diseases, such as colds, bodily and mental exertion, faults of diet, fright, fear of the disease, previous sufferings, &c.

As already mentioned, the plague also occurs in animals. Besides rats and flies, buffaloes, oxen, sheep, horses, goats, pigs, dogs, deer and poultry are seized by it.

SYMPTOMS.

The features of the plague in well developed cases are extremely typical. One can often distinguish in its course four separate stages: (1) the stage of attack; (2) the stage of violent fever; (3) the stage of developed local symptoms, and (4) in case of recovery the stage of convalescence. Before the actual onset of the disease proper certain premonitory phenomena occasionally occur. They consist of loss of appetite, lassitude, depression, stiffness, racking of the limbs, slight giddiness, carache, palpitation at times, also dull pains about the groins, the axillæ, &c., where bubos subsequently appear. In most cases the disease declares itself quickly with symptoms of very severe disturbance of the general state of health and great bodily and mental weakness. Along with it exist mental delusions and heaviness of the head, violent dull headache, usually localized about the forehead and the temples, giddiness, drowsiness, or, on the other hand, unrest and sleeplessness or disturbing dreams. The face of the patient is pale and listless, the features are distorted, the eyes dull and hollow, the look staring, speech is difficult, and the walk stumbling, giving the impression of one heavily drunk. The appetite disappears; there exists a feeling of sickness, often vomiting, at times also diarrhoea occurs (the latter specially in cases ending fatally), and the patients complain of pains in the limbs and oppression of the chest. In this stage the temperature does not yet seem to rise or only inconsiderably. Also the pulse is as yet little accelerated and soft, often weak and irregular.

The stage of attack is often strongly pronounced, and may last one and even several days. In other cases, however, it is only just indicated and lasts but a few hours, and may even not occur at all, so that the high fever sets in from the commencement.

The stage of high fever is usually ushered in by one or more fits of shivering or real ague, which may continue for hours; the temperature rises to 39° and 40°, or even 41° and above, and shows irregular exacerbations and remissions. The pulse is very rapid; the beats may amount to 130° and more

in a minute; respiration is also accelerated up to a rate of 40 to 50 per minute. The skin has a burning hot and dry feeling; the face appears somewhat swollen; the eyes are suffused, bright, but staring, the pupils mostly dilated, the hearing weakened. The tongue is swollen and shows a white coating like chalk or mother-of-pearl. Subsequently it becomes dry and cracked and covered, as well as the teeth, lips and nostrils, with brownish incrustations. Violent thirst is felt, and the patients are so weak that, even when quite conscious, they are hardly able to answer a question.

Gradually stupor and quiet, more seldom wild delirium, supervene, and in serious cases the patients already on the second or third day present a condition of pronounced typhus with extreme prostration. At times, however, consciousness remains perfectly clear up to the time of death. Often a slight bronchial catarrh, or, in rare instances, pneumonia, is recognizable. Continuous violent vomiting is frequently present. At times the body appears swollen from enlargement of the liver and spleen. The renal discharge is much diminished, at times even quite suppressed.

From the second to the fifth day of the illness the localised phenomena characteristic of the plague, the bubos which have been observed in more than two-thirds of all cases, make their appearance. These develop themselves most frequently about the groins, and usually further down the thighs than venereal bubos do, two or three fingers' breadth beneath the femoral ring in the triangular space between the sartorius and adductor longus muscles. They also develop in the armpit, where, moreover, the most deeply seated glands appear to be first affected; finally on the edge of the lower jaw-bone and the neck; quite exceptionally at the elbows, in the bend of the knee or above the collar-bone. Usually a bubo appears only at one of the said places; simultaneous bubos at the groins, the shoulders and the neck very seldom occur. The glands of the neck are most frequently attacked in children; the swelling mostly comes on quickly, often suddenly and accompanied by pain. At the outset they are small, of the size of a hazelnut or a walnut, but afterwards they may attain to, or even exceed the size of a goose egg. Their surface is either smooth or tuberculate.

Oppression, pains in the lower part of the abdomen, pains across the small of the back, seem to indicate affection of internal lymphatic glands. According to Russell's statistics, in 2,700 cases of the plague inguinal bubos were present in 1841, axillary bubos in 560, and maxillary bubos in 231 cases. Inguinal bubos occurred 175 times on both sides, 729 times only on the right side, 589 times only on the left one. Axillary bubos occurred nine times on both sides, 185 times on the right, 166 times on the left side. Maxillary bubos alone occurred only 130 times, and among these 67 times in children. Cabiadis in 1,826 cases found inguinal bubos in 720, axillary bubos in 406, cervical bubos in 98, bubos in several places at the same time in 122.

Carbuncles make their appearance much seldomly than bubos, according to Lubbock only in 3 to 5 per cent. of all cases, (of Cabiadis' 1,826 cases 36 presented carbuncles) ordinarily between the first and seventh day of the illness, it may be before or after the bubos, at times also without them, and almost always preceded by the occurrence of pain and burning heat in the affected sites. The carbuncles must, according to Virchow, have a great similarity to those appearing in cases of mortification of the spleen. They begin with a small, severely burning, reddish swelling, which grows quickly, extends inwardly, and forms a protuberance with one or more small blisters on the summit, which subsequently burst. The basis of the blisters mortifies into a black scab. The swelling and the scab rapidly spread in the periphery, the extension, however, as a rule coming to an end within two days. Such carbuncles may occur in all parts of the body, with the exception of the palms of the hands and the soles of the feet; they are mostly found on the legs, the buttocks, and on the neck. They mostly occur singly; at times, however, several and even a large number may make their appearance.

With the formation of these localized phenomena, in case of a favourable development of the disease, the fever slackens coincidently with the occurrence of heavy perspiration, the pulse becomes stronger, and its frequency falls to 90 to 100 beats in a minute. The patient becomes quieter, the expression of his face more natural, the tongue becomes once more moist, and the suffusion of the eyes and the distension of the pupils decrease.

The bubos either give off pus or subside; in the former case, which is considered to be the more favourable one, the glands again swell. After a few days the abscess ripens, opens and discharges pus, blood and loosened cellular tissue, which often gives off a very offensive smell. Healing occurs after the lapse of several weeks. In rare cases the bubo remains stationary for weeks, and maturation or subsidence then occurs.

The carbuncles cease to extend, the slough, which generally has a diameter of several centimeters, is gradually detached by suppuration, and the remaining sore cicatrises. The scars often cause considerable disfigurements. Occasionally the carbuncle develops a diffuse moist blister, which spreads rapidly and may bring about gangrene of a whole limb.

In favourable cases the improvement continues, accompanied by ample secretion of perspiration and urine, and on the sixth to tenth day of the illness convalescence commences.

At times after the formation of the localised phenomena, no remission occurs, and the typhoid condition continues up to the 15th to 20th day. In another class of cases an irregular fever occurs anew after a distinct remission, while miliaria, pustules, furuncles, abscesses, mortifying erysipelas, parotitides and gangrenous inflammations of the mammary glands develop themselves. In such cases we have evidently to deal with secondary pyæmic conditions.

A hæmorrhagic diathesis frequently appears in serious cases of plague. Patochiæ appear on the skin, usually on the neck, the chest and the extremities, in the form of dots, streaks or large red, black or bluish hæmorrhages, which occasionally are so numerous that the whole skin is covered with them. Hæmorrhages may also occur from the nose, mouth, lungs, stomach, intestines, kidneys, female genital organs, and, in the case of females, often cause abortions. The hæmorrhages usually occur at the height of the disease, from the third to the seventh or eighth day. They may, however, appear even during the first stage.

Hæmorrhages of the lungs, which are generally of very rare occurrence in plague (of Cabiadis' 1,826 patients, only six had hæmoptysis), occur so frequently in particular epidemics as to have formerly given rise to the belief that one had to deal in the latter with a separate disease, very similar indeed to the plague, but specifically distinct from it, and consequently distinguished from the Oriental plague as the Indian or the Pali plague. Thus the Black Death of the 17th century, the epidemics at Guzerat and Ahmedabad (India) in 1820, in Pali 1836, Tripolis 1874, Mesopotamia 1874-77 were distinguished by hæmorrhages of the lungs. The quantities of blood which are expectorated are mostly inconsiderable, seldom amounting to more than 15 grammes, and the accompanying symptoms consist of a short dry cough, difficulty in breathing, pains in the side and behind the sternum. The appearance of hæmoptysis is generally a very unfavorable symptom; such cases generally terminate fatally on the second day of the disease and before the appearance of the buboes. Death may occur in any stage of the disease, but most frequently on the third to the fifth day. Often the immediate cause is weakness of the heart, and death ensues at times quite suddenly and unexpectedly; sometimes a very frequent, small, soft, hardly perceptible and often irregular pulse, coldness of the extremities with internal heat, occasionally cyanosis or lividity of the face, hiccough, convulsive twitching of the muscles precede the occurrence of death. In other cases death takes place after a sudden convulsion accompanied by coma, or from exhaustion in consequence of fever, or in connection with the above-mentioned pyæmic conditions.

Convalescence sometimes proceeds pretty quickly; often, however, it takes a long time, particularly in the case of prolonged suppuration of the buboes, of suppuration of internal lymphatic glands, of carbuncles, parotitides, abscesses of the skin or deeper situated tissues, of pneumonia or of a persistence of the typhoid condition.

Deviations from the typical course of the plague as described above, and which are often observed in the midst of epidemics, frequently occur, and are based chiefly on variations in the virulence and duration of the disease.

Firstly, there are cases distinguished by their extremely rapid course, in which with the appearance of the greatest prostration the patients succumb within from 12 hours to two days, even before the appearance of the character-

istic local symptoms and before any stronger reactive febrile phenomena have manifested themselves.

On the other hand, particularly at the commencement or towards the close of epidemics, and occasionally along with isolated severe cases, mild cases occur forming complete minor epidemics, in which without any severe general suffering, buboes are formed which either mature, or after a short existence subside. Also ambulatory cases without fever have been observed, which at times quite suddenly and unexpectedly end fatally.

The duration of the disease varies between a few hours and four weeks or longer. On the average, up to the commencement of the convalescence it seems to last from 6 to 10 days. In consequence of secondary typhoid or pyæmic conditions it may, however, have a much longer duration.

The mortality is always very high. At the height of an epidemic it amounts frequently to 70 to 90 per cent. and more, and at other times it is seldom less than 60 per cent. In the hospitals at Hongkong in 1894 no less than 95 per cent. of the patients succumbed. Some epidemics form an exception, and are marked by the innocuous character of the disease. Relapses are not unfrequent, and always dangerous. Secondary diseases are not often observed. There are mentioned as such, persistent suppurations of the glands and of the ears, deafness, pulmonary gangrene, great enlargement of the spleen, obstinate bleeding of the urethra, dropsy, paralysis, dumbness, mental aberrations (delirium).

Pathological Anatomy.—The corpses of those who have died of plague generally show no emaciation. *Rigor morbis* is usually moderate, and decomposition commences early. There are frequently small or large hæmorrhages on the skin, and these are often so numerous that the whole body acquires a black tint. (hence the name "Black Death.") Cutaneous carbuncles, furuncles, pustules, abscesses, &c., also may be present. The brain and the meninges are congested, and the latter occasionally show ecchymosis. The subarachnoid space at times contains a serous fluid, and the ventricular fluid may also be in excess. The brain itself is usually found to be normal. The membranes of the spinal cord show changes similar to those present in the cerebral membranes. Ecchymosis occur on the serous membranes, and sanguineous or serous effusions are often present within the serous cavities. The lungs are sometimes normal, at times bronchitis, hypostasis, pneumonia, apoplectic patches and hæmorrhagic infarcts are present.

The heart, particularly its right half, is strongly expanded by loosely coagulated or liquid blood; its substance is frequently pale and limp; the large veins of the thoracic and abdominal cavities are also much extended by blood.

The liver is usually slightly swollen and full of blood; the bile plentiful, dark and thick, and the walls of the gall-bladder are sometimes œdematous. The swelling of the liver, according to Virchow, is apparently to be ascribed to acute parenchymatous changes. Pruner and Bulard maintain that they have seen carbuncles on the liver, but have, according to Virchow, probably mistaken the erectile, dark-red swellings, which are known to occur in the liver, for such lesions. The spleen is swollen as a rule, often to double and quadruple its normal size, dark, full of blood and soft.

The mucous membrane of the intestines and the stomach frequently shows ecchymosis, and here and there injection and increased secretion of mucus.

In the stomach there are also at times hæmorrhagic erosions, and in the intestines near the ileocaecal valve and extending to the vermiform process, ulcers have been found.

The mesenteric glands are usually somewhat enlarged, at times injected to a deep red or affected ecchymosis. The kidneys are often, probably in consequence of acute parenchymatous changes (Virchow), swollen and full of blood, and show ecchymosis both on the surface and on the pelvic membrane. The tissues surrounding the kidneys are also often permeated by hæmorrhages. Not unfrequently coagulated blood is found in the pelvis, and continued thence into the urethra.

The urinary bladder is at times filled with bloody urine, and its mucous membrane ecchymosed.

The most considerable, constant and characteristic changes, presented by the plague, occur in connection with the lymphatic apparatus. The exterior buboes, which may grow to the size of a goose-egg and may even attain to a weight of several pounds, specially appear, as has been already mentioned, in the glands of the groin, shoulders and neck, and frequently extend inwards, so that the groin-buboes may communicate through the inguinal ring with the glands of the sacral and lumbar plexus, and along the spine as far as the diaphragm, while the shoulder and neck buboes may communicate with each other and with the lymphatic glands in the mediastinum. The buboes are dependent on cellular hyperplasia with more or less plethora of blood and hæmorrhagic effusions (Virchow). The glandular tissue appears sometimes uniformly red, sometimes red like the dregs of wine, sometimes violet, and sometimes whitish or marbled and of marrowy, brainlike or firm, rather lardy consistency; at times it is softened to a pulp (Greisinger). The tissue surrounding the affected glands frequently shows more or less extensive hæmorrhages, and is according to Kitasato infiltrated with a reddish gelatinous exudation. Some observers (Pugnet) have detected a considerable extension of the lymphatic ducts in the vicinity of the affected glands.

Occasionally, instead of the usual buboes confined to certain localities, a generally diffused but moderate swelling of nearly all the glands of the body occurs (Aubert). Also in those cases in which the disease has ended fatally during the first days and before any buboes have developed, single glands in the usual places have, as a rule, been found in a swollen condition.

DIAGNOSIS.

The diagnosis of the plague is frequently, particularly at the commencement of epidemics, difficult. In serious cases, malignant malaria and typhus may be mistaken for it; and in milder ones, venereal buboes and other lymphatic inflammations may lead to errors in diagnosis. What is decisive for the diagnosis is epidemic occurrence, i.e., coincidence with the presence of an epidemic, the extraordinarily severe general suffering accompanied by high fever, and the buboes. Even although there may be exceptionally rapid cases in which buboes are absent, there will in any epidemic be cases of a typical nature, leaving no possible doubt in the matter of diagnosis.

From Dengue-fever, in which also slight swellings of the glands of the groins, the armpits and the neck do appear, plague is easily distinguishable by the severe pain of the joints and muscles, the peculiar eruption and the innocuous character proper to the former disease.

How far the bacteriological examination of the blood can be made available for the diagnosis of the plague, further researches must show.

PROGNOSIS.

The plague surpasses all infectious diseases in severity, and is therefore a very serious illness. The prognosis primarily depends on the character of the individual epidemic, which, as we have seen, may vary, and next on the age of the patients. Robust adults are comparatively the least endangered; young children and the aged are, on the contrary, said to succumb almost invariably. Once having withstood the disease gives a good prognosis.

An early appearance of buboes, their early inclination (on the third or fourth day of the disease) to suppurate, a distinct remission of the fever paroxysms with a natural expression of the face and intermission of stupor, spontaneous free perspiration, surviving the seventh day, constipation, full and regular pulse, are all looked upon as favourable symptoms. On the other hand, buboes on the neck, carbuncles at the back of the neck and along the spine, hæmorrhages, strong dyspnæa, violent delirium, convulsions, considerable diarrhoea, vomiting, anuria, weak and irregular pulse, cyanosis, are regarded as unfavourable symptoms.

PROPHYLACTICS.

The prophylactic of the plague consists, in the first line, of strict measures of blockade and quarantine; to these measures is to be ascribed the fact that the plague has ceased to figure of a universal disease.* As its importation may take place by water or land, a sanitary police supervision has to be exercised both at the frontiers and over the shipping whenever it threatens.

* He has already pointed out that the disappearance of the disease from Europe was coincident, not with any increment in the enforcement of quarantine measures, but with increased attention to local sanitation

D. D. CUNNINGHAM.

At the frontier, or the customs barrier,† travellers arriving from affected districts must be medically examined. All people who are sick or suspected must be isolated, and the others subjected to quarantine, for which purpose special accommodation must be provided. As the incubation of the plague only exceptionally exceeds seven days, a quarantine of this duration should suffice. The linen, clothing and other belongings of the travellers should be disinfected: those of the sick should be burnt. The goods traffic has likewise to be watched. What goods and articles should be altogether excluded from importation from a disease-stricken country is a difficult question to answer, as every new occasion has shown. The German interdict of 29th January 1879 regarding importation from Russia extended to used clothing, body and bed linen, rags, waste-paper, fur of all kinds, hides, bladders, guts, felt, bristles, feathers, caviare, fish and sarcoptabalsam. With regard to other goods, the disinfection of the coverings would appear to be desirable.

H. H. RISLEY.

The disinfection of clothes, with the exception of leather goods, which should be rubbed with 5 per cent. carbolic acid, is best done by steam disinfecting apparatus, while body and bed linen should be put for three hours in a solution of 3 per cent. soft soap heated to 50° Celsius, there allowed to stand 48 hours and then washed in the ordinary manner. The coverings of goods are disinfected by rubbing or brushing with 5 per cent. carbolic solution.

Less difficult than the sanitary police supervision of the frontier traffic is that over the shipping, which must be extended to all sea-going and river vessels coming from a diseased port. Ships which have, or have had on board, people infected with the plague must undergo quarantine, and the sick must be isolated in special quarantine hospitals, while their clothing, etc., should be burnt. The belongings of the healthy crew and passengers, etc., as well as the ship, should be disinfected. For ships which have had no case of sickness on board, the quarantine may be waived; but the disinfection should take place all the same. Of particular interest in this matter is the plague regulation issued in Egypt by the International Sanitary Board in June 1894, on the occasion of the outbreak of plague in South China. It distinguishes between infected, suspected, and clean ships. Clean ships, i.e., such as come from an infected port, but have not had an ascertained or suspected case on board, are admitted to free intercourse after medical inspection. If, however, seven days should not have elapsed since departure from the infected port, that period must first be completed. Suspected ships, i.e., those on which cases of the disease have occurred, but not within the previous nine days, are to be treated in a different manner, varying as they have a medical man and a disinfecting apparatus on board or not. The former are allowed to pass the Suez Canal in quarantine and with sealed hatches; the latter only after a process of disinfection of used clothing, bedding, and other susceptible articles has been carried out at the quarantine station. Mail and line steamers, having a medical officer, though not a disinfecting apparatus, on board, are allowed free intercourse after previous disinfection of the used clothing, susceptible goods and of the ship itself, if for a fortnight previously no case of illness has occurred; if less than a fortnight has elapsed since the last case of anybody being taken ill, a quarantine of 48 hours is imposed besides.

Finally, infected ships, i.e., those which have diseased people on board, or have had such within the previous nine days, must transfer the sick to an

isolated hospital. The healthy passengers must likewise disembark and be kept for seven days in quarantine, or for a shorter time, if for several days previous to arrival no more cases have originated (if the last case occurred nine days previously, then two days, and so forth); the detention is arranged in groups, in order that all may not have to be further detained if a new case should occur. The clothing and bedding of all the sick are to be burnt, and the used belongings of the healthy passengers and crew, as well as the susceptible goods and the ship itself, have to be disinfected. The latter may then, seven days having elapsed since the last case of disease observed on board, be allowed free intercourse.

As regards the disinfection of ships, it is advisable to wash the different cabins, &c., with lime-water, washing it off again after 2—3 hours, to treat all utensils according to their kind in a similar manner, or to rub them with a 5 per cent. solution of carbolic acid, to pump out the bilge water, and to disinfect the hold with lime-water. The bilge water should anyhow contain at least 2 vol. per cent. lime-water.

It is of the greatest importance, if the plague should break out in a country where it has not shown itself during the last decennial period, completely to blockade the first place where it appears by a military cordon. Provided the place is small, this is quite feasible, as is shown, among other cases, by the example of the town Noja in Lower Italy, 1815. It is different when the disease has already spread wider, which generally happens, as is indicated by the history of recent plague epidemics, before the disease has been properly recognized, and the fear of a diagnosis, having such far reaching consequences, has been overcome. To blockade wide tracts of country is extremely difficult, if not impossible, even in distant countries not yet in communication with the world at large, but in any case it is better to be content with an incomplete blockade than to dispense with one altogether, for anyhow a considerable portion of the infection which otherwise would spread all round will be intercepted. To do this as far as possible, besides the blockade round the infected area, additional military cordons should be established in the adjoining districts. The hotbed of the disease one must try to cut off as much as possible by isolation of the sick and of suspected cases, and by disinfection of their belongings and their dwellings. According to Kitasato's investigations, the isolation of convalescents must be carried on for one month, and disinfection has to be extended to their evacuations. The corpses of the plague-stricken must either be burnt or buried at least three metres deep. The same ought to be done with the bodies of rats, mice, &c., which have died of the plague.

Papered rooms must be disinfected by rubbing down the walls with bread, white-washed rooms done over again with lime-wash, and oil-painted ones with 5 per cent. carbolic solution or white-washed and washed again after two hours; the latter process to be applied as well to the floors; those made of hard wood, inlaid, or well-painted, are to be treated with carbolic solution, ill-kept ones with lime-water.

Furniture, doors, windows, frames, wainscotings, should be well washed with a 5 per cent. carbolic solution and then rubbed dry; in the same manner metal-ware, porcelain and glass-ware are treated.

Huts should be destroyed by fire.

For the disinfection of the evacuations of the patients, lime-water is best. About an equal quantity of the disinfectant should be used, and the mixture left standing an hour before pouring it into the latrine.

Finally, much depends in the prophylaxis of plague on the improvement of sanitary conditions, for, as we have previously seen, both the origin and the development of the disease are connected with bad hygienic conditions. The latest epidemic at Canton and Hongkong further strikingly demonstrated this to be the case.

Personal prophylaxis demands a regular mode of living, the utmost cleanliness, good ventilation of dwellings, and avoidance of all contact with the diseased, their dwellings and belongings. The rubbing of the body, specially of the face and hands, with oil is recommended, based on the immunity said to be enjoyed by oil-carriers, &c., from contracting the disease.

THERAPEUTICS.

The treatment of the plague is based on symptoms; unfortunately it holds out little prospect of success. In the stage of attack stimulants, chiefly alcoholic ones, are given.

From the commencement of the disease rubbing of the skin with oil is recommended; perhaps it is its efficaciousness in lowering the fever which exercises a beneficial influence. The fever-stage demands an antipyretic treatment, cold on the head, cold baths and antifebrilia, such as quinine, antipyrin, phenacetin, &c. When a tendency to sweating arises, it ought to be encouraged by warm drinks. Later on, with declining reaction of the nervous system and typhoid conditions, stimulants, camphor, æther, &c., should again be administered. The buboes and carbuncles are treated with hot poultices, and if fluctuation occurs, are laid open by incision. In case of hæmorrhages taking place, styptics, such as liquor, ferrisen, quichlorate, secale cornutum, ergotin, &c., are to be tried.

The investigations of Yersin, Calmette and Borrel, which have been already alluded to, raise well-grounded hopes that the disease may in future be successfully treated by means of serum obtained from artificially immunised animals.

STOCKS OF RICE IN AND AROUND CALCUTTA.

No. 312 Stats.—The following is published for general information.

Secretary to the Government of Bengal.

STATISTICAL DEPARTMENT,
The 8th February 1897.

STATISTICS OF THE SEA-BORNE TRAFFIC OF CALCUTTA IN FOOD-GRAINS.

No. 315 Statistics.—The following memorandum and statements are published for general information.

STATISTICAL DEPARTMENT,
The 9th February 1897.

M. FINUCANE,
Secy. to the Govt. of Bengal.

Memorandum.

The sea-borne import and export traffic of Calcutta in food-grains during the 10 days from 22nd to 31st January 1896 and 1897 are shown in the following statement:—

		22ND TO 31ST JANUARY			
		1896		1897.

Other food-grains, such as jowar, barley, oats, &c.	...	46	62
Total	..	56,300	76,630	555,075	7,55,519

The imports of *rice* from *Burma* are very rapidly increasing, the quantity received during the 10 days under review being so much as 484,456 cwts., against nil in the corresponding period last year. The consignments from *Chandbali* amounted to 12,611 cwts. of *rice* and 1,877 cwts. of *paddy*, against 18,072 cwts. and 9,158 cwts., respectively, in the preceding year. The receipts from *Balasore* also diminished, being 10,216 cwts. of *rice* and 3,855 cwts. of *paddy*, against 22,147 cwts. and 4,284 cwts., respectively, in the previous year. The increase of 28,251 cwts. under *gram and pulse* was almost entirely due to larger imports from *Coconada* (15,357 cwts.) and *Madras* (7,413 cwts.)

Exports.—In the following statement the total quantity of each kind of food-grains exported by sea during the last 10 days of January 1897 is compared with the figures for 1896 :—

1	22ND TO 31ST JANUARY			
	1896.		1897.	
	2	3	4	5
<i>Food-grains.</i>	Cwts.	Mds.	Cwts.	Mds.
Rice	335,061	4,56,055	115,591	1,57,832
Paddy	1,592	2,167
Wheat	1,040	1,470	498	678
Gram and pulses ..	69,752	94,940	9,813	13,856
Other food-grains, such as jowar, barley, oats, &c.	5,085	6,921	132	180
Total ...	412,570	5,61,553	126,034	1,71,546

The exports of *rice* to Foreign ports showed a heavy decline, viz., from 296,174 cwts. to 108,104 cwts., or by 193,070 cwts, or 65·19 per cent. owing chiefly to a decrease of 50,794 cwts. to Ceylon 46,090 cwts. to the United Kingdom, and 26,056 cwts. to Germany. To Mauritius and Cape Colony there were no shipments against 28,735 cwts and 24,056 cwts., respectively, in 1896 ; while, on the other hand the consignments to Holland, Aden, New South Wales and Victoria aggregated 10,532 cwts, against nil in the corresponding period in 1896. Under *gram and pulse* there was a remarkable fall, viz., from 55,522 cwts to only 2,627 cwts., the despatches to the United Kingdom being only 367 cwts, against 34,589 cwts, in the preceding year, while Mauritius drew nothing this year, against 16,072 cwts. in 1896

The shipments of *rice* to the Indian ports were about one-third those of the corresponding period in 1896, viz., 12,487 cwts. against 38,887 cwts. The exports to Bombay declined from 20,383 cwts. to 10,111 cwts., while to the Madras ports only 3 cwts. were sent, against 17,740 cwts. in the last 10 days of January 1896. The despatches of *gram and pulse* fell from 14,230 cwts. 7,186 cwts., or by half, the chief decline being in the exports to Madras ports, which amounted to only 3,162 cwts., against 9,091 cwts. in the preceding year.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below.

**STATISTICS OF THE SEA-BORNE TRAFFIC OF THE MINOR PORTS
IN BENGAL IN FOOD-GRAINS.**

No. 316 Statistics.—The following memorandum and statements are published for general information.

STATISTICAL DEPARTMENT,
The 9th February 1897.

M. FINUCANE,
Secy. to the Govt. of Bengal.

MEMORANDUM.

THE comparative statements below give statistics of the import and export trade of the minor ports of Chittagong, Narayanganj, Balasore (including both Balasore and Chhandbali), Cuttack and Puri during the week ending 14th January 1897, as compared with the trade of the corresponding period of 1896 :—

	{ 1897	...	1,543	21,835	23,378	31,820

The falling off under Chittagong is due to the cessation of exports to Trinidad, which received 20,551 cwts. of rice in 1896. The export trade of Cuttack, which showed a decline of 676 cwts during the period under report, was confined to Foreign Ports only. The falling off in the exports from the Balasore ports is chiefly due to smaller despatches of rice, paddy and gram and pulse to Calcutta this year.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below:—

Statement showing the quantities of Food-grains imported into Chittagong from each Foreign and Indian Port during the week ending 14th January 1897, as compared with the trade of the corresponding period of 1896.

WEATHER AND CROP REPORT.

For the week ending the 8th February 1897.

Burdwan.—Rainfall at Sadar 0·06, Kalna 0·61, Katwa 0·16, Raniganj 0·02. Weather seasonable. *Rabi* slightly improved by the recent rainfall. Pressing of sugarcane going on. *Boro* paddy cultivated in a few places. Fodder and water sufficient. Condition of cattle good. Common rice selling as follows:—

			Srs. c.	Srs. c.	
Sadar 10 0	to 12 0	} per rupee.
Kalna	10 0	
Katwa 10 10	to 10 15	
Raniganj	10 4	

Birbhum.—Pressing of sugarcane going on. Price of rice at Sadar 9 seers and Rampur Hat 10½ seers per rupee.

Bankura.—No rain except at Raipur, where there was only ·35 on the 1st instant. Threshing of *aman* nearly finished. Fodder and water sufficient at present, except in a few places. Cow-pox reported. Rice selling at Sadar 11½ seers and Vishnupur 11½ seers per rupee. Price is higher in the interior, viz. 10 seers in 4 thinas and outposts.

Midnapore.—Rainfall at Sadar 0·16 and Contai 1·46. Good showers in some parts. Prospect of indigo, linseed and other *rabi* crops not good, but it would improve with a little more rain. Threshing of *aman* going on. Cattle-disease reported from Salbani, Keshpur, and Binpur. Fodder and water sufficient. Common rice selling as follows:—

			Srs.		
Sadar	{	New rice	10
				Old "	9
Contai		12
Ghatal	10½ to 12	} per rupee.

Hooghly.—Scarcely any rain except at Serampore, where ·72 fell and did good. *Rabi* and sugarcane suffering. Common rice sells from 8½ to 10 seers per rupee.

Howrah.—Rainfall at Sadar 1·21 and Uluberia ·12. A thunder-storm on Monday (1st instant), otherwise weather unseasonably hot. Pressing of sugarcane going on. Prospects of *rabi* crops not good. Fodder and water sufficient. Common rice sells from 9 to 11 seers per rupee.

24-Parganas.—Rainfall at Sadar 1·39, Diamond Harbour ·36, Barasat ·5, Basirhat nil. Weather warmer with cloud. Prospects of standing crops poor. Lands in places are under preparation for *aus* paddy and jute. Pulses are being harvested. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

			Srs. c.		
Sadar	9 to 11 0	} per rupee.
Barasat	9 0	
Basirhat	10 0	
Diamond Harbour	10 10	

Nadia.—Rainfall ·02 reported from Kushtia, ·07 from Moherpur, ·14 from Chuadanga, ·41 from Ranaghat. The rain did little good to crops. Harvesting of *arhar*, *mug*, *kalmi* and sugarcane still going on. Water-supply generally deficient. Fodder ample everywhere. Common rice sells at 8 seers to 10 seers 12 chitaks per rupee. Latest price of rice where test-works are open is 9 seers per rupee. Numbers attending test-works are as follows:—

28th January	2,179
29th "	2,319
30th "	2,353
31st "	811
1st February	526
2nd "	260
3rd "	397
4th "	572
5th "	309
6th "	735

Number of persons who received gratuitous relief at police-stations during the week—men 247, women 845, children 327—total 1,419. Number on relief works on Saturday, 6th February—Sadar subdivision—men 1,417, women 411, children 978—total 2,806; Moherpur subdivision—men 877, women 296, children 908—total 2,081; Kushtia subdivision—men 802, women 16, children 283—total 1,101. Gratuitous relief—men 375, women 543, children 155—total 1,073.

Murshidabad.—Rainfall at Sadar ·06, Kandi ·01, Jangipur ·07. Weather seasonable. Prospect of *rabi* is not good. Transplantation of *boro* nearly finished. Pressing of sugarcane still going on. Mulberry and indigo doing well. Fodder sufficient for cattle. Common rice sells as follows:—

				Srs.	
Sadar	10½	} per rupee.
Kandi	11	
Jangipur	10½	

Jessore.—Rainfall at Sadar ·06, Narail ·01, Bangaon ·93. Days beginning to be hot; passing clouds occasionally; foggy in the morning. Rainfall too slight, especially at Sadar and Narail, to be of much use. Heavy fall of rain wanted for sowing *til* and for transplantation of *boro* seedlings. *Rabi* is being harvested. No cattle-disease. Fodder and water available. Common rice sells as follows:—

				Srs. c.	
Jessore	9½ to 10	} per rupee.
Magura	9 to 10	
Narail	10	
Bangaon	10	

Khulna.—Rainfall at Sadar ·50, Bagerhat ·02, Satkhira nil. Weather hot. Common rice sells as follows:—

				Srs.	
Khulna	9 to 11	} per rupee.
Bagerhat	11	
Satkhira	10	

No cattle-disease. Fodder and water available. Three relief works open. Number of persons employed on relief works in the Satkhira subdivision for the week ending 3rd February:—men 271, women nil, children 84—total 355. Gratuitous relief—men 8, women 21, children 11—total 40.

Rajshahi.—Rainfall at Nator ·01; no rain elsewhere. Prospects of standing *rabi* crops not good. Transplantation of *boro* continues. Sugarcane being planted. Lands are being ploughed for *bhadai* and jute. Fodder available. Want of drinking-water reported from places. Price of rice varies from 8½ to 11 seers per rupee. Number of persons employed on relief works on Saturday, 6th February—men 526, women 6, children 16—total 548. No gratuitous relief.

Dinajpur.—No rain. Weather seasonable. Condition of standing crops fair. No report of any cattle-disease, nor any complaint for fodder and water. Common rice sells from 10½ to 12 seers per rupee.

Jalpaiguri.—Rainfall nil. Weather cold. Prospects of standing *rabi* crops favourable. Rain wanted for ploughing land for *betri* paddy. Fodder and water sufficient. Average price of common rice 8½ seers per rupee.

Darjeeling.—Rainfall nil. Weather seasonable. Hills—Wheat and barley coming up; *tori* flowering; *phaphur* and *kalai* being harvested. Terai—Harvesting of *humanti dhar* completed; tobacco and mustard doing well; ploughing for jute and sugarcane going on. Price of coarse rice:—

				Srs.	
Hills	7 to 9	} per rupee.
Terai	9	

Tihutta, 13 to 18 seers per rupee.

Rangpur.—No rain. Land is being prepared for *aus* crop and jute. Harvesting of mustard continues. Prospects fair. Common rice selling at 8 to 10 seers per rupee. Fodder and water sufficient.

Bogra.—No rain. Weather getting warm. Fodder and water sufficient. Common rice selling at head-quarters 10 seers 14 chitaks per rupee, and in the interior from 8½ to 12 seers.

Pabna.—Rainfall ·03. Weather seasonable. No change in the condition of crops. Common rice selling at 8 to 10 seers per rupee. Fodder plentiful.

Dacca.—Rainfall nil. Weather foggy in the morning. Prospects of standing crops not very favourable for want of rain. Fodder available. No cattle-disease. Price of common rice 10 to 11 seers per rupee.

Mymensingh.—Rainfall nil. Weather seasonable. Rain wanted for preparation of land for *aus* paddy and jute. Price of common rice between 9 and 12 seers per rupee. Fodder and water sufficient.

Faridpur.—Slight sprinkle of rain at Sadar. Weather seasonable. Prospects as before. Common rice selling at 9 to 11 seers per rupee. Fodder and water available. Rain wanted.

Backergunge.—Rainfall .89. Weather close. Prospects of spring crops indifferent. More rain wanted. No cattle-disease. Common rice selling at 9½ to 12 seers per rupee. Fodder sufficient.

Tippera.—Weather seasonable. Prospects of standing crops not favourable. Fodder and water available. Common rice sells at 10 to 12 seers per rupee.

Noakhali.—Rainfall .52. It will do good to *rabi* crops. No cattle-disease. Fodder and water available. Price of rice : 9 to 12 seers per rupee.

Chittagong.—Rainfall nil. Weather dry with occasional clouds. *Rabi* crops suffering for want of rain. Prospects unchanged. Water and fodder sufficient. Rice selling at 8 to 10 seers per rupee.

Patna.—Prospects of *rabi* crops favourable, those of poppy slightly changed for the worse on account of the bad weather during the preceding week. Fodder and water for cattle sufficient, except green fodder in Bihar. Price of common rice at Patna 10½ seers per rupee. Numbers on test-works on Saturday, 6th February—men 104, women 72, children 8—total 184; gratuitous relief—men 35, women 50, children 40,—total 125.

Gaya.—Prospects of *rabi* crops continue excellent. Price of common rice at Sadar 9½ seers per rupee.

Shahabad.—*Rabi* prospects generally favourable. Some damage reported to have been done by hoar-frost and insects. Prices stationary. Number on relief works on Saturday, 6th February—men 410, women 548, children 297—total 1,255. Gratuitous relief—men 192, women 287, children 354—total 833.

Saran.—*Rabi* and poppy doing very well. *Rahar* little injured by frost in places. Sugarcane pressing going on. Average price of *makai* 10 seers 2 chitaks per rupee. Numbers on relief works on Saturday, 6th February—Sadar subdivision—men 530, women 875, children 1,215—total 2,620; Siwan subdivision—men 2,328, women 3,774, children 1,896—total 7,998; Gopalganj subdivision—men 1,067, women 1,443, children 995—total 3,505. Gratuitous relief—Sadar subdivision—men 1,198, women 4,550, children 1,215—total 6,963; Siwan subdivision—men 437, women 1,310, children 271—total 2,018; Gopalganj subdivision—men 1,156, women 3,053, children 1,490—total 5,699. Siwan poor-house 70 (men 15, women 26, children 29). Hatwa relief works 2,753; poor-houses 486; doles 231. Manjha poor-house 26; doles 155.

Champaran.—No rain. *Rabi* crops and poppy looking well. Price of common rice unchanged at 8½ seers, that of maize risen from 10½ to 10½ seers per rupee. Numbers on relief works on Saturday, 6th February—men 42,759, women 37,663, children 20,079—total 100,501; gratuitous relief—men 3,083, women 6,411, children 6,438—total 15,932.

Muzaffarpur.—No rain. *Rabi* prospects good. Prices are—common rice 9 seers, Burma rice 9½ seers, wheat 7½ seers, *makai* 10½ seers, barley 12 seers, gram 11 seers, *rahar* 12 seers. *Maka* and *rahar* fix the relief prices. Numbers on relief works on Saturday, 6th February—Sadar subdivision—men 285, women 743, children 6—total 1,034; Sitamarhi subdivision—men 827, women 226, children 219—total 1,272. Gratuitous relief—Sitamarhi subdivision—men 504, women 621, children 817—total 1,945.

Darbhanga.—Prospects of standing *rabi* crops fair. Rape seed and mustard are being reaped. Peas ripening. *Rahar* excellent. Price of common rice 9½ seers and of *makai* 11 seers per rupee. Numbers on relief works on Saturday, 6th February—Sadar subdivision—men 35,757, women 29,450, children 8,636—total 73,843; Samastipur subdivision—men 1,568, women 1,759, children 541—total 3,868; Madhubani subdivision—men 22,286, women 14,279, children 8,000—total 44,565. Gratuitous relief—Sadar subdivision—men 1,865, women 3,693, children 2,623—total 8,181; Samastipur subdivision—men 180, women 341, children 191—total 712; Madhubani subdivision—men 10,773, women 29,301, children 17,526—total 57,600. Besides the above, the Darbhanga Raj has on relief works—men 11,760, women 4,079, children 1,980—total 17,819, and on gratuitous relief—men 1,582, women 3,592, children 2,698—total 7,872.

Monghyr.—No rain except a bit at Chakai. Prospects of *rabi* crops favourable. Cattle-disease reported from Begusarai. Prices of common rice :—

	Srs.			} per rupee.
Monghyr	
Begusarai	
Jamui	
			9 to 10½	
			9½	
			8 to 10	

Bhagalpur.—Weather seasonable. *Rabi* crops coming into ears. Some cattle-disease reported from Sadar. Test-relief works opened in Supaul and Madhipura subdivisions. Number of workers according to latest information, 816. No gratuitous relief. Fodder and water sufficient. Prices of common rice :—

				Srs. c.	
Sadar	10 12	} per rupee.
Banka	10 10	
Madhipura	10 0	
Supaul	11 0	

Purnea.—No rain. Harvesting of mustard and tobacco going on. Standing *rabi* crops fair. Cattle-disease reported from Araria and Raniganj thanas. Fodder and water sufficient. Prices of common rice :—

				Srs.	
Sadar	10	} per rupee.
Kishanganj	10	
Araria	10 to 11	

Malda.—No rain. Weather getting hot. Prospects of crops unchanged. Common rice selling from 8 to 11 seers per rupee. No cattle-disease. Fodder and water sufficient.

Sonthal Parganas.—Weather getting warm. Slight rain in Dumka and Deoghur. Prospects of crops unchanged except at Godda, where wheat and other *chaitali* crops are, reported to be satisfactory. Fodder and water-supply yet sufficient. Dews getting scanty. A few cases of cattle-disease reported from Jamtara. Price of common rice 8 to 11 seers and of maize 12 to 16 seers per rupee.

Cuttack.—Rainfall nil. Heat increasing. Paddy harvest nearly over *Rabi* being harvested. *Dalua* growing extensively. Cattle-disease in Jajpur. Fodder sufficient. Common rice sells as follows :—

				Srs. c.	
Cuttack	11 13	} per rupee.
Kendrapara	14 7	
Banki	14 13	

Balasore.—A little rain in parts. *Sarad* rice being threshed. *Rabi* crops seem to be benefited by the rain. *Dalua* crop flourishing well in some places and suffering in others where no rain. Sugarcane being pressed. Price of rice varies from 12 to 14 seers per rupee in the interior. Rice sells at 12 and 13 seers per rupee at Balasore and Bhadrak respectively. Fodder and water sufficient.

Angul.—Weather cloudy, but no rain. Condition of crops and price of rice same as in last week.

Puri.—28 and 12 rainfall reported from stations Bhanpur and Ranpur. Harvesting of winter rice nearly complete. Prospects of summer rice and *rabi* crops much as before. Price of common rice stationary.

Hazaribagh.—Rainfall at Sadar nil, Giridih 46. *Rabi* doing well. Price of rice easier—8 and 9 seers per rupee. Importation by rail going on.

Lohardaga.—A little rain with hail. Lands are being ploughed. State of crops good. Rice sells at Ranchi 9 seers per rupee, and in the interior from 8 to 12 seers. Fodder and water sufficient. Cattle-disease reported from some police-stations.

Palamanu.—Rain and slight hail on Sunday (7th). Weather cloudy. *Rabi* slightly damaged by hail in Hussenabad and Chhatarpur thanas. Prices still rising. 68 markets sold 9 seers and under per rupee, against 61 in previous week; 21 against 13 between 9 and 10 seers; none over 10 seers against 2. Latest reports show 711 on test-relief works.

Manbhum.—Weather seasonable. Prospects of crops on the ground as before. Cattle-disease reported from thanas Purulia, Gourangui, Raghunathpur, and Para. Fodder and drinking-water sufficient at present, but diminishing. Average price of common rice :—

				Srs.	
Sadar	10	} per rupee.
Gobindpur	8	
				9	

Stocks of food-grains sufficient at present.

Singhbhum.—1.02 inches of rain on the night of 7th. Prices stationary. Rice plentiful.

General Summary.—Scattered showers of rain fell in parts of the Burdwan, Presidency, and Chota Nagpur Divisions, and also in Backergunge and Noakhali, and did good to the standing crops. In Lohardaga and Palamanu there was hail, which did some slight damage

in the latter district. Prospects of the *rabi* crops continue favourable in Bihar, but in all other parts (save in portions of North Bengal and Chota Nagpur) they are generally very poor. The poppy crop promises well in Bihar, but in Patna it has slightly suffered from the late unsettled weather. Spring rice is doing well, but wants rain in some districts. Ploughing for autumn rice and jute has begun in some districts. Prices show but little change during the week. In the distressed districts the prices of the food-grains on which the relief wages are based are—Nadia (common rice) 9 seers, Khulna (common rice) 10 seers, Rajshahi (common rice) 8½ to 11 seers, Patna (common rice) 10½ seers, Shahabad 10½ seers, Saran (Indian-corn) 10 seers 2 chitaks, Champaran (Indian-corn) 10 seers 2 chitaks, Muzaffarpur (Indian-corn) 10½ seers, Darbhanga (common rice) 9½ seers, and (*makai*) 11 seers. These prices show a slight tendency to fall in Saran, Champaran, Muzaffarpur, and Darbhanga.

The numbers on relief works and in receipt of gratuitous relief on Saturday, the 6th February, were—

Relief works—

Nadia	...	5,988 (men 3,096, women 723, children 2,169).
Khulna	...	355 (men 271, women nil, children 81).

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF JANUARY 1897.

WEATHER during January was not marked by any great peculiarity, except in the absence of rainfall. The usual number of depressions crossed the Province from the west, causing considerable pressure and temperature oscillations, and fairly general cloudy weather, but the rain which fell during their passage was both very light and very local. With the exception of Orissa, where the normal rainfall is less than .04 inch, the normal for the large divisions varies from .4 inch in South-West Bengal to .66 inch in Bihar. Bihar received on an average only .15 inch, Chota Nagpur .33 inch, and other parts less than .1 inch.

It will be remembered that almost general rain fell in the north of the Province on the 31st December. The light fall continued on the 1st of January, and it is owing to the amounts recorded on that date that the averages are at all comparable with the normal. The heaviest falls on the 1st were in the east of Bihar and North Bengal, and a few light showers fell in the south of the Province on the 3rd.

After this disturbance passed away, settled weather prevailed till near the middle of the month, when the first depression, properly belonging to January, gave rise to a few very light showers in Bihar, chiefly in the Champaran district. None of the amounts reported were above a tenth of an inch. Two others followed towards the end of the month. The first of these caused light showers on the 22nd and 23rd in Saran and Champaran, the heaviest being .4 inch at Bettiah on the 22nd and at Bagaha on the 23rd. The second was on the 27th, and caused a few light scattered showers in Lower Bengal and general light rain in Palamau, the heaviest falls being about half an-inch at Balumath and Garhwa.

If the rainfall in Saran, Champaran, and Palamau be left out of account, it may be said that after the 1st of the month the Province was practically without rain.

Though the three depressions failed to give the usual amount of general rain over the Province, they caused large oscillations of pressure and temperature. The latter especially fell rapidly; but as very hot weather for the season preceded the disturbances, the cold which followed them was not very marked, and in consequence the mean, maximum and minimum temperatures are above the normal in all districts, most so in the south-west of the Province.

At the beginning of the month pressure varied from 30.2 inches in the south-west of Bihar to 29.95 inches in the south-west of the Bay, giving a gradient considerably steeper than usual. Pressure had then recovered after the passage of the depression across the western districts, but was still falling in the east and over almost the whole of the Bay area. The cold wave following the depression was shown over Bihar and North Bengal, but mean daily temperature was still between 5° and 7° above the normal in Lower Bengal. By the 3rd the pressure distribution was more normal, being high by moderate amounts, and mean temperature was in moderate excess in part of South-West and East Bengal only. But on the 4th there was a brisk fall of temperature, which gave defect of 2° to 3° in all parts, except Orissa. A slow steady fall of pressure then set in and continued till the 9th. At the same time temperature began to recover slowly, and it was not till the 10th that weather was to any extent warmer than usual, and then only in the south-western districts. The heat wave preceding the disturbance of the 15th caused a daily increase of temperature till the 15th, when excess was 7°, except in North Bihar and North Bengal, where it was about 3°. Pressure oscillations during these days were of moderate magnitude. On the 14th, after a brisk rise, readings were below the normal by .06 inch in the west of Bihar, Chota Nagpur, and Orissa, and by .03 inch elsewhere. The depression was over the Province on the 15th, having caused a brisk to rapid fall of pressure at all stations. Readings were very uniform and greatest in Orissa, and a faint cyclonic circulation of winds prevailed. A rapid rise followed on the 16th in the west of Bihar, and was general on the 17th. The fall of temperature began on the 17th, and on the 18th defect varied from 1° in the south-west of the Province to 8° in the west of Bihar.

There was nothing noteworthy between the 19th and 21st, except the steady rise of temperature and the rapid rise of pressure. The latter began on the 21st and continued on the 22nd, when a slight disturbance caused cloudy weather over a great part of the Province and the light rainfall in Saran and Champaran referred to above. It was soon over, and westerly winds became general; but on the 25th they were again easterly in Bihar and the north of Chota Nagpur, owing to the approach of the third shallow depression, which was over the south of the Province on the 27th. The greatest defect on that day was .08 inch at Krishnagar and Berhampore, and the fall during the previous 24 hours varied from .1 to .13 inch. Temperature was nearly 10° above the normal, except in the extreme east and north-east. Pressure began to recover on the 29th, but there was still a moderate defect at the end of the month. The fall of temperature following the disturbance was about 8°, so that means on the 30th and 31st differed from the normal by small amounts, the variation on the latter date being between excess of 2° in Orissa and Chota Nagpur and defect of 1° over the eastern half of the Province.

Pressure oscillations have been considerable during the greater part of the month, especially during the three periods of disturbed weather. As, however, readings were at

times rather largely in excess, the means for the month have not been much affected by the depressions. They are practically normal in Chota Nagpur, Bihar, and North Bengal, and below the normal in the other divisions by .01 or .02 inch.

Temperature.—Has been more frequently above than below the normal, and by larger amounts, the greatest excess in the daily means being 10° just before the commencement of disturbed weather, or during the cloudy weather to which the depressions gave rise. In consequence both maximum and minimum values are on an average above the normal over the whole area, the former by amounts varying from 4°·6 at Midnapore to 1° in North Bengal, and the latter by amounts varying from 4° in Chota Nagpur to less than half a degree in parts of East Bengal. Mean excess varies from 4° in part of South-West Bengal and Chota Nagpur to 1° in North Bengal.

In Orissa and Chota Nagpur the average excess is 3°·1, in South-West Bengal 2°·5, in Bihar and East Bengal 1°·9, and in North Bengal 1°·6.

Rainfall.—As stated above, there were four occasions on which showers fell in places, on the 1st, 15th, 22nd and 27th. The showers were almost always light, and the total fall for the month was very light, in most parts practically *nil*. After the 1st the districts which received general, though light, rainfall were Saran, Champaran, and Palamau. In all other districts falls were very light and very scattered.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the Province for the month of January 1897:—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.						RAINFALL.

* N. 96, N.E. 24, E. 10, S.E. 0, S. 0, S.W. 0, W. 80, N.W. 96, Calm 30.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore .003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 2.5° lower; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0.6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

* NOTE—The wind directions are for 14 days, as during the remaining period of the month the anemograph was under repair.

J. H. GILLILAND,

METEOROLOGICAL OFFICE, INDIA,
Calcutta, the 8th February 1897.

0.61

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed, open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken respectively from the Munro's anemometer and a dial anemometer by L. Casella.

The mouth of the rain-gauge is one foot above the ground.

—, dew; —, fog; o, overcast; g, gloomy; p, passing temporary showers;
d, drizzling rain; t, thunder; <, lightning; /, strong wind.

NOTE.—The daily movements of the wind are from 8 A.M. to 8 A.M.

NOTE ON THE LATE COTTON CROP IN BENGAL FOR THE YEAR 1896-97.

The following is published for general information.

REV. DEPT., M. FINUCANE,
The 15th February 1897. Secy. to the Govt. of Bengal.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, BENGAL.

Note on the late Cotton Crop in Bengal for the year 1896-97.

Explanatory.—There are two Cotton Crops in these Provinces, viz., the early crop which is sown during the monsoon rains and harvested during the cold weather, and the late crop which is usually sown at the close of the rainy season, and harvested during the hot weather, in May and June. The Report on the early Cotton Crop was published by this Department on the 2nd December 1896. The present Report furnishes estimates of the area and outturn of the late crop.

Character of the season.—The season reviewed in this Note was characterized by general dryness. The monsoon of 1896 ceased early. In October, the usual time for sowing late cotton, the rainfall was in defect in all the late cotton-growing districts. The normal area could not be sown with late cotton, because of want of moisture in the soil. In November, the rainfall was deficient in all districts except Patna, Darbhanga, and Angul. In December the rainfall was above the normal in Bihar and below the normal in all the other late cotton-growing districts. In January, showers fell only in parts of Bihar and in Manbhum.

Area sown.—The total area sown with late cotton this year appears, from the appended statement, to amount to 75,400 acres against 104,800 acres sown in 1895-96, showing a decrease of 28 per cent. in the area sown. There has, no doubt, been a contraction in this area, owing to want of rain at the time of sowing, but the decrease noted above is chiefly due to the low estimate returned for Manbhum.

Character of the crop.—Deficiency of rain is reported to have adversely affected the outturn in all the late cotton-growing districts, except Saran, Champaran, and Angul. Sixteen-anna crops are reported from Champaran and Angul, the crop in the latter district having been greatly benefited by heavy rain in November. A 13-anna crop is reported from Saran, and the outturn would have been better if the crop had not been attacked by blight.

Out of the 15 districts for which estimates have been furnished in this report, two districts, as noted above, return an average crop of 16 annas; three districts, inclusive of Saran, with an area of 40,000 acres, or more than half the area sown, return crops varying from 12 to 13 annas; five districts estimate the crop between 8 and 11 annas; and three districts between 6 and 7 annas. Two districts, viz., Bhagalpur and Puri, report 4-anna crops only.

A comparison of this year's with last year's Returns shows that two districts now return better crops, one district an equal crop and 12 districts worse crops.

The arithmetical mean of the estimates of outturn, calculated with reference to the areas sown, amounts to 11 annas, and this estimate may be put forward as the probable average outturn of the present year's crop. Last year's late cotton crop for the Province was estimated at 12 annas.

N. N. BANERJEE,

*Assistant Director of Land Records and
Agriculture, Bengal.*

COUNTERSIGNED.

W. C. MACPHERSON,

*Director of the Dept. of Land Records and
Agriculture, Bengal.*

CALCUTTA,

The 4th February 1897.

1	2	3	4	5	6	7	8	9
Division.	District.	Approximate normal area under late cotton.	Approximate area sown last year (1895-96).	Acres. If it had not been sown this year (1896-97).	Annas. Taking 10 annas to the acre, how many more would have been sown than present? (1895-96).	Annas. Taking 10 annas to the acre, how many more would have been sown than present? (1896-97).	Remarks by the District Officer.	Remarks by the Department of Land Records and Agriculture, Bangalore.
Patna—consolid.	Champan	1,000	1,050	1,000	14	16	The prospect on the cotton crop, has not been so bright as in the previous years of the year like other crops.	
	Muzaffarpur	9,000	9,500	9,500	3	9	The reduced estimate of output of the present year is due to scanty rain during the last rainy season.	
	Darbhanga	9,800	7,500	7,500	12	10	owing to insufficient rain all this year the output will be less than in the last year. The crop is very uneven in this district, and I can give no opinion as to personal observation. I reproduce the figures reported, they are probably too low.	The Collector has changed the figures in columns 3 and 4, 10, 12, 14 and 16, 18, 20, 22 to 3, 5, 7, 9, 11, 13, 15, 17, 19, 21, 23, 25, 27, 29, 31, 33, 35, 37, 39, 41, 43, 45, 47, 49, 51, 53, 55, 57, 59, 61, 63, 65, 67, 69, 71, 73, 75, 77, 79, 81, 83, 85, 87, 89, 91, 93, 95, 97, 99, 101, 103, 105, 107, 109, 111, 113, 115, 117, 119, 121, 123, 125, 127, 129, 131, 133, 135, 137, 139, 141, 143, 145, 147, 149, 151, 153, 155, 157, 159, 161, 163, 165, 167, 169, 171, 173, 175, 177, 179, 181, 183, 185, 187, 189, 191, 193, 195, 197, 199, 201, 203, 205, 207, 209, 211, 213, 215, 217, 219, 221, 223, 225, 227, 229, 231, 233, 235, 237, 239, 241, 243, 245, 247, 249, 251, 253, 255, 257, 259, 261, 263, 265, 267, 269, 271, 273, 275, 277, 279, 281, 283, 285, 287, 289, 291, 293, 295, 297, 299, 301, 303, 305, 307, 309, 311, 313, 315, 317, 319, 321, 323, 325, 327, 329, 331, 333, 335, 337, 339, 341, 343, 345, 347, 349, 351, 353, 355, 357, 359, 361, 363, 365, 367, 369, 371, 373, 375, 377, 379, 381, 383, 385, 387, 389, 391, 393, 395, 397, 399, 401, 403, 405, 407, 409, 411, 413, 415, 417, 419, 421, 423, 425, 427, 429, 431, 433, 435, 437, 439, 441, 443, 445, 447, 449, 451, 453, 455, 457, 459, 461, 463, 465, 467, 469, 471, 473, 475, 477, 479, 481, 483, 485, 487, 489, 491, 493, 495, 497, 499, 501, 503, 505, 507, 509, 511, 513, 515, 517, 519, 521, 523, 525, 527, 529, 531, 533, 535, 537, 539, 541, 543, 545, 547, 549, 551, 553, 555, 557, 559, 561, 563, 565, 567, 569, 571, 573, 575, 577, 579, 581, 583, 585, 587, 589, 591, 593, 595, 597, 599, 601, 603, 605, 607, 609, 611, 613, 615, 617, 619, 621, 623, 625, 627, 629, 631, 633, 635, 637, 639, 641, 643, 645, 647, 649, 651, 653, 655, 657, 659, 661, 663, 665, 667, 669, 671, 673, 675, 677, 679, 681, 683, 685, 687, 689, 691, 693, 695, 697, 699, 701, 703, 705, 707, 709, 711, 713, 715, 717, 719, 721, 723, 725, 727, 729, 731, 733, 735, 737, 739, 741, 743, 745, 747, 749, 751, 753, 755, 757, 759, 761, 763, 765, 767, 769, 771, 773, 775, 777, 779, 781, 783, 785, 787, 789, 791, 793, 795, 797, 799, 801, 803, 805, 807, 809, 811, 813, 815, 817, 819, 821, 823, 825, 827, 829, 831, 833, 835, 837, 839, 841, 843, 845, 847, 849, 851, 853, 855, 857, 859, 861, 863, 865, 867, 869, 871, 873, 875, 877, 879, 881, 883, 885, 887, 889, 891, 893, 895, 897, 899, 901, 903, 905, 907, 909, 911, 913, 915, 917, 919, 921, 923, 925, 927, 929, 931, 933, 935, 937, 939, 941, 943, 945, 947, 949, 951, 953, 955, 957, 959, 961, 963, 965, 967, 969, 971, 973, 975, 977, 979, 981, 983, 985, 987, 989, 991, 993, 995, 997, 999, 1001, 1003, 1005, 1007, 1009, 1011, 1013, 1015, 1017, 1019, 1021, 1023, 1025, 1027, 1029, 1031, 1033, 1035, 1037, 1039, 1041, 1043, 1045, 1047, 1049, 1051, 1053, 1055, 1057, 1059, 1061, 1063, 1065, 1067, 1069, 1071, 1073, 1075, 1077, 1079, 1081, 1083, 1085, 1087, 2673, 2675, 2677, 2679, 2681, 2683, 2685, 2687, 2689, 2691, 2693, 2695, 2697, 2699, 2701, 2703, 2705, 2707, 2709, 2711, 2713, 2715, 2717, 2719, 2721, 2723, 2725, 2727, 2729, 2731, 2733, 2735, 2737, 2739, 2741, 2743, 2745, 2747, 2749, 2751, 2753, 2755, 2757, 2759, 2761, 2763, 2765, 2767, 2769, 2771, 2773, 2775, 2777, 2779, 2781, 2783, 2785, 2787, 2789, 2791, 2793, 2795, 2797, 2799, 2801, 2803, 2805, 2807, 2809, 2811, 2813, 2815, 2817, 2819, 2821, 2823, 2825, 2827, 2829, 2831, 2833, 2835, 2837, 2839, 2841, 2843, 2845, 2847, 2849, 2851, 2853, 2855, 2857, 2859, 2861, 2863, 2865, 2867, 2869, 2871, 2873, 2875, 2877, 2879, 2881, 2883, 2885, 2887, 2889, 2891, 2893, 2895, 2897, 2899, 2901, 2903, 2905, 2907, 2909, 2911, 2913, 2915, 2917, 2919, 2921, 2923, 2925, 2927, 2929, 2931, 2933, 2935, 2937, 2939, 2941, 2943, 2945, 2947, 2949, 2951, 2953, 2955, 2957, 2959, 2961, 2963, 2965, 2967, 2969, 2971, 2973, 2975, 2977, 2979, 2981, 2983, 2985, 2987, 2989, 2991, 2993, 2995, 2997, 2999, 3001, 3003, 3005, 3007, 3009, 3011, 3013, 3015, 3017, 3019, 3021, 3023, 3025, 3027, 3029, 3031, 3033, 3035, 3037, 3039, 3041, 3043, 3045, 3047, 3049, 3051, 3053, 3055, 3057, 3059, 3061, 3063, 3065, 3067, 3069, 3071, 3073, 3075, 3077, 3079, 3081, 3083, 3085, 3087, 3089, 3091, 3093, 3095, 3097, 3099, 3101, 3103, 3105, 3107, 3109, 3111, 3113, 3115, 3117, 3119, 3121, 3123, 3125, 3127, 3129, 3131, 3133, 3135, 3137, 3139, 3141, 3143, 3145, 3147, 3149, 3151, 3153, 3155, 3157, 3159, 3161, 3163, 3165, 3167, 3169, 3171, 3173, 3175, 3177, 3179, 3181, 3183, 3185, 3187, 3189, 3191, 3193, 3195, 3197, 3199, 3201, 3203, 3205, 3207, 3209, 3211, 3213, 3215, 3217, 3219, 3221, 3223, 3225, 3227, 3229, 3231, 3233, 3235, 3237, 3239, 3241, 3243, 3245, 3247, 3249, 3251, 3253, 3255, 3257, 3259, 3261, 3263, 3265, 3267, 3269, 3271, 3273, 3275, 3277, 3279, 3281, 3283, 3285, 3287, 3289, 3291, 3293, 3295, 3297, 3299, 3301, 3303, 3305, 3307, 3309, 3311, 3313, 3315, 3317, 3319, 3321, 3323, 3325, 3327, 3329, 3331, 3333, 3335, 3337, 3339, 3341, 3343, 3345, 3347, 3349, 3351, 3353, 3355, 3357, 3359, 3361, 3363, 3365, 3367, 3369, 3371, 3373, 3375, 3377, 3379, 3381, 3383, 3385, 3387, 3389, 3391, 3393, 3395, 3397, 3399, 3401, 3403, 3405, 3407, 3409, 3411, 3413, 3415, 3417, 3419, 3421, 3423, 3425, 3427, 3429, 3431, 3433, 3435, 3437, 3439, 3441, 3443, 3445, 3447, 3449, 3451, 3453, 3455, 3457, 3459, 3461, 3463, 3465, 3467, 3469, 3471, 3473, 3475, 3477, 3479, 3481, 3483, 3485, 3487, 3489, 3491, 3493, 3495, 3497, 3499, 3501, 3503, 3505, 3507, 3509, 3511, 3513, 3515, 3517, 3519, 3521, 3523, 3525, 3527, 3529, 3531, 3533, 3535, 3537, 3539, 3541, 3543, 3545, 3547, 3549, 3551, 3553, 3555, 3557, 3559, 3561, 3563, 3565, 3567, 3569, 3571, 3573, 3575, 3577, 3579, 3581, 3583, 3585, 3587, 3589, 3591, 3593, 3595, 3597, 3599, 3601, 3603, 3605, 3607, 3609, 3611, 3613, 3615, 3617, 3619, 3621, 3623, 3625, 3627, 3629, 3631, 3633, 3635, 3637, 3639, 3641, 3643, 3645, 3647, 3649, 3651, 3653, 3655, 3657, 3659, 3661, 3663, 3665, 3667, 3669, 3671, 3673, 3675, 3677, 3679, 3681, 3683, 3685, 3687, 3689, 3691, 3693, 3695, 3697, 3699, 3701, 3703, 3705, 3707, 3709, 3711, 3713, 3715, 3717, 3719, 3721, 3723, 3725, 3727, 3729, 3731, 3733, 3735, 3737, 3739, 3741, 3743, 3745, 3747, 3749, 3751, 3753, 3755, 3757, 3759, 3761, 3763, 3765, 3767, 3769, 3771, 3773, 3775, 3777, 3779, 3781, 3783, 3785, 3787, 3789, 3791, 3793, 3795, 3797, 3799, 3801, 3803, 3805, 3807, 3809, 3811, 3813, 3815, 3817, 3819, 3821, 3823, 3825, 3827, 3829, 3831, 3833, 3835, 3837, 3839, 3841, 3843, 3845, 3847, 3849, 3851, 3853, 3855, 3857, 3859, 3861, 3863, 3865, 3867, 3869, 3871, 3873, 3875, 3877, 3879, 3881, 3883, 3885, 3887, 3889, 3891, 3893, 3895, 3897, 3899, 3901, 3903, 3905, 3907, 3909, 3911, 3913, 3915, 3917, 3919, 3921, 3923, 3925, 3927, 3929, 3931, 3933, 3935, 3937, 3939, 3941, 3943, 3945, 3947, 3949, 3951, 3953, 3955, 3957, 3959, 3961, 3963, 3965, 3967, 3969, 3971, 3973, 3975, 3977, 3979, 3981, 3983, 3985, 3987, 3989, 3991, 3993, 3995, 3997, 3999, 4001, 4003, 4005, 4007, 4009, 4011, 4013, 4015, 4017, 4019, 4021, 4023, 4025, 4027, 4029, 4031, 4033, 4035, 4037, 4039, 4041, 4043, 4045, 4047, 4049, 4051, 4053, 4055, 4057, 4059, 4061, 4063, 4065, 4067, 4069, 4071, 4073, 4075, 4077, 4079, 4081, 4083, 4085, 4087, 40

Orissa	Part	1,500	1,500	800	10	4	Probably the outturn of this year has been under-estimated. The decrease in area is due to want of rain and consequent want of moisture in the soil at the time of sowing. The "normal area" appears to require revision. The outturn is expected to be small, on account of unfavourable weather at time of sowing.
	Balesore ..	500	500	25	14	13	The decrease in area and outturn is due to want of rain.
	Angul and Khondmahal	1,000	1,000	1,500	10	10	The figures in columns 3 and 4 have been corrected. The outturn is estimated at 15 annas, as flats were well irrigated by the heavy rainfall of November, and are doing well.
	Manbhum ..	25,000	25,000	1,500	10	0	The decrease in the area sown, and in the outturn, is due to want of rain.
	Shaphbhum ..	2,500	2,500	2,100	13	64	The decrease in the outturn and in the area sown this year is due to insufficient rainfall.
Orissa Nagpur	Total ..	114,700	104,000	78,400	13	11	
							The Deputy Commissioner's Return showed 12 annas in column 7 but the figure has been changed to 15 annas, with reference to his remarks in column 8.

N.B.—Twenty annas represent a bumper crop, 15 annas, an average crop, 10 annas, three-fourths of an average crop, and so on.

**PRELIMINARY NOTE ON THE WHEAT CROP OF
BENGAL, 1896-97.**

The following is published for general information.

REV. DEPT.,	M. FINUCANE,
<i>The 15th February 1897.</i>	<i>Secretary to the Govt. of Bengal.</i>

**DEPARTMENT OF LAND RECORDS AND AGRI-
CULTURE, BENGAL.**

Preliminary Note on the Wheat Crop of Bengal, 1896-97.

Explanatory.—Returns have been received from all the wheat-growing districts in these Provinces except two, viz., Darjeeling and Hazaribagh. In neither of these two districts is the wheat crop of much importance. The district returns appended hereto refer to the condition of the crop in the latter part of January. The date of each forecast is noted below the district concerned in column 2 of the returns.

The districts of the Patna Division contain a little under one-half, and those of the Bhagalpur Division about a third of the total wheat-growing area in these Provinces, which may be estimated at between a million and-a-quarter and a million and-a-half of acres. The Murshidabad and Rajshahi Districts are the more important wheat-growing districts in Bengal Proper.

2. *Character of the season.*—The monsoon rainfall of 1896 was not only very deficient, but came to an unusually early termination in the latter part of September. The month of October and the first three weeks of November were wholly rainless. The absence of rain during this period and the short rainfall of the previous months reduced the moisture of the soil and interfered with the preparation of land and the sowings of the *rabi* crops generally. Some light showers of rain fell on the 23rd and 24th November in Bihar and Chota Nagpur, but except in Patna, Gaya, Shahabad, Darbhanga, Palamau and Singhbhum, the rainfall was too scanty to do much good to the standing crops. In the latter part of December and the first week of January useful showers fell in all the important wheat-growing districts of Bihar and Chota Nagpur; and between the middle and end of January slight showers fell in parts of Saran, Champaran, and Darbhanga.

3. *Area sown.*—In consequence of the drought which set in at the end of September, the area sown in wheat this year shows a large falling off from that of the previous year. It will be seen from the appended district returns that the total area sown in wheat in these provinces, exclusive of Darjeeling and Hazaribagh, has been estimated at 1,234,500 acres against 1,414,300 acres in 1895-96, thus showing a decrease of 179,800 acres or 12·7 per cent. on the area sown last year. The returns for the last four years give an average area of 1,441,000 acres cultivated with wheat, exclusive of the areas sown in Darjeeling and Hazaribagh. The decrease in this year's area amounts to nearly 14 per cent. on the average for the last four years. The decrease is specially noticeable in Saran, Muzaffarpur, Darbhanga, Murshidabad, Nadia, and Palamau, where it is reported that large areas could not be sown for want of moisture. On the other hand, it is observed that in a few districts, noticeably in Shahabad and Gaya, the present year's area cultivated with wheat is in excess of the previous year's. The increase is ascribed to the failure of the winter rice crop, which induced cultivators to sow wheat in lands where the rice crop had failed.

4. *Estimated outturn.*—According to the prospects of the crop, as they appeared about the end of January, the outturn is expected to be between 10 and 11 annas or two-thirds of the average, or much the same as was obtained last year but over a larger area. The short rainfall of the last monsoon, and the entire absence of rain during October and the greater part of November, account for the poor prospects. The crop was benefited by the rain which fell at the end of December and in January; but this rain was not sufficient to change the crop into a good one. Only one district, viz., Gaya, has returned the crop to be 16 annas; three districts, viz., Saran, Malda and Rangpur report the crop to be between 12 and 16 annas; in ten districts, viz., Shahabad, Patna, Darbhanga, Muzaffarpur, Champaran, Monghyr, Purnoa, Singhbhum, Mymensingh and Faridpur, the outturn is stated to be between 8 and 12 annas; in seven districts, viz., Bhagalpur, Sonthal Parganas, Rajshahi, Pabna, Manbhum, Bankura, Birbhum between 4 and 8 annas; and in Murshidabad, Nadia, Palamau, Lohardaga, Burdwan and Cuttack under 4 annas.

Estimating by Divisions, it may be roughly reckoned that over the reduced area cultivated, the Patna Division will have a 12-anna wheat crop, the Bhagalpur Division a crop not much over 9 annas, and the other Divisions taken together not half an average crop.

B. C. BASU,

*Assistant Director of the Dept. of Land
Records and Agriculture, Bengal.*

COUNTERSIGNED.

W. C. MACPHERSON,

*Director of the Dept. of Land Records and
Agriculture, Bengal.*

CALCUTTA,
The 3rd February 1897.

First Forecast of the Wheat Crop of Bengal, 1896-97.

1	2	3	4	5	6	7	8	9
Division.	District with date of submission of forecast. (Date of forecast noted below the district.)	Approximate normal area under wheat in acres.	Approximate area sown last year (1895-96) in acres.	Estimated area sown this year (1896-97) in acres.	Taking 10 annas to represent the average outturn per acre, how many annas (1895-96) ?	Taking 10 annas to represent the average outturn per acre, how many annas will represent this year's outturn (1896-97) ?	Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
PATNA.	Shahabad 30th January 1897.	Acres. 173,000	Acres. 139,669	Acres. 132,500	Annas. 9½	Annas. 10	The increase in area under wheat as compared with last year is due to the failure of the rice crop, a good deal of the rice area being utilized this year for wheat cultivation.	The reported decrease of area cultivated is very noticeable as compared with the figures returned for other Bihar districts, and is possibly incorrect.
	Gaya 18th January 1897.	157,600	125,700	132,200	8	16	The increase of area in column 5 over that in column 4 is due to the fact that a considerable area of paddy lands which were left fallow for want of sufficient rain at the time of sowing and transplanting was sown with wheat after the rainfall in November. The increase in outturn is due to timely rainfall.	
	Saran 25th January 1897.	147,200	137,400	89,500	8	13	Owing to the absence of sufficient moisture during the month of October, the wheat producing tracts could not be sown. The rainfall in December, however, has improved the prospects; hence the outturn is reported to be better than last year's.	
	Patna 30th January 1897.	122,500	105,600	102,000	10½	11½	The decrease in the area sown this year is owing to the wheat land being sown with oilseeds. The rainfall in December last has improved the prospects, and the outturn will be better than previous year's.	
	Parbhansa 25th January 1897.	110,200	100,400	90,000	8	11	Decrease in area and outturn is due to deficiency of rain. Owing to insufficient rainfall and want of moisture at the time of sowing, the area sown is less than the normal area. The figures I have received are worthless, and I have had to make a very rough guess. The area given is certainly much below the normal in Madhubani, and I do not think the crop will exceed 4 annas, taken on the whole, area usually under wheat. In Samast pur, I believe, it is a 14-anna crop, if not a 16-anna one. Of course I take 16 annas as an average and not a bumper crop.	

Division	District with date of submission. (Date of forecast noted below the district.)	Approximate area sown last year (1896-97) in acres.					Estimated area sown this year (1897-98) in acres.					Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
		1	2	3	4	5	6	7	8	9			
PATNA—contd.	Muzaffarpur 27th January 1897.	70,000	70,000	70,000	70,000	50,000	11	11	For want of sufficient moisture, due to the scanty rainfall during the rainy season the estimated outturn is less than normal.				
	Chamravan 25th January 1897.	47,000	37,500	30,000	10	11	The area is much less than usual owing to the great lack of moisture consequent on the very early cessation of the rains, and the outturn will be less for the same cause and on account of the late sowings.						
	Bhagalpur 18th January 1897.	314,000	192,500	171,100	10	7½	The estimate of normal area has been slightly reduced in consequence of a revision by the Subdivisional Officer of Madhepura. Deficient rainfall and consequent want of moisture account for the decrease in area in column 8 and in outturn in column 9.						
	Monohrr 22nd January 1897.	163,000	103,200	97,500	104	10½	The rainfall being below the normal throughout the monsoon season, a smaller area was cultivated this year.						
	Madia 28th January 1897.	66,500	44,000	47,000	11	12	Insufficient rain in October, November and December has made the sowings below the normal, and the outturn below the average.						
	Purnea 18th January 1897.	24,000	23,500	21,500	12	11	The increase in the area is due to the fact that more lands have been sown in the Araria subdivision with wheat in consequence of the partial failure of winter paddy. There being no rainfall during the sowing season the growth of the plant was retarded, hence the outturn is expected to be 11 annas. But if there is another shower in January a better outturn (16 annas) is expected.						
	Sonhal Parganas 25th January 1897.	14,000	11,700	8,100	9	7	The distribution of rainfall was not favourable, hence the area cultivated is less than that of last year. The outturn will be also less than that of last year.						
	Marshidabad 26th January 1897.	130,000	124,900	92,600	9	5	The first sowing in Pakour was destroyed by caterpillars. The decrease in the area sown as well as in the estimated outturn this year, as compared with the normal and the last year's area and outturn, is due to want of rain.						
	Nadua 16th January 1897.	27,500	17,400	6,000	7	3½	The marked decrease in the area sown and in the estimated outturn is due to the want of winter rainfall during the previous and current seasons.						
	BHAUPUR.												
FARRUKHABAD.													

RAJSHAHY.									
Rajshahi 23rd January 1897.	54,500	76,740	69,400	105	7	The decrease in area sown and in estimated outturn is due to want of moisture and seasonable rain. If there be no rain during the present quarter, the outturn will probably be less than that shown in column 7.			
Bangpur 22nd January 1897.	40,000	32,700	32,700	12	14	Up to date there is nothing to prevent a good outturn; but little importance is attached to the crop in this district, and the soil is not prepared with any care.			
Pabna 16th January 1897.	23,000	15,400	15,400	16	7	Owing to the entire absence of rainfall in the month of December a poor outturn is expected.			
Darjeeling "	8,000	8,100	8	"			Return not received.
CHOTA NAGPUR.									
Palamanu 19th January 1897.	12,000	19,050	4,500	12	5	Owing to the want of rain in proper time, and also to the damage done to the crop by insects, the crop will hardly be a two-anna one.			
Hazaribagh "	4,500	8,000	...	11			Ditto.
Manbhum 21st January 1897.	8,000	8,000	1,600	8	5	The decrease in the area sown and in the outturn is due to the scanty rainfall.			
Singbhum 10th January 1897.	2,800	2,900	1,800	10	9	There has been less area under cultivation for want of sufficient rainfall in time.			
Lohardaga 1st February 1897.	2,500	1,000	500	4	3	The decrease in the area sown and in the outturn this year is due to want of rain and moisture in the soil.			
Mymensingh 18th January 1897.	14,700	10,000	6,000	12	9	Owing to want of seasonable rainfall, a smaller area was brought under cultivation of the crop, and the probable outturn will also be less by a annas than that of previous years.			
Faridpur 23rd January 1897.	2,000	1,800	2,200	10	8	Owing to failure of paddy, the cultivators sowed more land with wheat, hence the increase in area in column 6. The outturn is expected to be very poor, owing to absence of rain during the growing season.			

DIVISION.

STATISTICAL DEPARTMENT,
The 16th February 1897.

STATISTICS OF THE SEA-BORNE TRAFFIC OF CALCUTTA IN FOOD-GRAINS.

No. 390 Statistics.—The following memorandum and statements are published for general information.

STATISTICAL DEPARTMENT,
The 16th February 1897.

M. FINUCANE,
Secy. to the Govt. of Bengal.

Memorandum.

The sea-borne import and export traffic of Calcutta in food-grains during the week ending the 7th February 1896 and 1897 are shown in the following statement:—

		1ST TO 7TH FEBRUARY			
		1896.		1897.	
1		2	3	4	5
		Cwts.	Mds.	Cwts.	Mds.
<i>Imports.</i>					
From Foreign Ports	...	52,603	71,598	246,507	3,35,523
„ Indian „	...				
Total	...	52,603	71,598	246,527	3,35,550
<i>Exports.</i>					
To Foreign Ports	...	78,610	1,07,038	322,400	4,38,822
„ Indian „	...	32,076	43,659	30,063	40,919
Total	...	110,716	1,50,697	352,463	4,79,741

Imports.—The different staples comprising the import traffic are shown in the table below, and the figures for the week are compared with those for the corresponding period last year:—

		1ST TO 7TH FEBRUARY			
		1896.		1897.	
1		2	3	4	5
		Cwts.	Mds.	Cwts.	Mds.
<i>Food-grains.</i>					
Rice	...	29,627	40,325	219,025	2,98,117
Paddy	...	11,653	15,861	17,283	23,524
Wheat
Gram and pulses	...	11,323	15,412	9,780	13,312
Other food-grains, such as jowar, barley, oats, &c.	489	597
Total	...	52,603	71,598	246,527	3,35,550

The importation of rice showed an advance of 639 27 per cent. in comparison with the preceding year. The supplies drawn from Rangoon, Moulaic, and Akyah aggregated 205,315 cwts., against merely 3 cwts. in 1896, while the quantities shipped from Balasore and Chandbali jointly showed a decrease of 15,911 cwts. In the case of paddy also, Rangoon contributed largely, namely 13,408 cwts. As regards gram and pulses, the falling off in the consignments from Chandbali was compensated for by an increase in the shipments from Coconada.

Exports.—In the following statement the total quantity of each kind of food-grains exported by sea during the first week of February 1897 is compared with the figures for 1896 :—

1st to 7th FEBRUARY				
		1896.		1897.
1	2	3	4	5
	Cwts.	Mds.	Cwts.	Mds.
<i>Food-grains.</i>				
Rice	101,331	1,37,923	334,543	4,55,350
Paddy	1,562	2,126	22	30
Wheat	2,238	3,046	529	720
Gram and pulses	5,551	7,556	13,738	18,699
Other food-grains, such as jowar, barley, oats, &c.	34	46	3,631	4,942
Total ...	110,716	1,50,697	352,463	4,79,741

As in the week ending 21st January 1897, so in this week there was a considerable increase in the supplies of rice carried to foreign ports, the total quantity exported being 307,461 cwts., against only 75,999 cwts. in the preceding year. The shipments to Mauritius, Reunion, Aden, Arabia (other than Muskat), Abyssinia, Cape Colony, and the Eastern Coast of Africa amounted altogether to 200,955 cwts. against nil in 1896; while to the United Kingdom and Ceylon there was an increase of 36,565 cwts. and 8,674 cwts. respectively. Gram and pulses also were exported in large quantities to Mauritius, Reunion, and Ceylon.

The chief feature of the trade with Indian ports is an increase of 11,731 cwts. of rice shipped for Bombay, and a complete cessation of exports to the Madras ports.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below.

Statement No. II, showing the Exports of Food-grains from Calcutta to Foreign and Indian Ports during the week ending 7th February 1896 and 1897.

STATISTICS OF THE SEA-BORNE TRAFFIC OF THE MINOR PORTS
IN BENGAL IN FOOD-GRAINS.

No. 391 Statistics.—The following memorandum and statements are published for general information.

M. FINUCANE,
Secy. to the Govt. of Bengal.

STATISTICAL DEPT.,
The 16th February 1897.

MEMORANDUM.

THE comparative statements below give statistics of the import and export trade of the minor ports of Chittagong, Narayanganj, Balasore (including both Balasore and Chandbali), Cuttack and Puri during the week ending 21st January 1897, as compared with the trade of the corresponding period of 1896 :—

	{ 1897	50,081	23,585	73,666	1,00,268

The import trade of Chittagong showed a rise of 3,668 cwts., which is mainly due to the receipts of rice from Burma Ports. The falling off under Balasore is due to the cessation of exports to Mauritius and Oochin, which together were supplied with 44,951 cwts. of rice and 1,050 cwts. of paddy during the 3rd week of January 1896. The export trade of Cuttack and Puri, too, declined by 2,425 and 7,045 cwts., respectively, during the period under report, in consequence of smaller shipments to Foreign Ports.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below:—

Statement showing the quantities of Food-grains imported into Chittageng from each Foreign and Indian Port during the week ending 21st January 1897, as compared with the trade of the corresponding period of 1896.

WEATHER AND CROP REPORT.

For the week ending the 15th February 1897.

Burdwan.—Rainfall at Sadar ·08, Kalna ·13, Katwa nil, Raniganj ·08. Weather cloudy. Slight rain since last night. More rain expected. Paddy being threshed. Sugarcane being pressed. *Rabi* prospects fair except in Raniganj. Fodder and water sufficient. Condition of cattle good. Common rice selling as follows:—

			Srs. c.	Srs. c.	
Sadar	10 0 to 12 0	} per rupee.
Kalna	10 0 to 11 0	
Katwa	10 10 to 10 15	
Raniganj	10 8	

Birbhum.—Rainfall at Sadar ·03, Rampur Hat ·03. Weather cloudy. Sugarcane-pressing continues. Price of rice at Sadar 9½ seers, and at Rampur Hat 10½ seers per rupee.

Bankura.—Rainfall at Bankura ·03, Kotalpur ·02, Indas ·05, Raipur ·05, Khatra ·07, Maliara ·04. Weather generally cloudy. Threshing of paddy completed. Pressing of sugarcane commenced. Fodder and water sufficient at present, except in a few places. Cow-pox reported. Rice selling at Sadar 11½ seers and Vishnupur 11 seers. In the interior the price is between 10 and 11 seers per rupee.

Midnapore.—Rainfall at Sadar ·08, Tamluk ·02, Ghatal ·15. Weather cloudy. Prospect of indigo better. Sugarcane being pressed. *Rabi* crops being collected. Threshing of *aman* still going on. Transplantation of *boro* nearly finished in Pan-kura. Cattle-disease reported from Binpur, Keshpur, and Salbani. Fodder and water sufficient. Common rice selling as follows:—

				Srs.	
Sadar	11	} per rupee.
Contai	12 to 13	
Tamluk	10 to 11	
Ghatal	11 to 12	

Hooghly.—Slight rain to-day (15th) at Sadar; at Sorampore 4 fell, and did good to *rabi* and sugarcane. Common rice sells from 8½ to 10 seers per rupee.

Howrah.—Rainfall at Sadar ·01, Uluberia ·06. Weather cooler with clouds. Prospects of *rabi* crops not good. Pressing of sugarcane going on. Fodder and water sufficient. Common rice sells from 8 to 11 seers per rupee.

24-Parganas.—Rainfall at Sadar 04, Barasat 2·00, Basirhat ·09, Diamond Harbour nil. Weather cloudy. Prospects of standing crops poor. Pulses are being harvested. Lands are under preparation for *aus* and *jute*. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

				Srs. c.	
Sadar	9 to 12 0	} per rupee.
Barasat	9 0	
Basirhat	10 0	
Diamond Harbour	10 10	

Nadia.—Rainfall nil. Prospects of *rabi* crops not good. Harvesting of linseed and *rye* going on. Water-supply generally deficient. Want of fodder in Karimpur, Tehatta, and Alundanda. Isolated cases of cattle-disease in thana Tehatta. Common rice sells from 8 to 10 seers per rupee. Latest price of rice where test-works are open is 9 seers per rupee. Numbers attending test-works are as follows:—

7th February	820
8th "	928
9th "	917
10th "	737
11th "	333
12th "	865
13th "	940

Number of persons who received gratuitous relief at police-stations during the week—men 65, women 296, children 92—total 453. Numbers on relief works on Saturday, 13th February—Sadar subdivision—men 1,207, women 413, children 912—total 2,532; Meherpur subdivision—men 1,110, women 390, children 523—total 2,013; Kushtia subdivision—men 116, women 25, children 27—total 168. Gratuitous relief—men 438, women 1,196, children 238—total 1,872.

Murshidabad.—No rain. Weather seasonable, but cloudy. State of *rabi* crops not good. Indigo and mulberry doing well. Pressing of sugarcane still going on. Fodder sufficient. Common rice sells as follows:—

	Srs.
Sadar	10½
Jaugipur	11
Kandi	10½

Three test-works open.

Jessore.—Weather cloudy and damp for the last few days, with a little rain on the 12th and 14th and a slight shower this morning (15th). Slight rainfall at Sadar, Jhenida, and Bangaon; it drizzled at Narail, but not at Magura. More rain wanted for sowing *till* and for transplantation of *boro* seedlings. Sporadic cases of cattle-disease reported from Bangaon. Fodder and water available. Common rice sells as follows:—

	Srs.
Jessore	9½ to 10
Jhenida	9½
Magura	9½ to 10½
Narail	10
Bangaon	9 to 10

Khulna.—Some rain fallen since Saturday (13th). Weather cool. *Aman*, harvested. Prospects of *boro* fair. Common rice sells as follows:—

	Srs.
Khulna	9 to 11
Bagerhat	12
Satkhira	10

Numbers employed on relief works in Satkhira subdivision—men 129 and children 27—total 156. Gratuitous relief, men 38, women 111, children 67, total 216. Wages calculated at 10 seers per rupee. Relief-works 4. No cattle-disease. Fodder and water sufficient.

Rajshahi.—Rainfall at Nangaon .02; slight drizzle elsewhere. Prospects of standing crops poor for want of rain. Transplantation of *boro* rice going on. Lands being prepared for *bhadoi* rice and jute. Fodder available. Scarcity of drinking-water reported from some places. Common rice selling from 8½ to 11½ seers per rupee. Number of persons employed on relief-works on Saturday, 13th February—men 874, women 6, children 17—total 897. No gratuitous relief. Relief price of rice at relief-work, 9½ seers per rupee.

Dinajpur.—Weather cloudy. Slight rain throughout the district. Cultivation of *bhadoi* is going on. No report of any cattle-disease, nor any complaint for fodder and water. Price of common rice from 9½ to 12 seers per rupee.

Jalpaiguri.—Rainfall .09. Weather cold. Prospects of standing crops favourable. A little rain has greatly benefited the preparation of lands for cultivation of *betri* (early rice). No complaint of fodder and water. Average price of common rice, 8½ seers per rupee.

Darjeeling.—Rainfall at Sadar during the week ending 13th February .03, Kurseong .1, Siliguri .03. Weather seasonable. Hills—Wheat and barley progressing; *tori* and potatoes being harvested. *Tera*—Tobacco and mustard yet on the ground; ploughing for jute, *bhadoi*, and sugarcane going on. Price of coarse rice:—

	Srs.
Hills	7 to 8
Tera	9 to 10

Bhutia, 13 to 18 seers per rupee.

Rangpur.—Rainfall at Sadar .16. Lands being prepared for *aus* and jute. Early *aus* being sown in places. The rain, though drizzling, has done a little good to the standing crops. Prospects fair. Common rice selling at 9 to 10½ seers per rupee. Fodder and water sufficient.

Bogra.—No rain. Weather cloudy. Fodder and water sufficient. Common rice selling at head-quarters 10 seers 2 chitaks per rupee, and in the interior from 8½ to 12 seers.

Fabna.—Weather partially cloudy with a few drops of rain. Condition of crops same as last week. Common rice selling at 8 to 10 seers per rupee. Fodder sufficient.

Dacca.—Rainfall at Mauikganj .04, elsewhere no rain. Weather cloudy. Prospects of standing crops not very favourable for want of rain. Fodder available. No cattle-disease. Price of common rice, 10 to 11½ seers per rupee.

Mymensingh.—Rainfall nil. Weather cloudy. Rain wanted for preparation of land for *aus* paddy. Mustard sells at 12 seers per rupee. Price of rice stationary.

Faridpur.—No rain. Weather cold and cloudy. Prospects as before. Common rice selling at 9 to 11 seers per rupee. Water available, but fodder scanty. Rain badly wanted.

Backergunge.—Rainfall at Sadar 58. Weather close. Prospects of spring crops indifferent. Cattle-disease in some places. Common rice sells from 9½ to 11½ seers per rupee.

Tippera.—No rain. Weather cloudy for the last three days. *Rabi* crops not doing well in Sadar, but in two subdivisions prospects are better. Fodder and water available. Price of rice :—

				Sra.	
Sadar	10 to 11½	} per rupee.
Brahmanbaria	10 to 11½	
Chandpur	10½ to 11	

Noakhali.—No rain. Prospects of *rabi* crops fair. No cattle-disease. Fodder and water available. Price of common rice from 9 to 12 seers per rupee.

Chittagong.—No rain. Weather hot and cloudy. *Rabi* crops suffering for want of rain. Prospects unchanged. Water and fodder sufficient. Rice selling at 8 to 10 seers per rupee.

Patna.—Rainfall at Sadar 40, Barh 66, Bihar 96, Milsa 137, Dinapur 47, Bikram 81. Rain will benefit late sowings, but will injure pulses ripe or being harvested. Hot-weather vegetables and sugarcane being planted. Prospects generally favourable; Fodder and water for cattle sufficient except green fodder in Bihar. Prices stationary: Patna, 10½ seers per rupee. Test-works abandoned. Numbers on gratuitous relief on Saturday, 13th February—men 23, women 36, children 21—total 80.

Gaya.—Rainfall at Sadar 108, Jahanabad 167, Aurangabad 163, Nawada 76. *Rabi* doing well. Price of common rice at Sadar, 9½ seers per rupee.

Shahabad.—Rainfall at Sadar 71, Buxar 86, Sasaram 133, Bhabua 117. *Rabi* slightly damaged by rain. Late sowings, however, benefited. Clear weather very necessary. Prices stationary. Numbers on relief-works in Bhabua on Saturday, 13th February—men 863, women 494, children 315—total 1,177; Gratuitous relief—men 411, women 848, children 664—total 1,923: return incomplete. Sasaram gratuitous relief—men 26, women 18, children 19—total 63; Dehree—men 12, women 2, children 50—total 64. Figures for Chenari not received.

Saran.—Rainfall at Sadar 39, Siwan 38, Gopalganj 35. *Rabi* doing well. Average price of *maka* 9 seers 14 chitaks per rupee. Numbers on relief-works on Saturday, 13th February—Sadar subdivision—men 570, women 830, children 1,270—total 2,670; Gopalganj subdivision—men 1,734, women 2,281, children 1,665—total 5,680; Siwan subdivision—men 1,597, women 2,804, children 1,348—total 5,749; Gratuitous relief—Sadar subdivision—men 1,142, women 4,492, children 1,240—total 6,874; Gopalganj subdivision—men 1,066, women 2,863, children 1,077—total 5,006; Siwan subdivision—men 460, women 1,508, children 350—total 2,318. Chapra town gratuitous relief—men 187, women 676, children 51—total 914. Revilganj town gratuitous relief—men 29, women 91, children 8—total 128. Chapra poor-house 90. Hatwa Raj relief works 3,599; poor-houses 507; doles 264. Manjha poor-houses 41, doles 26. Siwan poor-house 68 (men 15, women 24, children 29).

Champaran.—Rain (Motihari 15, Bettiah 08) very useful. *Rabi* crops doing well. Poppy doing well in Bettiah and parts of Moluhari. Slight fall in prices: common rice 9½ seers, maize 10½ seers. Numbers on relief-works on Saturday, 13th February—men 48,916, women 43,374, children 25,249—total 117,539; gratuitous relief—men 5,613, women 12,431, children 12,129—total 30,173.

Muzaffarpur.—Rainfall 50. Prospects continue fair. Prices are—Burma rice 9½ seers, common rice 9 seers, wheat 8 seers, *maka* 10 seers, barley 12 seers, gram 10½ seers, *rahar* 12 seers. *Maka* and *rahar* fix the relief prices. Numbers on relief-works on Saturday, 13th February—Sadar subdivision—men 5,356, women 1,850, children 1,560—total 8,766; Sitamarhi subdivision—men 817, women 272, children 212—total 1,301; Hajipur subdivision—men 1,796, women 2,042, children 2,122—total 5,960. Gratuitous relief—Average daily for Sadar thana—men 2, women 4, and child 1—total 7; number on Muzaffarpur poor-house on Saturday, 13th—men 27, women 18, children 6—total 51. Gratuitous relief figures for Katra charge not received. Sitamarhi gratuitous relief—men 609, women 734, children 855—total 2,198; Hajipur gratuitous relief—men 26, women 48, children 16—total 90.

Darbhanga.—Rainfall at Sadar ·31, Samastipur ·33, Madhubani ·22. Late sown crops benefited by the rainfall of the week. Peas ripening. Wheat, *ruhar*, and barley attaining maturity. Rice selling at 9 seers per rupee, and *makai* 10 seers. Numbers on relief-works on Saturday, 13th February—Sadar subdivision—men 24,081, women 29,733, children 7,873—total 61,687; Madhubani subdivision—men 32,397, women 23,188, children 11,939—total 67,524; Samastipur subdivision—men 1,549, women 2,355, children 916—total 4,820. Gratuitous relief—Sadar subdivision—men 4,929, women 12,225, children 6,883—total 24,037; Madhubani subdivision—men 10,731, women 29,351, children 17,736—total 57,818; Samastipur subdivision—men 73, women 128, children 52—total 253. Darbhanga Raj—relief works—men 14,929, women 4,990, children 1,796—total 21,715; gratuitous relief—men 2,122, women 5,272, children 3,880—total 11,274.

Monghyr.—Rainfall at Monghyr 72, Begusarai ·09, Jamui ·24. Weather cloudy and rainy during the latter part of the week. Prospects of *rabi* fair. Standing crops doing well. Sugarcane pressing in progress. Cattle-disease still reported from Begusarai. Sufficient fodder and water. Common rice sells as follows:—

				Srs. c.	
Monghyr	9 to 10	0
Begusarai	9	7
Jamui	8 to 10	0
				} per rupee.	

Bhagalpur.—Rainfall at Sadar ·81, Banka ·15, Madhipura ·19, Supaul ·13. Weather getting warmer. The rain has improved the prospects of indigo, and has done some good to barley and wheat. Water and fodder sufficient. Cattle-disease reported from Sadar subdivision. Numbers on test-works on Saturday (13th)—Madhipura—men 877, women 617, children 285—total 1,779; Supaul men 12, women 164, children 157—total 453. Gratuitous relief—Madhipura nil; Supaul—men nil, woman 1, children 10—total 11. Price of common rice at Madhipura 10 seers per rupee. Prices of common rice:—

				Srs. c.	
Sadar	10	12
Banka	11	0
Supaul	11	0
				} per rupee.	

Purnea.—Rainfall at Sadar ·30, Kishanganj ·09, Araria ·02. Harvesting of mustard and tobacco continues. The recent rain has benefited the standing *rabi* crops which are doing well. Cattle-disease reported from Araria and Raniganj thanas. Fodder and water sufficient. Prices of common rice:—

				Srs.	
Sadar	9½	
Kishanganj	10	
Araria	10 to 11	
				} per rupee.	

Malda.—Rainfall at Sadar ·07, Chanchal ·37, Gajol ·15. Weather seasonable. Common rice selling from 8 to 11 seers per rupee. No cattle-disease. Fodder and water sufficient. Drinking-water has become scarce in some places in Shibganj thana.

Sonthal Parganas.—Rainfall at Sadar ·1. Prospects of crops continue unchanged except at Godda, where *rabi* has improved. Fodder and drinking-water still sufficient. Cattle-disease in Rajmahal. Price of common rice 8½ to 11 seers per rupee, and of maize 11½ to 16 seers per rupee.

Cuttack.—Rainfall nil. Weather cloudy and windy. Paddy harvest over. *Rabi* harvest continues. Cattle-disease in Jajpur. Fodder sufficient. Prices of common rice:—

				Srs. c.	
Cuttack	11	13
Jajpur	14	7
Kendrapara	14	7
Banki	15	12
				} per rupee.	

Balasore.—Rainfall at Sadar ·02. More or less rain in the interior. *Sarad* rice being threshed. *Rabi* crops growing well. *Dalua* flourishing in some places and suffering in others. Sugarcane being pressed. Price of rice varies from 12 to 16 seers per rupee in the interior. Rice sells at 12 and 14 seers per rupee at Balasore and Bhadrak respectively. Fodder and water sufficient. Sporadic cases of cattle-pox in some chaklas.

Angul.—No rain, but cloudy. The crop on the ground is *kulthi*, which is being harvested. Condition of people good. Cattle-disease reported from several villages. Fodder sufficient. Price of rice at Sadar 11½ seers, and in the interior 16 seers in Angul and 13½ seers in Khondmals.

Puri.—No rain. *Dalua* and *mug* growing. *Mandia* ripening and being injured in places by insects. Lands being ploughed in places for the next *sarad* and sugarcane crops. Price of common rice stationary. Fodder and grains insufficient in the Ohilka tracts.

Hazaribagh.—Weather cloudy. Occasional rain—at Sadar 1·16, Giridih ·34. Prospects of *rabi* and poppy fair. Rice sells at 8 to 9 seers per rupee. Bazar stocks sufficient. No applicants for relief-works.

Lohardaga.—Rainfall 1·00. Ploughing continues. State of crops good. Rice sells at 9 seers per rupee at Ranchi, and from 8 to 12 seers in the interior. Fodder and water sufficient. Grains in stock sufficient for the present.

Palamanu.—Rainfall 1·51. Weather cloudy. A severe storm on the 11th. Some hail reported from Daltonganj and Ranka thanas. *Khesari*, wheat, barley, gram, *musur*, peas and mustard damaged to some extent; early *mahua* crop and mango much damaged. Prices of rice again risen—78 markots selling at 9 seers and under against 68 in previous week, and 13 over 9 seers and under 10 seers against 17, none at 10 and over. Number on test-relief-work 1,727, and on gratuitous relief 381.

Manbhum.—Rainfall ·31. Weather cloudy. Raining considerably since close of week. Prospects poor generally. Sugarcane, planted in places, benefited by rain. Cattle-disease reported from thanas Burrabazar, Raghunathpur, and Purulia. Fodder and drinking-water sufficient at present, but gradually diminishing. Recent rainfall will have done good. Average price of common rice:—

					Srs.
Sadar	10 }
Gobindpur	9 } per rupee.

Stock of food-grains sufficient at present. Of three test relief-works sanctioned last week, one closed as not properly supervised, and two being conducted under better management on strict task system with about 1,200 workers and 300 dependants. Another test-work opened, but did not attract labourers. 332 persons on regular gratuitous relief and some 300 more on casual gratuitous relief.

Singhbhum.—Rainfall ·34. Prices stationary. Rice plentiful.

General Summary.—Good and general rain fell in Bihar and Chota Nagpur, and showers in North and South-West Bengal. The rain has benefited the standing crops, but has slightly injured the pulses, which are ripe or being harvested. It has also facilitated the ploughing for *aus* (autumn rice) and jute, which is in progress in several districts of Bengal Proper. In Palamanu there was a severe storm with hail on the 11th and some damage to the *rabi* crops is reported. The pressing of sugarcane is going on. In the distressed districts the prices of the food-grains on which the relief wages are based are—Nadia (common rice) 9 seers, Khulna (common rice) 10 seers, Rajshahi (common rice) 9½ seers, Patna (common rice) 10½ seers, Shahabad 10½ seers, Saran (Indian-corn) 9 seers 14 chitaks, Champaran (Indian-corn) 10½ seers, Muzaffarpur (Indian-corn) 10 seers, Darbhanga (common rice) 9 seers and (Indian-corn) 10 seers, Bhagalpur (common rice) 10 seers. These figures show a slight rise in Saran, Muzaffarpur, and Darbhanga, and a slight fall in Champaran.

The numbers on relief-works and in receipt of gratuitous relief on Saturday, the 13th February, were—

Relief works—

Nadia	...	4,713 (men 2,433, women 818, children 1,462).

STATISTICAL DEPARTMENT,
The 12th February 1897.

M. FINUCANE,
Secy. to the Govt. of Bengal.

STATISTICS OF THE FOOD-GRAIN TRAFFIC OF THE LOWER PROVINCES CARRIED BY RAIL.

No. 393 Statistics.—The following memorandum and statements are published for general information.

STATISTICAL DEPARTMENT,
The 16th February 1897.

M. FINUCANE,
Secy. to the Govt. of Bengal.

MEMORANDUM.

THE consolidated provincial statements of rail-borne traffic in food-grains for the month of November 1896, as compared with the figures for 1895, are published below, with a brief review of the salient points.

The following statement compares the total quantity of food-grains carried by rail to and from these provinces during the month of November 1895 and 1896 :—

Food-grains.	Imports.		Exports.	
	1895.	1896.	1895.	1896.
	Mds.	Mds.	Mds.	Mds.
Rice	4,92,277	4,23,016	5,79,151	6,04,976
Paddy	83,300	2,14,171	84,516	2,39,858
Wheat	2,44,863	70,138	1,21,226	62,967
Gram and pulses ...	3,06,231	1,95,398	2,76,344	5,68,769
Other food-grains ...	2,62,129	2,44,787	3,81,318	5,60,572
Total	13,88,800	11,46,510	14,38,655	20,16,522

The import trade fell off by 17·44 per cent., but the exports rose considerably, viz., by 40·17 per cent. Compared with 1896, the total rice traffic during the month shows a decrease of 70,261 maunds under imports and an advance of 31,225 maunds under exports. The month of November is not a fair representative month for the rice trade, which is most brisk during the early spring, and is large during all the months from January to September, but the greater activity of the trade shown during this month is attributable to the increased demand that occurred after the premature cessation of the rains. In the case of paddy, the import trade showed an advance of 1,30,871 maunds, and the export trade of 15,53,342 maunds. As regards wheat, there has been a falling off, namely, 1,74,725 maunds under imports and 68,269 maunds under exports. The importation of gram and pulses declined by 1,10,833 maunds, while the exports rose by 2,92,415 maunds. Concerning miscellaneous food-grains, the figures under imports remained nearly the same as in the preceding year, but the export trade showed a large increase of 1,67,254 maunds.

The total trade of the districts in each division is illustrated in the following statement :—

NAME OF DIVISION.	Rice.		Paddy.		Wheat.		Gram and pulses.		Other food-grains.		Total.	
	Import.	Export.	Import.	Export.	Import.	Export.	Import.	Export.	Import.	Export.	Import.	Export.

The total quantity of these grains imported into, and exported from, the Lower Provinces, from and to other parts of India, is shown below:—

Food-grains.	Imports into Bengal from other Provinces in India.		Exports from Bengal to other Provinces in India.	
	1895. Mds.	1896. Mds.	1895. Mds.	1896. Mds.
Rice	3,268	17,142	84,142	1,99,502
Paddy	91	427	1,307	26,114
Wheat	1,65,461	30,125	41,824	12,944
Gram and pulses	85,278	8,010	55,391	3,81,971
Other food-grains	4,298	10,060	1,25,478	3,15,845
Total	2,58,376	66,364	3,08,142	9,36,376

The quantities received into Bengal showed a decline of 74·31 per cent., while the despatches from the Bengal districts increased more than three times in comparison with the preceding year. By far the largest quantity, aggregating 8,57,352 maunds against 2,80,835 maunds in 1895, was consigned to the North-Western Provinces and Oudh alone, as the following statement will show :—

ARTICLES.	EXPORTS TO THE NORTH-WESTERN PROVINCES AND OUDH			TOTAL.
	From Bengal Proper.	From Bihar.		
		Patna Division.	Rhagalpur Division	
1	2	3	4	5
	Mds.	Mds.	Mds.	Mds.

... { 1896 ...	31,075	95,004	1,75,608	3,01,687
Total .. { 1895 ...	27,144	97,161	1,56,530	2,80,835
... { 1896 ...	2,28,530	2,63,541	3,65,254	8,57,325

The Panjab drew a large quantity of gram and pulses and miscellaneous food-grains, namely, 21,305 maunds and 13,465 maunds, respectively, chiefly from Calcutta, Monghyr, Southal Parganas, and Patna, while a large supply of rice, amounting to 26,519 maunds, against 3,307 maunds in 1895, was shipped for Assam chiefly from Calcutta.

The internal traffic of the Lower Provinces will be considered separately, first, as regards the inter-district trade of Bengal; secondly, with regard to the trade of the Bengal districts with Bihar; and lastly, the circulation of food-grains within the Bihar Province.

The following statement shows the total inter-district food-grain traffic of Bengal Proper, as distinguished from Bihar, during 1896, as compared with the figures for the corresponding period of 1895 :—

	1895.	1896.
Food-grains—	Mds.	Mds.
Rice	2,21,335	2,48,562
Paddy	28,724	1,14,178
Wheat	11,659	5,044
Gram and pulses	68,995	1,17,719
Miscellaneous food-grains	22,576	47,329
Total	3,53,289	5,32,832

The principal importing and exporting districts in connection with the above trade during 1896 will be seen from the table below—

The falling off in the imports into Bengal from Bihar amounted to 1,41,485 maunds, or 53.79 per cent., but the exports to that Province from Bengal advanced by 60,657 maunds, or 606.69 per cent., owing chiefly to larger despatches of rice, paddy, and gram and pulses.

The following abstract shows the local trade of Bihar in food-grains during the month of November 1895 and 1896 :—

ARTICLES.	LOCAL TRADE OF THE BIHAR PROVINCE.				TOTAL.
	Exports from the Bhagalpur Division.		Exports from the Patna Division		
	Inter- district or local trade of the Division.	To Patna Division.	Inter- district or local trade of the Division.	To Bhagal- pur Division.

... { 1896 ...	12,054	1,52,746	1,37,875	4,542	3,07,217

The foregoing figures show that the trade was slack in both Divisions in the Bihar Province.

Detailed statements showing the sources of supply and the places of destination are given below.

Statement showing the quantities of food-grains imported into and exported from each district in the Lower Provinces of Bengal carried by rail during the month of November 1896, as compared with the figures for the corresponding period of 1895.

The mean pressure of the seven days	Inches.
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29.961
The total number of hours of bright sunshine	Hours, 46.9
The maximum possible number of hours of sunshine	78.9
The mean temperature of the seven days	74.3
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	71.4
The extreme variation of temperature	23.6
The maximum temperature	86.5
The highest velocity of the wind in one hour	Miles, ?
The mean relative humidity	73
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	70
The total fall of rain from 7th to 13th February 1897	Inches, 0.03
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0.38
The total fall from 1st January to 13th February 1897	1.46
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0.99

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed, open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph and Munro's anemometer and a dial anemometer by L. Casella.

The mouth of the rain-gauge is one foot above the ground.

o, overcast;  dew; d, drizzling rain.

NOTE.—The daily movements of the wind from 7th to 10th are from 8 A.M. to 8 A.M.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,

Calcutta, the 15th February 1897.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Indian Councils Acts, 1861 and 1892.

THE Council met at the Council Chamber on Saturday, the 13th February, 1897.

Present:

The Hon'ble SIR ALEXANDER MACKENZIE, K.C.S.I., Lieutenant-Governor of Bengal, *presiding*.

The Hon'ble SIR CHARLES PAUL, K.C.I.E., Advocate-General of Bengal.

The Hon'ble H. H. RISLEY, C.I.E.

The Hon'ble RAI DURGA GATI BANERJEE, BAHADUR, C.I.E.

The Hon'ble NAWAB SYUD AMEER HOSSEIN, C.I.E.

The Hon'ble C. E. BUCKLAND, C.I.E.

The Hon'ble M. FINUCANE.

The Hon'ble C. W. BOLTON.

The Hon'ble W. H. GRIMLEY.

The Hon'ble J. G. H. GLASS, C.I.E.

The Hon'ble C. A. WILKINS.

The Hon'ble SURENDRANATH BANERJEE.

The Hon'ble A. M. BOSE.

The Hon'ble RAI ESHAN CHUNDRA MITTRA, BAHADUR.

The Hon'ble GURU PROSHAD SEN.

The Hon'ble M. S. DAS.

The Hon'ble SAHIBZADA MAHOMED BAKHTYAR SHAH.

FORCIBLE REMOVAL OF SMALL-POX PATIENTS TO HOSPITAL.

The Hon'ble BABU GURU PROSHAD SEN asked—

Has the attention of Government been drawn to an article in the *Statesman* newspaper, published in its issue of the 17th January, regarding certain cases of forcible removal of patients suffering from small-pox in the town of Howrah from their houses to the General Hospital, by order of the authorities, notwithstanding that the relatives offered to isolate them in their own houses and to arrange for their treatment?

Will it please Government to rule that in such cases, forcible removal, specially of females and children, is not necessary; and even if in any case the isolation being impracticable in their own houses, the removal of the patients to isolation hospitals comes to be necessary, the relations, if they are willing to attend on the patients, and to remain isolated, shall be allowed to do so?

The Hon'ble MR. RISLEY replied:—

“The facts referred to in the first part of the question are, it is believed, now under judicial enquiry. The Lieutenant-Governor is not prepared to lay down any general rules on the subject of the isolation of persons suffering from small-pox. It is for the responsible medical officer to decide in each case whether the removal of a patient to hospital is desirable in the interests of the public, and to use his influence to bring about such removal, while it is for the Superintendent of the hospital to determine whether relatives can be allowed to attend on such patients. Where the outbreak is severe and the hospital is crowded, such an arrangement would obviously be impossible.”

SALE OF ESTATES FOR ARREARS OF REVENUE.

The Hon'ble BABU GURU PROSHAD SEN asked—

To ensure the sale of the estates for arrears of Government revenue at adequate prices, will the Government be pleased to order that all sales for arrears of Government revenue take place on certain fixed days in each quarter, say 15th March for all arrears unpaid on the 12th January, and all arrears of previous *kists*, the sales for which could not be arranged at an earlier quarter sale day; 30th May for all arrears unpaid on the 28th March and previous *kists* when necessary; 15th August for all arrears unpaid on the 7th June, and 30th November for arrears unpaid on the 28th September or on any other date which the Board of Revenue may fix either for all districts, or district by district, in consultation with the local authorities, instead of, as now, leaving the dates to be fixed by the Collector, or his ministerial officer, according to the convenience of the office? Is the Government aware that such a rule in the case of sales for execution of decrees of Civil Courts brings in Court a large number of intending purchasers on the fixed sale days, and results in the properties being sold at their adequate prices?

The Hon'ble MR. FINUCANE replied:—

“A proposal similar to that now made by the Hon'ble Member was submitted to the Board of Revenue by the Bihar Landholders' Association, and was fully considered by them. The Board, for the reasons stated in their letter No. 703A, dated the 14th March, 1896, a copy of which is laid upon the table, were unable to accept the proposal. The Government agree with the Board.”

No. 703A, dated Calcutta, the 14th May, 1896.

From—F. A. SLACK, Esq., Offg. Secretary to the Board of Revenue, L. P.,
To—The Secretary, Bihar Landholders' Association.

IN continuation of the Board's letter No. 1244A, dated the 6th of September, 1895, regarding the dates for holding sales under the Revenue Sale Law and the Certificate Procedure, I am now directed to communicate the following observations with reference to your letter of the 23rd of August, 1895, in which it is suggested (1) that the rule of having sales on a certain day in a month may be advantageously adopted with regard to sales under the Certificate Act, and that the 15th of each month be fixed as the date, the hour being one later or earlier than that fixed for the Civil Court sales, where such happen on the 15th; and (2) that revenue sales should take place on a certain date in each quarter to be known by the people beforehand, and that certain dates proposed by the Association may be fixed for such sales.

2. With regard to the first point, I am to say—

- (a) that the matter had already attracted the notice of the Board by whom was issued clause VI of rule 1, Section IV, page 26, of the Certificate Procedure Manual of 1895, a copy of which is herewith enclosed;
- (b) that the Board have reason to believe that these instructions are followed in most districts, and that the attention of the Divisional Commissioners will again be drawn to the subject with a view of introducing the procedure where such has not already been done; and
- (c) that, bearing in mind the variations in the requirements of the different districts, the date or dates on which such sales should be held monthly is a matter which must be left to the discretion of the Collector concerned to settle.

3. Referring to the second point, concerning the dates of sales for arrears of revenue, I am to state that, in order to go through the whole of the necessary procedure, much more time is requisite than the Association appear to think, and that, in order to provide for all chances of illness among, and delay on the part of, the establishment, a long term would have to be fixed, which would be inconvenient. If this were not done, there would be great risk of occasional, possibly frequent, failures on the part of the Collector's establishment to have the requisite arrangements completed by the day appointed for the sale. This would render postponements of three months necessary, and the public interests would thereby suffer. Further, it would not be convenient that sales of estates under section 14 of Act XI of 1859, for the defaults of shares, should be put off for so long as three months, as they would probably have to be if certain days were fixed, on which alone sales could take place. I am also to add that experience shows both that the attendance at revenue sales is good, and that the dates are well known beforehand. The Board therefore do not find themselves in a position to concur with the Association's proposal.

No. 704A.

COPY forwarded to all Commissioners for information, and for communication to the District Officers under them, for their information and guidance.

By order of the Board of Revenue, L.P.,

F. A. SLACK,

Offg. Secretary.

CALCUTTA;
The 14th May, 1896. }

ROAD-CESS PAPERS.

The Hon'ble BABU GURU PROSHAD SEN asked—

With the same object in view, will the Government be pleased, by an executive order, to rule that road-cess papers, showing the annual value of estates advertised for sale, form a part of the sale Records, and a return from Registration office, showing the incumbrances on the shares of estates to be sold, in cases of sales of shares under section 13 of the Revenue Sale Law, it being made one of the conditions of sales that they are nowise to be affected by the incorrectness of these returns?

The Hon'ble MR. FINUCANE replied:—

“In the opinion of Government it is not desirable to make the rule suggested. Any person intending to buy has ample time beforehand to make his own enquiries, and if the validity of the sale is not to be affected by the incorrectness of the returns alluded to, then such returns would be of no practical value.”

REDEMPTION OF ESTATES.

The Hon'ble BABU GURU PROSHAD SEN asked—

Will the Government be pleased to state what is the number of estates that had to be redeemed under section 10 of the Estates Partition Act [Act VIII (B.C.) of 1876]? What amount has been received by Government on account of these redemptions? Whether this amount has not been kept separate from the ordinary revenue; whether it has been invested; and whether the yearly income from the investment is not more than the annual land revenue which Government has lost?

The Hon'ble MR. FINUCANE replied:—

“It would seem that the section referred to by the Hon'ble Member is 11 and not 10. In the Annual Land Revenue Administration Report of the Board of Revenue, a publication that can be bought by the public, the number of estates redeemed up to date, the Government revenue on the same, and the price realized, are given. The figures up to the end of 1895-96 are given on page 13 of the Land Revenue Administration Report for that year, and are as follows:—

Number of estates	2,620
				Rs.
Government revenue	1,312
Price realized	37,329

“The amount realised is not kept separate from the ordinary revenue and is not invested.”

MOTI LAL'S CASE.

The Hon'ble BABU GURU PROSHAD SEN asked—

Has the attention of Government been drawn to an article in the *Amrita Bazar Patrika* newspaper, headed “The case of Moti Lal,” published in the issue of that newspaper dated the 9th January, 1897? Will the Government be pleased to order an enquiry into the truth or otherwise of the statements contained in a memorial of Moti Lal, said to have been submitted by him to Government, about the conduct and proceedings of Mr. Lyall, the Subdivisional Officer of Siwan, in connection with this case?

The Hon'ble MR. BOLTON replied:—

“The attention of the Government has been drawn to the article referred to, and an enquiry has been made. The allegations made against the Subdivisional Officer in the Memorial submitted to Government by Moti Lal appear to be for the most part without foundation, but as charges are still pending against the Memorialist for fraud in connection with stamps, the Lieutenant-Governor will not for the present pass orders on his petition.”

ALLEGATIONS AGAINST THE COMMISSIONER OF BURDWAN.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

(a) Whether the attention of the Government has been called to the letter

To—His Honour the Lieutenant-Governor of Bengal.

May it please Your Honour,—I beg most respectfully to tender resignation, under section 27A (1) of the Municipal Act, of my post of Chairman of the Kalna Municipality on account of the unnecessarily harsh and insulting manner with which the Commissioner of the Burdwan Division, Mr. C. E. Buckland, C.I.E., was pleased to treat me during his inspection of the Municipality on the 6th January, 1897.

I have the honour to be, Your Honour's most obedient servant, Suriya Narayan Sarbadhikari, Chairman of the Kalna Municipality.

quoted in the margin which has been reproduced in several newspapers, and whether having regard to the allegations made therein, the Government will be pleased to make an enquiry and state the facts of the case? If the Government has already enquired into the case and passed orders, will the Government be pleased to communicate to the Council

the result of the enquiry and the orders passed?

(b) Is it the case that the Municipal Commissioners of Kalna, at a meeting held on the 12th January last, recorded a Resolution expressing their deep regret at the resignation of their Chairman, Babu Suriya Narayan Sarbadhikari, “especially,” to quote the words of the Resolution, “as the resignation is due only to the harsh and insulting treatment received at the hands of the Divisional Commissioner during his inspection of the Municipal Office,” and that at that meeting they further recorded a Resolution that the “Commissioners as a body felt it a deep humiliation at the improper treatment of their Chairman by the Divisional Commissioner”? Has the Government received a copy of this Resolution which by the terms of the Resolution of the Commissioners was to have been forwarded to the Local Government through the proper channel? If so, will the Government be pleased to state what action has been taken upon it?

The Hon'ble MR. RISLEY replied:—

“The papers of the case are laid upon the table. The Commissioner of Burdwan absolutely denies having treated the Chairman of the Kalna Municipality in an ‘unnecessarily harsh and insulting manner,’ and the Magistrate of Burdwan, who was present during the inspection, did not observe anything which could be so construed. In his letter of the 2nd February, Mr. Buckland expresses his regret that his criticisms on the municipal administration should have been regarded by the Chairman as unduly severe, and gives an assurance that nothing personal was intended. It was clearly the Commissioner's duty to point out any shortcomings in the municipal administration. This being so, the Lieutenant-Governor will await a further communication from the Chairman before accepting his resignation.”

No. 105M, dated Chinsura, the 2nd February, 1897.

From—C. E. BUCKLAND, Esq., C.I.E., Offg. Commissioner of the Burdwan Division,
To—The Secretary to the Government of Bengal, Municipal Department.

I HAVE the honour to forward, for the orders of Government, a copy of a letter, No. 449M, dated 25th—26th January, 1897, from the Magistrate of Burdwan, enclosing a communication from the Chairman of the Kalna Municipality, resigning his appointment as Chairman.

2. I absolutely deny that I treated the Chairman in an "unnecessarily harsh and insulting manner." It was my duty, in the course of my inspection, to point out plainly that the collections were bad and that the arrear balances were high; also that the arrangements made by the Municipality for preserving the purity of the water-supply of the town were altogether insufficient. A copy of my inspection note, dated the 6th January, 1897, is enclosed. I regret that my criticisms on the municipal administration in these matters should have been regarded as they have been by the Chairman, and I am willing to assure him that nothing personal was intended. He gave me at the time no reason whatever to suppose that his feelings were wounded, either at the office or in our walk through the town.

3. It will be observed that the Magistrate of Burdwan, who was with me on the occasion, saw nothing in my remarks to justify the construction put upon them by the Chairman.

4. I beg to recommend that the Chairman's resignation be accepted.

No. 449M, dated Burdwan, the 25th—26th January, 1897.

From—W. DUNBAR BLYTH, Esq., Magistrate of Burdwan,
To—The Commissioner of the Burdwan Division.

I HAVE the honour to forward a copy of letter No. 186 of the 13th instant, from the Chairman of the Kalna Municipality, together with a copy of the minutes of a meeting of the Commissioners held on the 12th idem, together with the resignation (in original) submitted by Babu Surya Narayan Sarvadhikari of his appointment as Chairman of that Municipality.

2. I heard you finding faults with the arrears in collections, and also with the absence of arrangements for preserving from pollution those tanks which had been nominally set aside for the supply of drinking water for the town, but I did not observe anything which could be construed into treating the Chairman "in a harsh and insulting manner."

Inspection Report on the Kalna Municipality.

VISITED the Kalna Municipality. Babu Surya Narayan Sarvadhikari Chairman. He is also a medical practitioner. The drainage scheme of part of the town has been once submitted to the Sanitary Engineer, and returned by him for an opinion as to the area to be drained: it will now be resubmitted very shortly: no estimate has yet been prepared. I am afraid that the Municipality is bent on too ambitious a scheme. The municipal income is about Rs. 8,000 (excluding latrine fees), so that it seems out of the question to go in for a drainage scheme costing a large sum. A much simpler scheme for letting off by culverts under roads all the water that collects on the higher land is all that is required. As to the burning ghâts, I am glad to say that the matter has been settled, as both the burning ghâts (1) for the fair-weather, (2) for the monsoon, are now to be regulated under section 259. The other points noticed by Mr. Bourdillon in June, 1895, have been receiving attention.

I looked into the collections under the head "Tax on persons and for latrine fees." A statement of the collections, demands and arrears is attached. It is evident that the collections are not good and that the arrears are too high. Much greater attention must be paid to collecting properly. As to water-supply, I am told that there are five tanks set apart for drinking water, named:—

Baruipara	(Municipal.)
Kassaripara	(Ditto)
Samajdighi	(Burdwan Raj.)
Laldighi	(Ditto.)
Mandopakhur	(Benode Lal Sen's.)

These five tanks are not watched by chaukidars. No prosecutions are ever instituted for soiling these tanks. It seems to me that the administration of the water-supply is very lax, and the Municipality should do much more to preserve the purity of the water. It is all nonsense to tell me that the order of the Municipality that certain tanks are to be preserved for drinking water is never disobeyed. I saw some of these tanks. The Laldighi looked fairly good. The Baruipara tank is very bad. The Samajdighi is very large. There was much dirt of animals on the bank. In fact there is no real attempt made to keep the water clear. A chaukidar should be appointed for each tank to enforce the notice prohibiting bathing, washing, &c., and to keep animals off the bank. The tanks should also be fenced.

There are 248 tanks in all, of which 46 are classed as wholesome and 202 as unwholesome. I see nothing to prevent anybody in the municipality from drinking from any of these sources of supply if they choose to do so.

There are two sets of public latrines, and a third has been sanctioned. They are cleared by sweepers, and the night-soil removed in carts. The trenching ground is $1\frac{1}{2}$ mile off. There are 16 sweepers in the town altogether. The town was as clean as any I have seen. I spoke also to the Chairman of the importance of preventing the pukka drains from being built over by encroachments. No permanent structure over the drains should be allowed, and all in existence should be removed by due process. If such little "bridges" are allowed, it becomes impossible to clear the drains properly.

KALNA;
The 6th January, 1897.

C. E. BUCKLAND,
Officiating Commissioner.

Abstract statement showing demand, collection, remission, and outstanding balance of tax upon persons and latrine fees levied within the Kalna Municipality, during the first three quarters of 1896-97.

PARTICULARS.	DEMAND.				Total collections during first three quarters of 1896-97, as per quarterly statement.	Total remissions granted during first three quarters of 1896-97.	Outstanding balance on close of 31st December, 1896.	REMARKS.
	1st quarter of 1896-97.	2nd quarter of 1896-97.	3rd quarter of 1896-97.	Total of last three quarters of 1896-97.

S. N. SARVADHIKARI,
Chairman.

KALNA MUNICIPAL OFFICE;
The 6th January, 1897.

No. 114M, dated Chinsura, the 6th February, 1897.

From—C. E. BUCKLAND, Esq., C.I.E., Offg. Commissioner of the Burdwan Division,
To—The Secretary to the Government of Bengal, Municipal Department.

WITH reference to your letter No. 615M, dated 5th February, 1897, calling for certain papers connected with the resignation tendered by Babu Surjya Narain Sarbadhikari of his office as Chairman of the Kalna Municipality, I have the honour to submit herewith the papers in question, and to express my regret that, contrary to my express orders, my office should have omitted to forward them with my letter No. 105M of the 2nd instant.

No. 186, dated Kalna, the 13th January, 1897.

From—BABU SURJYA NARAIN SARBADHIKARI, Chairman of the Kalna Municipality,
To—The Magistrate of Burdwan.

IN pursuance of the provisions of section 27A (1) of the amended Bengal Municipal Act, I have the honour to forward herewith an application of my resignation from the office of Chairman of the Kalna Municipality, and to request that you will be kind enough to forward the same to the Local Government for acceptance. A copy of the minutes of the proceedings of the Municipal Commissioners, passed at a special meeting held on the 12th instant, is herewith enclosed. As the Municipal Commissioners have expressed their willingness in that meeting that a copy of their proceedings recorded therein should accompany my application of resignation to Government, I beg to solicit, on behalf of the Municipal Commissioners, that you will be so kind as to forward the enclosed copy of the minutes of the proceedings of the said meeting, along with my application of resignation, to the Local Government.

A special meeting of the Commissioners of the Kalna Municipality was held on 12th January, 1897.

PRESENT:

Babu Mohendra Nath Singh	...	Vice-Chairman.
„ Aghore Nath Chatterjee	...	} Members.
„ Ram Lal Mukerjee	...	
„ Madhab Chand Mehera	...	
„ Bidhu Bhusan Mukerjee	...	
„ Bunwari Lal Biswas	...	
„ Nilmoni Mukerjee	...	
„ Taradhono Bhattacharjee	...	
„ Durga Churn Ganguly	...	
Sheik Babulla	...	

1. The Vice-Chairman presided in the absence of the Chairman.
2. This meeting has been convened at the request of the Chairman, Babu Surjya Narain Sarbadhikari, to forward his letter of resignation of his office of Chairman of the Kalna Municipality.
3. Read his resignation letter addressed to His Honour the Lieutenant-Governor of Bengal.
4. The Commissioners deeply regret at the resignation of Babu Surjya Narain Sarbadhikari who has been serving this Municipality as its worthy Chairman for a good many years with ability, honesty, efficiency, and devotedness to the satisfaction of the public as well as of the superior authorities, especially as the resignation is due only to the harsh and insulting treatment received at the hands of the Divisional Commissioner, Mr. C. E. Buckland, C.S., C.I.E., during his inspection of the Municipal Office on the 6th January last.
5. The Commissioners as a body feel it a deep humiliation at the improper treatment to their Chairman by the Divisional Commissioner.
6. Resolved that a copy of the proceedings of this meeting be annexed to the Chairman's letter of resignation, and that they be sent to the District Magistrate for forwarding them to the Local Government through proper channel.

MOHENDRA NATH SINGH,
Vice-Chairman, Presiding.

RAM LAL MUKERJEE.
BUNWARI LAL BISWAS.
BIDHU BHUSAN MUKERJEE.
TARADHONO BHATTACHARJEE.
DURGA CHURN GANGULY.
AGHORE NATH CHATTERJEE.
SHEIK BABULLA (in Bengali).
NILMONI MUKERJEE.
MADHAB CHAND MEHERA (in Bengali).

Dated Ka'na, the 10th January, 1897.

From—SURJYA NARAIN SARBADHIKARI, Chairman of the Kalna Municipality,
To—His Honour the Lieutenant-Governor of Bengal.

MAY IT PLEASE YOUR HONOUR—

I beg most respectfully to tender resignation of my post of Chairman of the Kalna Municipality on account of the unnecessarily harsh and insulting manner with which the Commissioner of the Burdwan Division, Mr. C. E. Buckland, C.S., C.I.E., was pleased to treat me during his inspection of the Municipality on the 6th January, 1897.

MURRAY TRUST BILL.

The Hon'ble MR. FINUCANE presented the Report of the Select Committee on the Bill to enlarge the scope of the Charitable Trust created by the Will of the late Mrs. Sally Murray, and moved that the Report be taken into consideration. He said:—

“The Select Committee met and their report was in circulation and had been in the hands of Hon'ble Members for some time. The Committee had no changes to propose in the Bill, and, as I believe there can be no objection to its provisions, I now move that the Report be taken into consideration.”

The Motion was put and agreed to.

The Hon'ble MR. FINUCANE also moved that the Bill be passed.

The Motion was put and agreed to.

PUBLIC DEMANDS RECOVERY ACT, 1895, AMENDMENT BILL.

The Hon'ble Mr. FINUCANE also presented the Report of the Select Committee on the Bill to amend the Public Demands Recovery Act, 1895. He said :—

“The Select Committee met on numerous occasions and carefully considered the provisions of the Bill. Their Report has only just been circulated, and it is proposed at the next meeting to take the clauses of the Bill into consideration, and I hope that on that occasion the Bill will also be passed.”

CHUTIA NAGPUR TENANCY BILL.

The Hon'ble Mr. Grimley moved that the Bill to regulate the enhancement of rents, the commutation of predial conditions or services, and the registration and resumption of intermediate tenures, in parts of Chutia Nagpur be referred to a Select Committee consisting of the Hon'ble Sir Charles Paul, the Hon'ble Mr. Risley, the Hon'ble Mr. Finucane, the Hon'ble Mr. Wilkins, the Hon'ble Mr. A. M. Bose, the Hon'ble Rai Pshan Chundra Mittra Bahadur, the Hon'ble Mr. M. S. Das and the Mover. He said :—

“I have already given a brief sketch of the land-question in Chota Nagpur from the earliest time when the Kols cleared the jungle and became the first cultivators of the soil down to the year 1887, and with your permission, Sir, I will now resume the story. In that year the Mundas and Uraons, who had been most persistent in memorialising Government, began to withhold payment of rents, asserting the existence of a decree which had been granted by the Home Government, but suppressed by the authorities in India, to the effect that they were the maliks of the soil and in no way bound to pay rent through any intervenor, but direct to Government. This movement seems to have been made by members of the German Lutheran Church, who at the same time presented a petition to the heads of that Mission requesting their assistance in support of their claims. When the Missionaries declared their inability to support them, they took umbrage and threatened to sever their connection with the Mission, and began to abuse the Missionaries, and went so far as to accuse them of having, in collusion with the authorities, stolen and secreted the decree. The ringleaders of the movement then proceeded to call meetings in order to induce the people to secede from the Church, to collect subscriptions, and to excite them to take possession of the majhihas land.

“The agitation gave much anxiety to the local authorities, but was eventually checked and kept under until the beginning of the cold season of 1889, when the unsettled relations between the Kols and their landlords again began to attract attention. This time, however, the excitement arose out of the action of Roman Catholic converts, who were reported to be moving about the district in large bands and compelling people to become Christians by cutting off their *chundi* or topknot of hair, as well as by threats of damage to their crops. The rapidity with which the so-called conversion of vast multitudes was effected caused much alarm in the minds of the zamindars, who began to fear for their crops as the harvest season was at hand, and some disturbances took place, and the aid of the Military Police had to be called in and various other repressive measures were resorted to. An enquiry was made into the cause of the agitation, and the conclusion arrived at by Government was that the spirit of antagonism between the landlords and raiyats was so strong and deep-rooted, and so generally diffused throughout the district, that there was no prospect of the parties arriving by themselves at any amicable settlement. The fault of the zamindars was that of the Dutch—in giving too little and asking too much—while the raiyats in some parts were even worse, ignoring the zamindars, refusing to pay rent, declining to cultivate the majhihas lands or to render any kind of service, and seeking to go back several centuries and revert to a time when Rajas and rents were unknown. In order to bring about a *modus vivendi* between the parties, it became necessary to notify to zamindars that they would not be permitted to exact labour from their tenants without any limits whatever, and to warn the latter of their unreasonable conduct in refusing to render service really due; to

this end, in my capacity as Commissioner, I issued a Proclamation drawing general attention to the custom of the country as recognised by Government and the Courts, and warning zamindars of the penal consequence of forcibly exacting labour in excess of the amount prescribed by custom, and urging the raiyats to perform their customary tasks willingly and ungrudgingly. An officer was also deputed to make enquiries in certain of the villages in the disaffected parts, as to the character and extent of these disputes, but these measures, though effectual in restoring order and in showing both parties that their claims were receiving attention, could not be expected to have a lasting result. In the meanwhile, I was in correspondence with Government as to the best means of bringing about a better understanding between landlord and tenant. I will not weary the Council by reciting the details of that correspondence, but the conclusion arrived at, with the concurrence of the Government of India, was that the object in view might be attained by extending the Bengal Tenancy Act to Chota Nagpur and giving Government the power of ordering commutation of services whenever it considered that the adoption of such a course would be calculated to avert serious dispute.

“The existing disputes chiefly fall under three heads—

(1) The assessment of rent on excess lands, that is, certain lands which the holders have somehow managed to retain possession of without payment of rent after failing to prove a bluinhari title ;

(2) the enhancement of rents paid by the tenants ; and

(3) the exaction of excessive service and rakumats by the zamindar. The settlement of the first two classes of disputes will be much facilitated by the introduction of the Bengal Tenancy Act into Chota Nagpur, while, as regards the last, the main object of the present Bill is the preparation of a record of the predial services and conditions rendered by the tenants and their commutation into money rents when found necessary for the preservation of the peace of the country. The landlords mostly favour the system of services and cesses, and the raiyats are not opposed to it when they are on good terms with their zamindars. There is therefore no need for interference when the parties can arrange their differences amicably among themselves. It is not proposed, then, to make commutation absolutely obligatory, but only where the parties have recourse to the authorities to settle their disputes, or where the disputes are likely to induce a breach of the peace. This is provided for in Chapter III of the Bill. It may at first sight appear that the provisions of this Chapter trench on those of Chapter X of the Tenancy Act, and that two concurrent procedures will, if this Bill be adopted, be provided for the same object; but this is not strictly correct: for whereas Chapter X of the Tenancy Act requires a survey to precede the record of rights, a survey is not indispensable under Chapter III. Where there has already been a regular survey, as in the Khalsa villages of the Chota Nagpur estate in the Lohardaga district, in the Barkagarh estate in the same district, and in the Dhanwar estate in Hazaribagh, a fresh measurement will be unnecessary. It will equally not be required where there is no difference of opinion between the zamindar and the raiyats as to the quantity of land held, whether such quantity is expressed in bighas or acres, or in the local standard of annas, powas, khuris, or kats. As to the rates, conditions, and predial services, the Revenue Officer can certainly ascertain and enter these in the record without measuring the land. It would undoubtedly be an advantage to have a survey before a record is made, but the survey would often entail a heavy cost, and it must be borne in mind that in Chota Nagpur the zamindars and tenants are comparatively very poor, and that few of them would be able to afford the expenditure. The record of existing rents is indispensable, because it is provided in the Bill that in commuting predial conditions and services, the Revenue Officer shall limit the money value of them to one-fourth the existing rent paid by each tenant concerned, a limit of this kind being necessary in order to prevent the incidence of commutation falling heavily on raiyats with small rentals. Where there are chronic disputes as to the existing rents, while it will be the duty of the Revenue Officer to do his best to ascertain and record what those rents are, it is not necessary to make any

provision in the Bill for the determination of new, fair and equitable rents. Where such a course is found necessary, the provisions of the Tenancy Act should be followed. In the present Act a distinction is maintained between executive proceedings and suits, appeals in the former being dealt with by Revenue Officers, and in the latter by Judicial Officers, and it has been thought necessary to preserve a like distinction as regards the proceedings under this Chapter. While ordinarily an appeal will lie to the Commissioner, and both the Commissioner and the Board have powers of revision, the Bill provides that, where any question of title or status or right of possession to land is at issue, an appeal shall lie from the order of the Commissioner to the High Court. Section 16 of the Bill provides for the defraying of the costs of commutation proceedings and follows section 114 of the Tenancy Act, with the difference that it authorises the Revenue Officer to require a deposit in advance from the person applying for commutation.

"Chapter II of the Bill is a reproduction with a slight modification of sections 19 and 20 of the present Act, which prescribe the incidents as regards liability to enhancement of certain tenures peculiar to Chota Nagpur. The holders of *khuntkati* tenures are men whose ancestors by their own exertions cleared the forest by cutting away the *khunt* or stumps of trees, and brought the land into cultivation. Korkar, which is also known by the other terms mentioned in section 5, is low rice land which has been prepared from high land by the expenditure of much labour. All these lands have special privileges as regards liability to enhancement of rent. Take Korkar for instance. The rent cannot be enhanced except under the terms of a written contract, or in accordance with the custom of the village. But in practice it is difficult to prove what the general custom of a village is, and therefore it is proposed to alter the law by providing that, where the custom cannot be ascertained in a particular village, the custom in the neighbouring village may be considered.

"Chapter IV relates to the registration and resumption of intermediate tenures, which are defined in Chapter I to mean a dependent taluk, and any other permanent or heritable interest in land intermediate between the zamindar and the cultivator and to include a resumable tenure. A definition is given of a 'resumable tenure' so as to include a large class of tenures peculiar to Chota Nagpur, which owe their origin to grants made by the Rajas, and which are held conditionally on the survival of a male heir of the original grantee. The Chapter has been added to the Bill with a view to remove difficulties under which zamindars and tenure-holders in Chota Nagpur both labour. The matter is somewhat complicated, but it may serve to elucidate it if I quote from a description of this Chapter which I gave as Commissioner in a letter addressed to Government.

"The zamindar requires that all transfers of under-tenures within his zamindari should be registered in his *sarishta*, so that he may have no difficulty in finding out the person who is responsible to him for the rent of the under-tenure. Section 31 of Act I (B.C.) of 1879 arms him with a very efficacious method of enforcing registration of transfers by succession or inheritance. This section can be taken advantage of by any one obtaining possession of a taluk or tenure by succession or inheritance only, be the taluk or tenure one saleable under section 123 or one in which the right and interests only of the tenure-holder are saleable under section 124. Section 35 would seem to indicate that the transfer by private sale of a transferable tenure or taluk, saleable absolutely under section 123, can also be registered under section 31; but in the case of tenures held conditionally on the survival of male heirs of the original grantees, transfer by private sale cannot be registered under sections 34 and 35, even if the transferees be willing to have their names registered, unless the zamindar chooses to do so on receipt of a large bonus in the shape of a *salami*. Again, while mukarrari and other permanent tenures, which are saleable under section 123, when sold for arrears of rent, are sold free of all encumbrances created by the tenure-holder, the effect of the existing law is that jagirs and other tenures which are held conditionally on the survival of male heirs of the original grantees, and which are admittedly of an inferior status when they fall into arrears, cannot be sold free of all encumbrances by the grantees or their

male heirs. In such tenures only the rights and interests of the grantees or their male heirs are saleable. The result of this anomaly is that, while a zamindar can, under the existing law in Chota Nagpur, very easily recover arrears of rent due by a permanent transferable tenure, by putting it up to sale in execution of a decree for arrears of rent, and selling it free of all encumbrances created by the tenure-holder, he has no such means of recovering his arrears from the holders of tenures held conditionally on the survival of male heirs, for it very often happens that, knowing the defect in the existing law, the grantees or their male heirs let out their tenures in sub-lease or mortgage, reserving only a nominal rent, which is often less than the rent they have to pay to the superior landlord. For instance, A, the jagirdar of a tenure, has to pay an annual rent of Rs. 100 to his superior zamindar, but he lets out his whole tenure either in mukarari or zaripeshgi for a nominal rent of Rs. 5 to B. B enjoys the rents and profits derived from the tenure and pays only Rs. 5 per annum to A. But A defaults in paying the Rs. 100 payable to his superior landlord. The superior landlord sues A and obtains a decree against him and puts up his tenure to sale under section 124 of Act I (B.C.) of 1879. No one comes forward to purchase the tenure, for it is only the rights and interests of A which can be sold under that section, and the purchase of these means the acquisition of the right of receiving Rs. 5 per annum from B, with a liability of paying Rs. 100 per annum to the superior landlord. To remove this anomaly in the rules framed for carrying on the sale of the rights and interests of an under-tenure-holder of the class referred to in section 124 of Act I (B.C.) of 1879, under instructions of the Board of Revenue, provision was made for making B, or any other sub-tenure-holder under him, a party to the suit to be instituted by the zamindar for the recovery of the rents due to him from A. It was held that when section 124 authorised the sale of the right and title of any person in the tenure, the rights and interests of any subordinate tenure-holder under A can be sold under that section, but that, in order to enable the zamindar to effect such sale, it is essential that he should make all such sub-tenure-holders parties to the suit to be instituted by him against A. The High Court of Calcutta, however, has held that such a procedure is perfectly illegal and is not authorized by law.

* * * * *

“A purchaser can be easily ousted from his holding in the event of a collusion between the zamindar and the original jagirdar or his male heirs. The purchaser has no right to apply for the registration of his name in the zamindar's sarishta, neither does the zamindar consider it safe on his part to admit him to registration, for, by doing so, he endangers his right of resumption in the event of a failure of the male heirs of the original grantees. After having once parted with their interests, the original grantees or their heirs cease to have any interest in having their names registered in the event of succession or inheritance in their families, and if the zamindar can induce the heirs of the original grantees to sit idle and keep themselves away, the zamindar can very easily obtain khas possession of the tenure. The power given by section 34 of Act I (B.C.) of 1879 is a tremendous lever in the hands of the zamindar, and can be exercised in a way which can cause ruin to the purchaser of a tenure. The object of Chapter IV of the proposed Bill is to remove the difficulty which the zamindar now labours under in the matter of the recovery of his rents, and at the same time to save purchasers from the inevitable ruin which awaits them whenever there is a succession in the families of the original grantees and the heirs of the latter are bought off by the zamindar. It will make all tenures held conditionally on the survival of male heirs of the original grantees freely transferable, as any other permanent under-tenure saleable under section 123 of Act I (B.C.) of 1879, and will give the purchasers the privilege of having their names registered in the zamindar's sarishta and of enjoying their tenures so long as there are male heirs of the original grantees, and so long as they pay the rents due to the zamindar with regularity, and at the same time of preserving the zamindar's right of resumption on failure of male heirs of the original grantees intact.

“With this explanation of the provisions of the Bill, I beg to move that it be referred to a Select Committee.”

The Hon'ble BABU GURU PROSHAD SEN said:—“I do not understand why it should be necessary for the Government to take more powers under this Bill. Ordinarily parties have got the right to move for commutation of services under section 7. It is not the case that the raiyats in Chutia Nagpur are very weak and unable to defend their rights. From the Hon'ble Member's own statement it appears that the Missionaries have taken the raiyats by the hand and are fostering a spirit of independence among them and reviving the traditions of olden times when each person was in a manner the proprietor of the soil which he cultivated, and have encouraged aspirations which are not likely to be realised, and, further, it appears that all the Missions in Chutia Nagpur—the Anglican, the German Lutheran, and the Roman Catholic—are supporting the cause of these Kols. If therefore they thought that commutations would be advantageous to them, they would move for it of themselves. I do not therefore understand why it is necessary to take further powers under section 8 of this Bill.”

The Hon'ble MR. M. S. DAS said:—“As the Bill is going before a Select Committee, they will consider the point which has been raised by the Hon'ble Member. I understand that there may be cases in which it may be necessary to exercise such a power in the interests both of zamindars and tenants. But as the learned Advocate-General is here, I would ask whether the provisions of section 14 can legally find a place in this Bill: whether this Legislature has the power to take away the jurisdiction of the Civil Courts?”

The Hon'ble SIR CHARLES PAUL said:—“As this Bill is to be referred to a Select Committee of which I am to be a member, the question can be considered there. I am not prepared to give an opinion at once.”

The Hon'ble MR. RISLEY said:—“The Hon'ble Member who spoke last but one has challenged the right of the Government to intervene between zamindars and raiyats in respect of the commutation of predial conditions or services. Having some personal experience in the Chutia Nagpur Division, I can say with confidence that if there is one place in the world where it is necessary to resort to legislation to give a right of intervention in such cases, it is in Chutia Nagpur, where you have a class of raiyats who possess a power of combination and are well able to take care of themselves; and they have been in the past, though I hope not in the future, to some extent supported by the missionaries. If the parties would by combined action come to a settlement, there may be no reason for the Government to exercise the power here proposed to be given. A further reason is that in all the districts of that division the arrangements relating to land are in a state which can only be described as closely approaching to chaos. I know of estates in which there is absolutely no system of land registration, and the unit upon which rent is ascertained is not the bigha or the acre, but by the maund of seed: the people paid their rents in maunds of paddy or other produce. In my memory in certain groups of villages the area of land represented by this arbitrary seed unit varied from 7 to 35 bighas, and the mere fact of the existence of such a state of things is conclusive proof of the necessity for a power of interference to settle disputes which in that part of the country often end in actual bloodshed.”

The Hon'ble MR. GRIMLEY said:—“I have only one word to add. I pointed out on the very first occasion on which I explained the objects and reasons of this Bill, that section 25 of the existing Act I (B.C.) of 1879, which provides for the voluntary commutation of predial conditions or services, is not found sufficient where there are serious disputes between the parties, and that it was decided after due consideration to allow the Government to intervene whenever they find it necessary to do so in order to preserve the peace of the country. That is the only reason why it is proposed to give this power.”

The Hon'ble THE PRESIDENT said:—"It is only necessary for me to say, with reference to the observation which fell from the Hon'ble Mr. Das as to the power of this Council to touch the jurisdiction of the Civil Courts, that this Bill has been introduced with the sanction of the Government of India, and is therefore quite within the powers of this Council."

The Motion was put and agreed to.

The Council adjourned to Saturday, the 27th instant.

CALCUTTA ;
The 23rd February, 1897. }

F. G. WIGLEY,
*Offg. Asst. Secy. to the Govt. of Bengal,
Legislative Department.*

WATER-SUPPLY.

No. 974 L.S.-G.—The 20th February 1897.—The following report of the progress made in the several districts of the Chota Nagpur Division in collecting and placing on record the chief facts regarding water-supply is published for general information.

H. H. RISLEY,

Secretary to the Government of Bengal.

No. 471T.—R.C., dated Camp Hazaribagh, the 12th February 1897.

From—A. FORBES, Esq., C.S.I., Officiating Commissioner of the Chota Nagpur Division,

To—The Secretary to the Government of Bengal, Municipal Department.

In reference to your Circular No. 58L.S.-G., dated the 12th December 1896, requesting submission of quarterly reports of the progress made in each district of this division in collecting and placing on record the chief facts regarding water-supply and the steps, if any, that have been taken by Municipalities and District Road Committees to improve existing sources of water-supply and to open new ones, I have the honour to submit the following report.

2. In Hazaribagh the registers prescribed by the Government Circular Nos. 7 and 8T.M., dated the 15th May 1896, have been opened by the District Road-Cess Committee and the two Municipalities of Hazaribagh and Chatra. The registers opened by the Road-Cess Committee are being tested by the Deputy Commissioner in his cold-weather tours. In the two municipalities mentioned above the sources of water-supply are reported to be sufficient for the requirements of each ward within them. Since the submission of Mr. Marinden's report No. 77R.C., dated the 12th May 1896, a public meeting of zamindars, mukarraridars, thikadars and other influential persons of the district was held at Mr. Herald's invitation, and no fewer than eighty-five of them have promised in writing to increase the available supply of drinking water in their respective zamindari and *elukas* either by digging new tanks and wells or by deepening and cleansing old ones, and the aggregate sum which they proposed to spend for the purpose amounts to Rs. 35,785. The Deputy Commissioner is now addressing these persons on the subject of taking advances without delay on the terms offered under the rules prescribed in Government notification No. 69, published at pages 26 to 29 of the *Calcutta Gazette* of 13th ultimo.

3. In Lohardaga the District Road-Cess Committee have prepared registers of all sources of water-supply for domestic use in rural villages containing more than 100 houses, and the registers have been forwarded to the District Superintendent of Police for verification and necessary correction. The Committee have further spent Rs. 944 in constructing four pucca wells at Lohardaga, Opa, Lodhma and Jeria, in the compounds of road-side bungalows, and these will be available to the public and to passengers frequenting the roads on the sides of which the bungalows have been constructed. Of the two municipalities in the district, Ranchi and Lohardaga, the former have simply prepared registers of the sources of water-supply existing within it, while the latter, besides preparing such registers, have improved one tank by clearing it of weeds, and have taken steps for clearing another which, though belonging to a private individual, is available to the public for use.

4. In the Palamau district the Road-Cess Committee have not yet been able to prepare the registers prescribed by the Government for want of the necessary particulars which the police were required to furnish. They have, however, undertaken the construction of three road-side wells at Latdag, Kurso and Manatu. Mr. Renny, the present Deputy Commissioner, is taking the necessary steps to give due effect to the Government orders, and expects to show satisfactory progress in the next quarter's report. In the Daltonganj Municipality the general register has been written up and the detailed register is under preparation.

5. In Manbhum the task of compiling the registers for rural villages was made over to the police in conjunction with the District Engineer, but the information collected is, in the opinion of the Deputy Commissioner, Mr. Luson, far from complete, though considerable progress is said to have been made in collecting it. Of the three municipalities in the district, Purulia, Rughunathpur and

Jhalda, the registers have been excellently prepared in the case of the two first, but insufficiently in that of the last, which has not yet completed the detailed register in Form No. II. Steps are being taken to have the information brought up to the required standard in the case of the Jhalda Municipality and of all villages of more than 100 houses outside municipal limits.

No special steps appear to have been taken in this district, in consequence of the opening of these registers, to improve existing sources of water-supply or to open new ones. Mr. Lusson writes that he joined the district on return from furlough only two months ago, and his attention had not been drawn to the subject until the 18th ultimo. He promises to do his best now to see that the information tabulated is used to advantage, and that some real work is done to improve the existing sources of water-supply and to provide new ones.

6. In Singhbhum the registers prescribed by the Government have been prepared; but the District Road-Cess Committee, which is unable to maintain the District Roads properly, can ill afford to spend any sum on the improvement of water-supply in rural tracts. In the Government Kolhan Rs. 1,012 have been spent on the improvement of tanks and wells. In the Chaibassa Municipality a sum of Rs. 32 has been spent by the Municipal Commissioners in clearing wells and tanks, and another sum of Rs. 220 has been subscribed by the Thakur of Kharsawan for clearing and improving the Ranibandh, within the same Municipality.

7. It appears to me from the above *précis* that, beyond preparing the prescribed registers, the measures so far taken in the direction of improving the water-supply in the different districts do not as yet hold out much promise of sufficient practical results, except in the district of Hazaribagh, where Mr. Herald has been giving much personal attention to the matter. I am forwarding extracts of his proceedings, noticed in paragraph 2 above, to the other District Officers for their information and guidance.

LIBERALITY OF RAO JOGENDRA NARAYAN ROY.

No. 1001F., dated Calcutta, the 8th February 1897.

From—H. H. RISLEY, Esq., C.I.E., Secy. to the Govt. of Bengal, Financial Dept.,
To—The Commissioner of the Presidency Division.

WITH reference to the correspondence ending with your letter No. ⁹/₁₃₉ Mis., dated the 29th January 1897, I am directed to forward, for your information and for communication to Rao Jogendra Narayan Roy of Lalgola, the enclosed copy of a Notification of to-day's date regarding the establishment of the Rao Mohesh Narayan Roy Serai at Raghunathganj in the Jangipur subdivision of the district of Murshidabad.

2. I am to request that you will be so good as to convey to the donor an expression of His Honour's acknowledgment of his liberality and public spirit. This letter will be published in the *Calcutta Gazette*.

LIBERALITY OF RAI SETAB CHAND NAHAR, BAHADUR, OF AZIMGANJ.

No. 932Medl., dated Calcutta, the 19th February 1897.

From—H. H. RISLEY, Esq., C.I.E., Secretary to the Government of Bengal, Municipal Department,
To—The Commissioner of the Rajshahi Division.

WITH reference to your Memorandum No. 396J., dated the 23rd December 1896, and previous correspondence, relating to the establishment by Rai Setab Chand Nahar, Bahadur, of Azimganj, of a charitable dispensary, within his estate at Setabganj, in the district of Dinajpur, to be maintained from the proceeds, amounting to Rs. 624 per annum, of an endowment of landed property created by him, I am directed to request that the Lieutenant-Governor's thanks may be conveyed to the donor for his liberality and public spirit. Sir Alexander Mackenzie is glad to recognise this evidence of of the Zamindar's wish to provide medical aid for his tenantry. I am to add that there is no objection to the name of the dispensary being changed to the "Lady Mackenzie Setabganj Charitable Dispensary," as proposed by the donor.

2. This letter will be published in the *Calcutta Gazette*.

REPORT ON THE STATE OF THE SALT MARKET FOR THE
THIRD QUARTER OF 1896-97.

No. 146B., dated Calcutta, the 13th February 1897.

From—E. H. WALSH, Esq., Secretary to the Board of Revenue, L.P.,
To—The Secretary to the Government of Bengal, Financial Department.

I AM directed to submit the following report on the state of the
SALT. salt market for the third quarter of 1896-97,
comprising the months of October, November,
THE HON'BLE MR. W. H. GRIMLEY. and December 1896.

2. The quantity of salt of every description cleared during the quarter under review, amounted to 24,40,628 maunds, against 26,77,294 maunds in the previous quarter, and 27,75,261 maunds in the corresponding quarter of the previous year; and the net amount of duty levied thereon was Rs. 57,12,378, against Rs. 61,68,873 in the previous quarter, and Rs. 65,18,246 in the corresponding quarter of the previous year. In all cases fractions are omitted.

3. The quantity of locally-made salt removed from the golas in Orissa during the quarter under review, and the quantity which remained in store at the close of the quarter, are shown in Table I below :—

TABLE I.

1				2
				Puri.
				Mds.
Balance at the close of the previous quarter	...			4,25,549
Manufactured and added during the quarter
Total				4,25,549
Sold during the quarter		9,272
Wastage
Total				9,272
Balance at the close of the quarter		4,16,277

The total sales of locally-made salt during the quarter under review amounted to 9,272 maunds, against 16,134 maunds in the previous quarter, and 15,248 maunds in the corresponding quarter of the previous year. Duty was levied during the quarter on the full quantity sold.

4. The subjoined Table II shows in detail the importations into the port of Calcutta and the total clearances of sea-imported salt during the quarter under

review, as compared with the figures of the corresponding quarters of the previous two years:—

TABLE II.

WHENCE IMPORTED.	1894-95		1895-96.		1896-97.

5. Table III shows the quantity of sea-imported salt remaining in the warehouses at the close of the quarter under review, as compared with the results of the previous four quarters:—

TABLE III.

WHERE STORED.	Third quarter of 1895-96	Fourth quarter of 1895-96.	First quarter of 1896-97.	Second quarter of 1896-97.	Third quarter of 1896-97.
1	2	3	4	5	6
Saltica Government Salt golas ...	Mds. 29,30,016	Mds. 25,50,046	Mds. 13,80,350	Mds. 17,03,053	Mds. 13,11,553
Kidderpore Dock ditto ...	6,20,000	5,49,200	1,72,853	1,703	...
Ditto do. Private golas	5,806
Chittagong Government Salt golas ...	2,01,164	3,00,777	1,46,701	1,168	60
Ditto Private ditto	60,000	48,061	44,183	20,235
Narayanm (Salt Bonded Warehouse of Messrs. Turner, Morrison & Co.)	2,320
Khulna (ditto) ...	519	6,940	1,946	5,088	6,774
Malabar (ditto) ...	2,485	8,552	137	...	3,036
Chandrab (ditto) ...	3,060	3,066	3,724	...	10,084
Banab Bazar (ditto) ...	2,809	2,809	2,000
Total ...	38,73,152	34,69,340	17,11,073	18,03,025	13,65,428

The stock in bond at the close of the quarter was reduced to about one-third of that at the close of the corresponding quarter of the previous year, but there was a marked advance in the shipments of salt for the port of Calcutta, as noted in paragraph 9, being 53,560 tons, against 40,430 tons in the previous quarter and 30,200 tons in the corresponding quarter of the previous year.

6. The despatches of salt from Calcutta by water and the three railways passing the several pass-stations into the interior of the country, both east and west of the river Hooghly, as well as the despatches by steamers and flats during the quarter under review and the corresponding quarters of the previous two years, are shown in table IV below:—

TABLE IV.

PERIOD.	BY WATER.					BY RAIL.			BY STEAMERS AND FLATS.	
	Via Balakhal.	Via Sankrail.	Via Govan-khally.	Via Kidderpore.	Via Ballia-Ghat.	Via Ruttollah-Ghat.	By the East Indian Railway.	By the Eastern Bengal and South-Eastern Railway or via Chittpur.	Quantity despatched into the interior (excluding Orissa).	Quantity despatched to Orissa.

Ditto of 1895-96 ...	1,62,026	1,18,962	74,000	67,607	5,00,283	23,651	8,00,545	2,23,283	1,70,000	19,000
Ditto of 1896-97 ...	1,18,928	1,11,683	73,505	64,609	3,16,168	748	11,15,373	2,51,731	1,42,752	36,432

7. The quantity of salt despatched by the East Indian Railway to stations beyond Buxar during the quarter under review, amounted to 11,991 maunds 10 seers, as noted in the margin, against 9,742 maunds 30 seers in the previous quarter, and 20,609 maunds 10 seers in the corresponding quarter of the previous year.

8. The quantity of saltpetre removed from the refineries during the quarter on payment of duty, amounted to 6,982 maunds, against 5,315 maunds in the previous quarter and 4,210 maunds in the corresponding quarter of the previous year.

9. The shipments of Liverpool salt for the port of Calcutta, according to published market reports, were as follows :—

					Tons.
October	14,050
November	12,200
December	27,310
Total	53,560

It is reported that four sailing ships were *en route* for Calcutta at the close of the quarter, with 12,700 tons of salt from Hamburg.

10. Table V shows the average wholesale price per 100 maunds of Liverpool and other descriptions of salt during each fortnight of the quarter under review :—

STATISTICS OF THE SEA-BORNE TRAFFIC OF CALCUTTA
IN FOOD-GRAINS.

No. 485 Statistics.—The following memorandum and statements are published for general information.

STATISTICAL DEPARTMENT,
The 23rd February 1897.

M. FINUCANE,
Secy. to the Govt. of Bengal.

Memorandum.

The sea-borne import and export traffic of Calcutta in food-grains during the week ending the 14th February 1896 and 1897 are shown in the following statement:—

1	8TH TO 14TH FEBRUARY			
	1896.		1897.	
	2	3	4	5
<i>Imports.</i>	Cwts.	Mds.	Cwts.	Mds.
From Foreign Ports	15	20
„ Indian „ ...	33,582	45,709	170,503	2,32,074
Total ...	33,582	45,709	170,518	2,32,094
<i>Exports.</i>				
To Foreign Ports ...	245,610	3,34,303	30,139	41,022
„ Indian „ ...	78,340	106,629	5,097	6,938
Total ...	323,950	4,40,932	35,236	47,960

Imports.—The different staples comprising the import traffic are shown in the table* below, and the figures for the week are compared with those for the corresponding period last year:—

1	8TH TO 14TH FEBRUARY			
	1896.		1897.	
	2	3	4	5
<i>Food-grains.</i>	Cwts.	Mds.	Cwts.	Mds.
Rice ...	25,478	34,678	153,870	2,09,434
Paddy ...	7,897	10,749	12,358	16,821
Wheat
Gram and pulses ...	207	282	4,280	5,825
Other food-grains, such as jowar, barley, oats, &c.	10	14
Total ...	33,582	45,709	170,518	2,32,094

As in previous weeks, the chief feature of the import trade of the period under report is the considerable quantity of rice, amounting to 1,40,727 cwts., that was received in Calcutta from Burma. The only ports outside Burma which contributed to the rice trade were Balasore and Chandbali, although the shipments from those places showed a heavy falling off in comparison with that of 1896. The bulk of the imports of gram and pulses was derived from Coconada and Chandbali.

Exports.—In the following statement the total quantity of each kind of food-grains exported by sea during the 2nd week of February 1897 is compared with the figures for 1896:—

8TH TO 14TH FEBRUARY				
		1896.	1897.	
1	2	3	4	5
	Cwts.	Mds.	Cwts.	Mds.
<i>Food-grains.</i>				
Rice	285,200	3,88,189	31,633	43,056
Paddy	594	809	29	39
Wheat	4,024	5,177	113	154
Gram and pulses	24,392	33,200	3,450	4,655
Other food-grains, such as jowar, barley, oats, &c.	9,740	13,257	41	56
Total ...	323,950	4,40,932	35,236	47,960

The export trade in rice with foreign ports fell off from 229,477 cwts. in the corresponding period of last year to 29,162 cwts. during the week under report. The exports by sea in the preceding week were 3,07,464 cwts. With the exception of Ceylon, to which a trifling quantity, namely 1,361 cwts., was shipped against 60,571 cwts. in the preceding year, the only port to which Bengal rice was consigned is Barbadoes in the West Indies, which received 28,072 cwts. against 1,049 cwts. in 1896. To the United Kingdom, Mauritius, Aden, Arabia and Persia, which received largely during the corresponding period of 1896, there were no exports at all.

In the case of the coasting trade, the exports of rice decreased from 55,723 cwts. to 2,171 cwts., those of wheat from 4,024 cwts. to 3 cwts., those of gram and pulses from 10,543 cwts. to 2,912 cwts., and those of miscellaneous food-grains from 2,028 cwts. to 11 cwts. The only items worthy of notice in the statement are an export of 1,697 cwts. of rice and 2,664 cwts. of gram and pulses carried to Rangoon, against 1,516 cwts. and 7,735 cwts., respectively, in the corresponding period last year.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below.

Statement No. I, showing the Imports of Food-grains into Calcutta from Foreign and Indian Ports during the week ending 14th February 1896 and 1897.

**STATISTICS OF THE SEA-BORNE TRAFFIC OF THE MINOR PORTS
IN BENGAL IN FOOD-GRAINS.**

No. 484 Statistics.—The following memorandum and statements are published for general information.

M. FINUCANE,
Secy to the Govt. of Bengal.

STATISTICAL DEPT.,
The 23rd February 1897.

MEMORANDUM.

THE comparative statements below give statistics of the import and export trade of the minor ports of Chittagong, Narayanganj, Balasore (including both Balasore and Chandbali), Cuttack and Puri during the ten days ending 31st January 1897, as compared with the trade of the corresponding period of 1896 :—

IMPORTS.

Port.			From Foreign ports.	From Indian ports.	Total.	
					Cwts.	Mds.
Chittagong	{ 1896	430	430	58
	{ 1897	4,762	4,762	6,482

	{ 1897	...	3,161	3,161	4,303
Total	{ 1896	...	36,995	176,650	213,645	2,90,794
	{ 1897	...	13,080	30,893	43,973	59,852

The import trade of Chittagong showed a rise of 4,332 cwts., which was mainly due to the supply of rice and paddy from Burma Ports. Narayanganj and Balasore also showed an improvement of 147 cwts and 195 cwts. respectively.

The falling off in the export trade of Chittagong is chiefly attributable to the cessation of exports of rice and paddy to both Foreign and Indian Ports, which together received, in the corresponding period of 1896, 74,775 cwts. in excess of the shipments during the period now under review. Narayanganj showed a rise of 694 cwts. owing to larger despatches of rice and gram and pulse to Chittagong. The decline of 80,926 cwts. in the case of Balasore was due to smaller shipments of rice, paddy and gram and pulse to both Foreign and Indian Ports. The falling off in the Cuttack trade amounted to 17,826 cwts., no rice was sent thence to Indian Ports, which received 25,675 cwts. in the corresponding period of last year, while the trade of Puri was confined to Colombo, which was supplied with 3,161 cwts. of rice against nil in 1896.

Statement showing the quantities of Food-grains exported from Narayanganj to each Foreign and Indian Port during the ten days ending 31st January 1897, as compared with the trade of the corresponding period of 1896.

MEMORANDUM ON THE IMPORTS AND EXPORTS OF FOOD-GRAINS
TO AND FROM CALCUTTA DURING NOVEMBER 1896.

No. 486 Statistics.—The following memorandum and statements are published for general information.

STATISTICAL DEPARTMENT,
The 23rd February 1897.

M. FINUCANE,
Secy. to the Govt. of Bengal

The total quantity of food-grains imported into and exported from Calcutta during the month of November 1896, as compared with the corresponding month of the previous year, is shown below:—

Specification of routes.	Imports.		Exports.	
	1895 Mds.	1896. Mds.	1895. Mds.	1896. Mds.
By internal routes, i.e., by rail, road, river (country boat and steamer) and canals ...	13,97,004	11,83,043	1,72,798	5,07,255
By sea (in both foreign and coasting vessels) ...	1,02,822	3,09,165	9,80,681	5,24,390
Total ...	14,99,826	14,92,213	11,53,482	10,31,645

There was very little fluctuation in the total import trade, though in the trade carried by internal routes there was a decrease of 15·3 per cent. as compared with November 1895. The falling off in the internal trade was principally in rice and wheat, and this decline is counterbalanced by increased importation of rice and gram and pulses by sea. In the total export trade the decline was 10·5 per cent., while the quantity exported by internal routes showed the marked increase of 193·5 per cent. In the exports by sea there was a decrease of 46·5 per cent.

Imports.—The table below shows the total trade in each kind of food-grains imported during the month by all routes:—

		November 1895.	November 1896.
		Mds.	Mds.
Rice	7,91,273	7,93,392
Paddy	59,760	1,55,103
Wheat	2,31,580	1,00,685
Gram and pulses	3,60,931	3,83,364
All other kinds of food-grains	45,282	59,669
Total	14,99,826	14,92,213

Of these imports, 13,97,004 maunds were received by internal routes during November 1895, and 11,83,048 maunds during same month in 1896, the sea-borne imports during those two months being 1,02,822 maunds and 3,09,165 maunds respectively. The increase in the paddy trade was due to larger imports, principally from Midnapore (67,678 maunds against 12,650 maunds) and from Burdwan (29,238 maunds against 4,309). The falling off in the inland trade was due to short despatches of rice mainly from Backergunge, (16,434, maunds against 2,31,440 maunds), and also to short consignments of wheat from the North-Western Provinces and Oudh, which exported only 12,810 maunds, against 1,54,241 maunds in November 1895.

Exports.—The export trade in each staple of food-grains is shown in the following table:—

		November 1895.	November 1896.
		Mds.	Mds.
Rice	8,28,025	6,25,112
Paddy	35,410	1,10,421
Wheat	15,772	15,969
Gram and pulses	2,53,519	2,36,776
All other kinds of food-grains	20,756	43,367
Total	11,53,482	10,31,645

There was a decline of 10·5 per cent. in the total exports owing chiefly to smaller exports by sea, which aggregated only 5,24,390 maunds against 9,80,684 maunds, while there was a marked increase in the inland export trade of 3,31,457 maunds, and this increase was general in all grains, and was not limited to any part of the Lower Provinces of Bengal. The despatches to Nadia were 44,554 maunds against 9,404 maunds, and to Jessore 22,228 maunds against 1,177 maunds. The exportation to Assam was 1,20,705 maunds against 36,355 maunds, and to the North-Western Provinces and Oudh 1,07,641 maunds against only 26 maunds during the month of November 1895.

Statement I showing the several routes followed by the trade in food-grains imported into and exported from Calcutta during the month of November 1895 and 1896.

EXPORTS OF FOOD-GRAINS BY RAIL FROM HOWRAH.

No. 487-Statistics.—The following statement, showing the quantities of rice and other food-grains exported by rail from Howrah during the period 1st January to 13th February 1897 inclusive, is published for general information.

It is observed that the whole quantity of food-grains carried from Howrah to stations in these provinces was only 1,85,690 maunds; whereas more than four times that quantity—5,96,809 maunds—were exported to the North-West Provinces and Oudh. The exports to other provinces aggregated 1,98,376 maunds.

It has not as yet been found possible to compile returns of the shipments of food-grains from Kidderpore, Chitpore, and the Port Trust Railway; but it is expected that such returns will shortly be ready for publication.

M. FINUCANE,
Secy. to the Govt. of Bengal.

STATISTICAL DEPT.,
The 23rd February 1897.

Statement showing the quantities of rice and other food-grains exported from Howrah by rail from 1st January to 15th February 1897.

COMPARATIVE STATEMENT OF THE PRICES OF FOOD-GRAINS.

RETAIL prices of common rice and other food-grains in the several districts of Bengal and in the neighbouring districts of the North-Western Provinces during the first and second fortnights of January and the first fortnight of February 1897, as compared with the corresponding fortnights of January and February in 1896, are published for general information. The latest available prices of common rice in Cachar and Sylhet are also published.

M. FINUCANE,
Secy. to the Govt. of Bengal.

REVENUE DEPARTMENT, the 23rd February 1897.

Quantity obtainable for a rupee.

WEATHER AND CROP REPORT.

For the week ending the 22nd February 1897.

Burdwan.—Rainfall at Sadar 0·84, Kalna 1·40, Katwa 0·73, Raniganj 0·41. Weather seasonable. The recent rain has done much good to the standing *rabi* crops, and ploughing is now going on briskly in many parts. Sugarcane is being pressed. Condition of cattle good. Fodder and water sufficient. Common rice selling as follows:—

			Srs. a.	Srs. c.	
Sadar 10 0	to 12 0	} per rupee.
Kalna 10 8	to 11 0	
Katwa 10 10	to 10 15	
Raniganj	10 4	

Birbhum.—Rainfall at Sadar 1·15, Rampur Hât 0·06. Weather seasonable. Crushing of sugarcane going on. Price of rice at Sadar 9½ seers, and Rampur Hât 11½ seers per rupee.

Bankura.—Rainfall at Bankura 0·83, Indus 0·85, Khatra 0·44, Maliara 0·57, Gangajalghati 0·67, Kotalpur 0·5, Raipur 0·48, Vishnupur 0·82. Weather cloudy at the beginning of the week. The recent rain has started ploughing. Pressing of sugarcane going on. Fodder and water sufficient except in a few places. Cow-pox reported. Common rice selling at Bankura and Vishnupur at 11 seers per rupee.

Midnapore.—Rainfall at Sadar 0·77, Contai 1·19, Tamluk 0·42, Ghatal 0·27. Weather seasonable. Prospect of indigo better. Sugarcane is still being pressed. *Rabi* crops are being collected. Threshing of *aman* still continues. Transplantation of *boro* finished. Cattle-disease reported from Salbani, Binpur, and Naraingarh. Fodder and water sufficient. Common rice selling as follows:—

			Srs.		
Sadar	11	} per rupee.
Contai	12 to 13	
Tamluk	10 to 12	
Ghatal	10 to 11	

Hooghly.—Rainfall at Sadar 0·37, Serampore 0·10, Jahanabad 0·33. Rain too late to do much good to *rabi*. Rice sells from 8½ to 10 seers per rupee.

Howrah.—Rainfall at Sadar 0·11, Uluberia 0·16. Weather seasonable. Prospects of *rabi* crops not good. Pressing of sugarcane still going on. Fodder and water sufficient. Common rice sells at 9 to 10½ seers per rupee.

24-Parganas.—Rainfall at Sadar 0·16, Barasat 0·20, Basirhat 0·05, Diamond Harbour 0·30. Weather warmer with cloud. Prospects of standing crops poor. Ploughing going on for the next crops. Fodder and water sufficient. Common rice sells as follows:—

			Srs. a.	Srs. c.	
Sadar	9 to 11 0	} per rupee.
Barasat	9 0	
Basirhat	10 0	
Diamond Harbour	10 10	

Nadia.—Rainfall at Sadar 0·46, Kushtia 0·45, Meherpur 0·26, Chuadanga 0·33, Ranaghat 0·65. Weather fair and seasonable. Prospects of standings crops poor. Rain has facilitated the ploughing of *aus* and jute lands. Water-supply generally deficient. Fodder not sufficient in some places. No cattle-disease. Common rice sells from 8 to 10 seers per rupee. Latest price of rice where test-works are open is 9 seers per rupee. Numbers attending test-works are as follows:—

14th February	1,001
15th "	920
16th "	590
17th "	623
18th "	618
19th "	610
20th "	654

Number of persons who received relief at police-stations during the week—men 70, women 231, children 126—total 427. Numbers on relief-works on Saturday, 20th February—Sadar subdivision—men 2,356, women 843, children 2,043—total 5,242; Meherpur subdivision—men 493, women 83, children 108—total 684; Kushtia subdivision—men 403, women 110, children 60—total 573. Gratuitous relief—men 279, women 891, children 286—total 1,456.

Murshidabad.—Rainfall at Sadar 0·18, Kandi 0·23, Jangipur 0·12. Weather seasonable. Prospects of *rabi* crops not favourable. Gram is likely to be a good crop in Jangipur subdivision. Indigo and mulberry doing well. Pressing of sugarcane still continues. Fodder sufficient. Common rice sells as follows:—

	Srs.
Sadar	10½
Kandi	11
Jangipur	11

} per rupee.

Three test-works opened.

Jessore.—Weather cloudy with drizzling rain at beginning of week. Rainfall at Jessore 0·58, Jhenida 0·33, Magura 0·34, Narail 0·40, Bangaon 0·57. Harvesting of *rabi* crops is almost over. The recent rain has done good to the sowing of *tii* and to *boro* seedlings. More rain wanted. Fodder and water available. Sporadic cases of cattle-disease reported from Bangaon. Common rice sells as follows:—

	Srs.
Jessore	9 to 10½
Jhenida	9½
Magura	9½ to 10
Narail	10½
Bangaon	9 to 10

} per rupee.

Khulna.—Rainfall at Khulna 0·21, Bagerhat 0·11, Satkhira nil. Weather getting hot. *Boro* doing well. Sowing of *tii* going on. Common rice sells as follows:—

	Srs.
Khulna	10 to 11
Bagerhat	12
Satkhira	10

} per rupee.

Numbers employed on four relief works—men 274, children 77—total 351. Gratuitous relief—men 107, women 374, children 246—total 727. Wages calculated at 10 seers per rupee. No cattle-disease. Fodder available. Water getting scarce.

Rajshahi.—Rainfall at Sadar 0·15, Nator 0·07, Nangaon 0·16. No change in the prospects of the *rabi* crops. Transplantation of *boro* continues. Lands are being prepared for *bhadai* rice and jute. Fodder available everywhere. Scarcity of drinking-water reported from some places in Rajapur outpost. Price of rice ranges between 8½ to 12 seers per rupee. Two of five test-relief-works closed on Saturday, the 20th. Report from one not received. Numbers employed on two relief-works—men 509, women nil, children 71—total 580. No gratuitous relief. Price of rice at relief-works, 10 seers per rupee.

Dinajpur.—No rain. Weather seasonable. Condition of standing crops fairly good. No report of any cattle-disease, nor any complaint for fodder and water. Common rice sells from 9 to 12 seers per rupee.

Jalpaiguri.—No rain. Days warm, nights cool. Preparation of land for *betri* rice commenced. Prospects of standing crops favourable. No complaint of fodder and water. Average price of common rice, 8½ seers per rupee.

Darjeeling.—No rain at Sadar and Kurseong, 0·03 at Siliguri. Weather seasonable. Hills—Wheat and barley progressing; *tori* and potatoes being harvested. Terai.—*Haimanti* paddy being threshed; ploughing for jute, *bhadai* rice, and sugarcane going on. Price of coarse rice:—

	Srs.
Hills	7 to 8
Terai	9 to 11

} per rupee.

Bhutla, 13 seers per rupee.

Rangpur.—No rain. Lands being prepared for *aus* and jute. Early *aus* being sown in places. Harvesting of mustard nearly finished. Prospects fair. Common rice selling at 8 to 10 seers per rupee. Fodder and water sufficient.

Bogra.—Slight rain in the district. Average 20 inch. More rain urgently wanted for *aus* and jute sowing. Fodder and water sufficient. Common rice selling at head-quarters 10½ seers, and in the interior from 8½ to 12 seers per rupee.

Pabna.—Rainfall at Sadar 0·50, Sirajganj 0·92. Weather seasonable. Condition of crops partly improved by fall of rain. Price of common rice varies from 8 to 10 seers per rupee. Fodder sufficient.

Dacca.—Rainfall at Sadar 0·25, Manikganj 0·46, Narainganj 0·21, Munshiganj nil. Weather seasonable. Prospects of standing crops not very favourable, but recent rain has done some good. Fodder available. No cattle-disease. Common rice sells at 10 to 11 seers per rupee.

Mymensingh.—Rainfall at Sadar 1·32, Jamalpur 0·13, Kishorganj 0·75, Netrokona 0·33, Tangail nil. Weather getting warmer. The rainfall will facilitate preparation of lands. Common rice sells from 9 to 12 seers per rupee. Drinking-water at present sufficient.

Faridpur.—Rainfall at Sadar ·03, Goalundo ·30, Madaripur ·13. Weather seasonable. Prospects in Madaripur good, elsewhere as before. More rain wanted. Common rice selling at 9½ to 11 seers per rupee. Fodder and water available.

Backergunge.—Rainfall at Sadar and Patuakhali nil, at Pirojpur and Bhola ·51, Weather seasonable. Prospects of standing crops fair. No cattle-disease. Common *aman* rice selling at 9 to 12 seers per rupee.

Tippera.—Rainfall at Sadar ·09, Chandpur ·16, Brahmanbaria nil. Weather bright and cool for the season. Prospects of *rabi* crops not improved. Fodder and water available. Prices of rice :—

	Srs.			} per rupee.
Sadar	10 to 11½	
Brahmanbaria	10 to 12	
Chandpur	10½ to 11½	

Noakhali.—Rainfall at Sadar nil, Feni ·05. Prospects of crops fair. No cattle-disease. Fodder and water available. Price of rice 9 to 11 seers per rupee.

Chittagong.—No rain. Weather hot with occasional clouds. *Rabi* crops suffering from want of rain. Water and fodder sufficient. Rice selling at 8 to 10 seers per rupee.

Patna.—Rain at Bihar 0·05 only. Recent rain has improved prospects of late *rabi* sowings and of millets and sugarcane now being planted, and has destroyed insect-blight in Barh. Slight damage done to crops, ripe or harvested. Prices rising slightly in Barh. Fodder and water for cattle sufficient except green fodder in Bihar. Price of common rice at Patna, 11 seers per rupee. Numbers on gratuitous relief on Saturday, 20th February—men 17, women 19, children 4—total 40.

Gaya.—Rainfall at Aurangabad ·49; other stations nil. Harvesting of *rabi* commenced. Prospects very good. Price of common rice at Sadar, 10½ seers per rupee.

Shahabad.—No rain. *Rabi* harvest commenced. Poppy prospects continue favourable; lancing and leaf-making in progress. Prices almost stationary. Numbers on relief-works in Bhabhua on Saturday, 20th February—men 456, women 414, children 305—total 1,175; gratuitous relief—men 1,303, women 2,550, children 1,929—total 5,782.

Saran.—No rain. *Rabi* doing well. Mustard, *rahar* and peas ripening. Average price of *makai* 9 seers 14 chitaks per rupee. Numbers on relief-works on Saturday, 20th February—Sadar subdivision—men 738, women 949, children 1,273—total 2,960; Gopalganj subdivision—men 2,110, women 2,212, children 3,534—total 7,856; Siwan subdivision—men 9,250, women 15,470, children 6,705—total 31,125. Gratuitous relief—Sadar subdivision—men 1,200, women 4,495, children 1,125—total 6,820; Gopalganj subdivision—men 1,272, women 3,636, children 1,318—total 6,226; Siwan subdivision—men 548, women 1,707, children 471—total 2,726. Chapra Town—Gratuitous relief—men 121, women 547, children 60—total 728; Revilganj Town—Gratuitous relief—men 19, women 62, children 6—total 87; Chapra poor-house 101. Matwa relief-works 5,984, poor-houses 488, doles 302. Manjha poor-houses 49, doles 156. Siwan poor-house 56 (men 10, women 21, children 25).

Champaran.—No rain. *Rabi* crops good. Poppy improving. Opium gathering commenced. Outturn good. Slight rise in prices: Common rice 9 seers, maize 10 seers. Numbers on relief-works on Saturday, 20th February—men 47,073, women 37,035, children 23,394—total 107,502; gratuitous relief—men 5,244, women 10,354, children 12,282—total 27,880. Bagaha figures, about 15,000 workers and 5,000 gratuitous, not received, excluded.

Muzaffarpur.—No rain. Prospects fair. Prices are—Burma rice 9½ seers, common rice 8½ seers, wheat 7 seers, *makai* 10 seers, barley 11 seers, gram 10½ seers, *rahar* 12 seers. *Makai* and *rahar* fix the relief prices. Numbers on relief-works on Saturday, 20th February—Sadar subdivision—men 8,927, women 2,800, children 1,674—total 13,401; Sitamarhi subdivision—men 1,189, women 468, children 275—total 1,932; Hajipur subdivision—men 1,801, women 2,040, children 2,181—total 6,022. Gratuitous relief—Sadar subdivision—men 231, women 561, children 331—total 1,123; Sitamarhi subdivision—men 830, women 1,232, children 1,286—total 3,348; Hajipur subdivision—men 26, women 88, children 16—total 140. Gratuitous relief figures for Majorganj, Bokraha, and Raipura Circle not received—estimated figures are—men 65, women 78, and children 20. Muzaffarpur poor-house—men 31, women 6, children 7—total 44.

Darbhanga.—No rain. Prospects of standing *rabi* crops continue to be fair. Peas are ripening, and in places are being harvested. *Rahar* attaining maturity. Common rice selling at 9 seers and *makai* 10 seers per rupee. Numbers on relief-works on Saturday, the 20th February—Sadar subdivision—men 20,542, women 29,817, children 8,993—total 59,352; Madhubani subdivision—men 31,577, women 28,399, children 13,498—total 73,474; Samastipur subdivision—men 2,210, women 3,053, children 975—total 6,238. Gratuitous relief—Sadar subdivision—men 5,141, women 13,420, children 7,376—total 25,937; Madhubani subdivision—men 4,453, women 12,929, children 7,511—total 24,893; Samastipur subdivision—men 123, women 199, children 121—total 443. Darbhanga Raj-relief works—men 14,525, women 4,795, children 1,867—total 21,097; gratuitous relief—men 2,525, women 5,800, children 3,896—total 12,221.

Monghyr.—Rainfall at Sadar nil. Weather cold with high west wind. Standing crops very promising. Mustard and rape-seed are being gathered. Outturn good. Opium slightly affected by strong west wind. Common rice selling as follows:—

	Srs.	c.	
Monghyr	9 to 11 0
Begusarai	9 8
Jamui	8 to 10 0

} per rupee.

Bhagalpur.—Rainfall at Sadar nil. Weather seasonable and healthy. The recent rain is said to have done some harm to mango blossoms. Westerly wind is beneficial to the *rabi* crops. Deficiency of water reported from one part of Supaul subdivision. Price of common rice has risen from 11 seers to 10 seers 10 chittaks per rupee in Banka; 11 to 10 seers in Supaul; 10 seers 12 chittaks to 10 seers 2 chittaks in Sadar. It remains stationary at 10 seers in Madhipura. Price of *marua* in Supaul has risen from 15 to 14 seers per rupee. No cattle-disease. Fodder sufficient. Numbers on relief-works on Saturday (26th)—Madhipura subdivision—men 2,929, women 1,753, children 632—total 5,314; Supaul subdivision—men 274, women 367, children 253—total 894. Gratuitous relief—Madhipura subdivision—children 251, Supaul subdivision—men 1, and children 34.

Purnea.—Rainfall at Sadar nil. Harvesting of mustard and tobacco nearly finished. Outturn fair. Standing *rabi* crops doing fairly well. Lands are being ploughed for next *bhadoi* crops. Fodder and water sufficient. No cattle-disease. Prices of common rice:—

	Srs.	
Sadar	...	9½
Kishanganj	...	10
Araria	...	11

} per rupee.

Malda.—Rainfall at Shibganj 14. Weather getting hot. Wheat and barley ripening. No cattle-disease. Common rice selling at 8½ to 11 seers per rupee. Fodder sufficient. Want of drinking-water in some places reported from Gomastapur and Shibganj thanas.

Sonthal Parganas.—Rainfall at Sadar 16. Weather clear with strong west wind. *Rabi* fair in Godda and Pakour; otherwise prospects unchanged. Prices of food-grains stationary. Fodder getting scanty. Water-supply sufficient.

Cuttack.—Rainfall 0.64. Rain has benefited the *dalua* and *ghaimung*. Cattle-disease in places. Fodder sufficient. Rice only available in some places in small quantities. Common rice sells at:—

	Srs.	c.	
Cuttack	11 13
Jajpur	14 7
Kendrapara	14 7
Banki	15 12

} per rupee.

Balasore.—Rainfall at Sadar 1.87. Anxiety of loss of standing *rabi* crops with fear of scarcity of water and fodder removed by rain. *Sarad* rice being threshed; *dalua* rice flourishing well, and is in ear in places; sugarcane being pressed. Price of rice varies from 12 to 16 seers per rupee in the interior. Rice sells at 12 and 13 seers per rupee at Balasore and Bhadrak respectively. Fodder and water sufficient.

Angul.—Rain on 16th and 17th. No crop on the ground except garden vegetables. *Kutth* and *china* harvested. Cultivators engaged in ploughing. Condition of people good. Cattle-disease continues. Fodder sufficient. Price of rice stationary.

Puri.—Rainfall at Sadar 4.25, Khurda 6.2, Satpura 5.12, Banpur 3.70, Pipli 3.0. *Dalua* and *mug* growing fairly well. *Mandia* ripening. Land being ploughed for next *sarad* and sugarcane crops. Fodder and grains scarce in tracts adjoining the Chilka, and relief-works have been started. Price of common rice stationary.

Hazaribagh.—Rainfall at Sadar 1.02, Giridih 3.2. Weather hot. Pressing of sugarcane almost completed. Prospect of poppy good. *Rabi* fair. Rice sells at 8 to 9 seers per rupee.

Lohardaga.—Rainfall 1.37. State of standing crops good. Ploughing continues. Rice sells at Ranchi 9 seers, and in the interior from 8 to 12 seers per rupee. Fodder and water sufficient. Cattle-disease reported from some police-stations. Grain stocks sufficient for the present.

Palamanu.—No rain. Weather bright and becoming hot. Rain of previous week did some damage (not much) to *rabi* in eastern part of district. *Rabi* doing well; if no more rain. *Rab* and *mahua* should yield well. The price of common rice under 9 seers prevailed in 57 markets, against 37 in previous week; at 9 seers in 21 against 41; and over 9 seers and under 10 seers in 12 against 13. Burma rice is on the way here from Gaya. Number on relief-works—2,602 and on gratuitous relief 409. Cattle-disease reported from Balumath thana.

Manbhum.—Rainfall at Sadar 1·22, Gobindpur ·52. Weather seasonable. Sugar-cane being planted in places. Cattle-disease reported from thanas Raghunathpur and Burrar bazar. Fodder and drinking-water both reported to be insufficient in thana Raghunathpur, and the latter in thana Gourangdih. Average price of common rice 10 seers per rupee at Sadar; 9 and 9½ at Gobindpur. Stocks of food-grains sufficient at present. Nine test-works in operation. 2,403 persons on regular gratuitous relief, and about 1,000 more on casual gratuitous relief. Recent rains have softened the soil, and ploughing is in progress throughout the district.

Singhbhum.—Rainfall at Chaibassa 1·70, Cuackradharpur 1·53, Ghatsilla 1·47. Prices stationary. Rice plentiful.

General Summary.—There was general rain in South-West and East Bengal, Orissa and Chota Nagpur during the week. The rain has to some extent benefited the *rabi* crops, and has facilitated ploughing for the autumn crops. Spring rice is doing well. In Bihar the harvesting of *rabi* crops and the gathering of opium have begun. The pressing of sugar-cane is still going on. The fodder-supply is generally sufficient. The want of drinking-water is beginning to be felt in some districts. In the distressed districts the prices of the food-grains on which the relief wages are based are—Nadia (common rice) 9 seers, Khulna (common rice) 10 seers, Rajshahi (common rice) 10 seers, Patna (common rice) 11 seers, Shahabad 10½ seers, Saran (Indian-corn) 9 seers 14 chitaks, Champaran (Indian-corn) 10 seers, Muzaffarpur (Indian-corn) 10 seers, Darbhanga (Indian-corn) 10 seers, Bhagalpur (common rice) 10 seers. These figures show a slight fall in Rajshahi and Patna, and a slight rise in Champaran; elsewhere prices were stationary.

The numbers on relief-works and in receipt of gratuitous relief on Saturday, the 20th February, were—

Relief-works—

Nadia	...	6,499 (men 3,252, women 1,036, children 2,211).

The mean pressure of the seven days	Inches.
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29.910
The total number of hours of bright sunshine	Hours.
The maximum possible number of hours of sunshine	38.7
				79.8
The mean temperature of the seven days	70.3
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	73.4
The extreme variation of temperature	30.9
The maximum temperature	84.1
The highest velocity of the wind in one hour	Miles.
				11
				%
The mean relative humidity	75
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	67
The total fall of rain from 14th to 20th February 1897	Inches.
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0.17
The total fall from 1st January to 20th February 1897	0.30
The average fall of the corresponding period for 24 years, Surveyor-General's Office	1.63
				1.29

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph. The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed, open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

☁ dew; — fog; o, overcast; g, gloomy; d, drizzling rain.

Results of the Barometrical and Thermometrical Observations taken at the Meteorological Office, Chowringhee, from 14th to 20th February 1897.

DISTRESS IN THE PATNA DIVISION.

No. 582(Fam.).—The 26th February 1897.—The following are published for general information.

M. FINUCANE,
Secretary to the Govt. of Bengal.

No. 581(Fam.), dated Calcutta, the 26th February 1897.

From—M. FINUCANE, Esq., Secretary to the Govt. of Bengal,
To—The Commissioner of the Patna Division.

IN acknowledging the receipt of your report No. 491F.G., dated the 21st February 1897, with its enclosures, on relief operations in the Patna Division, for the half-month ending the 13th February, I am directed to say that the Lieutenant-Governor has perused it with much pleasure. It shows that every care and attention is being given by yourself and the Collectors to famine relief administration in every detail, with eminently satisfactory results.

2. *Paragraph 45 of your report.*—The Lieutenant-Governor agrees with you in thinking that Mr. Hare's observations on the necessity of having a reserve of both Charge Superintendents and Circle Officers are judicious, and the Lieutenant-Governor hopes that the Collector has already made the arrangements suggested.

3. *Paragraph 51 of your report.*—With regard to Famine Statements D and E (Forms 5 and 7) for the district of Darbhanga, you observe that they probably do not include figures relating to the relief works under the Public Works Department. I am to draw your attention to Government order No. 434-Fam., dated the 13th February 1897, and to request that steps may be taken in future to give figures for works under the Public Works Department, as well as those under the civil officers, in the statements and accounts. The Lieutenant-Governor agrees with you that from the figures abstracted in paragraph 51 of your letter it is clear that more and more control is being gained over the relief-workers, and that the rates per thousand cubic feet of earthwork now arrived at, viz. Rs. 3-1-11 and Rs. 2-12-10, are, if correct, moderate considering that many of the works are tanks.

No. 491F.G., dated Bankipore, the 21st February 1897.

From—J. A. BOURDILLON, Esq., Offg. Commissioner of the Patna Division,
To—The Secretary to the Government of Bengal, Revenue Department.

I HAVE the honour to forward herewith my famine report under sections 13 and 24 of the Famine Code for the two weeks ending 6th and 13th February 1897.

PART I.—INTRODUCTION.

2. As usual, I employed part of the interval between the dates for submission of my fortnightly reports in making a rapid tour, which on this occasion took me into the Muzaffarpur district, which I had not hitherto visited except for a few hours at a time.

3. Leaving Bankipore on the night of the 11th February, I reached Muzaffarpur in heavy rain at midnight. After discussing several matters of importance with Mr. Hare, I left again at midday and proceeded to Sitamarhi *via* Samastipur and Darbhanga; at Lahiria Sarai Mr. Carlyle met me, and at Darbhanga Mr. Mills joined us, and I received reports from both those officers.

On Saturday, the 13th, Mr. Russell, the Subdivisional Officer, drove me to Belsand and back (14 miles south). We stopped in several villages on the road, and visited the relief works going on on the road: at Belsand I met Mr. H. Crowdy, the Manager, and Mr. Bradley (Assistant District Superintendent), the Charge Superintendent, and inspected the poor-house there, and the books and returns of the charge. On the 14th we drove to Shiuhar and back (15 miles south west). As it was Sunday there were no relief workers visible, but we stopped and made enquiries in several villages, and I checked the gratuitous lists in one village on the road. At Shiuhar I met Mr. Reily (Assistant District Superintendent) who is temporarily Charge Superintendent there, and went through his books with him besides inspecting the poor-house. After returning to Sitamarhi, I visited the local relief works and the poor-house; at night Mr. Russell and I went by train to Pupri. On the 15th I inspected the relief works and poor-house at that place with the Charge Superintendent, Mr. Clair, and the Subdivisional Officer, and drove on to Rajkhand Factory (14 miles), where we were met by Mr. Hare. In the afternoon Mr. Hare and I proceeded to Muzaffarpur (17 miles) passing along the Rajkhand road, which has been and is being raised and broadened by famine labour. Leaving Muzaffarpur again at midnight of the same day I reached Motihari in the morning, and spent the whole of the 16th with the Collector over famine matters. We visited the poor-house and the chaukidari parade at the Sadar thana, and I discussed many matters with the Joint-Magistrate, the District Superintendent of Police, and the Civil Surgeon. In the evening I left again for Bankipore, arriving there at 6-30 on the morning of the 17th.

4. A memorandum of my observations and conclusions with the necessary instructions has been forwarded to the Collector of Muzaffarpur.

PART II.—DISTRICT REPORTS.

5. *Patna*.—The state of this district remains excellent: the crops are good, and though some little damage from caterpillars is reported, Mr. Inglis states that if ordinary weather continues, the *rabi* will be a better crop than has been reaped for years. The harvesting of the earlier crops, such as peas, mustard and *rahar*, has begun, and gives employment to the labouring classes which will continue till the middle of March. Rain fell on the 11th and 12th, averaging half an inch all over the district, and reaching an inch at Bihar and nearly an inch and-a-half at Hilsa: as it was succeeded by fine clear weather, its effect was wholly beneficial, the crops on the threshing floors sustaining no material damage.

6. Prices are rising slightly, but private charity still supplies the wants of the pauper population, and gratuitous relief appears not to be required. A poor-house, however, is almost completed at Patna, and the District Board are building rest-houses at suitable spots along frequented routes, where shelter and a cooked meal is given to all wayfarers who choose to ask for them. The cost of the dole, as shown in Form No. 7, is very high, and the Collector has been asked to explain the figures. All relief works have been closed as such.

7. It was stated in my last report that for the first time imports had exceeded exports, the difference being 9,269 maunds: it now appears from the complete figures since received that a net addition of 16,848 maunds should have been made to the exports, turning the excess of imports to an excess of exports amounting to 7,579 maunds. During the fortnight under report the exports again exceeded the imports by 12,358 maunds, the figures being 60,678 maunds and 48,320 maunds. Two-thirds of the imports were rice, and nearly half the exports "other food-grains." The exports reported up to date from the time that reports began are more than double the imports, the figures being 4,70,796 maunds and 2,10,458 maunds. No better proof could be adduced of the general prosperity of the district.

8. *Gaya*.—Not less satisfactory is the report from this district also. An average of 1.13 inches of rain fell throughout the district; and as the dull weather was quickly succeeded by sunshine, little or no damage was done to the grain on the threshing floors, while the standing crops were greatly benefited: it is not too much to expect a full average *rabi*, or 16-anna crop. The harvesting of the earlier crops has commenced, and will give employment till the

middle of March. Prices generally are steady, but there is a rise in that of wheat.

9. The import and export traffic has been slack during the fortnight under report, the imports amounting only to 5,504 maunds and the exports to 1,695 maunds. It remains to be seen what effect the late orders sanctioning a bounty on grain exported to Palamau will have on the export trade. About 600 maunds of rice have already been exported thither. I am writing to the Collector of Gaya to ascertain from the Deputy Commissioner of Palamau what amount goes into his district from Gaya, in order that it may be noted in the Gaya reports.

10. The only kind of relief that is going on is the distribution of cooked food to travellers and others along the Grand Trunk Road at Kusa, Madanpur and Aurangabad: Madanpur is a little over 20 miles from Kusa, and Aurangabad is about 14 miles further on. About 112 persons were fed daily at Kusa and 107 at Aurangabad; the Madanpur kitchen is only just opened. All are maintained at private expense. The District Engineer has informed me in conversation that most of those relieved are people returning from Bengal, many of them in bad condition; Mr. Grierson in a private letter confirms this information, and adds that there is also a large number of people still going east from the North-Western Province, of both sexes and all ages.

11. Labour is now coming to the South Bihar Railway, and this work should provide employment throughout the summer. The Collector has not stated what has wrought this change, and he will be asked whether there has been any advance in the rates offered.

12. A large sum (Rs. 80,800) has been advanced during the current financial year under the Land Improvement Loans Act, of which Rs. 9,000 have been advanced during the fortnight under review.

13. *Shahabad*.—In my last report I stated that the Collector had found that distress was becoming acute in the Bhabhua subdivision, and was making arrangements to meet it. These arrangements have now been completed, and have been specially reported by him in his letter No 3282G. of the 14th instant, which is forwarded with the present district narrative.

14. The area affected is unaltered, save that a fresh tract is under observation, *i.e.*, the strip of low land between the Rhotas hills and the Sone from Akbarpur to the south-western boundary of the district. Enquiries are being made here, and no definite opinion can yet be formed as to the condition

Number.	Name of charge	Area.	Population.	Number of circles.
1	2	3	4	5
1	Ramgarh	316	69,804	5
2	Chand and Champur	212	1,23,123	6
3	Bhabhua and Chenari	224	1,04,118	6
4	Adhaura plateau	500	14,711	4
	Total	1,312	3,33,156	21

of the people. The remainder of the affected area has been arranged in charges and circles as shown in the marginal statement. In charges Nos. 2 and 3 the circles have been fully manned. Mr. F. C. B. Birch has been placed in charge of No 3, and Mr. D. Percy Smith, who reported himself to me here yesterday, will take charge of

No. 2, which is at present under the Inspector of Police. For the Adhaura and Ramgarh charges, which are so far partially manned by Circle Officers, and where distress is not imminent, no Charge Superintendent will be appointed for the present, the Circle Officers reporting direct to the Subdivisional Officer. These arrangements have my approval. As Circle Officers began work from the 6th instant only, the returns are not yet quite complete.

15. Mr. Marindin's estimate of expenditure, received with the separate letter above quoted, is Rs. 79,727 for 1896-97 and Rs. 3,07,834 for 1897-98, or Rs. 3,87,561 in all. These figures are composed of the following items:—

	1896-97. Rs.	1897-98. Rs.	Total Rs.
Relief works and gratuitous relief, Bhabhua subdivision and Chenari	75,727	2,99,834	3,75,561
Gratuitous relief through police elsewhere, poor-houses, &c.	4,000	8,000	12,000
Total	79,727	3,07,834	3,87,561

I hope that the expenditure will not reach this amount, and at any rate no grant from Provincial Revenues is yet required, as the District Board have sufficient funds to meet the present needs of the district. In 1873-74, when the effect of the Sone Canals was only a fraction of what it now is, and when the rice crop was 2 annas only in place of 6 annas, the total expenditure on relief works and gratuitous relief (so far as I can make out from the figures supplied by Government) was Rs. 3,82,683, of which Rs. 2,22,939 represent cash payments and Rs. 1,59,744 the value of grain at Rs. 4 a maund. These figures are exclusive of loans and of grain advances.

16. Except in the affected tract, where comparatively little *rabi* is grown, the promise of the winter crops is excellent. Rain fell on the 11th and 12th instant, from about three-fourths to an inch, and a quarter all over the district, which has done little damage and much good: caterpillars are reported in some places. The price of common rice is stationary, but there has been a marked fall in the price of those food-grains which are earliest harvested, viz., wheat, grain, peas and *masur dal*.

17. There has been a shrinkage of both imports and exports, the figures being 24,895 maunds and 7,999 maunds, respectively, against 46,806 maunds and 23,647 maunds during the three weeks covered by my last report: the balance in favour of the district is, therefore, 16,896 maunds as against 23,159 maunds last reported and 15,994 maunds in the fortnight ending 9th January. The imports were nearly all rice (24,428 maunds), which came from the districts of the Burdwan Division: most of the exports were "other food grains." Buxar shows by far the heaviest traffic in imports.

18. The Collector reports that in the affected area grain stocks are said to be very low: he has appointed grain contractors in the Chainpur Chand charge under section 35 of the Famine Code. I have called his attention to the recent orders of Government sanctioning a bounty for grain imported into Palamau, and consider that it may be necessary to apply for similar orders for the Adhaura charge later on, in order to supply the people with grain before the rains render the passes into the hills impracticable.

19. Here, as in Gaya, there are a number of poor travellers along the Grand Trunk Road, and for the relief of them a poor-house has been constructed at Sasaram, and kitchens and shelters have been opened at four places situated at convenient distances along the road. The number of persons relieved appears to have averaged 564 per diem, though this is not quite clearly stated. It is also reported that a good number of persons have left their homes in search of work; the Collector will be asked whether this is a usual incident or a novelty.

20. Four relief works were opened during the period under review. One of these, viz., the Hata-Durgaoti road, which has been opened for a long time, is now drawing to a conclusion, which accounts for the falling off in the number employed. The number of male units employed was 2,810 in the second week and 3,879 in the first, while those on daily wage irrespective of task was 2,099 to 2,267. When the Circle Officers have completed their enquiries, I hope that many of these will be relieved at their homes, and I have instructed the Collector to this effect. The outturn of work per male unit is fair, ranging from 30 to 52 cubic feet, which is doubtless due to the fact that about half the workers are of the A class. The cost per 1,000 cubic feet is also low. The average daily wage irrespective of task is higher than that of the male unit, which should not be the case unless there is a large number of special gangmen in the former. The new programme of relief works has not yet been received by me.

21. The number of persons on gratuitous relief, including those fed at the kitchens and poor-houses, appears from Form No. 6 to have been 8,229, as against 599 in the previous report; but in the body of the report the Collector states that, so far as returns have been received, they show that those on charitable relief proper were 6,972. Mr. Marindin thinks that the opening of relief circles will lead the public generally to suspend their charity all over the district. I have pointed out that it is quite impossible for Government to take over the support of the paupers all over Shahabad, and that in parts of the district where the crops have been good the well-to-do must, as in ordinary years, be left to support the pauper population.

22. *Saran*.—No material change is reported in the condition of affairs in this district, but the Collector has been on tour through the eastern portion of Gopalganj, a part of the district which he had not previously visited, and the result is that he has somewhat modified the opinions enunciated in his last report. He considers the Siwan subdivision pretty safe, but the Gopalganj subdivision will require careful attention, and later on relief will be wanted in parts of the Sadar subdivision. I consider this forecast very near the truth.

23. Crop prospects continue good; the rain of the 11th and 12th instant averaged from $\frac{1}{3}$ to $\frac{1}{2}$ an inch, running up to $\frac{3}{4}$ th of an inch in places: it has done, as elsewhere, no damage to the crops, and great benefit to the backward *rabi*. The latter is estimated at 16 annas in the Siwan subdivision, about 10 to 12 annas in the Sadar and the same in Gopalganj taken as a whole. Bearing in mind the energy of the cultivators and the extra area sown in *rabi* this year, I feel pretty sure that the winter crops of 1896-97 will be quite up to the full average of ordinary years.

24. No apprehension is felt as to food-stocks, and the shrinkage in the amount of imports may mean either that money is tight or that the baniya's golahs are full: Burma rice is said to be available everywhere. The figures for road, river and rail show imports 92,675 maunds against 2,00,205 maunds, and exports 10,193 maunds against 26,560 maunds in the three weeks of the previous report: the balance in favour of the district is thus 82,482 maunds, against 1,73,705 maunds in the preceding three weeks.

25. There were 27 Government relief works open during the fortnight as against 23 in the previous period. The following abstract statement gives the most important information on this head and that of gratuitous relief:—

Week ending.	Number of works open.	Daily outturn per male unit	AVERAGE DAILY NUMBER OF MALE UNITS ON—			
			Task work.	Daily wage irrespective of task.	Gratuitous relief including dependents.	Total.
1	2	3	4	5	6	7
<i>A.—Under Government.</i>						
23rd January	24	25	8,158	731	5,835	14,724
30th "	23	23	9,185	917	4,486	14,618
6th February	27	27	10,464	781	13,560	21,805
13th "	27	30	6,917	1,029	13,068	21,014
<i>B.—Under the Mutua Raj.</i>						
21st January	6	28.9	1,858	169	931	2,958
28th "	6	39	1,734	186	558	2,478
6th February	31	1,803	304	604	2,711
13th "	33	1,777	356	646	2,779

The figures show some falling off in the number on task work, due to the cutting of the *rabi* having commenced: the outturn per male unit reported in Form No. 7 is a little better than in the previous report, having been 27 and 30 cubic feet against 28, 25 and 29 cubic feet: the average earned by each male unit has been 1 anna 3 pies and 1 anna 4 pies, against 1 anna 2 pies 1 anna 2 pies and 1 anna 3 pies. The cost per 1,000 cubic feet is Rs. 2-13, which is about the same as before. The average of the daily wage irrespective of task is still somewhat high, being 1 anna 8 pies and 1 anna 5 pies. This is, no doubt, due here, as in other places where the number of task workers is not very large, to the influence of the higher wages paid to the mates, special gangs and odd men of various kinds.

26. The total number on task work during the last week of the fortnight were men 15,842, women 22,983, big children 14,202, small children

5,300; total 58,327. The unusual proportions in this crowd of workers have been noticed and explained in previous reports. It is to be expected that the numbers will decrease still further for a time as work in the harvest field increases, but Mr. Earle is about to start new works in the Gopalganj subdivision under Public Works Department agency. One of the most important and largest of these is the excavation of more channels in connection with the Saran Canals. Mr. Buckley has lately gone up to Chapra in connection with this scheme. The above figures do not include any for works under Public Works Department agency.

27. The daily average number of persons in receipt of gratuitous relief was 14,352, and the average daily dole was about 9 pies. Seven poor-houses were open during the period under review, which fed an average of 700 persons a day.

28. *Champaran*.—The situation in this district remains unaltered, except in three particulars, *i.e.*, a better task has been obtained, larger numbers are now on gratuitous relief instead of being on the relief works, and the Public Works Department have commenced to take over the larger works. These will be dealt with in turn.

29. The prospects of the crops continue good: the rainfall of the 11th and 12th was lighter here than in other districts, but was sufficient to freshen up the *rabi* without doing any damage whatever: the result is that the Collector is now able to forecast an average crop of *rabi* (16 annas) over the area sown. It is feared that this area is a good deal below the normal, but even so it seems safe to predict a crop equal to three fourths of that of an ordinary year.

30. Prices are either stationary or show a tendency to fall owing partly to the importation of Burma rice. Prices are a good deal higher at out-of-the-way places. The Collector's remarks in his 8th paragraph deserve careful perusal; it would indeed be an aggravation of the present crisis if it were found that the present tightness of money prevented importation. The matter will be further considered, and, if necessary, separate proposals submitted.

31. The food-grain traffic of the fortnight has been comparatively insignificant: the imports by rail aggregating 11,351 maunds, and the exports 1,678 maunds, as against 14,745 maunds and 4,573 maunds in the previous three weeks: the result is a balance of 12,673 maunds in favour of the district, against 10,472 maunds at the end of the previous period. The imports were mostly rice and paddy from Calcutta and the Bardwan Divisions, and the exports chiefly comprised the same grains to Saran. These figures take no account of the road traffic which is still considerable, for rice is still coming in from Nepal all long the frontier, and the Saran statistics show that during the period under review 1,139 maunds passed from Champaran into Saran through Gobindganj Ghat.

32. There is no general deterioration of health. In consequence of statements made to me, I proceeded to Motihari on the 16th instant, and in company with the Collector and other officers visited the poor-house and attended the *ch'akidari* parade. I saw a large number of persons brought in by the *ch'akidars*, many of whom were in bad condition: a sensible proportion of these were professional beggars and cripples, and many of the others were already in receipt of gratuitous relief. They had been hitherto relieved through the police under sections 12 and 166 of the Famine Code, and it was reported that their numbers had risen very rapidly during the past fortnight. The explanation is that many of the voluntary Circle Officers have been unable to complete their lists for the reasons cited in paragraphs 5 and 25 of Mr. Macpherson's report, so that instead of the destitute and dependents being relieved in their villages, they either received aid from the police or were relieved as dependents on the works. Mr. Macpherson has been busy for some time in appointing paid Circle Officers to assist the voluntary officers. Here this aid seemed necessary, and the result is already apparent, as will be noticed below. Meanwhile these necessitous persons have not failed to get relief, though they may not have received it in the most suitable manner. The matter is referred to in paragraph 35 of my last report.

33. As regards relief works, the process of taking over by the Public Works Department, mentioned in my last report, has been continued in the period under review; but, for reasons mostly beyond their control, this transfer has not been carried out so rapidly as had been anticipated by too sanguine persons: by the end of the period under report only 7 works, according to the Collector, had been taken over out of 23. As matters are still in a state of transition, it is hardly fair at present to compare the results of Civil and Public Works agency.

34. Taking the works as a whole then, whether under Civil or Public Works agency, it appears that on the 13th February there were 75 works open, against 61 on that day fortnight. The following statement compares the principal figures in respect of relief works and gratuitous relief during the last and the preceding fortnight:—

Week ending.	Number of works open.	Daily outturn per male unit.	AVERAGE DAILY NUMBER OF MALE UNITS ON—			
			Task work.	Daily wage irrespective of task.	Gratuitous relief including dependents.	Total.
1	2	3	4	5	6	7
23rd January	14	71,977	1,216	4,004	80,197
30th " ...	61	15	74,261	1,716	4,730	80,740
6th February	36½	62,800	2,057	7,515	72,392
13th " ...	75	19	67,175	2,742	15,222	85,129

These figures show a sensible improvement. The fact that most of the works are tanks, and the other considerations stated in Mr. Macpherson's 18th paragraph, fully explain, in my judgment, the apparently small outturn in the last week, and the small outturn which has been apparent throughout: they also justify the apparently high cost per 1,000 cubic feet, which for the last four weeks has been as follows: Rs. 5-14-8, Rs. 4-14-4, Rs. 2-10-6 and Rs. 4-6-1. These rates would not have been so low as they are, had not the penal wage been rigorously enforced in the attempt to restore and enforce order. According to the Collector the total number of persons on Government relief works on the 13th February was 117,339, as against 97,319 on the 30th January; but in addition to this there was a considerable, though undetermined, number on private relief works, some figures for which are given in the Collector's 20th paragraph. So far as these statistics can be relied on, the average daily number of persons on private relief works during the fortnight was 1,767. The Bettiah Raj has not yet decided on what course to pursue in order to benefit its raiyats, as the Maharani is unwell and unable to attend to business, but it is hoped that substantial aid will be given in the execution of the Tribeni Canal scheme; in the meantime a poor-house has been opened and some small works have been undertaken.

35. During the week ending 13th February as many as 19,146 persons were gratuitously relieved, against 9,925 in the previous week. These figures, and those in the statement above, show that the circle organization is being rapidly completed, and that gratuitous relief is being more largely given in villages. The Collector fully appreciates the advantages of this system which I have repeatedly brought to his notice, and I look forward to seeing the works cleared within the current fortnight of a large number of dependents and D class labourers, and the police relieved of the functions which they have been discharging as a temporary measure.

36. A poor-house has been constructed so far at Motihari only. I visited it on the 16th instant, when it contained about 70 inmates. The average for the week ending 13th February was 35. I have desired the Collector to construct a poor-house at the head quarters of each charge without delay.

37. *Muzaffarpur*.—The chief feature in the history of this district for the first fortnight of February is a large increase in the numbers on relief works and in the receipt of gratuitous relief.

38. Crop prospects continue good, and the *rabi* ought to yield nearly three-fourths of the average outturn of the district. Mr. Hare reports that in Hajipur the area sown is 25 per cent. in excess of the normal; and though this is not the case throughout the district, especially in the north, yet I am confident that there is a general excess which will compensate to some extent for some failures. I noticed during my trip through Sitamarhi that the crop, though healthy, is backward; but towards the north of the Division the *rabi* is always later than it is to the south. The rainfall ranged from 1.42 of an inch at Shiuhar in the Sitamarhi subdivision to .32 in Sitamarhi itself. On the average, half an inch fell all over the district, and did no damage and much good to the backward crops.

39. Prices are practically stationary; and as Mr. Hare points out, the hardness of prices indicates a sufficiency of food-stocks.

40. The imports are 52,939 maunds and the exports 5,308 maunds, as against 55,935 maunds and 11,111 maunds for the previous three weeks: this shows a distinct advance, and the balance in favour of the district for the fortnight is 47,631 maunds, as against 44,821 maunds for the previous three weeks. Rice and paddy provide just half the total imports, and 20,082 maunds, or almost all the remainder, were "other food-grains." Rather less than half of the exports come under the same head.

41. The number of relief works has increased from 23 to 36, but the figures for 33 only are given in Form No. 5. The following abstract taken from Form No. 7 gives the principal figures for the past and previous fortnight:—

Week ending.	Number of works open.	Average daily outturn in cubic feet.	AVERAGE DAILY NUMBER OF MALE UNITS ON—			
			Task work.	Daily wage irrespective of task.	Gratuitous relief, including dependents.	Total.
1	2	3	4	5	6	7
23rd January ...	23	80	4,723	184	4,291	9,198
30th " ...	22	76	7,981	217	19.8	10,1.6
6th February ...	29	82.13	16,982	374	12,376	29,832
13th " ...	33	80.68	16,727	630	11,189	31,516

It will be observed that the numbers on relief works have increased cent. per cent., while those in the receipt of gratuitous relief have increased in a much larger proportion. This is as it should be, for, so long as the helpless and dependents are assisted, the general population can afford to wait a little longer before they seek the relief works. The outturn per male unit is extraordinarily high, but I have satisfied myself in my tour through Sitamarhi that the measurements are correct, and that the recorded task is really done. I found several instances where particular gangs had done more than 100 cubic feet per male unit. One explanation is that the proportion of adult males to others is very large, and another that all the work that I saw, and most of the work in the district, is road work, with short lead and lift and very light soil. The Collector and his subordinates have from the first insisted on a fair task being done, and the result shows that the task can be done and a fair wage obtained, if the labourers only try: a good many have been deterred, I think, by the fact that little or no concession was made (in Sitamarhi at any rate) when labourers first came to the works. I am of opinion that more relief through the medium of works is needed, and I have asked the Collector to open several large works under Public Works Department agency: a letter, later than his report, informs me that 9 works, each capable of employing 6,000

persons, will be opened by the 1st proximo. These works will be conducted strictly on the principles of the Public Works Department Resolution No. 420M.P.I.; and as they have been started after sufficient notice, they should afford most important evidence as to the popularity and efficiency of that system.

42. From what I saw on my tour, I considered that gratuitous relief should be somewhat more liberally granted, and I am glad to see from the present returns that my instructions to that effect have already been anticipated.

43. The list appended to Mr. Hare's tables shows that the Darbhanga Raj relief works in the Parihar Circle employed an average of 758 persons, or 693 male units, during the fortnight: about three-fourths of these were men.

44. On behalf of Government five poor houses are now open, all in Sitamarhi, except that at Muzaffarpur; one will shortly be opened at Hajipur. I visited all the four in the Sitamarhi subdivision, and found the arrangements good, except that Medical Officers are badly wanted: they have been applied for. The average daily number of inmates has not been stated, but it is about 50. The Darbhanga Raj poor-house at Parihar had a daily average number of 211.

45. Mr. Hare reports that he requires assistance in some of his larger charges; the matter will be separately dealt with. His observations on the necessity of having a reserve of both Charge Superintendents and Circle Officers are most judicious.

46. As regards agricultural loans, I have authorized all officers to make them freely up to the limit of their existing allotments, and to report whether they wish for additional funds. The matter is further referred to below.

47. *Darbhanga*.—In this district the note of the fortnight is an apparent increase in the numbers on gratuitous relief, a more rigid control over the relief workers, and a continuation of the operation of making over large works to the Public Works Department.

48. Gentle rain fell throughout the district on the 11th and 12th instant, giving an average all round of a quarter of an inch; this was wholly beneficial, and the prospects of the *rabi* crop continue excellent. The area sown, however, is reported to be a good deal less than usual, especially in Madhubani.

49. Prices show little fluctuation. Common rice is a little cheaper in Samastipur and a little dearer in Darbhanga; Indian-corn, which is being eaten up everywhere, is a little dearer in consequence; and *sahar*, which is being harvested in the south of the district, has not yet had any effect on the market.

50. The traffic in food-grains has been brisker than in the previous three weeks, as the imports aggregate 50,591 maunds against 50,058 maunds, and the exports were 20,229 maunds against 13,266 maunds: the balance in favour of the district is, therefore, 30,362 maunds for the fortnight, as against 36,792 maunds for the previous three weeks. As usual, the majority of the imports consists of rice and paddy (15,049 and 13,107 maunds), but "other food-grains" give a total of 21,954 maunds, most of which came to Darbhanga itself, and nearly half the exports were "other food-grains."

51. There are now 98 relief works open in Darbhanga, as against 83 at the end of the previous fortnight. The following abstract gives some of the most important figures in this connection:—

Week ending.	Number of works open.	Average daily outturn of work.	AVERAGE DAILY NUMBER OF MALE UNITS ON—			
			Task work.	Daily wage irrespective of task.	Gratuitous relief, including dependents.	TOTAL.
1	2	3	4	5	6	7
23rd January	77	34.4	67,583	872	47,316	111,770
30th " "	83	29.00	80,238	2,044	73,228	145,448
6th February	..	26.8	82,346	1,306	64,821	155,551
13th " "	98	32.2	77,946	2,116	70,128*	150,133

* N.B.—The Collector has since written to say that by an error in compilation, there is an excess of about 30,000 in the figures from Madhubani.

These figures, which are taken for the most part from Forms Nos. 5 and 7, do not altogether tally with those given in the body of Mr. Carlyle's report.

The explanation probably is that while the statements do not include Public Works Department figures, the statistics quoted by Mr. Carlyle in his paragraph 111 (a) probably do so. As the number of works taken over is now considerable, the omission is unfortunate, and it makes a criticism of the above figures hardly worthwhile. However, they may be taken as those of civil agency works only, and in that sense they afford ground for satisfaction: it is clear that more and more control is being regained over the workers, as is indeed definitely stated by Mr. Carlyle, and the rates per 1,000 cubic feet given in Form No. 7, viz., Rs. 3-1-11 and Rs. 2-12-10, are very low, considering that many of the works are tanks: they have of course been reduced by the vigorous enforcement of the penal wage which has, very properly, been freely used in order to coerce contumacious gangs.

52. Subject to whatever may be reported later about the mistake of 30,000 in the Madhubani figures, gratuitous relief appears to have again increased, and the daily number of persons in receipt thereof now nearly equals that of the male units on relief works: the reasons for this unusual proportion have been explained in previous reports. The increase in the past fortnight, if real, is due to the increasing pressure of high prices, and is in some respects a complement of the better figures for outturn of work on relief works. In several of the thanas of the district relief works have not been started up to the full needs of the population, and it is in these that gratuitous relief plays the chief rôle: as the full programme of relief works is worked up to, I confidently expect that not only will the absolute numbers on gratuitous relief be somewhat reduced, but their proportion to that of persons on relief works will be diminished. The Collector has, during the past fortnight, paid a visit to the head-quarters of each Charge Superintendent, and he writes that the supervision which the Charge Superintendents have found time to exercise over Circle Officers exceeded his expectations.

53. Poor houses are open at four places, but I have authorised the Collector to open one at the head-quarters of each charge for the purposes of sections 111 (2) and 71 of the Code.

PART III—CONCLUSION.

54. No material change in the situation has occurred during the fortnight under review, but such changes as have taken place give cause for satisfaction.

55. Prices are practically stationary. The harvesting of the early crops has fairly begun in South Bihar, and this has led to the employment of a good deal of labour in the fields which will increase in volume as the month progresses: the harvest in North Bihar is always later than in the south, so that the effect in the most affected districts is not yet so apparent; but, on the other hand, it will last later, and carry the people well on into March. It is to be observed that, on the whole, the harvest is earlier this year than usual.

56. Rain fell all over the Division on the 10th, 11th and 12th, and appears to have been heaviest in South Bihar: Darbhanga received but little. As the fall was gentle and steady, and was not accompanied by wind or hail, while it was rapidly followed by sunshine and a west wind, the effect has been most beneficial, and has still further improved the already excellent prospects of the *rabi*. The promise of the poppy continues good, especially in South Bihar. Caterpillars are reported from one or two places south of the Ganges, but no great harm has been done.

57. Another effect of the frequent light showers which we have had since Christmas is to enable the raiyats to cultivate their fields, and the extent to which this has been done everywhere is quite unusual. A very large proportion of the rice lands have already been ploughed or dug up, many of them more than once, and I am assured on all hands that this process will be repeated, so that the lands may be ready for early sowings of *bhadoi* as soon as the monsoon arrives.

58. The food-grain traffic continues to be brisk, as the subjoined statement will show. The figures for Patna for the three weeks ending the 30th

January, published in my previous report, have been corrected in accordance with the Collector's present report.

DISTRICT.	IMPORTS.		EXPORTS.		EXCESS - I. OR E.	
	Three weeks ending 30th January.	Fortnight ending 13th February.	Three weeks ending 30th January.	Fortnight ending 13th February.	Three weeks ending 30th January.	Fortnight ending 13th February.
1	2	3	4	5	6	7
Patna	Mds. 1,08,544	Mds. 48,470	Mds. 1,16,123	Mds. 60,462	E. 7,679	E. 11,009
Gaya	4,507	8,804	5,698	1,085	E. 1,191	E. 3,809
Shahabad	46,805	24,895	23,647	7,499	E. 23,159	E. 19,806
Saran	1,87,033	81,316	22,249	8,483	E. 1,65,404	E. 72,831
Champanan	14,745	14,351	4,773	1,678	E. 10,172	E. 12,673
Muzaffarpur	65,036	62,939	11,111	6,008	E. 44,824	E. 57,631
Darbhanga	50,078	50,591	13,700	2,320	E. 36,702	E. 3,302
Total	4,68,288	2,78,066	1,96,617	1,05,856

It will be seen that while in Patna the exports still exceed the imports, the balance in all the other districts is the other way, Gaya for the first time appearing as an importing district, no doubt owing to the needs of Palamau. Saran is again the largest importer, but both its total imports and net excess are less than half what they were in the previous three weeks. Remembering the difference in the duration of the period under report, the excess of imports is greater than it was for the period of my previous report in Champaran and Muzaffarpur, and about the same in Darbhanga. The total volume of trade comes to 2,78,066 maunds of imports and 1,05,856 maunds of exports, against 4,68,288 munds and 1,96,617 maunds in the previous period of three weeks. The amount of rice in maunds imported from Howrah, presumably either Burma or Orissa rice, is as follows:—Patna 9,291, Shahabad 1,544, Saran 14,314, Champaran 3,682, Muzaffarpur 4,851, Gaya and Darbhanga nil; total 33,682. Paddy was also imported from the same place in the following quantities: to Patna 794 maunds, Saran 1,764 maunds, Champaran 1,951 maunds, total 4,509 maunds.

59. Before passing on to consider the details of the administration of relief works and gratuitous relief during the past fortnight, it will be interesting to note what proportion of the population in the affected tracts is now in the receipt of relief of all kinds. The figures are given in the statement in the margin.

DISTRICT.	Numbers in receipt of relief on February 13th	Estimated population of affected area.	Percentage receiving relief.
1	2	3	4
Shahabad	3,227	371,824	.86
Saran	13,709	1,841,598	2.51
Champaran	117,712	972,000	15.19
Muzaffarpur	26,891	1,660,000	1.6
Darbhanga	200,078	2,270,000	8.81
Total	411,417	6,615,422	6.21

Those in column 2 are taken from the *Gazette of India* of the 20th instant, but they have been subjected to some modifications. The Collector of Darbhanga has reported that by an error in compilation the reported figures under gratuitous relief were 20,000 too high; the reduction has now been made. I have included the Hutwah and private relief figures in Saran and the Darbhanga

Raj figures in Darbhanga, less 1,100 allowed to Muzaffarpur to represent the operations of the Raj in the Parihar Circle. Even after these corrections, however, the figures are still incomplete, as it is believed that returns from some of the Public Works Department works are not included, both in Champaran and Darbhanga. The figures in column 3 are taken from the published fortnightly reports of the District Officers.

60. It seems unlikely that the Champaran figures will rise much higher, and I trust that neither in Shahabad nor in Saran will they ever reach 5 per cent.; but it is clear that in Darbhanga, as relief works are opened out to the full in some of the thanas where gratuitous relief is now the mainstay of relief administration, the number will rise. In Muzaffarpur the numbers will certainly increase with the opening of large relief works by the Public Works Department, and it is to be observed that the figures for the affected population (taken from Mr. Haro's report of the 2nd December last) include all areas likely to be distressed up to the end of March.

61. I next give below as before an abstract statement comparing the principal items of relief administration, district by district, for the past and previous periods of report. Many of the items have already been noticed in dealing with the district reports.

DISTRICT.	THREE WEEKS ENDING 30TH JANUARY 1897.								FORTNIGHT ENDING 13TH FEBRUARY 1897.							
	TASK WORK.				DAILY WAGES, IRRESPECTIVE OF TASK.		GRATUITOUS RELIEF.		TASK WORK.				DAILY WAGES, IRRESPECTIVE OF TASK.		GRATUITOUS RELIEF.	
	Average daily number of male units.	Work done by each per diem.	Wages earned by each per diem.	Cost per 1,000 cubic feet.	Average daily number of male units.	Daily wages earned by each.	Number of adult units in receipt of gratuitous relief.	Average dole.	Average daily number of male units.	Work done by each per diem.	Wages earned by each per diem.	Cost per 1,000 cubic feet.	Average daily number of male units.	Daily wages earned by each.	Number of adult units in receipt of gratuitous relief.	Average dole.

..	7,573	74	1 4	1 1 11	240	1 9	2,418	2 0	10,864	81 1/2	1 5	1 1 3	552	1 10	13,282	0 6 1/2
..	72,509	31	1 5	2 13 0	1,365	1 4	41,942	2 8	86,145	22 1/2	1 4 1/2	2 15 4 1/2	1,740	1 2 1/2	67,635	0 5 1/2
1	1,66,037	4,347	51,656	176,343	5,953	1,12,061

62. Turning first to task work, it will be seen that there has been a general increase in the daily number of male units employed, which is caused by the advance in Saran, Muzaffarpur and Darbhanga: in Patna and Gaya there are no relief works, and in Shahabad and Champaran the numbers have fallen off. There is an improvement in the outturn of work in every district except Darbhanga, and there the decrease is very slight. The improvement is greatest in Champaran. I have already remarked on the large outturn in Muzaffarpur, and pointed out that it is due to the small numbers employed and the large proportion of adult males among them. As regards average daily wage in the five districts where work has been going on, the mean is 1 anna 4 $\frac{1}{10}$ pies this fortnight, as against 1 anna 4 $\frac{1}{2}$ pies in the previous three weeks, and it will be seen that the district variations from the general mean are smaller than they were. The cost per 1,000 cubic feet is nowhere excessive; it is highest in Champaran, but there it has been reduced by nearly 38 per cent. in the fortnight, and the Collector has clearly explained that there are good reasons for the present high rate in this district: the cost is again lowest in Muzaffarpur.

63. The numbers on daily wage irrespective of task have increased everywhere, except in Shahabad. For the whole Division the ratio these bear to the task workers is 3·38 per cent., but it is much less than that in Champaran, Muzaffarpur and Darbhanga, and higher in the other two districts.

64. In the matter of gratuitous relief, it will be seen that the numbers have very largely increased everywhere,—a result due partly to the completion of circle organization, partly to my admonitions, and partly, especially in Muzaffarpur and Shahabad, to some increase of distress. The percentage of numbers on gratuitous relief to the whole number relieved is as follows:—Shahabad 88·34, Saran 58·11, Champaran 14·43, Muzaffarpur 43·28, Darbhanga 43·77; whole Division 38·2. In Shahabad, Muzaffarpur and Darbhanga the ratio will probably fall as relief works are more fully opened out, while in Champaran it will probably increase as the circle organization is improved and dependents are sent off the works to their villages. In Saran, for reasons previously stated, it will probably remain high throughout the operations.

65. The average dole appears to have been everywhere reduced, which is perhaps due to a majority of the new recipients of gratuitous relief being women and children. The instructions for calculating the average dole in the footnote to Form No. 7 leave something to be desired, and the matter will be looked into at once.

66. Appendix A gives the expenditure to date, so far as it can be ascertained from the financial statements supplied with each fortnightly report. It is obviously incomplete, for among other things it shows nothing spent as bounties for *kutchra* wells, whereas it has been ascertained from the reports themselves that the following sums have been spent: Champaran Rs. 522; Darbhanga Rs. 920. However, taking the figures as they stand, it appears that up to date nearly seven lakhs of rupees have been expended, of which Rs. 2,63,870 have been spent during the past fortnight.

67. As noticed in my remarks on the Muzaffarpur report, I have authorized all Collectors to grant advances under the Agriculturists' Loans Act freely. My reasons for this order, and the limitations which I have imposed, are set forth in my Divisional Circular No. 9 of 1897, a copy of which I append. I have no doubt that the money is urgently wanted, and that it will be used to advantage, while nothing approaching the wholesale operations of 1873-74 will be allowed, either now or later in the season.

68. The process of taking over large works by the Public Works Department has been going steadily on. I learn from demi-official letters just received from Messrs. Mills and Toogood that the following progress has been made.

69. In Champaran, five Public Works Department subdivisions have been arranged and works opened as stated in the margin. New works are to be started as fast as the establishment is available in the Ramnagar subdivision. In view of the contraction of works now expected in Saran, I am arranging with Mr. Toogood and the Collector to transfer some of the Public Works Department establish-

Subdivision.	Name of subdivisional officer.	Number of works taken over.	New works.
1	2	3	4
Ramnagar	Mr. Chester	..	2
Berhah	.. Sedgely	1	2
Mothari	.. Rooke	2	1
Phulpara	Babu N. N. Mookerji	..	2
Ram	.. R. K. Mookerji	..	2

ment of that district to Champaran where they are badly required. From Darbhanga Mr. Mills reports that 11 large works have been taken over in Bani-pati thana, 3 in Khajauli, 1 in Tadhubani and 1 in Phulparas. He states that practically all the needed works in North Darbhanga have now been taken over, though others will be required shortly. Mr. Mills will now take up the works in the Sadar subdivision. In Muzaffarpur, as already stated, 9 major works under Public Works Department agency will be opened on different dates during the current week.

70. It has been arranged everywhere that as the Public Works Department take over works, or open new ones, the neighbouring works under civil agency shall be closed as soon as possible. I have forwarded to the two Superintending Engineers a form of weekly progress report, showing the number of old works taken over, and new works started, in each district, and it will be submitted with effect from the current week. It is too soon yet to judge of the effect of the system laid down in Public Works Department Resolution No. 420M.P.I.: in Champaran the outturn at the outset was not altogether satisfactory, but that was certainly due, in great part, to the novelty of the experiment; from Darbhanga Mr. Mills reports that the results vary a good deal; here also a reasonable time must be allowed to elapse before a fair judgment can be formed.

71. Officers of the Public Works Department complain as bitterly as Civil officers have done of the inefficiency of many of their subordinates; this is inevitable at a season of distress such as this, and it is not till a great deal of weeding-out has been done that perfect order and efficient control will be secured.

72. The usual statements are appended.

APPENDIX A.

DISTRICT.	RELIEF WORK.				GRATUITOUS RELIEF.				MISCELLANEOUS.							GRAND TOTAL.	
	Paid for task work.	Daily wage irrespective of task.	Dependents under sections 83 and 84.	Total of columns 2, 3 and 4.	Poor-houses, &c.	Relief of artisans.	Relief by grain doles.	Relief by money doles.	Kitchens.	Miscellaneous charitable relief.	Total of columns 6 to 11.	Establishment and contingencies.	Tools and plant.	Cash and stores.	Bounties for directing wells.		Total of columns 13 to 16.

PATNA COMM. 'S OFFICE, BANKIPORE,

The 21st February 1897.

J. A. BOURDILLON,
Offg. Commissioner.

APPENDIX B.

FAMINE CIRCULAR No. 9 OF 1897.

Dated Bankipore, the 16th February 1897.

From—J. A. BOURDILLON, Esq., Offg. Commissioner of the Patna Division,
To—The Collector of

HITHERTO it has been the policy of most Collectors in the distressed districts in the Division to abstain from granting advances under the Agriculturists' Loans Act for the present in the belief that any money advanced now would not be applied to the purpose for which it was ostensibly granted, but merely to maintenance.

2. From enquiries made in several districts, however, I am satisfied that during the present year a great deal of land has been cultivated much earlier than usual, and that after the showers which have fallen, and in anticipation of an early monsoon, a good deal of cultivation would be done if the raiyats and small farmers could afford to pay for it.

3. In these circumstances, I consider that it would be better to make some advances now than to withhold them altogether till April and May, and therefore authorize you, if you think proper, to make advances freely under the Act subject to the following conditions:—

- (a) The agreements for repayment to be joint and several.
- (b) Not more than Rs. 4 a bigha to be advanced up to a maximum of Rs. 50 to any one person.
- (c) Not more than half to be advanced now.
- (d) A definite date to be fixed when the remainder is to be advanced.

4. The allotment at present made to your district is stated in the margin. You may advance up to that amount. Please state what further amount, if any, you will require to advance before the 31st March next and how much during 1897-98.

	Rs.
Shahabad	29,000
Saran	31,000
Champaran	11,000
Musaffarpur	28,000
Darbhanga	10,000

5. It is understood of course that these advances are made under the Act, and that they are entirely separate from the special advances for the purchase of grain alluded to in

paragraph 13 of Government Resolution No. 5133 of the 10th December 1896, as well as from those for village improvements dealt with in paragraph 19 of the same Resolution.

No. 243F, dated Camp Ratna, the 16th—18th February 1897.

From—W. B. OLDHAM, Esq., Commissioner of the Bhagalpur Division and Sonthal Parganas.

To—The Secretary to the Government of Bengal, Revenue Department.

IN continuation of my No. 292R.Ct., dated Bardaha, the 1st—2nd February 1897, I have the honour to forward, under section 9 of the Famine Code, the accompanying copy of extracts from a report submitted under section 10 by the Deputy Commissioner of the Sonthal Parganas with his No. 4549R., dated the 26th January 1897. Though so dated, it was not received in my office till the 13th February, or by me till yesterday, and appears to have been despatched on the 12th February. The chief object in forwarding the extracts to Government is to confirm the estimates for the Sonthal Parganas submitted under my No. 3395R., dated the 11th January 1897, and to prepare for the grants being appropriated. The omitted portions refer either to information already reported by me to Government, or to contentious matter, and this editing is necessary, if only for the reason that copying has become a very heavy item in my office. I do not forward the map referred to in the Deputy Commissioner's 12th paragraph, because it does not give the information which it is intended to convey. I have reproduced the reference to turnpikes in paragraph 17, but do not at this juncture endorse the views expressed. The passage indicates the character of some of the matter omitted. The final sentence about establishment refers to the restoration of the district staff, which has lately been drawn on, to its former strength, and not to any more definite proposals. The staff at present is ample.

No. 4549R., dated Camp Hiranpur, the 26th January 1897.

From—R. CARSTAIRS, Esq., Deputy Commissioner of the Sonthal Parganas,
To—The Commissioner of the Sonthal Parganas, Bhagalpur.

I HAVE the honour to report, under the provisions of section 10 (Chapter II) of the Famine Code, that scarcity prevails in this district, and that distress is imminent in certain

parts of it. The parts in which there is more immediate fear are Godda and Jamtara, of which the former is nearest famine. In this report I propose to declare a part of the Godda subdivision to be an affected tract.

2. * * * * *
3. * * * * *
Crops, such as mustard, *kurthi*, and the like, have been in most places a failure * * * * *

5. (b) *Area and population likely to be affected.*—The total area of Godda subdivision is likely to be affected, that is, 957 square miles with a population of 385,000. Out of this the area more immediately affected is the southern part of the subdivision, having an area of 331 square miles and a population of 102,800. This last area, comprising tappas Passye and Bellathan, and the southern end of the part of the Damin-i-koh estate, which lies in Godda, I propose to declare an affected tract.

(2) *Character of communications in the affected area.*—No part of the area is touched by the railway, and it has no navigable waterway.

There are no metalled or fully bridged roads within its area. It communicates by means of roads, passable in the dry season, but nearly all more or less impassable by reason of hill streams and bad surface in the rains, with the railway stations of Bhagulpur, Ghaga, Pirpointi, Timpalur, Kotalpukur, and Pakaur on the loop line, and with Deoghur on the chord line, and toward the south with Dumka and Suri. Internally it is provided with unmetalled and unbridged roads (a few small bridges and culverts have been built) giving access to almost every part of it, but little used in the rainy season.

(c) *Condition of grain stocks.*—The enquiry ordered by Government into the condition of grain stocks was made, but gave no trustworthy results. If we are to accept its results—no one has any stock at all. Traders will not reveal the state of their resources, nor will producers, and we are obliged, therefore, to fall back on our knowledge of the general conditions of local business.

In making his estimate Mr. Piffard has excluded the Paharia population, numbering some 23,000, on the ground that their crops of *bapa* and *bhadol*, on which they depend, have been abundant. They may need help, being in the habit of coming down for employment to the valleys and of selling firewood, but their case is not urgent.

6. At a recent conference held at Dumka with my Subdivisional Officers, we determined that a reasonable estimate for average outturn of crops was—

	Per acre.
	Mds.
Winter rice	... 12 cleaned rice.
Second crop on this land (1st and 2nd class only)	... 4 grain.
Bhadol	... 10 grain of all sorts.
Second crop	... 5
„ class <i>bari</i> land (chiefly <i>kurthi</i> and <i>rahar</i>)	... 4½

Mr. Piffard accepted these figures, which are in some cases higher than those he gave originally. I give in a table below a calculation of the outturn in a normal and in the year of all crops. They include oilseeds and other non-edible crops, which can be sold for rent and other purposes. They do not include mohwa and fruit.

I have calculated the value of an acre of first class, second class, and third class winter rice land for the purpose of determining average outturn at 3½, 2, and 1, respectively, since it would not be right to take an acre of the latter as of equal importance with an acre of the first in producing food. The proportion takes into account short cultivation

7. The figures are as follows:—

Winter rice.				
CIRCLE.	Normal area.	Outturn.	Proportion saved.	Outturn.
1	2	3	4	5
	Acres.	Mds.		Mds.
Godda	44,500	5,14,000	9 aunas	2,89,000
Mahagama	32,100	3,91,700	9 „	2,20,000
Poraya	24,200	2,90,400	5½ „	1,00,000
Damin-i-koh, excluding hills	21,600	2,49,700	9 „	1,40,000
Total	1,22,900	14,45,800	8½ annas	7,49,000

Second crop, Winter rice land.

CIRCLE.	Area.	Outturn.	Proportion saved.	This year's outturn.
1	2	3	4	5
	Acres.	Mds.		
Godda	25,300	1,01,200	8 annas	50,600
Mahagama	23,600	94,400	8 "	47,200
Poraya	12,700	50,800	6 "	19,000
Damin-i-koh	13,000	52,000	8 "	26,000
Total	74,600	3,08,400	7½ annas	1,42,800

Phadoi.

Godda	10,200	1,02,000	10 annas	63,800
Mahagama	8,000	80,000	10 "	50,000
Poraya	6,200	62,000	8 "	31,000
Damin-i-koh	13,000	1,30,000	10 "	81,000
Total	37,400	3,74,000	9½ annas	2,26,800

Second crop on Bhadoi land.

CIRCLE.	Area.	Outturn.	Proportion saved.	This year's outturn.
1	2	3	4	5
	Acres.	Mds.		
Godda	10,200	51,000	6 annas	19,000
Mahagama	8,000	40,000	6 "	15,000
Poraya	6,200	31,000	4 "	7,750
Damin-i-koh	13,000	65,000	6 "	24,000
Total	37,400	1,87,000	5½ annas	65,750

Kahar, Kurthi, &c.

Godda	20,000	50,000	4 annas	22,500
Mahagama	14,000	61,300	4 "	16,000
Poraya	26,400	1,18,800	4 "	29,700
Damin-i-koh	29,000	1,30,500	4 "	32,400
Total	89,700	4,03,600	4 annas	1,00,600

These figures condensed give the following result :—

Circle.	Normal outturn.		Outturn this year.	
		Mds.		Mds.
Golda	8,58,200		4,44,900
Mahagama	6,70,400		3,48,200
Poraya	5,53,000		1,87,450
Damin-i-koh	6,27,200		3,03,400
Total	...	27,08,800		12,83,950

The Poraya circle is thus singled out as the worst, having an outturn of about 31 per cent. of the normal, as against about 47 for the subdivision. The cold-weather crops were merely estimate. The facts about *bhadoi* and winter rice are known.

8. The grain calculated by Mr. Piffard to be necessary to feed the population is 10 chitaks per head. This would make the supply necessary for a whole year about 20,00,000 maunds, so that the normal outturn estimate agrees with probabilities. If these figures are correct, there is a deficiency of food-supply for the subdivision of rather over 7,00,000 maunds, without reckoning rent and other expenses to be met and exports. We know that large exports have been and are going on. This calculation does not take account of mohwa, which is reckoned to give, if the crop succeeds, a full month's supply of food for the Sonthals, nor of such produce as lac and tusser, whose export help to bring something into the district, nor of the annual temporary emigration in search of work which reduces the number of mouths to be filled, and brings a little something, *i.e.*, from without. Where there is so much that must be little more than guess work, it would be rash to build too much either way on figures. Mr. Piffard's estimates of the proportion of crops saved are, however, the best he can make after very careful enquiry, and I so far accept them as to say the prospects disclosed are very serious and warn us to be fully on our guard.

9. Coming to the area of scarcity, I find that the population is 102,000, and the supply needed to support them for eight months, that is, up to the beginning of the *bhadoi* harvest, at 10 chitaks per head daily, is 5,81,000 maunds of grain.

The outturn for this area is—

CROP.			Area.	Normal outturn.	Proportion	Outturn this year.
1			2	3	4	5
			Acres.	Mds.		Mds.
Winter rice	39,100	4,68,200	5 annas	1,46,300
Second crop	21,800	87,200	5 "	27,000
<i>Bhadoi</i>	13,050	1,30,500	8 "	65,200
Second crop	13,050	65,250	4 "	16,300
Kurthi, &c.	41,200	1,85,400	4 "	46,300
Total			9,36,550	3,01,100

* This is inconsistent with the figures given above (Mr. Piffard's), but as he did not give separate statistics for the tract under report in detail, I have made this calculation for myself. I think his was wrong.

R. C.—26-1-97.

The population of this area is (excluding Paharias about 10,000 souls) about 114,000,* and the grain necessary to support them for a day is 1,781 maunds, or for a year 6,50,000 maunds. Supposing the above calculation to be right, the following is the time the produce of this season's crops would last :—

<i>Bhadoi</i> crops	...	about 36 days.
Winter rice	"	82 "
Second crop of <i>bhadoi</i>	"	9 "
Kurthi, &c.	"	26 "
Second crop, winter rice	"	15 "
Total		168 "

There is in addition the stock of grain over from last harvest, amounting, according to Mr. Piffard's estimate in November, to about 60,000 maunds, or a supply for about 33 days. Of the above supplies, no part but the *bladoi* crop was available before the end of December, and thus we may calculate that at that time there was a supply available locally, supposing none was exported, for 132 days at least, or, since it is quite certain this year's maize was not all consumed by the end of December, we can put it at not less than 150 days. The old stock was probably understated at 60,000 maunds, but taking it at that, we had at the end of December probable supplies for 183 days, or up to the end of June. Besides this, we may calculate that the Santhals, who form about half the population of the distressed area, would get a month's food from mohwa, and a fair amount of miscellaneous supplies from the forest, especially in the rains. There is likely to be a certain amount of emigration also in search of work, of which the ordinary emigrant for a few months only is not likely to meet with so much success as usual.

10. I should be inclined to let the stock mohwa and savings from emigration go to balance the loss by export. They are all uncertain items; in fact everything in the calculation is uncertain, being the best guess we can make, and this gives us a local supply for 150 days, or 5 months, up to about the end of May, leaving three months, June, July, and August, to be provided for. The stock of grain will not be equally divided, some raijats having enough and something over, the traders having some, and many raijats having none at all. We have calculated that there may be a beginning of pinching at any time, and that it will probably become serious from the 1st of April onward.

11. (d) *Sources of supply.*—As we cannot in any way check the coming and going of supplies, I propose to leave this question to be dealt with solely by trade. In order to attract prompt supplies in out of the way places, where necessary, we should be prepared to make small preliminary advances to enable traders to move their stocks, but, as I understand, the question of where supplies are to come from is not to be our concern at all.

12. (e) *Proposed measures of relief.*—In my No 412 R.* of the 16th January 1897, I have explained what system of relief measures we propose to adopt.

It is not proposed to open within the circles kitchens or poor-houses, or to form lines for workers, but we should have a hospital and dispensary at a central point, Poraya, where the outpost is, and a hospital assistant in charge. All cases of sickness should at once be conveyed there or to Godda. If the distress is severe, we shall need a second hospital and dispensary on the east side of the tract. Chandna in the Damin-i-koh is a suitable point. The buildings need only be temporary, and need not be erected until they are wanted. It may be preferable to hire quarters. The Chandna bungalow has good out-houses.

The Subdivisional Officer, Mr. Piffard, has got his plans and estimates for relief works in working order. The people likely to come to the work have their own tools, but we have ordered, in addition to the reserve stock of tools which we already have, such reserve of hoes, picks, and stone-hammers as we think necessary. Mr. Piffard has been of great help both in working out a system of relief better suited to our needs than the more elaborate and costly Bihar system, and in making all the practical arrangements. His set of maps which he has prepared gives us a much more accurate and detailed knowledge of facts regarding villages and populations as they are than we should otherwise have obtained. I think all is ready to begin when necessary in the area indicated. The enclosed map shows where it is and what are leading roads outside and within it.

13. (f) *Estimate of expenditure likely to be incurred and the local sources from which it can be met.*—I see in your report to Government No 278 R., of 1st January, you have correctly stated that we have in this district very small public resources from which to meet the expense of any extra work such as relief. There is no road or Public Works cess, and Government has not made over to us for local expenditure the pound and ferry receipts. The Government grant for roads, which is for the whole district, is spent mainly on repairs and establishment charges, and it is impossible, in view of the anticipated development of distress in almost every part of the district, to propose to concentrate it on this one spot. Within the Godda subdivision itself expenditure will have to be incurred after the 1st April, and I am receiving claims from nearly every other part of the district for more expenditure to give employment to those in distress.

14. There are sources from which I have hopes, although I cannot reckon on them as I could on funds actually under my control.

In the first place there is the liberality of the local landlords, on whom the moral obligation of spending money for the relief of their people is all the greater on account of the absence of local taxation, and of local well-to-do tenants for the same reason. The greater part of the affected area now under report is tuppa Passye in the Lachmipur estate, and the manager, Mr. Braidwood, has already arranged for the opening of works wherever needed. I am not sure what he proposes to spend, but he will spend liberally. The greater part of the remainder is in the Government estate Damin-i-koh, and I hope that Government will not be backward in setting a good example to other landlords, and will, if necessary, increase its grants for estate improvement. The balance of the area is Boibathan, a long narrow strip between these two, whose people will be able to do a little, but not much, for themselves, but will be benefited by any work done in the neighbourhood. The proposed opening of the works for the projected Bousi Railway would be a help to the western

(Passye) side, but not to so great an extent as it would have been had the original line by Nonihat been adhered to. The line, as I understand, will now run direct from Bousi to Deoghur, leaving Passye some distance to the west.

I have also hopes that there will be some relief by means of emigration to a distance. The temporary crop-cutting expeditions have not been so productive as usual, many having come back empty-handed.

Where all is so uncertain, I can make no useful estimate, and can only repeat that which I have already submitted in answer to Government's order, in its No. 79Agri. of the 31st December 1896, and your No. 3328R. of the 6th January 1897.

This for Godda subdivision is Rs. 1,50,000, and for the whole district Rs. 3,11,200, of which Rs. 6,200 is to be spent in 1896-97 and Rs. 3,05,000 in 1897-98.

15. (g) *Any other matter necessary for the information of Government.*—As has been already reported to you, and by you to Government, the area most likely to be affected next to Godda is Jamtara. There will be distress in all parts of the district, more or less, owing to the high prices, but it has not manifested itself as yet. I observe considerable activity among the agriculturists in their usual engineering works of improving levels and making small reservoirs and reclaiming hollows, and I have already received promises from a number of local proprietors, among whom may be mentioned Raja Ram Ranjan Chakrabarti Bahadur, of Hetampur; Rai Kamaleswari Prasad Bahadur, proprietor of Belpatta; Mr. Braidwood, Manager of Hendwai and

Kamaleswari (of Monghyr). of Lachmipur estate, parts of which lie in the subdivisions of Godda, Dumka and Deoghur; Mr. Maling Grant, who owns land in Dumka and Deoghur; the zamindars of Patsanda in Godda; Babu Dariuo Lal, Ghatwal of Suruth; Babu Ram Charan Sing, Ghatwal of Banon-gaon; the Manager of the Baneili estate, part of which is in Godda; the Ghatwal of Marraro in Jamtara, that they will spend money in giving employment. The Sankara, Rohini, Punasi and Narainpur estates are under the Court of Wards, and we are arranging for expenditure when needed. The zamindar of Pahia proposes to give help mainly by allowing facilities to private persons for making improvements in the shape of tanks and bunds. The largest proprietor in the district is Government, to whom I am addressing a separate report on the subject of improvements in Government estates.

16. In the Pakaur subdivision the situation is peculiar, owing to trouble in connection with the recent settlement of Ambar and Sultanabad. The Sonthal raiyats in those estates are, partly from the evil advice and threats of agitators, and partly from legitimate grievances, in an uneasy frame of mind, which has partially spread to the adjoining part of the Damin-i-koh estate of Government. The community system is strongly developed among them, and they consequently object to the interference of the kanungo, even when that is to take measurements and make plans for relief works. They look on it as an invasion on their privacy, and having just had a course of settlement amins, they decline any further interference, saying they do not want bunds. In this subdivision there is no great likelihood that relief works on a large scale will be needed, the only parts reported as distressed being a few villages on the east side. I am therefore instructing the Subdivisional Officer to make up his precautionary relief programme, which is not likely to be needed this year, by projects for raising the local roads a foot or two. Pakaur is sore at present, and needs delicate handling.

17. As will be seen from the above report, I am in hopes that while the unexpected may always happen, and has been prepared for as far as possible, the district will probably get on without formal relief measures, except perhaps in the south of Godda and in the north-west of Jamtara. The extension of section 84 of the Tenancy Act proposed in my No. 697R., of the 2nd June 1891, would in my opinion be of the utmost use to us this year, as being likely to stimulate works of local improvement, which have been considerably impeded by the want of such a provision. Our resources would also be materially strengthened if the permission asked for in my No. 411P.-W., of the 5th September 1896, to establish turnpikes on the Dumka-Rampur Hat road were granted, and the same permission extended to our other expensive roads, namely, the Suri-Blagapur and the Dumka-Deoghur roads.

It may be said that this is a bad year to place impediments in the way of traffic. On the contrary, I think that to make the road self-supporting would be rather to withdraw a bounty than to impose a tax. While it is our duty not to put needless obstacles in the way of traffic, it is as little our duty to stimulate by maintaining free roads the exports of grain from the district, which, in the opinion of many, is going on to an excessive extent.

As executive orders only are needed to give effect to those proposals, and their effect would be almost immediate, I hope that even in this busy year time will be found to pass orders.

19. I began this report meaning to keep it ready until the result of Mr Piffard's test works should be known. I think, however, that I ought to submit it to you at once, that you may be in possession of the views and information it contains. I have endeavoured to work out the information of Godda subdivision first, that being most urgent. I shall try to complete the information for the rest of the district by degrees, and submit it as it is ready. I do not expect any extensive operations in any case before the beginning of April, and think that with loans and useful private and public works, it may be possible in almost all parts to stave off the necessity for declaring famine at all. I submit my report chiefly on account of establishment.

SCHEME FOR THE SUPPLY OF FILTERED WATER TO THE TOWN OF BERHAMPORE.

MUNICIPAL DEPARTMENT--MUNICIPAL.

Calcutta, the 2nd March 1897.

RESOLUTION—No. 115-M

READ—

A letter from Sanitary Board, No. 47S.B., dated the 10th February 1897, submitting, for the sanction of Government, plans and estimates for a scheme for the supply of filtered water to the town of Berhampore, together with a letter No. 54M., dated the 20th January 1897, and its enclosures, from the Commissioner of the Presidency Division on the subject.

Read also—

The previous correspondence regarding the water-supply scheme.

In April 1894 the Municipal Commissioners of Berhampore expressed a desire to improve the water-supply of their town, and instructions were issued by the Sanitary Board for the preparation of a scheme, with an approximate estimate of the cost of carrying it into effect. The Sanitary Engineer inspected the town, and on his report, which was drawn up in consultation with the local officers, it was decided that the best plan would be to pump water from the river Bhagirathi into settling-tanks, and distribute it, after filtering, through the ordinary street stand-posts for five or six hours in the morning and three or four

hours in the afternoon, as is done at Dacca and Burdwan. The approximate cost of such a scheme, which would give a supply of eight gallons per head per diem, was estimated at Rs. 2,21,800, or in round numbers Rs. 2,25,000. As soon as this was known, the question of providing the necessary funds was considered, and as it was not possible for the Municipality to carry out such a project without substantial aid from private or other sources, a deputation of the leading inhabitants of Berhampore waited on Maharani Surnomoyee, c.i., of Kasimbazar, in order to seek her aid towards the financing of the scheme, and that generous lady, with her characteristic liberality, at once offered to bear the entire cost of the scheme, provided it did not exceed Rs. 2,21,000, on being assured that Government would grant the services of an engineer free of cost, and that the Municipality and the District Board would undertake to bear the cost of maintenance of the works when completed. In August 1894 instructions were issued by Government to the Sanitary Board to undertake the preparation of a scheme under the supervision of the Sanitary Engineer, with the assistance of a surveyor on Rs. 250 a month and a draftsman, the expenditure on this account being met from Provincial revenues, in case it could not be provided out of the total limit of cost. The Board, with the approval of Government, deferred the preparation of the plans and estimates until the water of the river Bhagirathi had been thoroughly tested and analysed. Samples of the water were taken at different seasons, and analysed, with the result that it was found to be "organically safe," and convertible, under a proper system of filtration, into a good supply. The settlement of details such as the position of the pipe lines and standposts occupied some time, but the Sanitary Board have at last succeeded in drawing up a complete scheme. The total cost is now shown to be Rs. 2,38,883, the reasons for the increase being (a) that it was not known, at the time the rough estimate was prepared, that the water of the Bhagirathi required such careful filtration; (b) that provision has been made for house-connections; and (c) that the present estimate provides for a constant supply of water. It appears, however, from a report submitted by the Magistrate of Murshidabad, that the estimate is susceptible of reduction under certain heads, and that the actual expenditure in the execution of the works will probably not exceed the original estimate. Subject to this proviso, the Maharani agrees to pay the whole cost of the scheme, which may, therefore, be regarded as financially sound. The Municipal Commissioners of Berhampore have resolved to bear the entire cost of maintenance and to impose the necessary water-rate. As regards the carrying out of the project, it is proposed that this should be undertaken by the Magistrate of the district in consultation with the Maharani.

The Lieutenant Governor sanctions the scheme as drawn up by the Sanitary Board, and approves the proposal that it should be carried out by the Magistrate of the district in consultation with the Maharani. Sir Alexander Mackenzie desires to take this opportunity of thanking the Maharani for her munificent gift, which is only one of her many acts of public spirit and liberality, and which will confer a lasting boon on the town of Berhampore. This Resolution will be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Govt. of Bengal.

DISTRESS IN THE PRESIDENCY, CHOTA NAGPUR AND OTHER DIVISIONS, EXCEPT THE PATNA DIVISION.

No. 611(Fam.).—The 2nd March 1897.—The following are published for general information.

M. FINUCANE,
Secretary to the Govt. of Bengal.

No. 609Agri. (Fam.), dated Calcutta; the 1st March 1897.

From—M. FINUCANE, Esq., Secretary to the Govt. of Bengal,
To—The Secretary to the Government of India, Revenue and Agricultural Dept.

IN continuation of this Government's letter No. 455Agri (Fam.), dated the 16th February 1897, reporting on relief operations in the Patna Division, I am directed to submit famine statements A and B for the districts of Nadia and Khulna, together with the following report on the condition and prospects of the Presidency and other Divisions in Bengal.

2. *Presidency Division.*—Of the districts in the Presidency Division, there is nothing new to report with regard to the 24-Parganas, in which there is no distress at present, nor any immediate prospect of necessity for relief. In Murshidabad, as reported in paragraph 9 of my letter No. 447Agri.(Fam.), dated the 16th February 1897, there is some probability of distress, especially in a tract bordering on the affected area in the north-west of the district of Nadia. Test works have been opened, and the situation is being carefully watched.

In the district of Jessore the worst tracts are an area of 106 square miles in the north-east of the Magura subdivision, situated mostly in thana Muhammadpur but partly in thana Magura and out-post Salikha, and an area of 168 square miles in thana Bangaon. The total population of the two tracts is about 163,000. The most important crop in these tracts is *aman* or winter rice, which, in consequence of deficient rainfall from July to November, was a total failure, the average outturn, except in *bils* or swamps, being estimated at about two annas. The crop next in importance is the *aus* or autumn paddy, the outturn of which last season was only about six annas; the *rabi* crops also, which are of minor importance, have suffered for want of rain. On the other hand, jute is largely grown in the tracts in question, and yielded a good outturn. Another resource of the people of these parts is the date-palm, which is extensively grown and affords a means of subsistence to many till the middle of March, when the tapping season closes. In consequence of high prices, some slight distress is being felt, and a small number of persons has been placed on gratuitous relief. But distress requiring the opening of relief works is not considered likely to appear till March or April, and may last till the end of June. The Lieutenant-Governor does not apprehend that relief measures on an extensive scale will be required in this district.

The area now affected in the district of Khulna is 442 square miles with a total population of 262,000 persons, comprising thanas Asasuni, Magura and Kaliganj in the Satkhira subdivision, and a portion of thana Paikgacha in the Sadar subdivision. Nearly the whole of this area consists of reclaimed Sundarban lands, and is intersected by numerous tidal rivers and channels, the water of which is salt during the greater part of the year. Practically the only crop grown is winter-rice, the aggregate area occupied by other crops being, it is believed, not more than 2 per cent. of the total cultivated area. The failure of the rice in this area is not so much due to shortness of the rain as to impregnation of the soil with salt water arising from the failure of the local landholders to keep up embankments. Their attention has been called to the matter, and it has been pointed out to them that the responsibility for relieving distress in

this area rests primarily with them. In the first five months of 1896 the rainfall recorded at Satkhira and at Nakipur, another recording station in the Satkhira sub-division, fell short of the normal by 6·04 and 9·17 inches respectively; and was not sufficient to wash out the salt from the soil. The lands had, moreover, been submerged by a storm wave in October, 1895, which partially destroyed the crop of that year and left a large deposit of salt. The result of this combination of unfavorable circumstances and of the short ill-distributed rainfall from July to November was that the winter-rice crop almost entirely failed over the greater part of the area in question. There can be no doubt that the failure of the winter rice crop for two successive seasons has caused distress among the people, but although relief works have been opened in the affected tract since December last, the number of labourers employed on them is still small. At the end of January there were three relief works open, but the total number of labourers shown in the famine statement now submitted is only 147. Since then the number has increased, the total number reported on the 21st February being 351. It is remarkable that there are no women among the relief workers. This is reported to be due to the social customs of the people of the district which debar women from seeking employment on relief works. The number on gratuitous relief at the end of January was 142, and, on the 20th February, 727, of whom 374 were women.

The condition of the affected tract was reported at the end of January to have undergone no change. There is no *rabi* crop, and food stocks were reported to be small, but grain was being imported by the local dealers. Two more tracts are considered likely to be affected in this district, viz., an area of 60 square miles with a population of 46,000 in thanas Satkhira and Magura, where distress is apprehended from the middle of March, and 201 square miles with a population of 96,000 in thanas Mollahat and Morelganj of the Bagerhat subdivision, but the Commissioner has not yet put this Government in possession of complete information regarding these tracts.

In the district of Nadia distress is spreading, and the areas affected at the close of January were:—

Nadia.					
Thanas.					
	Square miles.
Kaliganj	109
1 Nakushipara	67 50
1 Chapra	65
1 Meherpur	66 50
1 Gangul	63 00
Karimpur	193 00
1 Daulatpur	72 00
1 Tehatta	135 30
1 Naopara	44 25
					815 25

The population of this area is reported to be 428,644.

The tracts where distress first made its appearance are the Kaliganj and Nakashipara thanas of the sadar subdivision and thana Tehatta of the Meherpur subdivision. This portion of the district is known as the Kalantar, and is a low lying tract subject to floods and well adapted to the cultivation of winter rice. There is very little land in this area suited to the cultivation of *aus* or autumn paddy, or of *rahur* (*cajanus indicus*), but *rabi* crops, such as wheat, gram, linseed, &c., are largely grown. In consequence of insufficient and unseasonable rainfall, the outturn of the *aus* crop was not more than 6 annas and the winter rice was almost a total failure, the estimated outturn being only one anna. Of the *rabi* crops, generally speaking, wheat and lentils as well as *khesari* (*lathyrus sativus*) and peas have totally failed, and the other crops which have yielded some outturn do not materially affect the condition of the tract in question. The condition of thanas Karimpur and Daulatpur in the Meherpur subdivision, as described by the local officers, is similar to that of the Kalantar. The principal crops grown are rice and *rabi*. Last year the average outturn of all crops taken together was not more than 8 annas. This year the *aus* yielded only about a four-anna outturn, while the *aman* or winter rice has been a total failure, and the prospects of the coming *rabi* are reported to be gloomy. A great part of the population of both tracts consists of landless labourers and poor cultivators.

Test works were started early in December. In the report for the second-half of January, it is stated by the local officers that two test works and two regular relief works under Civil Officers, and one relief work under the Public Works Department were open during that period, and the total numbers on relief works and gratuitous relief at the end of the month were 8,229 and 1,084 respectively. The only other form of relief given was in the grant of loans, and it is stated that Rs. 15,950 were advanced under the Land Improvement Loans Act to 25 applicants during the period under report.

3. *Chota Nagpur Division.*—Particulars regarding the Chota Nagpur Division were furnished in paragraph 8 of my letter on estimates of expenditure No. 447Agri.(Fam.), dated the 16th January 1897. The Commissioner's report for the second half of January shows no change for the worse in the condition of the districts of Lohardaga and Singhbhum.

As regards the district of Palamau, under the recent orders of the Government of India, a subsidy of 8 annas a maund (up to a limit of 50,000 maunds) from general revenues has been sanctioned in aid of the importation of grain up to the end of March. The causes of distress in the district of Palamau were fully described in the papers submitted to the Government of India with my letter No. 381Fam., dated the 11th February 1897, are briefly as follows:—Palamau does not in the best of years produce sufficient food for the support of its population, but depends on certain tributary states and the district of Lohardaga to make up the normal deficit in the food supply of the district. This year, in consequence of the general failure of crops, these sources of supply have stopped. There was only a five-anna winter rice crop, preceded by a *bhadai* or autumn crop of $9\frac{1}{2}$ annas, and by poor harvests in 1895-96. The whole district, with an area of 4,905 square miles and a sparse population of about 600,000 persons, is reported to be affected. Prices are unusually high, being in places less than 8 seers per rupee. The worst portion of the district is a broad tract, of which the area has not yet been reported by the local officers, running from east to west through the centre of the district. It is within this tract that the scarcity of supplies for sale and the consequent high prices are most felt. In the block to the north of this tract, the state of things gradually improves until the Gaya border is reached, where no indication of distress is at present visible. The corresponding block to the south abounds in forest products, and does not as yet give any great cause for anxiety. During the period under report relief measures were still being organised. The telegraphic report of the 21st February shows that on that date there were in Palamau 2,602 persons on relief works and 409 on gratuitous relief.

In paragraph 8 of my letter No. 447Agri (Fam.), dated the 16th February 1897, it was stated with regard to Manbhum that the outturn of the winter rice crop averaged about 5 annas in thanas Gobindpur, Tundi, Nirsha, Chas and Chandil, comprising 1,280 square miles with a population of 361,000 persons, and that, with the exception of thana Chandil, this area included the greater part of the tracts affected in 1873-74. It was also stated that the Deputy Commissioner was of opinion that if the *mahua* crop failed, two-thirds of the district, with a population of 800,000, would be affected. He did not, however, anticipate much distress before March. A report since received shows that while thana Chandil does not at present give reasons for anxiety, distress has suddenly made its appearance in thana Tundi in the Gobindpur subdivision, and the Commissioner of Chota Nagpur writes that it certainly now looks as though the distress in Manbhum were approaching that of 1874. The prospects of the *rabi* crop in this district are poor. With regard to this and the other districts of the Chota Nagpur Division, the Commissioner wrote on the 12th February that the *mahua* was not yet in flower, but that if the weather was favourable that crop might still be a good one.

No material change is reported to have taken place in the condition of the district of Hazaribagh as described in paragraph 8 of my letter of 16th February above quoted, but prices were high, ranging from 8 to 11 seers per rupee.

4. *Orissa Division.*—The Commissioner of the Orissa Division reports that neither in Angul nor Balasore is there any reason to suppose that scarcity is imminent, and he is of opinion that very ordinary relief measures will suffice for both districts. Cuttack remains in a state of uncertainty, but what is known shows the necessity for watchfulness, especially with regard to the following areas:—

		Square miles.	Population.
Sadar subdivision	...	278	208,000
Banki Government estate	...	117	58,795
Jajpur subdivision	...	324	173,000
Kendrapara subdivision	...	173	88,400
Kujang Ward's Estate	...	320	69,877
Kanika ditto	...	265*	85,563
Total	...	1,477	683,635

* Exclusive of 174 square miles lying within the district of Balasore.

In Puri distress has made its appearance, and measures of relief are being taken in certain tracts near the Chilka lake, which is also the area in which distress first manifested itself in the great Orissa famine of 1866, but the Lieutenant-Governor is not in possession of precise information relating to the area and population affected.

5. *Bhagalpur, Rajshahi, Burdwan, Dacca and Chittagong Divisions.*—There is now nothing to add to what was stated with regard to these Divisions in paragraphs 11 to 14 of my letter No. 447Fam., dated the 16th February 1897.

6. Maps of the districts of Nadia and Khulna showing the areas affected are herewith enclosed.

Monthly Famine Statement A for the five weeks ending Saturday evening, the 30th January 1897.

* The programme for this district is not complete.

THE following is published for general information.

REV. DEPT.,
The 2nd March 1897.

M. FINUCANE,
Secretary to the Govt. of Bengal.

First forecast of the oilseed crops of Bengal, 1896-97.

N.B.—Returns have been received from all districts except Darjeeling.

Explanatory.—The chief oilseed crops in these Provinces are:—(1) rapeseed and mustard, (2) linseed, (3) *til* or gingelly, and (4) other oilseeds, *e.g.*, castor-oil and *sirguza* (niger oilseed), &c. Two varieties of *til* are grown, viz. (a) the *bhadoi til*, which is sown during the rains and reaped early in the cold weather, and (b) the *rabi til*, which is sown in the cold weather and reaped shortly before the setting in of the rains. Both varieties are included in the present report.

2. *Character of the season.*—The monsoon season of 1896 was exceptionally dry. It also ceased early. The month of October was practically rainless, and no general rain was received over the Province till the third week of November. The absence of rain during this period and the deficient rainfall of the previous months produced a want of moisture in the soil which interfered seriously with the sowing of the oilseed crops. In December there was no rain in Lower Bengal and Orissa. In North Bengal there was general light rain on the 31st, and in Bihar and Chota Nagpur light rain fell on the 25th and 31st. In January, rain was very light throughout the Province, in most parts practically nil. During the first fortnight of February, good and general rain fell in Bihar and Chota Nagpur, and showers were recorded in North and South-West Bengal, and also in Backergunge and Noakhali in East Bengal; it is probable that this rain which has fallen since the district returns were submitted may have improved prospects.

3. *Area cultivated.*—Exclusive of Darjeeling, for which no returns have been received, the total area sown with oilseeds in Bengal during the current year is estimated at 3,604,600 acres against 4,182,900 acres estimated to have been sown in 1895-96. This shows a decrease of 578,300 acres, or 13·8 per cent., on the area sown last year. The decrease is due to the early cessation of the monsoon rains, and subsequent want of rain which left the soil generally too

dry for sowing. An increase in the area sown this year is, however, noticeable in Bogra, Pabna, Patna, Gaya, Shahabad and Malda. In Gaya and Malda the season is said to have been favourable for sowing. In Patna, wheat lands, and in the remaining districts mentioned above, rice lands, which could not be sown with these crops owing to deficient rain, were utilized for growing oil-seed crops.

4. *Character of the crop.*—On reference to the appended returns, it will be seen that out of 44 districts from which reports have been received, no district returns an average crop (of oil-seeds taken as a whole) amounting to 16 annas; nine districts, viz., Dinajpur, Bogra, Tippera, Patna, Gaya, Muzaffarpur, Darbhanga, Purnea and Malda, report crops from 12 to 15 annas; and 18 districts, viz., Jessore, Rajshahi, Jalpaiguri, Rangpur, Pabna, Dacca, Mymensingh, Faridpur, Backergunge, Noakhali, Shahabad, Saran, Champaran, Monghyr, Bhagalpur, Cuttack, Balasore and Hazaribagh, report crops from 8 annas to less than 12 annas. The remaining 17 districts, including all the districts of the Burdwan Division and most of the districts in the Presidency and Chota Nagpur Divisions, return crops less than 8 annas.

Fourteen districts now return better crops than those of 1895-96, four districts equal crops, and the remaining districts worse crops. Taking the Province as a whole, the crop of the present year would appear to be much the same as that of the previous year, and may be estimated at 10 annas against $10\frac{1}{2}$ annas estimated for the previous year, but this outturn will be obtained over a smaller area than in 1895-96. The poor outturn of the year may be ascribed to the deficient rainfall of the last monsoon season and to subsequent want of rain in October and throughout the greater part of November.

The rain which has fallen since most of the returns appended to this note were written may have improved the prospects of the crop. If so, the improvement will be noticed in the final forecast which will be issued about the 21st May 1897.

N. N. BANERJEE,
Assistant Director of Land Records
and Agriculture, Bengal.

Countersigned.

W. C. MACPHERSON,
Director of Land Records and
Agriculture, Bengal.

CALCUTTA,
The 22nd February 1897.

First Forecast of the Oilseed Crops of Bengal, 1896-97.

DIVISION.	District.	Names of oilseeds.	Approximate normal oilseeds.	Approximate area sown last year (1895-96).	Estimated area sown this year (1896-97).	Taking 16 annas to represent the average outturn per acre outturn last year (1895-96) ?	Taking 16 annas to represent the average outturn per acre this year's outturn (1896-97) ?	Remarks by District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
Burdwan (General).	Midnapore	Linseed " and Rapeseed " and Til Other oilseeds "	Acres. 24,300 40,300 30,400 24,300 119,300	Acres. 14,800 31,100 26,200 21,300 93,400	Acres. 21,700 32,400 19,700 19,000 79,400	Annas. 8 9 8 6 8	Annas. 8 9 7 6 8	The area brought under cultivation has been less than the normal area as well as the area of last year in consequence of the total failure of rain, and for the same reason the outturn is also likely to be less than that of last year.	
	Hooghly (with Howrah).	Linseed " and Rapeseed " and Til Other oilseeds "	Acres. 2,700 5,300 1,200 2,300 11,500	Acres. 2,800 4,900 800 1,900 9,800	Acres. 1,900 3,300 " " 1,900 7,000	Annas. 7 9 " " 7 8	Annas. 7 9 " " 7 8	The decrease in area sown and estimated outturn is due to want of rain.	
	24-Parganas	Linseed " and Rapeseed " and Til Other oilseeds "	Acres. 1,600 600 700 4,000 6,900	Acres. 1,300 400 600 3,800 6,200	Acres. 400 400 500 800 2,100	Annas. 7 3 12 9 9	Annas. 4 3 9 9 8	The unusual decrease in the area sown this year is due to scanty rainfall at the sowing season. The same cause also accounts for the decrease in the estimated outturn of the crop.	
	Nadia	Linseed " and Rapeseed " and Til Other oilseeds "	Acres. 27,900 57,700 17,800 13,000 111,500	Acres. 40,000 23,200 8,800 7,900 79,900	Acres. 23,600 20,300 6,200 4,300 54,400	Annas. 9 8 7 9 8	Annas. 9 8 7 9 8	Owing to want of rain, most of the lands could not be cultivated, hence the marked decrease in the estimated area sown this year. The decrease in the estimated outturn is also due to the same cause. The area under khadar till in the Manghat subdivision shown last year, has been excluded from the present return, as there has been no cultivation of the same during the current year.	

MURSHIDABAD.		30,500	26,900	23,300	9	8	The decrease in the area sown this year as well as in the estimated outturn as compared with the normal area and that sown last year, and with last year's outturn, is due to want of rain.
Linseed and Rape-seed and mustard.		23,700	18,900	14,900	16	7	
Til		8,100	7,800	6,300	12	7	
Other oilseeds ..		20,000	15,600	11,700	10	6	
Total		82,500	68,600	53,200	11½	5½	
Jessore		42,000	23,000	10,200	9	5	The decrease in area sown this year and the poor outturn are due to want of rainfall during the year and to want of flood in the Narail subdivision this year.
Linseed and Rape-seed and mustard.		51,400	40,000	31,900	7	7½	
Til		20,900	22,800	24,100	9½	11½

Acres. 24,800 30,000 1,800 18,400 75,000	Acres. 16,500 22,900 1,600 13,100 54,100	Acres. 19,100 28,700 23,700 12,100 61,600	10 1/2 13 8 11 1/2 10 1/2	10 1/2	The increase in the area sown this year is due to the wheat land being sown with oilseeds owing to the failure of rain at the sowing season.	
	Gayá	Linseed ... and Rapeseed ... and Til ... Other oilseeds ... Total ...	Acres. 85,400 27,300 13,800 51,100 200,500	Acres. 62,500 15,600 9,300 73,800 162,300	Acres. 61,500 15,400 9,300 80,400 169,000	6 6 1/2 6 6 6	14 13 12 13 13 1/2	The increase in acreage under rapeseed and mustard and other oilseeds, and of the estimated output, is due to timely rainfall.	

Shahabad	Linseed	12,200	9,500	16,600	94	94	The increase in the area under oilseeds, as compared with last year's area, is due to the failure of the rice crop, a good deal of rice land having been utilized this year for oilseed cultivation.
	Rapeseed	9,800	4,000	7,300	74	74	
	Mustard	300	300	1,000	74	74	
	Other oilseeds	13,700	7,200	11,500	11	94	
	Total	36,000	21,000	36,400	94	94	
Saran	Linseed	8,200	6,600	6,000	8	10	For want of moisture, the area sown is less, but the crop is healthy and the outturn is expected to be more than last year's.
	Rapeseed	24,600	24,500	29,000	10	11	
	Mustard	4,600	4,000	1,400	6	10	
	Other oilseeds	11,700	17,300	10,600	10	13	
	Total	49,100	45,400	39,000	34	11	
Champan	Linseed	207,700	173,000	140,000	11	11	The area is much less than usual, owing to great lack of moisture consequent on the very early cessation of the rains, and the outturn on the area will be less than usual, owing to the same cause and the lateness of the sowings. Also food crops have been sown in preference to oilseeds this year.
	Rapeseed	161,300	76,000	64,000	8	11	
	Mustard	3,000	3,000	4,000	10	11	
	Other oilseeds	3,000	2,800	2,100	6	9	
	Total	315,000	254,800	210,100	10	11	
Muzaffarpur	Linseed	17,000	17,000	17,000	10	12	The estimated outturn is less than the normal owing to the scanty rainfall in the rainy season, but more than last year's outturn, as the winter rain improved the condition of these crops.
	Rapeseed	17,000	17,000	17,000	10	12	
	Mustard	13,000	13,000	13,000	4	12	
	Other oilseeds	47,000	47,000	47,000	4	12	
	Total	94,000	94,000	94,000	4	12	
Darbhanga	Linseed	47,700	46,400	43,400	8	12	Though there may be some decrease in the area sown, the mustard bears a fine crop this year, an average area has been returned allowing for the reduction in area.
	Rapeseed	49,400	46,300	40,300	8	16	
	Mustard	36,100	27,500	27,500	9	16	
	Other oilseeds	133,200	114,500	114,300	54	15	
	Total	366,400	334,700	325,500	24	15

	Malda	Linseed " " and Rapeseed " " and Mustard " " and Other oilseeds " " Total	Acres. 8,300 80,000 11,500 97,900	Acres. 10,200 67,200 7,000 84,000	Acres. 10,200 66,400 7,000 83,600	Annas. 8 8 8 8	Annas. 12 12 to 14 8 12 to 14	Mustard has been sown more extensively than usual owing to the early cessation of the rains and low state of rivers, which allowed the land to be prepared early. The figures given for last year's area and the normal area have been found to be quite wrong by personal enquiry. The normal area is therefore estimated to be 84,000, and the area this year is 100,000 acres.	The area in column 6 against rapeseed and mustard has been altered in this office with reference to the alterations made by the Collector in columns 4 and 6.

The Deputy Commissioner has changed the normal area under all kinds of oil-seeds and last year's area under til without assigning any reason for the change.

The distribution of rainfall was not favourable; hence the smaller area cultivated and the bad outturn.

Early cessation of rain prevented the sowing of a large area under all kinds of oil-seeds crops, and this is also the cause of the poor outturn.

The decrease in area and outturn is due to difficult rain throughout the growing season.

Casualty of rain in Satepore, October and November, retarded the sowing of mustard and oil-seeds which was taken up in the first week of land after the rainfall of 23rd November. Losses in the area sown in September withered for want of rain. In Khordha Mr. Leved reports: "For want of rain there has been a total failure this year in the cultivation of the oil-seed crop."

The season is unfavourable to all the crops except "Pongol" and "Pongol" oil-seeds. There has been no rain since the middle of September etc.

The decrease in the outturn is due to scanty rain since the sowing season.

The decrease in the area sown and the outturn this year is due to the early cessation of rain and want of moisture in the soil.

STATISTICAL DEPARTMENT,

STATISTICS OF THE SEA-BORNE TRAFFIC OF CALCUTTA IN FOOD-GRAINS.

No. 513 Statistics.—The following memorandum and statements are published for general information.

STATISTICAL DEPARTMENT,
The 2nd March 1897.

M. FINUCANE,
Secy. to the Govt. of Bengal.

Memorandum.

The sea-borne import and export traffic of Calcutta in food-grains during the week ending the 21st February 1896 and 1897 is shown in the following statement:—

		15TH TO 21ST FEBRUARY			
		1896.		1897.	
1		2	3	4	5
		Cwts.	Mds.	Cwts.	Mds.
<i>Imports.</i>					
From Foreign Ports	...	3	4
„ Indian „	...	27,121	36,915	109,325	1,48,803
Total	...	27,124	36,919	109,325	1,48,803
<i>Exports.</i>					
To Foreign Ports	...	220,616	3,00,283	149,106	2,02,950
„ Indian „	...	51,861	70,588	25,372	31,534
Total	...	272,477	3,70,871	174,478	2,37,484

Imports.—The different staples comprising the import traffic are shown in the table below, and the figures for the week are compared with those for the corresponding period last year:—

		15TH TO 21ST FEBRUARY			
		1896.		1897.	
1		2	3	4	5
		Cwts.	Mds.	Cwts.	Mds.
<i>Food-grains.</i>					
Rice	...	14,111	19,656	95,936	1,30,581
Paddy	...	9,024	12,283	8,724	11,874
Wheat
Gram and pulses	...	3,659	4,980	3,920	5,334
Other food-grains, such as jowar, barley, oats, &c.	745	1,014
Total	..	27,124	36,919	109,325	1,48,803

As in previous weeks, the chief feature of the import trade is the considerable quantity of rice, amounting to 89,635 cwts., received in Calcutta from Burma. The imports from Chandbali showed a falling off of 7,754 cwts. as compared with those for 1896. The shipments of rice from Balasore remained practically the same as in the previous year, but this port supplied 1,763 cwts. of paddy against nil in 1896. The bulk of the imports of gram and pulses came from Coconada and Chandbali.

Exports.—In the following statement the total quantity of each kind of food-grains exported by sea during the third week of February 1897 is compared with the figures for 1896 :—

15TH TO 21ST FEBRUARY				
			1896.	1897.
1	2	3	4	5
	Cwts.	Mds.	Cwts.	Mds.
<i>Food-grains.</i>				
Rice	253,910	3,45,600	154,989	2,10,957
Paddy	3,463	4,713	22	30
Wheat	1,216	1,655	577	785
Gram and pulses	13,789	18,768	16,283	22,163
Other food-grains, such as jowar, barley, oats, &c.	99	135	2,607	3,549
Total ...	272,477	3,70,871	174,478	2,37,484

The export trade in rice with foreign ports declined from 212,376 cwts. in the corresponding period of last year to 137,657 cwts. during the week under report. The exports by sea in the preceding week were 29,462 cwts. The shipments to Mauritius, West Indies, Cape Colony, and Natal amounted altogether to 63,222 cwts. against nil in 1896, while to Arabia, the United Kingdom, and Ceylon, the exports decreased by 86,238 cwts., 6,093 cwts., and 3,254 cwts., respectively. On the other hand, there was a complete cessation of exports to Germany, Abyssinia, and Aden, which together received 31,615 cwts. of rice in the corresponding period of last year. The figures under gram and pulses showed a slight advance of 4,910 cwts., due chiefly to comparatively larger supplies having been despatched to Mauritius, United Kingdom, Reunion and Trinidad.

In the case of the coasting trade, the exports of rice decreased from 41,394 cwts. to 17,332 cwts., those of paddy from 440 cwts. to 22 cwts., those of wheat from 1,195 cwts. to 441 cwts., and those of gram and pulses from 8,756 cwts. to 7,240 cwts. As regards miscellaneous food-grains, the figures rose from 76 cwts. to 337 cwts. The decrease in the rice trade was chiefly in the supplies carried to Bombay, Madras, and Travancore, while the quantity of gram and pulses shipped for Rangoon aggregated 1,656 cwts., against 3,107 cwts. in 1896.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below.

STATISTICS OF THE SEA-BORNE TRAFFIC OF THE MINOR PORTS
IN BENGAL IN FOOD-GRAINS.

No. 514 Statistics.—The following memorandum and statements are published for general information.

M. FINUCANE,
Secy. to the Govt. of Bengal.

STATISTICAL DEPT.,
The 2nd March 1897.

MEMORANDUM.

THE comparative statements below give statistics of the import and export trade of the minor ports of Chittagong, Narayanganj, Balasore (including both Balasore and Chandali), Cuttack and Puri during the week ending 7th February 1897, as compared with the trade of the corresponding period of 1896 :—

				IMPORTS.			
Ports.				From Foreign ports.	From Indian ports.	Total.	
				Cwts.	Cwts.	Cwts.	Mds.
Chittagong	{ 1896	489	489	666
	{ 1897	2,157	...	2,936
Narayanganj	{ 1896
	{ 1897
Balasore ports...	{ 1896	222	222	362
	{ 1897	359	488
Cuttack	{ 1896
	{ 1897
Puri	{ 1896
	{ 1897
Total	{ 1896	711	711	968
	{ 1897	2,516	2,516	3,424

				EXPORTS.			
Ports.				To Foreign ports.	To Indian ports.	Total.	
				Cwts.	Cwts.	Cwts.	Mds.
Chittagong	{ 1896	12	147	159	216
	{ 1897
Narayanganj	{ 1896	272	272	370
	{ 1897
Balasore ports...	{ 1896	33,245	64,937	98,182	1,33,637
	{ 1897	15,393	15,393	20,951
Cuttack	{ 1896
	{ 1897	11,755	11,755	16,000
Puri	{ 1896	5,143	5,143	7,000
	{ 1897
Total	{ 1896	38,400	65,356	103,756	1,41,223
	{ 1897	11,755	15,393	27,148	36,951

Owing mainly to larger supplies of rice, paddy, and gram and pulse from Narayanganj and Burma, the import trade of Chittagong showed a rise of 1,668 cwts. The Balasore trade also showed an improvement of 137 cwts., which was due to large despatches from Calcutta. Of miscellaneous food-grains none of these were sent to Balasore in the corresponding period of last year.

Balasore and Puri showed a decline of 82,789 cwts. and 5,143 cwts, respectively, in consequence of smaller despatches of rice, paddy, and gram and pulse to Calcutta; there were no exports to other Indian and Foreign ports. The trade of Cuttack was confined to Mauritius, to which 11,755 cwts. of rice were sent against *nil* in the corresponding period of 1896.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below:—

EXPORTS OF FOOD-GRAINS BY THE EAST INDIAN RAILWAY.

No. 557-Statistics.—The following statements show the quantities of rice and other food-grains—

- (a) Exported by the East Indian Railway from Howrah during the period from 1st January to 20th February 1897 inclusive;
- (b) Exported by the East Indian Railway from Kidderpore Docks, Chitpore, and the Port Trust Railway during the period from 31st January to 20th February 1897 inclusive.

During the month of January the quantity exported from these places was 87,800 maunds. 14,63,292 maunds were therefore carried up-country from Calcutta by the East Indian Railway between 1st January and 20th February 1897; the destinations to which 13,75,492 maunds were shipped appear in the statements below. Of this quantity, 9,53,007 maunds (or about two-thirds) were carried to the North-Western Provinces and Oudh, and 1,81,588 (about one-eighth) to stations in these provinces; the rest (2,40,897 maunds) were carried to other provinces.

M. FINUCANE,
Secy. to the Govt. of Bengal.

STATISTICAL DEPT.,
The 2nd March 1897.

Statement showing the quantities of rice and other food-grains exported from Howrah by rail from 1st January to 20th February, 1897.

WEATHER AND CROP REPORT.

For the week ending the 1st March 1897.

Burdwan.—No rain. Weather getting much warmer. A considerable amount of ploughing was done after the late rain, but the ground is again becoming hard. Prospect of *rabi* crops fair. State of cattle fair. Fodder and water sufficient. Common rice selling as follows:—

			Srs. c.	Srs. c.	
Sadar 10 0	to 12 0	} per rupee.
Kalna 10 8	to 11 0	
Katwa 10 15	to 11 2	
Raniganj	10 4	

Birbhum.—Rainfall nil. Weather seasonable. Sugarcane crushing nearly finished; outturn poor. Price of rice at Sadar 9½ seers, and Rampur Hat 11½ seers per rupee.

Bankura.—No rain. Weather seasonable. Pressing of sugarcane continues. Ploughing going on in places, but more rain is wanted. Fodder everywhere sufficient. Water insufficient in a few places. Cow-pox reported. Rice selling at Bankura 11½ seers and Vishnupur 11 seers per rupee.

Midnapore.—No rain. Weather hot. Prospect of indigo good. *Rabi* crops are still being gathered. Threshing of *aman* going on. *Boro* is being sown in Binpur and Gopiballavpur. Cattle-disease reported from Salbani, Naraingarh, Khespur, Binpur, and Benapura. Fodder and water sufficient. Common rice selling as follows:—

			Srs.		
Sadar	11	} per rupee.
Contai 12	to 13	
Tamluk	10½	
Ghatal 10½	to 12½	

Hooghly.—No rain. Want of rain felt throughout the district. *Rabi* suffers for want of moisture. Common rice sells from 8 to 11 seers per rupee.

Howrah.—Rainfall nil. Weather hot with clouds. Prospects of *rabi* not good. Fodder and water sufficient. Common rice sells from 8½ to 10 seers per rupee.

24-Parganas.—No rain. Weather warmer with cloud. Prospects of standing crops poor. Ploughing going on for the next crops, but rain wanted. Fodder and water sufficient. Some cattle-disease in Budge-Budge thana. Prices slightly fallen. Common rice sells as follows:—

			Srs. c.		
Sadar 9 to 10	8	} per rupee.
Barasat	10 0	
Basirhat	10 8	
Diamond Harbour	10 10	

Murshidabad.—No rain. Weather seasonable. Prospect of *rabi* crops not favourable. Indigo and mulberry doing well. Pressing of sugarcane still continues. Fodder sufficient. Common rice sells as follows:—

			Srs.		
Sadar	10½	} per rupee.
Jangipur	10½	
Kandi	11	

Four test-works open.

Jessore.—No rain. Weather hot in the day, nights cool; generally clear; occasionally foggy in the morning. Harvesting of *rabi* crops almost over. Lands are being prepared for cultivation of *aus*, but more rain is wanted badly. Fodder and water available. Sporadic cases of cattle-disease reported from Bangaon. Common rice sells as follows:—

			Srs. c.		
Jessore 10½ to 11	8	} per rupee.
Jhonida	10 0	
Magura 9½ to 10	0	
Narail	10 10½	
Bangaon	10 0	

Khulna.—No rain. Weather getting hot. *Boro* doing well. Rain wanted. Sowing of *til* going on. Common rice sells as follows:—

				Srs.	
Khulna	10 to 12	} per rupee.
Bagerhat	12	
Satkhira	9½	

Numbers employed on four relief-works—

			Men.	Women.	Children.	Total.
Relief-workers	422	nil	85	507
Dependants			Not ascertainable.	
Otherwise relieved	159	628	313	1,100
					Total	1,607

Wages calculated at 10 seers per rupee. No cattle-disease. Fodder available. Water getting scarce.

Rajshahi.—No rain. Prospects of standing *rabi* crops very poor. Transplantation of *boro* not yet finished. Lands are being prepared for *bhutoi* rice and jute. Sowing of jute commenced in some places. Fodder available everywhere. Scarcity of drinking-water reported from some places. Common rice selling from 9 to 11 seers per rupee. Two test-works open. Numbers employed on Saturday, 27th February—

			Men.	Women.	Children.	Total.
Test-workers	...		560	Nil	25	585

Price of rice at relief-works, 10 seers per rupee.

Dinajpur.—No rain. Weather somewhat hot in day, cool at night. Condition of standing crops fair. No report of any cattle-disease, nor any complaint for fodder and water. Price of common rice, 9 to 12 seers per rupee.

Jalpaiguri.—No rain. Days warm, nights cool. Preparation of land for *tetri* paddy going on. Harvesting of mustard and some other *rabi* crops commenced. Prospect of tobacco fair. Fodder and water sufficient. Average price of common rice, 8½ seers per rupee.

Darjeeling.—Rainfall at Sadar 01. Weather seasonable. Hills—Wheat and barley coming to perfection; *tori* and potatoes being harvested. *Bhutta* being planted. Terai.—*Haimanti dhan* being threshed; ploughing for jute and *bhadoi dhan* going on. Price of coarse rice:—

					Srs.	
Hills	9	} per rupee.
Terai	9 to 11	

Bhutta, 13 to 20 seers per rupee.

Rangpur.—No rain. Lands mostly prepared for *aus* and jute and sowing going on. Rain wanted. Harvesting of mustard finished; prospects fair. Common rice selling at 9 to 10 seers per rupee. Fodder and water sufficient.

Sonthal Parganas.—No rain. Weather clear with west wind. *Rabi* doing well. *Mahua* promise well. Mango in flower. Price of common rice 8½ seers per rupee at Rajmahal and 10 to 11 seers elsewhere; of maize 11 to 14 seers. Fodder beginning to fail. Water-supply fair. Jamtara private works open; test-works opened, but accounts not clear; Godda works not attended; Deoghur proposed.

Cuttack.—Rainfall nil. *Dahua* doing well. Condition of men and cattle generally good. Rice only available in places in small quantities. Price of common rice—

				Srs. c.	
Cuttack	11 13	} per rupee.
Jajpur	14 7	
Kendrapara	14 7	
Banki	15 12	

Balasore.—No rain. *Sarad* rice being threshed. *Dahua* crop flourishing, and is in ear in places. Sugarcane being pressed. Price of rice varies from 12 to 14 seers per rupee in the interior. Rice sells at 12 and 14 seers per rupee at Balasore and Bhadrak respectively. Fodder and water sufficient.

Angul.—No rain. Cultivators engaged in ploughing their fields and planting sugarcane. Day-labourers have found work in field since the late rain. Condition of people good. Cattle-disease continues. Fodder sufficient. Price of coarse rice, 16 seers per rupee in Angul and 13½ seers in Khondmals. Coarse rice sells at 11 seers per rupee at head-quarters of Angul Sadar subdivision only.

Puri.—No rain. *Dahua*, *mandia*, and *mug* grow fairly well. Land being ploughed for next rice crop. Fodder and grain scarce in tracts adjoining Chilka. Price of common rice stationary.

Hazaribagh.—No rain. Weather hot for the season. Faddy-fields are being ploughed. Rice selling at 8 to 9 seers per rupee. Preparations are being made to start relief works.

Lohardaga.—No rain. Ploughing continues. State of standing crops good. Rice sells at 8 seers per rupee at Ranchi and 8 to 12 seers in the interior. Fodder and water sufficient. Cattle-disease reported from some police-stations. Grain in stock sufficient for the present.

Palamanu.—Rainfall nil. Weather cold. *Rabi* doing well and ripening. Eight-annas yield expected. *Mahua* backward. Prices risen further. Sixty-three markets selling below 9 seers, against 57 markets last week; 17 markets against 21 at 9 seers; 10 markets against 12 below 10 seers. Six hundred and fifty-eight maunds bounty rice arrived; price asked 8 seers 11½ chittaks (since reduced to 9 seers); sales slow in consequence. Numbers on relief—

		Men.	Women.	Children.	Total.
Relief-workers	1,687	1,282	980	3,949
Otherwise relieved	92	117	44	253

Manbhum.—No rain. Weather seasonable, Sugarcane being transplanted in places. Cattle-disease reported from thanas Raghunathpur, Barabazar, Chas, Chandil, and Purulia. Fodder and drinking water sufficient at present. Average price of common rice 10 seers per rupee at Sadar and 9½ seers at Govindpur. Stock of food-grains sufficient at present. 1,921 men, 1,321 women, and 250 children—total 3,492—on nine test relief-works on 27th February. Details of those on gratuitous relief not available, but such persons between 4 and 5 thousand.

Singhbhum.—No rain. Rice plentiful. Price of rice 8 to 12 seers per rupee.

General Summary.—There was no rain during the week. The *rabi* crops are maturing, and are being harvested in some parts. In Bihar the *rabi* crops continue to promise well, but in the rest of the Province (except in portions of the Rajshahi and Chota Nagpur Divisions) the prospects are poor. Spring rice is doing well, having been benefited by the late rain. The ploughing of lands for the early rice and jute is going on, but more rain is required. The prospects of opium in Bihar are very favourable. Tobacco is reported to be a good crop. Sugarcane pressing continues. Fodder-supply is generally sufficient. Scarcity of drinking-water is reported from some districts. The prices of food-grains have fluctuated slightly in some districts. In the distressed districts the prices of the staple grain on which the famine wage is based are—Nadia (common rice) return not received, Khulna (common rice) 10 seers, Rajshahi (common rice) 10 seers, Patna (common rice) 11 seers, Shahabad 10½ seers, Saran (Indian-corn) 10 seers 1 chitak, Champaran (Indian-corn) 10 seers, Muzaffarpur (Indian-corn) 10½ seers, Darbhanga (Indian-corn) 10 seers, Bhagalpur (common rice) 10 seers. There was a slight fall in the price of Indian-corn in Saran and Muzaffarpur.

The numbers on relief on Saturday, the 27th February, were —

Nadia	...	Return not received.	
Khulna	...	1,607	
Rajshahi	...	585

The mean pressure of the seven days ... 29.877

The average pressure of the corresponding period for 24 years, Surveyor-General's Office ... 29.911

The total number of hours of bright sunshine ... 54.0

The maximum possible number of hours of sunshine ... 80.8

The mean temperature of the seven days ... 73.7

The average temperature of the corresponding period for 24 years, Surveyor-General's Office ... 75.8

The extreme variation of temperature ... 34.0

The maximum temperature ... 91.6

The highest velocity of the wind in one hour ... 9

The mean relative humidity ... 75

The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office ... 71

The total fall of rain from 21st to 27th February 1897 ... Nil

The average fall of the corresponding period for 24 years, Surveyor-General's Office ... 0.11

The total fall from 1st January to 27th February 1897 ... 1.43

The average fall of the corresponding period for 24 years, Surveyor-General's Office ... 1.40

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed, open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, No. 581, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables compiled by the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the traces of a Beckley's anemometer.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; , dew; fog.

WATER-SUPPLY.

No. 1243L.S.-G.—The 5th March 1897.—The following reports of the progress made in the several districts of the Dacca and Patna Divisions in collecting and placing on record the chief facts regarding water-supply are published for general information.

H. H. RISLEY.

Secy. to the Govt. of Bengal.

No. 2328G., dated Dacca, the 22nd February 1897.

Memo. by—The Offg. Commissioner of the Dacca Division.

Copy of the following submitted to the Government of Bengal, Municipal Department, in continuation of this office No. 1806G., dated 4th January 1897.

No. 108G., dated Barisal, the 13th February 1897.

From—N. D. BEATSON-BELL, Esq., Offg. Magistrate of Backergunge,
To—The Commissioner of the Dacca Division.

IN continuation of paragraph 3 of this office No. 962G. of the 31st December last on the subject of improvement of water-supply, I have the honour to state that all the municipalities in this district have opened Registers I and II as proscribed by Government Circular No. 7T.M., dated 15th May 1896. In Pirojpur and Patuakhali Municipalities the Registers have been completely written up and in the others steps are being taken to furnish details.

No. 115G., dated Bankipore, the 24th February 1897.

From—J. A. BOURDILLON, Esq., Offg. Commissioner of the Patna Division,
To—The Secretary to the Government of Bengal, Municipal Department.

I HAVE the honour to acknowledge the receipt of your Circular No. 58L.S.-G., dated the 12th December 1896, asking for a quarterly report on the progress made in each district of this Division in collecting and placing on record the chief facts regarding water-supply, and the steps, if any, that have been taken by Municipalities and District Boards, respectively, to improve existing sources of water-supply and to open new ones.

2. In reply, I beg to forward herewith in original the marginally-noted letters, being quarterly reports of the progress made in the several districts in this Division. The report from Champaran is not yet to hand. It will follow when received.

1. Letter from the Chairman, District Board, Patna, No. 1173, dated 11th February 1897.

2. Letter from the Magistrate of Gaya, No. 17, dated 4th January 1897.

3. Letter from the Magistrate of Shahabad, No. 4820, dated 30th December 1896.

4. Letter from the Magistrate of Saran, No. 47, dated 9th January 1897.

5. Letter from the Magistrate of Muzaffarpur, No. 19, dated 7th January 1897.

6. Letter from the Chairman, District Board, Darbhanga, No. 693, dated 7th January 1897.

3. In a recent Circular I have already called the earnest attention of all District Officers to the great importance of protecting the purity of the water-supply during the next

few months, not only on relief works, but on all frequented roads and in the vicinity of all works.

No. 1173, dated Bankipore, the 11th February 1897.

From—T. INGLIS, Esq., Chairman of the District Board, Patna,
To—The Commissioner of the Patna Division.

WITH reference to your No. 518G.Circular, dated the 18th December last, giving cover to the Government Circular No. 58L.S.-G., dated the 12th idem, calling for a report on the progress made in water-supply in the district, I regret I am unable to submit a complete report in the forms appended to Government Circular No. 8T.M., dated the 15th May 1896, as I have not been able to collect complete information required under several heads. From what I have on record at my disposal, I am in a position to say that the scheme of water-supply has not been lost sight of since the subject has drawn the attention of Government in late years, and Mr. Forbes has in his various circulars insisted on the local bodies to promote the scheme as desired by Government.

2. Since the question has been started, the District Board have been increasing grants under this head as much as the funds at their disposal would permit, and their chief aim has been to provide wells along roadsides for the sake of travellers which is thought more urgent than constructing wells in villages, where it rests with the villagers and the landlords to look out for themselves.

3. The success of the Government scheme depends much on the exertion of the landlords and rich persons of villages, and the spirit of the Government Circular No. 23L.S.-G., dated the 11th April 1866, which specially touches this point, has been widely published throughout the district through the members of the District and Local Boards.

4. The District Board have, at their meeting held on the 25th July 1896, made it a rule that wells should be provided along the roadsides, and that sites and estimates should be approved of by the Board before any such works are started, in order to prevent Local Boards undertaking works which should be left to private individuals.

5. The Local Boards which were consulted have made the following suggestions in the furtherance of the scheme:—

(a) That wells should be provided on roadsides 2 miles apart.

(b) That wells should be furnished with lathas, chains and iron buckets, &c.

(c) That headmen and chaukidars of villages should be made responsible to keep wells secure from pollution.

(d) That bye-laws should be framed for prosecuting the persons found polluting wells.

6. I have supported their suggestions, and will see that wells are furnished with lathas and chains, &c., as funds permit. The difficulty is to obtain chains of a suitable calibre. Those proposed are too heavy and could raise several tons. In course of a few years this suggestion, I hope, will be fully carried on into effect.

As regards the suggestion (a) the bye-laws, which are now under amendment, will be submitted later on for the approval of Government with a complete report on this subject as soon as I am in receipt of the information to be filled up in the forms above alluded to.

No 17, dated Gaya, the 4th January 1897.

From—H. SAVAGE, Esq., Magistrate of Gaya,
To—The Commissioner of the Patna Division.

IN reply to your memorandum No. 518G.Cir., dated 18th December last, and connected papers, respecting the collecting and placing on record of the principal facts regarding water-supply, I have the honour to report as follows.

2. In the three municipalities in the district, complete lists of wells have been prepared, and the Commissioners are considering which should be set aside for drinking purposes.

For the remainder of the district, Register in Form No. I has been completed for Jahanabad and Aurangabad subdivisions by the Local Boards.

In those subdivisions only four villages are found with an inadequate water-supply, and the Local Boards have been directed to submit definite proposals for providing drinking water for those villages.

The Register I from Nawada and the Sadar Local Boards has not yet been received in a complete form.

Register II has not as yet been received from Jahanabad in a complete form.

3. For Gaya town there is a good scheme for water-works, and steps are being taken to raise funds by subscription for carrying out the scheme. In the other municipalities and and over the district generally, there is a plentiful supply of well water, but the difficulty is to keep the wells free from pollution.

In the municipalities the difficulty can be met by setting aside certain wells for drinking purposes, and, if necessary, closing the rest. In the outside villages, however, there is no law under which certain wells can be set aside for drinking purposes, and even if there were, it would be generally inoperative, in the absence of local police for detecting, local tribunals for fining, or local opinion for restraining those whose view with respect to a well is that it is at once the proper place for drinking, bathing and washing their clothes and culinary utensils.

No. 4820, dated Arrah, the 30th December 1896.

From—C. R. MARINDIN, Esq., District Magistrate of Shahabad,
To—The Commissioner of the Patna Division.

I HAVE the honour to submit the report called for in your memorandum No. 518G.Cir., dated the 18th current, on the subject of collecting and placing on record the chief facts regarding the water-supply and the steps, if any, taken by Municipalities and the District Boards to improve the existing sources of water-supply and to open new ones.

2. As regards municipalities, registers prescribed in Government order No 7T.M., dated 15th May 1896, have been opened in all the municipalities and existing sources of supply recorded. The wells in all were cleansed during the year by permanganate of potassium; wells have been set apart for drinking and other purposes. The existing number of wells is adequate in all of them.

3. In Arrah there are water-works which supply pure filtered water from the river Sone to the large portion of the town. In Jagdispur the water-supply is drawn from wells, of which there is a sufficient number. In Buxar the water of the Ganges river is chiefly used, but there are 130 wells and 23 tanks within the town. Of these 122 wells are considered wholesome and 8 unwholesome. The former have been set apart for drinking purposes. Of the tanks, one is said to contain good water, which is used for drinking purposes, three reserved for bathing, and the rest for other purposes. A new well was sunk at a cost of Rs. 1,312-3-7, of which Rs. 1,212-3-7 was paid by the Municipality, and the remainder by Government.

In Dumraon eight tanks and 96 wells have been registered. Of these, 40 wells have been reserved for drinking purposes. A tank called Ugrah Singh's tank in mahalla Dharamsala is being cleansed and re-excavated and arrangement made to obtain water from the Bhojpur distributary of the Sone Canal. An experiment was made with the Abyssinian tube well, but without success.

In Bhabua 20 wells have been reserved for drinking purposes, and out of seven tanks two have been set apart for drinking and four for bathing purposes and one for washing clothes, &c. Iron chains and buckets have been provided for each well.

In Sassaram there are two wholesome tanks in the Municipality; one is Shersah's tank, which is the main source of water-supply and is set apart for drinking purposes. A guard is appointed by the Municipality; the other tank called "Goshain's tank" is assigned for bathing, washing and other purposes. There are 210 wholesome wells in the town.

4. With regard to the District Board, lists of villages, containing 100 houses and over, were prepared by the Magistrate's office and made over to the District Board on the 2nd September 1896. These are embodied in printed forms, which are being distributed to police and other executive officers, whose duties require them to be on the move in the district. When the lists are returned with the necessary information supplied, registers, as required by Government Circular No. 8T.M., dated the 15th May 1896, will be opened. To enable the Local Boards to improve the sources of water-supply, a sum of Rs. 500 has been placed at the disposal of the Chairmen at Buxar, Sassaram and Bhabua.

No. 47, dated Chapra, the 9th January 1897.

From—E. P. CHAPMAN, Esq., Joint-Magistrate, Saran,
To—The Commissioner of the Patna Division.

I HAVE the honour to acknowledge receipt of your memorandum No. 518G.Cir., dated the 18th December 1896, forwarding Government Circular No. 5818-G., dated the 12th December 1896, on the subject of the water-supply of this district.

2. The Chapra Municipality have not yet replied to my enquiry, but I understand that the existing water-supply is ample. The Chairman of the Revilgunge Municipality reports that with the numerous wells in the town and the stream of the Gogra at hand, there can never be any fear of a scarcity of water. In the Siwan Municipality the wells have been recently cleansed and disinfected and fresh wells have been constructed. The Chairman reports the supply to be sufficient. The Municipal Board will be directed not to allow the matter to escape their attention.

3. The District Board have not lost sight of the importance of the subject, and it is hoped that Mr. Berkley will shortly pay a visit to the district and elaborate a scheme for the permanent improvement and extension of the distributions to the Saran Canals. It is generally held that tanks are not of such value except as a source of supply for cattle, and the digging of wells has been encouraged in preference. The matter will not be lost sight of.

No. 19, dated Muzaffarpur, the 7th January 1897.

From—L. HARE, Esq., Magistrate of Muzaffarpur,
To—The Commissioner of the Patna Division.

WITH reference to your memorandum No. 518G., dated 18th ultimo, requesting me to submit report of the progress made in collecting and placing on record the chief facts regarding water-supply and the steps that have been taken by the Municipalities and the District Boards to improve the existing sources of water-supply and to open new ones, I have the honour to report as follows:—

I.—It appears from the report of the District Board that the registers regarding water-supply in this district are being prepared from the Settlement Officer's records and the Census tables, and will be completed by the Famine Circle Officers.

Progress made.

Register for Hajipur thana is nearly completed.

Registers for Katra, P'upri, Belsandh, Sheohar, Lalganj and Mahwa thanas are partly done.

II.—From the reports received from the municipalities, viz., Muzaffarpur, Hajipur, Lalganj and Sitamarhi, it appears that they have opened the registers. They further report that their wells have been cleaned and there is no complaint about the water-supply.

No. 693, dated Darbhanga, the 7th January 1897.

From—The Chairman, District Board, Darbhanga,
To—The Commissioner of the Patna Division.

REFERRING to your memorandum No. 518G.Cir., forwarding Bengal Government Circular No. 5818-G., dated the 12th December 1896, on the subject of the maintenance of a register of the water-supply in the district and the steps taken to improve the existing sources, I have the honour to report that, as directed in paragraph 3 of your letter No. 225G.Cir., dated 29th May 1896, the register showing villages with 100 houses or more has been prepared from the Census tables, and the necessary information has been asked from the police. Reports from all thanas, except Madhopur, Bahera and Koseria, have been received.

The general register embodying all information will be compiled as soon as these remaining reports are received. Printed slips in the prescribed form have also been supplied to the Civil Surgeon for collecting information through the vaccinators to check the figures, &c., received from the police.

2. Beyond clearing silt from some of the existing roadside wells and providing lime and permanganate of potash to purify their water, no other steps have yet been taken to improve the existing sources of water-supply. In the course of the famine relief works now in progress, the re-excavation and clearing of a very considerable number of old tanks will also be taken in hand.

DISTRESS IN THE ORISSA DIVISION.

No. 676.—(Fam.)—*The 9th March 1897.*—The following papers are published for general information:—

M. FINUCANE,
Secretary to the Government of Bengal.

No. 658Agri. (Fam.), dated Calcutta, the 9th March 1897.

From—M. FINUCANE, Esq., Secretary to the Government of Bengal,
To—The Commissioner of the Orissa Division.

I AM directed to acknowledge the receipt of your letter No. 234R., dated the 5th February 1897, with its enclosures, regarding the condition and prospects of the several districts of the Orissa Division, and in reply to convey the following observations and orders of the Lieutenant-Governor.

2. *Paragraph 6 of your letter.*—The Lieutenant-Governor notices with satisfaction that you do not see any grounds for apprehension at present in the state of the Balasore district generally.

3. *Paragraph 8 of your letter.*—This paragraph deals with the sources from which the Collector of Cuttack derives his information of the outturn of crops; and you describe these sources as being "habitually unreliable." The Lieutenant-Governor shares your suspicion that in this district the officers entrusted with the task of reporting on the outturn of crops have disregarded the instructions of Government, and have habitually used the term "sixteen annas" to represent a bumper and not an average crop. I am to request that you will enquire into this point, and take the necessary steps to correct the misconception, if it is found to exist.

4. *Paragraph 9 of your letter.*—With regard to the district of Cuttack, it is believed that the granaries of zamindars and others will prove a valuable resource during the present year of scarcity, and you say that you have not been informed that they have been depleted. I am to request that you will ascertain positively and report to Government whether these granaries have or have not been depleted.

5. *Paragraph 11 of your letter.*—The Lieutenant-Governor accepts your conclusion that at present there appears to be no cause for alarm in Cuttack, but that the necessity for vigilance is clear, and agrees that the Collector should attend to the mapping out of relief circles and to the preparation of schedules of works for areas in which the appearance of distress is probable. He should also have an organisation ready to administer gratuitous relief should it be required, and should enquire into the sufficiency of communication, &c., as you suggest.

6. The tracts reported by the Collector of Cuttack as likely to be affected include the Kujong and Kanika Wards' estates. His Honour is of opinion that it is the duty of the Court of Wards, as a model landlord, to undertake any relief works that may be needed in these estates.

7. In paragraph 12 of Mr. Growse's letter No. 224G., dated the 24th January 1897, it is stated that there is absolutely no machinery for imports. The Lieutenant-Governor does not understand why rice and other grain cannot be imported into the district of Cuttack by steamer if necessary. Experience in Bihar shows that native dealers who ordinarily export are willing enough to import also if put in the way of doing this at a profit. You should see that information as to the selling price of rice in Calcutta and Rangoon is regularly furnished to all the principal dealers.

8. The Lieutenant-Governor approves the action reported to have been taken in paragraph 13 of Mr. Growse's letter. As suggested, the funds of the District Board should be diverted from schemes which do not supply much earthwork, to projects suitable for purposes of famine relief.

9. *Paragraphs 14 and 18 of your letter.*—It is stated that there can be no question that scarcity prevails in a limited area in the district of Puri, but that you have at present no definite information as to area or population

affected. The Lieutenant-Governor awaits the further report, under section 9 of the Famine Code, which you have called for from the Collector.

10. *Paragraph 14 of your letter and paragraph 7 of letter No. 66, dated the 9th January 1897, from the Collector of Puri.*—With regard to a place called Satpara, which the Collector of Puri visited on the 6th January, it is stated by him that “if lives are to be saved, paddy must be brought here and stored in godowns.” In the same paragraph Mr. Leo writes—“I have written in to Puri for ten cartloads of paddy every week to Satpara, but godowns will also have to be established at Arakhkuda, Parikud and Malud.” The Lieutenant-Governor understands from a telegram recently received from you, that the godowns referred to have been opened by private traders for the sale of imported grain, at their own risk, and that the Collector has merely advanced them money at interest to enable them to import grain. Sir Alexander Mackenzie is disposed to think that the action taken was under the circumstances judicious, but the orders of Government should have been obtained, before advances for this purpose were made.

11. It is also stated that in Malud a water famine is anticipated in April or May. The daily weather report issued by the Meteorological Reporter shows that in Puri there was a heavy fall of rain on the 17th February 1897, amounting to 4.25 inches. The Lieutenant-Governor hopes that this will have the effect of averting the anticipated danger.

12. *Paragraph 15 of your letter.*—The Lieutenant-Governor agrees that the Collector of Puri should map out his circles of relief, have schedules of works ready in each case, organise gratuitous relief, and enquire into communications, &c., as suggested by you. His Honour would be glad if you could again visit and thoroughly inspect the affected areas in Puri at an early date, and arrange in concert with the Collector, for such measures of relief as may be required. Full and early report, as required by article 9 of the Famine Code, should be submitted for the affected areas, and regular fortnightly reports should follow. You have funds for gratuitous relief, and no time should be lost in appointing local committees to disburse the money granted from the Charitable Relief Fund.

13. I am also to acknowledge the receipt of your letter No. 329R., dated the 18th February 1897, in which you apply for sanction to the construction of an embankment on the eastern side of the Chilka lake. In reply, I am to request that you will consult with the Superintending Engineer in charge of the Orissa circle, and submit a further report on the subject. Meanwhile the work proposed and the other embankments referred to in paragraph 7 of your letter may, if the Superintending Engineer and you approve of them, be begun in anticipation of sanction.

14. As regards the appointment of Mr. Parish as Circle Officer for the Chilka area, I am to say that a reference has been made to the Madras Government.

No. 329R., dated Camp Balugaun, the 18th February 1897.

From—H. G. COOKE, Esq., Commissioner of the Orissa Division,
To—The Secretary to the Government of Bengal, Revenue Dept.

I HAVE the honour to enclose a copy of letter 290 of 11th February 1897, from the Collector of Puri, and my reply thereto. I have endeavoured in my reply to deal fully with each question that has arisen, and to supplement this by calling the attention of the Collector to various points on which his reports are silent.

2. There has been considerable delay in getting in the report required under section 9, and I still await the material for the same, and the revised schedule of works; there appears too much uncertainty as to whether relief works, that are relied on, have actually been commenced. I have issued clear orders to commence them at Malud, Parikud and Satpara. Mr. Beale is dealing with Chabiskud, and I apply for sanction to the construction of the embankment proposed in that locality. I am doubtful whether this should be done by the District Board, but propose that the District Board should begin it, and, if necessary, it should be taken over by the Public Works Department. For the

reasons given in my letter to the Collector, it appears certain that the sanction of Government is required for the work under section 19, and I therefore now apply for such sanction.

I also request sanction to the appointment of Mr. Parish, as Circle Officer, for the whole Chilka area, on a horse allowance of Rs. 100, and with the usual establishment.

3. The arrangements for conveying rice to the places where it is wanted, are now in progress, and Mr. Lee speaks confidently as to his resources in this respect, one individual in Khurda being, in Mr. Lee's opinion, capable of supplying all the rice that will be required for Malud and Parikud. I understand that the population of these places is 24,000, of whom about one-third will have to be considered in providing a grain supply, 8,000 persons at even two-thirds of a seer a day gives 5,333 seers, or 133 maunds a day: this appears an enormous quantity of grain to provide from now till the next harvest, and I find it difficult to share Mr. Lee's confidence on this point. I cannot say that the facts are exaggerated; these tracts ordinarily depend entirely on their own resources, and, if these have entirely failed, I do not see how we can estimate for a smaller quantity.

There are, at present, three contractors bringing grain into the Chilka area; depôts are to be opened at Satpara and Malud, and Kaunas near Balbhadrapur, on the Dyah, which may suffice for the present; but unless our estimates are extremely fallacious, I should think more contractors will be necessary.

4. Gratuitous relief remains to be organized, and the agency available seems inadequate. I think that it may be necessary to establish dispensaries under section 84, mainly with a view to gratuitous relief, the accident that there is a dispensary at Satpara, has attracted some 50 or more applicants for gratuitous relief gathered from a few villages.

5. I visited Satpara and some villages in Parikud. I did not see anywhere more indigent persons than could be produced in any year in a similar area; but these are now thrown on public relief, instead of being supported by their neighbours. The people are eating a weed, locally known as *douma sâj*, and the roots of the kanika grass; both are well flavoured, and I think it not improbable that they form articles of diet in ordinary years, as a prosperous Bengal raiyat sets his fish-trap for small fry that one would suppose that none but the poorest would resort to as an article of diet.

6. I am not in a position to gainsay the conclusions of the Collector as to the extent of the evil; indeed, where crops have entirely failed a population which only in ordinary years raises enough rice for its own support, I do not see how his conclusions can be questioned; at the same time it is gratifying to be able to say that, so far as my observations went, I did not see in the condition of the people any cause for uneasiness. In this area famine commenced in 1866, and I think that the relief works ought to be opened at once as, indeed, I supposed they had already been.

7. About one matter I am quite clear, the floods on the Chilka have swept away the protective embankments of Malud, Parikud, Satpara, and Chabiskud, and if these are not restored, there will be no protection from yearly floods and loss of crops; these certainly should be restored, and they afford the most useful relief works possible, and should, I think, take precedence of other works.

8. Grain is reported to be leaving the Puri district for Ganjam in large quantities, and I feel some concern about the grain supply of the district generally, being unduly depleted. Mr. Dutt estimated a large deficit in the stock available in Orissa, as compared with the actual requirements till next harvest. I should be glad to be informed whether action should be taken by me to induce merchants to import rice from Burma, or is this done in Calcutta? There are Bombay merchants in Cuttack, who are accustomed to export on a large scale, and are quite capable of importing on a large scale; but I hesitate to take any steps in this direction without special instructions, the estimates are of doubtful value, and possibly any arrangements of the kind would be made for the province generally in Calcutta: if grain is to be brought from Burma to Orissa, however, it would be simpler to bring it direct, rather than to trans-ship it at Calcutta.

No. 290, dated Puri, the 11th February 1897.

From—W. H. LEE, Esq., Offg. Collector of Puri,
To—The Commissioner of the Orissa Division, Cuttack.

IN continuation of my reports Nos. 66 and 116, dated 9th and 20th January 1897, respectively, on the subject of the distress in the Chilka tracts, I have the honour to report as follows.

2. My predecessor, Mr. Bell, believing that distress was prevailing in those tracts, ordered one or two test-works to be undertaken, under the supervision of the District Engineer. The results have not yet been reported, and I have, in the meantime, seen the tracts for myself, and reported my observations in the letters quoted above. I have found that it is necessary to open relief works there at once.

3. I have, therefore, in anticipation of your sanction and Government, appointed Mr. Parish, the Salt Inspector at Satpara, to be the Circle Officer, under the Famine Code, for Malud and Parikud, and Mr. Beale, District Engineer, for Pargana Chabiskud, and beg to propose for them a horse-allowance of Rs. 100 each, with nine clerks at Rs. 30 each to begin with.

4. Protecting the country from the incursion of salt-water, there is an embankment on the eastern side of the Chilka lake. This embankment was done as a relief work in the famine of 1866. It is now in a state of great disrepair. During the floods of July last, which swelled the waters of the Chilka to an unusual height, the embankment was washed away in most places, and the salt-water, passing through them, totally destroyed the crops of a large part of Pargana Chabiskud, including the directly-managed estate of that name, and the Wards' Estate of Rorang. It is necessary that this embankment, a portion of which is already maintained as an embanked road by the District Board, should be repaired within the next two months, as the south wind drives the water up towards the bundh. I have ordered earthwork to be begun on it at once. The work is roughly estimated to cost about Rs. 10,000, and an estimate is being prepared by the District Engineer. Section 52 of the Famine Code says that large works will be the backbone of the system of relief in the latter stage of a famine, while small works should be utilized to the utmost in the early days of the scarcity. But having regard to the provisions of Section 55, and those of paragraph 4 of the rules of Government of North-Western Provinces and Oudh, enclosed with their Resolution No. 18 Public Works of 1896, and forwarded with Bengal Government Circular No. 74, dated 31st December 1896, and also considering the fact that unless the embankment be repaired immediately within the next two months, there is danger to a large amount of Revenue in the directly-managed and the Wards' Estates, I have thought it best to order repairs to be done at once, to the Nuni bundh, as it is commonly called, as a relief work. I propose to disburse money on this account from Government in the first instance, and to adjust it subsequently between us and the Province.

5. I have, in reference to paragraph 30 (c) of the Famine Code asked Messrs. Parish and Beale to ascertain and report what works can be carried out in the Circles, with rough estimate of the cost, and when I have their reports, I shall be in a position to report the extent to which Imperial aid is likely to be required for the tracts in question.

6. Your sanction to the arrangements and proposals is solicited.

No 328R., dated Camp Puri, the 15th February 1897.

From—H. G. COOKE, Esq., Commissioner of the Orissa Division,
To—The Collector of Puri.

IN reply to your letter No. 290, dated the 11th February, I have the honour to state that it is to be regretted that the result of one or two test-works opened by Mr. Bell was not formally reported, but the fact that you have been to the affected areas on the Chilka, and satisfied yourself as to the necessity for opening relief works, will doubtless be accepted as an equivalent to such report.

2. I understand that relief works have actually been opened, and gratuitous relief administered under Chapter III of the Code, and that the relief work is paid for at the minimum rates prescribed by Chapter VII of the Code. As I have already pointed out to you, action taken under Chapter III of the Code should have been preceded by action under Chapter II. The protective embankment for Chabiskud should be commenced; this, I think, is only relief work that has been specifically referred to in your reports. I learn from you verbally that a relief work in the form of a road is contemplated in Malud and Parikud, but I am unable to ascertain whether any action has been taken in this direction, some information being to the effect that it has not been commenced; other information shows that it was commenced a fortnight ago; it appears to be a fact that no officer is on the spot looking after the work, which makes it probable that nothing is being done. In view of the fact that some weeks ago Malud was described as the worst part of the district, this is not a matter that should remain in uncertainty, and you should at once send out an officer to see that the relief work is opened. Mr. Gupta volunteered to start the work, but it should ultimately be placed under a District Board Overseer, under the supervision of Mr. Parish, whom you have selected as Superintendent. I think that protective embankments should

take precedence of the road in Malud and Parikhud. The only extensive work that has been a considerable time in progress, is the protective embankment made by the Raja of Parikud, which is, I learn, nearly finished, and I presume that other works will be necessary in Parikud ere long. I find that a relief work to be executed out of the Khurda Government Estate Improvement Fund awaits sanction. It consists of an embankment to protect Satpala, Bankijol, Noagown, Baghunda and Seopukarda hamlets, as well as 18 survey mauzas. It is important that this should be pushed on, as the high tides will do further damage to rice lands if this embankment is not made before they take place. Mr. Gupta should begin the work in anticipation of sanction; if his funds are insufficient, they should be supplemented by the District Board. You tell me that there can be no doubt as to the necessity of reporting under Chapter II that scarcity is apprehended, and famine is imminent in certain portions of your district, and your action in opening relief works and administering gratuitous relief, shows that such has been your conviction for some little time; please therefore report under section 10, supplying me with the information necessary for my report under section 9.

3. It will be necessary to consider what areas should be declared. I understand that a portion of Chabiskud, which is also adjacent to the Chilka lake, is similarly affected to the Malud. Parikud area to the south of the lake you should consider whether this second area should not be dealt with in the same report, and so with the detached villages you speak of on the north shore of the Chilka. From what I gather all these tracts might be simultaneously dealt with.

4. I would draw your attention to the remission statements for certain villages in Khamahal Chatiskud which, I think, will establish the fact that those villages normally lose their crop and are allowed abatements, year by year, as a matter of course. The people of these villages apparently have some resources other than their crops which constantly fail; it will have to be considered whether things are really worse than usual in those parts for, in an ordinary year, it would be possible to produce evidence of local destruction of crops, which nevertheless had not called for special relief measures in the past.

5. You inform me that you have, in anticipation of sanction, appointed Mr. Parish, Salt Inspector, as Circle Officer of Malud and Parikud, and Mr. Beale, District Engineer, as Circle Officer of Chabiskud. The area assigned to a Superintendent, that is, an officer of the status of Mr. Parish or Mr. Beale, in Bihar, is two hundred to three hundred square-miles, with a population of 250,000 persons, the Chilka areas collectively would not provide works for one such officer. I see no objection to Mr. Parish being given the post of Superintendent of the whole affected area, with the 100 Rupees horse-allowance. His salt work can, at least, for the present, be left more to subordinates than is perhaps desirable, but I understand that Mr. Shreen may be trusted to see after it; the urgency of the case, and the impossibility of finding suitable officers locally, will doubtless be accepted as adequate reasons for such a course. Mr. Beale, District Engineer's services, cannot be concentrated on the present famine area; his duties lie not in the Chilka area alone, as is the case with Mr. Parish, but all over the district of Puri, and even, should scarcity be confined to the Chilka area, he could not neglect his work in the rest of the district, still more is it important to have his services available wherever scarcity may arise in your district. I cannot therefore approve of Mr. Beale being appointed as Superintendent; his services should be utilized, however, in starting the works in Chabiskud, and, if necessary, in the other affected areas around the Chilka.

6. Mr. Parish will not only require Mr. Beale's assistance, but will also require Inspector's dealing with areas of 30 to 40 miles, with populations of 2,500 to 3,000 persons. I cannot find on what scale Inspectors are paid in Bihar. I presume that they could be had for Rs. 50 a month or less, but I do not see why the work of Inspectors should not be done at present by Overseers and Sub-Overseers of the Board, whose other duties can be entrusted to temporary substitutes.

7. The scale of establishment, allowed to Superintendents in Bihar, will be found at paragraph 2, Resolution No. 5133, of 10th December 1896, together with other details that I quoted above; there is some reference to the pay of Superintendent at page 10 of the Notes of a Conference held at Sonapur on 20th November 1896, forwarded with Circular No. 49 Agri. of 26th November 1896; your office establishments are excessive and should be reduced.

8. Your paragraph 4 refers to the construction of an embankment on the eastern shore of the Chilka lake as a relief work; the work is roughly estimated to cost Rs. 10,000, and as the District Board cannot command this sum, and also, as I judge, the work will occupy 1,000 men for three months, it would appear that it comes under the head of 'large works,' section 55 of the code, and it appears open to question whether this work should not be placed under the Public Works Department. I shall be obliged by your informing me, at an early date, whether you think this should be done, or whether the work can be carried out by the District Board. Section 54 of the Code classifies relief works as those done by the Public Works out of Imperial or Provincial funds, and those dealt with by the District Board out of local funds. This would lead to the conclusion that the present one, which will require the assistance of Provincial funds, would ordinarily be made over to the Public Works Department. In any case it appears certain that the previous sanction of Government is necessary, as the cost will fall on Provincial funds; you say that the cost will be ultimately adjusted by the District Board, but supposing the Board capable of refunding Rs. 10,000 which seems scarcely possible in view of the heavy calls that it may have to meet this year and next year, the date of such adjustment is likely to be remote and I think it only right

to treat the work as one made from Government funds, and apply for sanction under section 19 of the Code; this sanction will, therefore, be at once applied for, without waiting for my report under section 9 of the Code: you will be justified in commencing in anticipation of sanction, and, if necessary, the work can be transferred to the Public Works Department hereafter.

9. There are some other points, some of which I have referred to in previous correspondence, to which I desire to call your attention.

(a) The schedule of works especially prepared to meet famine requirements, should be pushed on to completion. I understand that Mr. Beale has been engaged on this, and that you believe that it is finished. I need hardly say that the schedule should be comprehensive and not confined to the area at present seriously affected, but should include projects that will adequately meet any requirements that may arise in the way of relief works throughout your district.

(b) You should have all parts of the district, where distress is in the least apprehended, mapped out into Superintendents' Charges and Inspectors' Circles, so that if necessity arise, you will only have to appoint officers in each case as occasion requires. Officers competent to hold a Superintendent's charge are not obtainable locally; you should give me the earliest notice of such officers being required, as procuring them will necessarily take some little time; the supply is little better in Cuttack than it is in Puri.

(c) With regard to gratuitous relief of "respectable women," I understand that cases of the kind are hardly likely to occur in the Chilka area, and that there is a Manager for Malud, the Raja of Parikud and his servants and two dewans, who could deal with any such cases. I apprehend that you will meet with considerable difficulty in finding a local agency to deal with this matter in the district generally, as there seem but few prominent persons who could be trusted with so delicate a task. This matter will require very careful consideration from you and your Committee, should the necessity for such relief arise.

On the occasion of my visit to Satpara, I found that the dispensary was a centre of gratuitous relief, and that some old and infirm people were in receipt of grain doles. Assuming that these were all really indigent persons who, in other years, would have been supported by the charity of neighbours, who are not now in a position to be charitable, some idea of the requirements of Malud and Parikud in the way of charitable relief can be formed, if the few villages around Satpara give so many cases, the larger areas will give ten or twenty times as many. If the overseer to be placed in charge of the relief works is unable to distribute gratuitous relief in Malud-Parikud, and if no local persons are available, a dispensary should be opened under section 84, and the hospital assistant should be relieving officer as at Satpara.

(d1) The question of communications also requires very careful study. The Chilka lake is served on the north side by East Coast Railway, and it is proposed to take rice in boats from the northern shore to central points of the affected area. All that seems necessary is to procure an adequate supply of boats for this purpose. You expressed a doubt as to the resources of the lake in the matter of boats. I need scarcely say that adequate provision is imperative, and boats will have to be found.

(d2) Another portion of the map marked brown, includes parganas Mirichpur, Khodar and Astrang; there appear to be no roads whatever in this locality and the Devi river, as itself an offset of the Kokai, is doubtless as dry as the latter at this season; happily your reports do not show reason to apprehend distress here at present, but in the event of it occurring, you should be prepared to act and know how grain can reach these localities.

(d3) The brown tract near Bhubneshwar can be reached by the Railway, but it remains to be seen how distribution is to be effected from the Railway Stations.

(d4) Kotdesh, which is colored dark green, is singularly ill provided with roads, though the northern part adjoins both the railway and the Puri road; besides this there is but one unmetalled road from a point Baligai near the east shore of the Sur lake to Madhab on the Cuttack boundary; this road probably extends into the Cuttack district. I do not suppose that water-carriage will be available by the Bargovi and Khushbhodro rivers till the rains, and should distress occur in this large area, I fear that the communications will be found inadequate; at the same time it may, perhaps, be assumed that in ordinary times rice does circulate in this area, at least for export purposes, even if local trade is not great, owing to the agriculturalists keeping their own stores; and if rice leaves the area, it must be able to return to it in the same manner and by the same routes; but it appears that we are at present in the dark as to what the manner is, and what the routes are, and it would be well to ascertain these from the Police or other agency.

(e). You may find it necessary to have a supply of tents, treasure-chests, copper coin, and tools and baskets, see paragraph 8, Resolution 5130 of 10th December 1896 and Government of North-Western Provinces, Resolution page 4, received with Circular 74 of 31st December 1896; there are many points in the North-Western Provinces Resolution, which repay study. These matters have to be dealt with with foresight, as tents, &c., are not to be had at short notice in Puri.

At Satpara, I learn from Mr. Parish that kodalis will not be wanting, and all that the coolies will require is a supply of baskets which can be made locally, and picks.

(f). I understand that you have found contractors willing to take advances from Government, and pay interest. This has been done nominally in accordance with paragraph 136 of Resolution 5133 of 10th December 1896; in fact what has been done is not in strict

accordance with the conditions imposed, viz., (1) that "supplies are drawn from districts beyond those in which scarcity extends, or is apprehended in the present instance, all India," and (2) "occasional inspection of grain invoices in order to verify that the persons to whom advances are made do really import grain into the inaccessible tracts, and that it was obtained originally outside Bengal or other provinces threatened with scarcity."

The departure from the above conditions is unfavourable, and I only mention the matter, in order to keep the Government informed of the fact.

(g). I would call your attention to paragraph 12 of Resolution 5133 of 10th December 1896, on the subject of well-sinking. As you have already referred to an apprehended water famine, it would be as well to ascertain whether the system of a Government contribution of Re. 1 per well would overcome the apathy of the people, who appear unwilling to stir themselves to procure water which is, I understand, very easily procured.

(h). The Chilka area, where tanks have been dug as relief works, has no rivers, but this may not be the case everywhere. That it may be necessary to undertake such works, I therefore invite your attention to what is written in paragraph 19 of Resolution 5133 of 10th December about providing tanks that admit of being flushed from rivers.

DISTRESS IN THE CHOTA NAGPUR DIVISION.

No. 678.—(Fam.).—*The 9th March 1897.*—The following papers are published for general information.

M. FINUCANE,

Secretary to the Govt. of Bengal.

No. 677Agri. (Fam.), dated Calcutta, the 9th March 1897.

From—M. FINUCANE, Esq., Secretary to the Govt. of Bengal,
To—The Commissioner of the Chota Nagpur Division.

I AM directed to acknowledge the receipt of your letter No. 575T.M.R., dated the 24th February 1897, with its enclosures, reporting on the condition and prospects of the districts in the Chota Nagpur Division, and in reply to convey the following observations and orders of the Lieutenant-Governor.

2. *Paragraph 5 of your letter.*—It is stated that you still prefer to regard the works in the district of Palamau as test works, in so far that you still think it unnecessary and undesirable to bring into operation section 67(1) of the Famine Code, which lays down that no relief-worker, whether employed individually or in a gang, shall be paid less than the minimum wage prescribed by section 101 of the Code, except temporarily in cases of contumacy. You are persuaded that the condition of the people in Palamau does not at present require this departure from the general system of task work, and that the result would only be harmful. The Lieutenant-Governor accepts your views.

3. In the same paragraph you observe that Mr. Renny is mistaken in thinking that the rates* shown in the column of remarks at page 13 of the Hon'ble Mr. Glass's table of tasks for famine relief workers are the rates to be adopted in the payment of wages to famine labourers. Those rates are, as you rightly understand, the ordinary contract rates. The rates to be paid to relief-workers are those shown at page IV, Appendix IV of the Public Works Department Resolution No. 420M.P.L., dated the 25th January 1897. Explanatory notes are being issued, showing separately how the tasks for diggers, and the tasks for, and numbers of, carriers should be regulated. The principle to be borne in mind is that the full tasks prescribed in page 2 of Mr. Glass's note prefixed to the table of tasks, namely, 200 feet in soft soil, 130 feet in medium, 85 in hard, &c., should be exacted from diggers, and the numbers of carriers should be regulated according to the length of lift and lead, so that they may be able to lift and carry the earth excavated by the diggers.

4. *Paragraph 11 of your letter.*—As regards the grant of loans for village works in the district of Manbhum, under Government notification No. 69Agri.—Fam., dated the 5th January 1897, I am directed to say that there is no objection to giving such loans on adequate security. As suggested by you, the Deputy Commissioner may grant loans for village works wherever he considers that there is a real demand for work, even though the necessity of opening relief works may not as yet have been proved.

5. Orders as to the appointment of a third Superintendent will be passed when it is found that an additional officer is required. The Public Works Department have deputed an upper subordinate, and are unable to spare any more officers at present. You should endeavour, if possible, to obtain suitable men locally for the supervision of relief works, but should you be unable to do so, you should address the Public Works Department of this Government on the subject of deputing an Engineer to Palamau.

No. 575T.—M.R., dated Camp Hazaribagh, the 24th February 1897.

From—A. FORBES, Esq., C.S.I., Offg. Commissioner of the Chota Nagpur Division;
To—The Secretary to the Government of Bengal, Revenue Department.

In continuation of this office No. 474T.—M.R., dated 12th instant, I have the honour to submit the following report under section 13 of the Famine Code for the districts of this Division:

PALAMAU.

2. I enclose a copy of the Deputy Commissioner's report (Appendix I). Up to the end of the week ending the 13th instant, the general rise in prices continued to be felt, as shown by the following figures reported by the Deputy Commissioner:—

	Week ending 16th January 1897.	Week ending 24th January 1897.	Week ending 31st January 1897.	Week ending 13th February 1897.
Number of <i>hats</i> at which rice was selling under eight seers per rupee ...	4	7	7	15
Number of <i>hats</i> at which rice was selling at eight seers and under nine seers per rupee ...	13	26	36	22
Number of <i>hats</i> at which rice was selling at nine seers and under ten seers per rupee ...	53	40	28	54
Number of <i>hats</i> at which rice was selling at ten seers and under eleven seers per rupee ...	10	6	4	...
Number of <i>hats</i> at which rice was selling at eleven seers or over ...	1	1	1	...
Total number of <i>hats</i> from which returns were received ...	86	80	76	91

I note, however, that some of the returns submitted call for explanation. For instance, it is reported that in all the *hats* of the Manatu outpost rice was up to 7 seers per rupee, although at Hariarganj, which is only about 30 miles distant, it was selling at 9½ seers. The difference, supposing the figures reported are correct, can only be explained by a rigging of the market by the local traders. I am calling the attention of the Deputy Commissioner to this matter.

3. Since the date of my last report, the proposal to allow a bounty of 8 annas per maund on Burma rice imported to Daltonganj *via* Maharajganj has, I am glad to say, been sanctioned by Government. Sanction was accorded by telegram on the 14th instant, and one of the Gaya merchants writes me, under date 17th instant, that he had already despatched 668 maunds to an agent he has appointed for the purpose at Daltonganj. I have every reason to hope that the measure will have the desired effect of unlocking or replenishing the local stores, whichever may turn out to be the remedy needed.

4. In my last report I stated that up to the 9th instant, five relief test-works had been opened, on which 416 men, 168 women and 161 children, total 745 persons were employed; and that 333 persons were stated to be on gratuitous relief. Since then work has been opened in two other places, and the numbers on all the seven works now in hand had risen by the 16th instant (except at Latehar, for which place the return is dated 13th instant), to 2,676 viz., 1,266 men, 966 women, and 440 children, as will be seen from the abstract accompanying this report (Appendix II); while the number of persons on gratuitous relief has increased to 404, viz., 154 men, 188 women, and 62 children. I notice that the *average* number of persons on relief works, as given in the body of the Deputy Commissioner's report, during the week ending the 13th instant, was only 1,312, viz., 671 men, 387 women and 254 children; but there was a cause for such low figures, viz., the inclemency, for several days running, of the weather. This seems to have had the effect—notably at Panki, where the largest work (road construction) is in progress—of keeping all the labourers away for one whole day and two-thirds of them for the next day: not in itself a bad sign. Immediately the weather cleared again, they appear to have returned to the works in increasing numbers.

5. As regards the remarks recorded by the Deputy Commissioner on the subject of my orders respecting rates of wage, I beg to state that I still prefer to regard the works in the Palamau district as test-works, in so far that I still think it unnecessary and undesirable to bring into operation section 67 (1) of the Famine Code, as I am persuaded that the condition of the people does not at present require this relaxation of the general system of task-work, and that the result would only be harmful. I may here mention that, when a month ago, I raised the rate from the former *test-work rate* (viz., Rs. 1-4 per 1,000 cubic feet) to the present *relief-work rate* (viz., Rs. 2-3 per 1,000 cubic feet), I did so under a misapprehension of facts. I was guided chiefly by the returns from the test-work then in progress at Lesliganj, the returns from which showed a rapid increase in numbers during several days (23rd to 25th January). It was not, however, until my visit to that place, on the 30th idem, that I found that the numbers had suddenly fallen off from 168 on the 25th to only 15 on the 26th; that they had again risen to 76 on the 27th, to fall back to 24 on the 28th and to 35 on the 29th. I then discovered, on questioning the officer in charge, that he was under the impression that it was his duty to endeavour to attract people to the work, and this he had done (on the 27th) by enlisting the good offices of a neighbouring zamindar in inducing his raiyats to attend, and by also informing the people that the work was only a test-work, and that the rates would be shortly raised if they kept on working. When they found, however, that the rate was not raised, they left off coming. My first impulse, on discovering this, was to recall my order allowing the adoption of *relief-work rates*; but in view of the cessation of imports and of the consequent marked rise in prices, I thought it best to let the order stand. I certainly do not, however, think that any further modification, in the direction desired by the Deputy Commissioner, is at present necessary. I would also point out that Mr. Renny, in making the calculation as to the rate of wage permissible under the Hon'ble Mr. Glass' scheme, is mistaken in thinking that the rates shown in the column of remarks, page 13 of that officer's note, are those to be adopted in the case of famine labourers, viz., annas 2½ per man, annas 2 per woman and annas 1½ per boy. Those are the ordinary *contract rates*, as I understand, given by the Public Works Department. The rates to be paid to relief labourers are those shown at page iv, Appendix IV, Government Resolution No. 420M.P.I., dated 25th January, and (at 9 seers per rupee) come to only 1½ annas to 2 annas per man, 1½ annas per woman, and 1 anna per boy. My views as to the sufficiency of the rate I have for the present fixed (Rs. 2-3 per 1,000 cubic feet) are contained in the accompanying extract from a demi-official letter, dated 18th instant, to the Deputy Commissioner (Appendix III). Most of the works are road works with burrow pits close to the road, and I am not yet prepared to allow any enhancement on such works on account of lead or lift. In tank work there is more need for differentiation, and I am instructing the Deputy Commissioner that he is at liberty to introduce, at such works, the scale prescribed in the Hon'ble Mr. Glass' memorandum taking the

With rice at 9 seers—

	As.	P.
Each man ...	1	6
„ woman ...	1	6
„ boy ...	1	0

allowed on the above rate. For, say, 150 feet load and 12 feet lift, the wage will be worked out as under :—

				As.	P.	As.	P.
7 (men)	x	35 c. ft.	=	245 c. ft.		7	x 1 6 = 10 6
3 (women)	x	28 „	=	84 „		3	x 1 6 = 4 6
3 (boys)	x	21 „	=	63 „		3	x 1 0 = 3 0
				392 or, say, 400 c. ft		annas	18
400	:	1,000	::	18	:	x	
x	=	$\frac{1,000 \times 18}{400}$	=	45	=	2 13	per 1,000 c. ft., and so on.

6. The Deputy Commissioner has been given the services of two overseers and two sub-overseers from the Public Works Department. He has also the

District Engineer and two road-cess overseers under his orders. But the district is a large one, the works are scattered, and the numbers attending them are rapidly rising. Under the circumstances, I am of opinion that an officer of the grade of Assistant Engineer should be deputed to assist in the duty of supervision, and I am addressing the Inspector of Works, Western Circle, on the subject. The Deputy Commissioner suggests that the Public Works Department should be asked to take charge of some of the larger works, *e.g.*, of the road work at Panki on which (as I learn from a post-card from the officer in charge) the numbers at work on the 19th instant had risen to 1,047. There is, however, only one Executive Engineer (at Ranchi, 100 miles by road from Daltonganj), and I do not know whether this could be conveniently arranged; and I think that the deputation of an Assistant Engineer for the present—and of one or two more, if necessary, afterwards—to work under the orders of the Deputy Commissioner, will meet requirements. I should be obliged for orders on this point.

7. For the present the Deputy Commissioner has placed Mr. Sunder in charge as Superintendent of the three western thanas, Husainabad, Garhwa, and Ranka; Deputy Magistrate and Collector Maulvi Muhammad Yusuf Ali of the three southern thanas, Mahuadand, Latchar and Balumath, he himself remaining in charge of the three central thanas, Daltonganj, Patan and Chhatarpur. If Government can give the services of a third officer as Superintendent, I propose to place him in charge of the three western thanas, and to place the three central ones under Mr. Sunder, as they include several important Government estates with which Mr. Sunder is well acquainted and where he could be usefully employed in supervising the construction of irrigation *bundhs* and other works of improvement.

MANBHUM.

8. A copy of the Deputy Commissioner's report, dated 19th instant, is enclosed (Appendix IV). The statements which should have accompanied the Deputy Commissioner's report have not yet arrived. They will follow when received.

9. The report shows clearly the existence of distress in the Gobindpur, Tundi, Nirsha and Chas thanas sufficient to necessitate the opening of relief works. It is true that the first test works, as I suspected when writing my last report, were not properly conducted on task work principles; but the mistake was soon remedied, with the result that on the 17th instant some 1,500 persons still attended on a task-work rate of $2\frac{1}{2}$ annas per 100 cubic feet. The Deputy Commissioner was continuing the test for a few days longer, and I am authorizing him, should the numbers have kept up to this figure for one week, to raise the wage to the authorized relief rate of Rs. 2-3 per 1,000 cubic feet (as in Palamau). I am also requesting him to re-open test-works in the Jhalda thana at $2\frac{1}{2}$ annas per 100 cubic feet, as I consider the former rate of 2 annas, in view of the prevailing high prices, somewhat too low.

10. In my last report I asked that two overseers and two sub-overseers might be placed at the disposal of the Deputy Commissioner in view of the unmistakable signs of increasing distress. I think that Government should also be prepared to depute one or two officers of the grade of Assistant Engineer to the Manbhum district at short notice, should the necessity arise, as it probably will do shortly.

11. Regarding the question of loans for village works under the rules published with notification No. 69, dated 5th January last, I note that the Deputy Commissioner proposes to await the result of the existing test-works before taking steps to make such advances and also to restrict his action in this direction to the parts of the district where distress has distinctly declared itself. I should be inclined to support a more liberal policy, and to permit Mr. Luson to make loans of the kind referred to at once, and whenever he considers that there is a real demand for work, even though the necessity of opening relief works may not as yet have been proved. On this point I should be obliged for instructions from Government. In considering it, I think the effect on the general mass of the people of the high prevailing prices may fairly be allowed weight.

12. I am informing the Deputy Commissioner of Manbhum and Palamau of the arrangements made by Mr. Herald in Hazaribagh to afford relief to

respectable females at their homes by employing them in spinning cotton, through the medium of the educational officers, and am asking them to endeavour to set a similar system at work in their districts.

13. I am also asking Mr. Luson to follow the example of Mr. Renny in making advances to the head raiyats of Government villages where irrigation *bundhs* are needed, the advances to be worked off at a maximum rate which I have for the present fixed at Re. 1-9 per 1,000 cubic feet of earthwork.

HAZARIBAGH.

14. Copy of the Deputy Commissioner's report is submitted (Appendix V). The following is an abstract statement of the prices of common rice ruling at the *hats* from which returns were received during the three last fortnightly periods:—

	1st fortnight of January 1897.	2nd fortnight of January 1897.	1st fortnight of February 1897.
Number of <i>hats</i> in which rice was selling at—			
Less than 8 seers per rupee ...	4	4	2
„ 8 seers and under 9 seers ...	23	27	25
„ 9 seers and under 10 seers ...	37	33	29
„ 10 seers and under 11 seers ...	11	8	2
Number of <i>hats</i> from which returns were received ...	75	72	58

The above figures would have been more valuable for purposes of comparison, if the returns had been for exactly the same *hats* in each fortnight. Not having been so, it is difficult to form any opinion from them as to the general rise or fall of prices; but the Deputy Commissioner states that there is no tendency in the prices for rice to get harder, though *makai* (Indian-corn) continues to rise and is now in many places as dear as common rice. I regret that up to the time of writing this, the Deputy Commissioner has not been able to furnish me with particulars regarding imports and exports of food-grains.

15. No relief works have yet been opened, but 37 works of different kinds are going on in 35 places at ordinary rates without, apparently, attracting more than the usual amount of labour. I notice, however, that 19 of the works in question are “building works” or “repairing wells” which, though useful in their way as affording employment, cannot be regarded as of any value as a test. Omitting these, there were 18 places where roads and other earthwork gave employment to 699 men, 81 women and 60 children at the ordinary rate of Re. 1-9 per 1,000 cubic feet. I am inclined myself, in view of the prevailing high prices, to doubt whether these works are in themselves a sufficient test, and I am recommending the Deputy Commissioner to offer work in other places wherever he may hear of there being a demand for it, lest he be suddenly taken unawares. At the same time I admit that the comparatively small number of women and children on the above works does not point to the existence of real distress.

16. The information given by the Deputy Commissioner on the subject of loans is somewhat vague, and I am asking him to give more definite particulars in his future reports, distinguishing between ordinary loans under the Land Improvement Loans Act, loans under the rules covered by notification No. 69, dated 5th January last, loans under the Agriculturists' Loans Act, and advances made for improvements in Government estates. As regards the latter, I am calling his attention to the system adopted by Mr. Renny in the Palamau district.

17. The system of giving relief to respectable females at their homes, by spinning cotton, through the medium of the subordinates of the Educational Department, is being supervised by Rai Jadunath Mukerjee Bahadur, the Honorary Secretary to the Hazaribagh Branch Famine Relief Fund Committee, and promises to work well.

18. The Deputy Commissioner does not, so far, require any assistance in the matter of establishment.

LOHARDAGA AND SINGBHEUM.

19. Up to the time of writing this, I have not received the fortnightly reports from the Deputy Commissioners. But there is no reason to apprehend any distress for the present in either district.

APPENDIX I.

No. 1871R., dated Daltonganj, the 17th February 1897.

From—R. H. Renny, Esq., Deputy Commissioner of Palamau,
To—The Commissioner of the Chota Nagpur Division.

I HAVE the honour to submit herewith my fortnightly report under section 13 of the Famine Code for the fortnight ending 15th February 1897.

Report required under section 13 of the Famine Code for the fortnight from 1st to 15th February 1897.

2. *Preliminary.*—Under orders of the Commissioner of the Division, all relief works are treated as test-works still.

3. *The general condition during the half-month of the tract or tracts for which anxiety is felt.*—As stated in my previous report, the whole district of Palamau causes anxiety to be felt. The general condition of the district has grown worse since my last report was submitted. At the close of January 43 markets were selling rice under nine seers, 18 at nine seers, 10 above nine but below ten, 3 at ten, 1 over 10 seers but below 11, and one at 11 seers; but now 78 markets are selling at nine seers and under, 13 over nine seers but under 10, and none at over 10 seers. Again the weather has been very unsettled and unfavourable to the *rabi*, *mahua* and mango crops. Supplies have not increased since I last wrote.

4. *Prospect of crops.*—Owing to the unfavourable weather during the greater part of the fortnight under report, for it has been cloudy, stormy and wet with some hail, *khesari*, wheat, barley, gram, *mauri*, peas and mustard have been damaged to some extent, as those crops in blossom have had the flowers blown off by the storm and hail, and those in pod have suffered from the wet and cloudy weather by worms forming with pods and from want of sunshine. The mango crop is said to be lost by all blossom having been knocked off by wind, rain and hail, and the early *mihua* crop is said to have suffered severely from the wet, cool weather and want of sunshine. The weather still continues to be very cloudy and threatening.

5. *Food-stock.*—The food-stock is running low in many parts, and the supplies of edible jungle roots, fruits, sago, &c., are becoming exhausted. I received a telegram from the Commissioner of the Division, informing me that Government have sanctioned a bounty of eight annas per maund of Burma rice imported by traders to Daltonganj. I hope this bounty will prove a sufficient inducement to traders both in and out of the district to pour Burma rice into

it. Mr. Savage, Collector of Gaya, also writes me that he is arranging to send me 10,000 maunds of rice by orders of Government, and Ghansom Dass, a Gaya merchant, has sent off a chalan of 600 maunds for sale at Daltonganj as a speculation. If the bounty scheme proves successful, all anxiety on the score of food-supply will be removed.

6. *Importation and exportation of grains.*—There is a *mela* at Daltonganj, and some rice was brought into the market here from Hariarganj; no doubt it has come from the tracts in the Shahabad and Gaya districts irrigated by the Sone river. It was not much. A little also found its way here from Lohardaga and Burway, both in the Lohardaga district. I have heard of no grain leaving the district.

7. *Rainfall.*—There was rain and small hail during the fortnight under report. On the night of the 11th a severe nor'wester with 68 inches of rain and some hail blew, and on the 12th there was heavy rain again: 59 inches was registered. There was rain also on 7th, 8th and 13th, but slight.

8. *Public health.*—The Civil Medical Officer informs me that the prevailing scarcity and high prices of food which have continued for many months past, has and is still telling more or less severely on the poorer-classes. No epidemics have, I am thankful to say, visited us.

9. *Emigration and immigration of famished people.*—There has undoubtedly been emigration, and chiefly from the Tori and Latehar parganas. There is every year more or less movement from these parts, but this year it has received impetus from the scarcity and high prices prevailing everywhere in the district and neighbouring districts. The people who have left has gone mostly to the tea districts of the Western Duars. No immigration to speak of.

10. *Condition of cattle.*—The weather, which is so unfavourable to crops, is most favourable to cattle, who are flourishing on the fresh grass brought up by the rain. There is very little, if any, cattle-disease prevalent up to date.

11. *Number and nature of public works open in or near the tract, distinguishing works—(a) under District Board or Municipal Committee, (b) under Public Works Department (Executive or Superintending Engineer.)*—All works open are managed by the Deputy Commissioner out of funds placed at his disposal by the District Road Committee. The Public Works Department have not been called as yet, but the time has arrived when the Executive Engineer, Chota Nagpur Division, should be sent down here with an adequate staff to take some of the works, in which the labourers nearing 1,000, off my hands. The time has also arrived when the Commissioner of the Division might with advantage allow us to drop styling our works "test" works, for a test is no longer needed, considering the number of people who resort to the works.

The works open are—

(1) At Panki	Road construction.
(2) At Lesliganj	Excavation of a tank.
(3) At Nowajaipur	Road construction.
(4) At Shahpur	Reservoir repairs.
(5) At Garhwa	Excavation of a tank.
(6) At Untari	Road construction.
(7) Latehar	Ditto.

and officers have been deputed to open works at Balumath and Ranka.

12. *Daily average number of persons employed on the works in each week of the half-month, distinguishing (i) men, (ii) women, (iii) children, as compared with the number employed in the previous half-month.*—The following statement gives the average number of persons attending daily at the so-called test relief works during the week ending 6th February 1897 :—

	Number of men.	Number of women.	Number of children.	Total.	REMARKS.
1	2	3	4	5	6
1. Panki	98	65	82	245	
2. Lesliganj	117	46	35	198	
3. Latehar	7	3	2	12	
4. Garhwa	24	7	...	31	
5. Nawa	11	1	4	16	
Total	257	122	123	502	

The following statement gives similar information for the week ending 13th February 1897 :—

	Number of men.	Number of women.	Number of children.	Total.	REMARKS.
1	2	3	4	5	6
1. Panki	143	99	143	379	
2. Lesliganj	123	48	30	201	
3. Latehar	73	48	14	135	
4. Garhwa	104	49	...	153	
5. Nawa	47	17	19	83	
6. Shahpur	39	16	6	61	
7. Untari	142	116	42	300	
Total	671	397	254	1,312	

Figures for the average number of persons attending daily at test relief works in the previous half-month are as follows :—

	Number of men.	Number of women.	Number of children.	Total.	REMARKS.
1	2	3	4	5	6
1. Lesliganj	39	12	21	72	
2. Panki	20	22	29	71	
Total	59	34	50	143	

As reported already, the distribution of gratuitous relief has been left in the hands of a Relief Committee appointed in each thana and outpost.

The following is the statement of average number of persons daily receiving gratuitous relief for the week ending 6th February 1897:—

	Number of men.	Number of women.	Number of children.	Total.	REMARKS.
1	2	3	4	5	6
1. Ranka	12	20	24	56	
2. Latehar	5	2	7	
3. Lesliganj	14	17	2	33	
4. Garhwa	17	21	1	39	
5. Bistrampur	18	30	...	48	
6. Hariarganj	12	13	...	25	
7. Panki	12	8	3	23	
8. Chandwa	18	20	1	39

13. There are two reasons for there not being more persons on the relief test-works during the fortnight under report, viz., (1) that owing to the rainfall it became possible to do some field work, and many persons left the relief works for the field works. This is as it should be; and (2) that the rate fixed by the Commissioner of the Division for all works, viz., Rs. 2-3 per 1,000 cubic feet, is nearly less by half in some cases, particularly tank excavation work, than what people are entitled to be paid under the note prepared by the Hon'ble Mr. J. G. H. Glass, C.I.E., Chief Engineer to the Government of Bengal, dated 24th December 1896, published with Bengal Government Revenue Department Circular No. 74, dated the 31st December 1896, and forwarded to all District Officers for information and guidance.

For example, let me cite a case falling under Table No. 3 (A), stiff and hard soil. According to Mr. Glass, the gang should consist of seven diggers, three women and three boys, and the task to be assigned would be 352 cubic feet; the cost at the rates given by Mr. Glass would be Rs. 4-15-6 per 1,000 cubic feet:—

$$\begin{aligned} 7 \times 32 &= 224 \\ 3 \times 26 &= 78 \\ 3 \times 20 &= 60 \end{aligned}$$

362 cubic feet the task.

$$362 : 1,000 :: \text{Rs. } 1-12-0$$

$$\frac{1,000 \times \text{Rs. } 1-12}{362} = \frac{28,000}{362} = 4 \text{ Rs. } 13 \text{ p. } 6$$

At the Commissioner's rate of—

	As. p.
Per man	1 10
„ woman	1 7
„ child	0 11

applied to the said gang of seven men, three women and three children, the wage would come to Rs. 1-6-4, and this wage, applied to the aforementioned task of 362 cubic feet, would be Rs. 3-13-8, thus:—

$$362 : 1,000 :: \text{Rs. } 1-6-4$$

$$\frac{1,000 \times \text{Rs. } 1-6-4}{362} = \frac{268,000}{362} = 3 \text{ Rs. } 13 \text{ p. } 8$$

But I am, under Commissioner's orders, allowed to pay only Rs. 2-3 for 1,000 cubic feet, no matter what the depth or lead; the difference therefore at Commissioner's rate is Rs. 3-13-8—Rs. 2-3 = Rs. 1-10-8 per 1,000 cubic feet. This is a very large difference; and it is, therefore, no wonder that the people refuse to work on tank work, and leave such work and go long distances to other works. The importance of tank work is being pressed on Collectors of famine districts by Government, but I do not see my way to giving effect to the wishes of Government until the Commissioner is pleased to sanction tank work at the rates given in Mr. Glass' note.

14. No cases of relief under section 12 of the Famine Code were reported during the fortnight.

Statement showing particulars of advances under the Agriculturists' Loans Act in this district up to 15th February 1897.

NAME OF THANA.	Name of village in which improvement is to be made.	Nature of improvement.	Amount of loans applied for.	AMOUNT OF INSTALLMENTS ALREADY ADVANCED.			Average daily number of labourers during fortnight under review.	Rate of wage per 1,000 cubic feet.	REMARKS.
				Up to end of previous fortnight.	During fortnight under review.	Total of columns 5 and 6.			
1	2	3	4	5	6	7	8	9	10
				Rs. 477	Rs. 477			

No advances given in this fortnight, as under orders of the Commissioner the giving of such advances have been limited to purchase of cattle by tenants paying rents direct to Government, and this, too, under certain specified restrictions only. Under this Act, 356 applications covering Rs. 42,462 have been previously filed, and 13 applications covering Rs. 1,270, during the period under report.

Statement giving particulars of advances sanctioned under the Land Improvement Loans Act in the District of Palamau up to 15th February 1897.

NAME OF THANA.	Name of village in which improvement is to be made.	Nature of improvements.	Amount of loans applied for.	AMOUNT OF INSTALLMENTS ALREADY ADVANCED.			Average daily number of labourers during fortnight under review.	Rate of wage per 1,000 cubic feet.	REMARKS (here state terms on which loan in each case has been made.)
				Up to end of previous fortnight.	During fortnight under review.	Total of columns 5 and 6.			
1	2	3	4	5	6	7	8	9	10
				Nil.					

No advances sanctioned during the half-month under report owing to there being no officer available for making the preliminary enquiries required by the rule. Officers have now been posted to the district, and I expect to do much in the line during the ensuing fortnight. Under this Act, 26 applications covering Rs. 19,475 have been previously filed and 8 applications covering Rs. 3,350 during period under report.

Statement showing particulars of expenditure on Agricultural Improvements in Government Estates in the District of Palamau for the fortnight ending the 15th February 1897.

Palamau --	A. P.	C. ft.	A. P.	C. ft.					A. P.	C. ft.	Common rice.	3 seers	Rs. A.	No minimum wage is given.
Maximum	1 10	100	1 7	90 carrying.					1 9	50				
Minimum														

The rate of wages was calculated according to the Commissioner's memorandum forwarded with his No. 401T.—M.R., dated the 24th January 1897 (copy annexed).
Forwarded in continuation of this office No. 1871R. of the 17th February 1897.

R. H. RENNY,
Deputy Commissioner, Palamau.

Memorandum of Calculation of Wages.

THE test works show that the present proportion of men, women, big children and little children attending work is 4, 2, 1 and 1. The soil in this district may be taken generally to be hard. The cutting and carrying of 300 cubic feet can be done by three men cutting 300 cubic feet, carrying —

	C. ft.
1½ Man	12
2 Women	18
1 Big boy	6
1 Small boy	3
Total	39

Thus to arrive at the proper price to be paid for cutting and carrying 300 cubic feet, we must deduct the wage of the 2 boys leaving only that of the 4 men and 2 women. The price to be paid thus comes (under section 103 and Appendix V of Famine Code) to—

For each A class man—				As.	P.
Rice (at 9 seers per rupee)	1	4
Pulse	0	3
Salt, oil, vegetable, &c.	0	3
				1	10

For each A class woman—				As.	P.
Rice	1	2
Pulse	0	3
Vegetable, &c.	0	2
				1	7

.. So that the wage of 4 men and 2 women will be 4 × 1a. 10p. + 2 × 1a. 7p. = 10a. 6p. or 3a. 6p. per 100 cubic feet, or Rs. 2-3 per 1,000 cubic feet.

APPENDIX II.

Daily report of famine relief works of Palamau District for the 16th February 1897.

Name of circle.	Date.	Description of works.	Men.	Women	Children	Total	Quantity of work done.	Amount paid in cash.	Amount paid in grain.

No. 4F., dated Daltonganj, the 18th February 1897.

Memo. by—The Deputy Commissioner of Palamau.

SUBMITTED to the Commissioner of the Chota Nagpur Division for information.

APPENDIX III.

Extract from demi-official letter, dated 18th February 1897, from the Commissioner of Chota Nagpur, to the address of the Deputy Commissioner of Palamau.

If you examine Resolution No. 420M.P., dated 25th January 1897, and enclosures, you will find in Glass' note with blue cover, page 13, that the aggregate work for seven men, three women and three boys is as under, in cubic feet—

$$\begin{aligned} 7 \times 53 &= 371 \\ 3 \times 43 &= 129 \\ 3 \times 32 &= 96 \end{aligned}$$

Total ... 596, or, say, 600 cubic feet, while their wages (Appendix IV of the

Resolution), at 9 seers per rupee, will be—

	As.	p.
7 × 1·6 =	10	6
3 × 1·6 =	4	6
3 × 1 =	3	0

Total ... 18 0 annas for 600 cubic feet = Re 1-14 for 1,000 cubic feet, or

if the men are all paid as *able-bodied*—

	As.	p.
7 × 2 =	14	0
3 × 1·6 =	4	6
3 × 1 =	3	0

Total ... 21 6 for 600 cubic feet = Rs. 2-3-10 for 1,000 cubic feet. Again,

if you take an equal number of men, women and children, you get $\frac{1000}{19} = 52\frac{12}{19}$ = 19 men, $\frac{1000}{23} = 43\frac{11}{23}$ = 23 women, $\frac{1000}{31} = 32\frac{8}{31}$ = 31 boys—

	As.
and 19 × 2 =	38
23 × 1·6 =	35
31 × 1 =	31

3)104

35 or about Rs. 2-3 per 1,000 cubic feet.

So that the rate I fixed, viz., Rs. 2-3 per 1,000 cubic feet is the *highest* rate allowable, taking all the men as *able-bodied*. If you take them as “adult men unable to do a full task,” then the rate should be cut down to Re. 1-14 per 1,000 cubic feet, but I do not wish to do this yet. But if rice falls to 10 seers per rupee, we shall have to make a reduction.

Our rates at present are *full* rates, and I agree with Sir A. P. MacDonnell that in ordinary works lead and lift may be disregarded. It is only where, in the centre of a big tank, for instance, the lead becomes excessive, any increase should be allowed. This is another reason why I wish Sunder to be in charge of the big tanks about Lesliganj, &c. He is a thoroughly intelligent man, and will understand my instructions much better than most native Deputies or Sub-Deputies.

APPENDIX IV.

No. 1555R., dated Purulia, the 19th February 1897.

From—H. LUSON, Esq., I.C.S., Deputy Commissioner of Manbhum,

To—The Commissioner of the Chota Nagpur Division.

I HAVE the honour to submit my fortnightly report for the period 1st to 15th January 1897 in accordance with section 24 of the Bengal Famine Code.

2. (1) *Area affected during the period under report and approximate estimate of the portion of the population affected; number of relief circles and of officers in charge.*—In my report No. 1459R., dated the 3rd instant, for the period 16th to 31st January 1897, submitted in accordance with section 13 of the Code, I gave the following areas, with population, as those for which anxiety was felt:—

Thanas.	Area in question.	Population.
1	2	3
Gobindpur and Tundi ...	478	109,530
Nirsha ...	170	58,675
Chas ...	237	100,487
Jhalda ...	396	102,320
Total ...	1,281	371,012
Figures for whole district ...	4,147	1,193,328

In my report No. 1356R., dated the 19th ultimo, submitted in accordance with section 10 of the Code, I did not include the Jhalda thana in the area likely to be affected. It

was added in my report of the 3rd instant, as the police report under section 161 of the Code stated that the labouring classes were in distress, and some people were not getting two meals a day; and as the tahsildar of the Begunkodar Ward's Estate in a similar report stated that the poorer classes in his tahsil were in distress, being unable to get work or sufficient food, a test work was accordingly opened at the village of Khatgaon, in the Jhalda thana, on the 9th instant, under the personal superintendence of the District Engineer. This work was to be the construction of the *bundh* on a somewhat extensive scale, which had been sanctioned from the funds of the Begunkodar Ward's Estate. The District Engineer reports that as a test work it has been a failure, as only 12 men were attracted to it at the rates allowed, viz, 2 annas per 100 cubic feet, with a lead of not more than 50 feet, and half an anna more for every additional 50 feet of lead. The District Engineer was interviewed by a large number of labourers and the poorer class of cultivators, who complained of very great privations, but they declined to work for less than 3 annas a 100 cubic feet. Regarding his recent visit to Khatgaon to start this work, he states:—"I have seen several parts of the Jhalda thana, and from what I heard and saw, I have no hesitation in saying that there is some abnormal distress amongst the poor cultivators and labourers; but they did not appear to me to have come to the end of their own resources. I quite believe that many of them have to supplement their little stock of rice with a good deal of jungly fruits, bulbs, roots, &c., but they did not appear to be any worse in health for all that."

It is the custom in this district for the lower classes to eat jungle products, and in view of the failure of the test-work at Khatgaon and the District Engineer's report I think the Jhalda thana need not be considered an affected area for the present. The reports of the Jhalda police and the tahsildar recently received are also somewhat more reassuring; but as regards the other areas I think they are clearly affected, viz:—

Thana.	Area in question.	Population.
1	2	3
Gobindpur and Tundi ...	478	100,530
Nirsha	170	58,675
Chas	237	100,487
Total ...	885	268,692
Figures for the whole district ...	4,147	1,193,328

During the fortnight I myself visited the thanas of Gobindpur, Tundi and Nirsha, and I despatched the Sub-Deputy Collector, lately in charge of settlement operations in this district, to Chas. Three test relief works were opened, as mentioned in my last report, in the Tundi thana on the border of the Nirsha jurisdiction. On my visit to these works, I found (see below) that they were not being conducted on the task work system. I closed one entirely, and reopened the other two on strictly task principles. They have not yet been in work on these principles for a sufficient time to enable me to judge with certainty of their result. A test-work is in progress at Chas, but the result will not be certain for some days. Notwithstanding that distress has not yet been fully established by test-works in the Gobindpur, Tundi, Nirsha, and Chas thanas, I have little doubt of its existence. I myself examined, with the Civil Hospital Assistant at Gobindpur, a large number of the persons in receipt of gratuitous relief there, and found most of them anemic and emaciated. I also examined various of the persons being relieved in this way at Pokhuria. At the beginning of the fortnightly period I was on tour in the south and centre of the district, and have thus been able to make a comparison, from what I have seen myself, of the parts of the district which are best off with those which are mentioned above as affected. No relief circles have yet been formed. As soon, however, as the test-works declare the necessity, which I expect will be in a few days, I shall form four relief circles corresponding with the four thanas above mentioned.

3. (2) *General state of the affected tracts during the half-month under report; crop prospects; food-stocks; importation or exportation of food-grains; rainfall; public health; emigration or immigration of famished people; condition of cattle.*—In the areas in question, the chief features are want of work for the labourers, and failure of many of the very poor, who are usually dependent upon charity, to obtain sufficient food to keep them in health. The labourers are not yet reduced for want of food. I went round all the gangs on the test-works near Pokhuria, and agree with the Revd. A. Campbell, who accompanied me, that they did not show signs of emaciation. A number of cultivators complained to me at Gobindpur, and the least seemly of them said that their appearance was due to hunger; but the Civil Hospital Assistant by whom I had them examined declared that they showed no signs of want of nourishment, being lean from old age and other causes. Our chief care in the affected thanas should, I think, be devoted just now to the beggars, widows, orphans and others without support who are unable to work.

Regarding crop prospects, I have to say that in these thanas there is very little on the ground except sugarcane which has lately been transplanted and will not be reaped for ten months, and some *arhar* in the Chas thana. There are in places patches of *rabi* (wheat and barley chiefly), but in the Tundi thana there is scarcely any *rabi* at all. There in, however, a great food staple in all the affected thanas, and especially in Gobindpur, Tundi and Nirsha, viz., the *mahua* tree. If this yields a full crop, a very great deal of our anxiety will for the present be removed. It is reported that the *mahua* was damaged somewhat in thana Chandil by hail, but in the affected thanas and in the rest of the district it has been benefited by the recent rain. If during the next few weeks we have fine weather, the crop should be a good one. Mangoes this season will yield very poorly, but they are not of much account.

As to food-stocks, I think that the mahajans and the better class of cultivators have stocks sufficient to support the population in their neighbourhoods for a considerable time; but as long as there is no work to do in the fields, they will not share their grain with those who have none.

Two thousand five hundred and sixty-two maunds of food-grains were imported during the week ending the 13th instant from outside the district at the stations on the Jharra extension of the East Indian Railway, which runs through thanas Gobindpur and Nirsha, and not far from thanas Tundi and Chas, as compared with 1,850 maunds in the previous week. I found that there is also a considerable importation of grain from Barakar by road into thanas Nirsha and Tundi. I am endeavouring to have this registered. There is, I am glad to say, little difficulty about the supply of grain in the affected areas. Its exceedingly high price and the poverty of the poorer classes cause the trouble here. The number of people wishing to emigrate from the district to Assam is increasing, but more people go to the railway works in the next district: numbers of people are reported to have gone to the Raniganj subdivision to find work at the collieries, but have returned unsuccessful, as the coal trade is dull. A good many up-country men have come into this jurisdiction to find work in the coal-mines here, but many of such mines have closed or reduced their establishment.

No cattle-disease is reported from the affected thanas. Cow-pox exists in several other thanas, and I am arranging with the Civil Veterinary Department to obtain the services of a suitable officer to investigate it. The recent rain has for a time improved the supply, of food and drink for cattle.

4. (3) *Number of relief works open in or near the affected tracts; the numbers, if any, paid by daily wages and those paid by task work.*—There is no "relief work" open in the district, but there are nine test-works in progress; of these, seven are being carried out at the expense of the District Road Cess Fund, one at the expense of a Court of Ward's estate, and one at the expense of an Encumbered Estate.

The first test-works opened were those in the Gobindpur subdivision which were started on the 30th ultimo. On the 31st idem there were employed on them (i) 104 men, (ii) 58 women and (iii) 18 children. By the 3rd instant the total number had risen to 1,558. The numbers further increased till they reached with dependents 2,871. Last week I visited these works and superintended the measurement by the subdivisional overseer of the work done. Two of the works were the excavation of new tanks, and the third was the re-excavation of an existing tank. The workers were paid daily wages at the following rates, 6 pice for a man, 5 pice for a woman and 3 pice for a child. The soil on which these works were being executed was very stony and hard, and stout pickaxes were required. Taking, however, the lowest tasks for work in hard soil under famine conditions given in the table forwarded with Bengal Government's Revenue (Agriculture) Circular No. 74, dated the 31st December 1896, viz., 53 cubic feet a day for a man, 43 cubic feet for a woman and 32 cubic feet for a child, and reducing these figures to 50, 40, and 30, for easy calculation, I worked out the following results:—

<i>Pokhuria East Tank—</i>			Cubic ft.
Work which should have been done at these rates	275,400
Work actually done (a little less than)	100,000
<i>Pokhuria West Tank—</i>			
Work which should have been done	169,290
Work actually done (about)	44,000
<i>Pandua Tank (re-excavation)—</i>			
Work which should have been done	202,300
Work actually done (a little less than)	40,000

The ground is, however, generally much harder than that of the Gangetic plain for which the tasks in question were prescribed; the soil of the Pokhuria west tank is particularly hard; and the work on the Pandua tank consisted of removing mud (an unsuitable work as a test, and I have closed this work). It was nevertheless clear that full tasks were not exacted. The workers were all arranged in suitable gangs and their places properly marked out, but their work was not properly measured up, and there was no doubt idling. The Subdivisional Officer explains that more work might have been done, but at first there were only a few suitable implements. The Subdivisional Officer, however, neglected to observe the provision in section 11 of the Famine Code, that test-works are to be opened on the strict condition that labour is paid for at task rates, not daily wages. He treated these works

as relief works. As soon as I found out, after measurement of the work, the state of affairs, I stopped further payment on daily wages, closed the Pandua work as unsuitable for several reasons, and directed the reopening of the other two works strictly on the task-work system of $2\frac{1}{2}$ annas a hundred cubic feet. Heavy rain just then happened to soften the soil, and the workers consented to work at this rate. A report which I have just received from the Sub-divisional Officer states that, although the supply of tools is not yet quite sufficient, both the works are fully occupied with workers (about 1,500, including men, women and children), and there were on Tuesday, the 17th instant hundreds of others begging for work and offering to work for less than $2\frac{1}{2}$ annas a 100 cubic feet. Thus, though a mistake was made by the Subdivisional Officer in the method of conducting these works, it appears now that they disprove the existence of distress. I consider, however, that they should be tried for some days further at the rates above quoted. In consequence of the recent rain, ploughing is now going on apace in most of the districts, and it is desirable to see how this affects the workers on the test-works.

I have no exact information as to the works being conducted by private agency. A few such works are being carried out on a small scale by zamindars, talukdars, &c., but the amount of work on this account is less than usual at this time of year, as the persons mentioned cannot, owing to the high price of food, afford to spend much on them. In the Tundi Encumbered Estate and the Nagarkeari Wards' Estate in the Gobindpur thana, I have already allowed a number of applications for small works such as petty embankments. In this district not much assistance is to be expected from the zamindars; but as a number of their estates are under management, I am able to afford considerable aid to the tenants and their dependents. I have already thrown open to free grazing all the forests on such estates, and have declined, in accordance with what I believe is generally customary, to enforce for the present at least any claims by tahsildars for payments for woods, &c., taken by persons from these forests for their own use.

(4) *Number of poor-houses open and scale of food distributed.*—No poor-house has been opened, but gratuitous relief is being administered at Gobindpur under the superintendence of the Sub-Registrar and at Pokhuria under the superintendence of the Revd. A. Campbell of the Southal Free Church Mission. At all the police thanas and outposts in the district funds are at the disposal of the officers in charge for gratuitous relief. The provisions of Chapter V of the Code are being followed. The District Superintendent of Police is devoting his attention to this. Grain doles are almost invariably given. The recipients are mostly old men, women and children and disabled persons. The scale is $\frac{1}{2}$ a seer of rice for an adult and $\frac{1}{4}$ seer for a child. Section 44 of the Code only provides for such doles being in grain. I have found it necessary, however, to add salt at the rate specified in section 99, viz., $\frac{1}{2}$ oz. to a pound of rice. I discovered that a number of the people who received doles of rice were eating it without salt. This much diminished the value of the doles to them. The doles are made in the presence of the distributing officer.

I have, in consultation with the Subdivisional Officer, selected a site for a poor-house at Gobindpur, but the time has not yet come for opening such an institution I think. If the *mahua* crop is a good one, the necessity for poor-houses will be deferred.

The gratuitous doles appear to me to be the best form of relief for the poorest and most helpless people at present.

(5) *Organisation for employment of artisans, women, &c., at their houses.*—Nil.

(6) *Organisation for the distribution of grain doles or money doles.*—See above under (4).

(7) *Relief in kitchens.*—Nil.

(8) *Number of persons to whom loans under the Land Improvement Act or under the Agriculturists' Loans Act have been made.*—I have not made any such advances during the fortnight. I have Rs. 7,950 in hand for such grants. By the orders of the Government of India this money is to be used for the employment of labour under famine relief conditions and restrictions. I am accordingly waiting to see where, on the results of the various test-works in progress, this money can be most advantageously allotted: 112 applications for such loans have been received during the fortnight; of these, 89 were filed at Barrabazar in the south of the district in the neighbourhood of which I was in camp on the 5th, 6th and 7th instant. There is no apprehension of distress in that part of the district at present.

(9) *Financial statement for the fortnight.*—

A.—Receipts—

			Rs.	A.	P.
Grants from the district Road Cess Fund	2,435	11	0

B.—Expenditure—

(a) On 3 test-works opened in Gobindpur subdivision on 30th January 1897 (inclusive of amount spent on 30th and 31st January)	1,204	3	9
Tools and baskets	546	15	0
(b) On relief by grain or money doles	395	0	0

Total expenditure	2,146	2	9
-------------------	-----	-----	-----	-------	---	---

C.—Balance	289	8	3
------------	-----	-----	-----	-----	---	---

(10) *Account of economic condition of the affected tracts and of crops affected and extent to which they have suffered; the contingencies on which the probable duration of distress depends; the position of the affected area as to local trade; food-supply and communications and other general information which may be useful.*—These items have been dealt with in my previous reports quoted above and in this report *supra*.

The following regarding the affected thanas are taken from the police reports submitted under sections 1 and 161 of the Code.

Thana Gobindpur.—Some 10 or 15 strangers in a destitute condition daily pass down the Grand Trunk Road, and are relieved. Many people in the thana require gratuitous relief, and are receiving it.

Thana Nirsha.—The people who cannot work and the labouring people who have others to support are in distress, and are coming to the thana for relief.

Thana Tundi.—Most of the poorer people are in distress, but only those who cannot work are being relieved at the thana.

Thana Chas.—Needy and starving persons are coming to the thana and getting relief. The reports of the tahsildars employed in Wards' and Encumbered Estates in these thanas are to the effect that the poorer people are destitute, and the poorer labourers do not get sufficient food.

The Sub-Deputy Collector's report concerning thana Chas is to the effect that relief will be required there. A relief work is in progress under a sub-overseer.

(11) *The condition of the tract outside the affected thanas.*—The reports do not show that, except in the case of the Katras outpost of the Topchanchi thana adjoining the Gobindpur thana, any material change has taken place during the fortnight. In areas adjoining the thanas which I have mentioned above as affected, four test works in different places are in progress, and I am about to open another.

A death from starvation—the only one reported in the district—was reported from the Katras outpost as having occurred on the 10th instant. The District Superintendent of Police who was in camp with me in Gobindpur on receipt of this information at once visited the village (and adjoining villages) in which this death was said to have occurred. He reports that the person in question was a young man of 25 or 30, whose crops had failed and who had been unable to obtain work. He had been to Katras to borrow money, and on his return was taken ill with purging and vomiting, and died shortly afterwards. The District Superintendent is not sure that he died of starvation, but thinks that he ate some jungle products which poisoned him. The people in the neighbourhood clamoured for assistance from Government, but told Mr. Briscoe that they would work at earth-cutting for 9 pice a 100 cubic feet; they said they would work for the usual rates. He thinks that test-works there would probably not draw at present. Such a work is being opened at Katras to-day.

On the 17th instant I telegraphed to you that the recent rain throughout the district had been very timely in benefiting the *mahua* and in rendering the soil fit for ploughing. I have recently seen many ploughs at work, and am in hopes of a good *mahua* crop. The outlook is therefore somewhat higher than when I submitted my last report. My action is now being devoted to the effective working of test-works in different places and to the distribution of gratuitous relief freely, but not unduly, to the helpless poor. I expect, during the present fortnight, to have to open two regular relief works in the Gobindpur subdivision and to give out a large portion of the amount I have available for advances.

The map prescribed in section 27 of the Code is herewith submitted. The statements prescribed in sections 26 and 27 *idem* will follow immediately.

APPENDIX V.

No. 1619R., dated Hazaribagh, the 17th February 1897.

From—The Deputy Commissioner of Hazaribagh,
To—The Commissioner of the Chota Nagpur Division.

Fortnightly Famine Report of the district of Hazaribagh under sections 13 and 24 for the fortnight ending 15th February 1897.

General condition.—There has been no marked change during the fortnight. In view of possible distress among certain sections owing to continued high prices of food-grains, I have developed plans for assisting those in want of every grade by providing work in aid for them. Road work and works of improvements have been arranged for at 35 different places in the district. Cotton thread-making will be given to *bhadralok* and *zenana* women. Kitchens will be opened where helpless people are found from enquiries now in progress. I do not yet see reason for thinking there will be "pressure before April."

2. *Prospects of crops.*—*Rabi* promises well. *Mahua* not out yet. There has been much cloud and rain, which is unfavourable, if it continues another week, to the *mahua* crop.

3. *Prices.*—Statements showing number of *hats* and the selling price (per rupee) of rice, *marua*, *makai* and *mahua* for the first two weeks of January and of February are submitted herewith. Prices of rice show no tendency to get harder, but *makai* is now in many places as dear as common rice.

4. *Importation by rail.*—Statements 8 and 9 will follow.
5. *Statistics of traffic on the Grand Trunk Road (Dumwa).*—I ordered statistics of traffic down the Grand Trunk Road to be prepared, and will give this fortnight, if the figures are received, or next fortnight at latest.
6. *Rainfall.*—
- | | | | | | | |
|-----------|-----|-----|-----|-----|-----|------|
| At Sadar | ... | ... | ... | ... | ... | 1.16 |
| „ Giridih | ... | ... | ... | ... | ... | 0.80 |
7. *Public health.*—Very good.
8. *Emigration.*—Three thousand one hundred and forty-four persons emigrated from this district during the month of January 1897, against 959 persons in January 1896. This is emigration through depôts and irrespective of free emigration to the Duars, of which no figures are kept.
9. *Number and nature of public works opened in the district.*—A comparative statement showing the particulars required is submitted herewith. Works opened within the last few days are not shown.
10. *Test works.*—The works shown in the above statement against Road Cess Department are to be treated as test-works. If they attract large crowds of labourers, they will be converted into regular famine works.
11. *Relief under section 12, additional.*—Rupees 230 have been paid to the thanas and outpost officers for giving gratuitous relief as directed in section 12 of the Famine Code. Every thana has been giving small amount of relief.
12. *Loans.*—Five applications for loan of Rs. 1,650 have been received up to date against nil in the previous year. Further applications are expected. *Parwanas* have been issued everywhere calling for them. Applications will be dealt with next month when the full number has been received.
13. *Condition of cattle.*—Very little disease reported.
14. *Rates of wages.*—The rate given on ordinary works is Re. 1-9 per 1,000 cubic feet for municipal estate and road cess, or As. 2-6 per *laggi* of 10×10 feet. Public Works Department rates remain unchanged.
15. *Organisation for employment of artisans, women, &c.*—*Parwanas* have been issued to all thana and outpost officers to prepare, with the assistance of the chaukidar of each village, lists of *bhadralok* and other persons unable to work at earthwork who require relief. The system of making thread from cotton has already been introduced into the town of Hazaribagh. The number of persons employed in cotton-spinning during the fortnight under report was 109 women. The quantity of 3 maunds and 15 seers of cotton was distributed during the fortnight. Only one seer of thread was received from one woman, and annas 6 was paid to her as compensation for the labour. When the mufassal lists are ready, the services of the gurus and inspecting pandits will be utilized in distributing cotton and doles in the mufassal, unless regular relief circles are called for in any locality.
16. *Relief in kitchens.*—Particulars are given in Statement 6 annexed.

FORM No. 6.

[See Section 20 (ii) of the Code.]

DISTRICT HAZARIBAGH.

Statement of gratuitous relief for the fortnight ending 15th February 1897.

NAME OF CIRCLE AND HEADS OF GRATUITOUS RELIEF.	NUMBER OF PERSONS RECEIVING GRATUITOUS RELIEF.				Money expended.
	Men.	Women.	Children.	Total.

Secretary to the Government of Bengal

STATISTICS OF THE SEA-BORNE TRAFFIC OF CALCUTTA IN FOOD-GRAINS.

No. 586 Statistics.—The following memorandum and statements are published for general information.

STATISTICAL DEPARTMENT,
The 9th March 1897.

M. FINUCANE,
Secy. to the Govt. of Bengal.

Memorandum.

The sea-borne import and export traffic of Calcutta in food-grains during the week ending the 28th February 1896 and 1897 is shown in the following statement:—

		22ND TO 28TH FEBRUARY			
		1896.		1897.	
1		2	3	4	5
		Cwts.	Mds.	Cwts.	Mds.
<i>Imports.</i>

Other food-grains, such as jowar, barley, oats, &c.	1	1
Total	...	41,859	56,975	197,727	2,69,128

The total quantity of rice received from Burma was 102,395 cwts., against 89,635 cwts. in the preceding week. The entire supply imported from Burma since the 1st November 1896 aggregates 1,313,544 cwts. No grain came from Chandbali in the week under report against 19,067 cwts. of rice and 8,696 cwts. of paddy in the corresponding period of last year. The importation of rice and paddy from Balasore fell off from 9,215 cwts. in the corresponding period of last year to 4,980 cwts. For the third time since December last a considerable supply of wheat arrived from the United States; this third supply amounted to 92,152 cwts., the total quantity received up to date being 394,134 cwts. The decline under gram and pulses was due to the cessation of imports from Chandbali, which contributed 3,728 cwts. in the same period in 1896.

Exports.—In the following statement the total quantity of each kind of food-grains exported by sea during the last week of February 1897 is compared with the figures for the corresponding period of 1896 :—

		22ND TO 28TH FEBRUARY			
		1896.		1897.	
1		2	3	4	5
<i>Food-grains.</i>		Cwts.	Mds.	Cwts.	Mds.
Rice	...	274,815	3,74,054	66,228	90,137
Paddy	...	736	1,002
Wheat	...	1,025	1,395	125	170
Gram and pulses	..	17,403	23,687	7,421	10,101
Other food-grains, such as jowar, barley, oats, &c.		1,683	2,291	3,070	4,178
Total	...	295,662	4,02,429	76,839	1,04,586

The export trade in rice with foreign ports declined from 231,028 cwts. in the corresponding period of last year to 64,955 cwts. during the week under report. The exports in the preceding week were 137,657 cwts. There were no exports at all to the United Kingdom, Barbadoes, Muscat, Ceylon, Port Elizabeth, Aden, Persia and ports in the east coast of Africa, against 175,184 cwts. carried to those ports in the corresponding week of last year. To States other than Muscat, in Arabia 16,920 cwts. of rice were shipped during the week, against nil in 1896, while Mauritius imported 43,049 cwts., against only 22,996 cwts. in the corresponding week of last year. On the other hand, shipments to Natal were reduced from 21,286 cwts. to a trifling figure, namely, 439 cwts.

In the case of the coasting trade, the exports of rice decreased from 43,787 cwts. to 1,268 cwts.; those of paddy from 736 cwts. to nil; those of wheat from 878 cwts. to 125 cwts.; those of gram and pulses from 7,765 cwts. to 1,843, and those of miscellaneous food-grains from 487 cwts. to 10 cwts. The decrease in the rice trade was chiefly in the supplies carried to Bombay and Madras.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below.

STATISTICS OF THE SEA-BORNE TRAFFIC OF THE MINOR PORTS IN BENGAL IN FOOD-GRAINS.

No. 587 Statistics.—The following memorandum and statements are published for general information.

M. FINUCANE,
Secy. to the Govt. of Bengal.

STATISTICAL DEPT.,
The 9th March 1897.

MEMORANDUM.

The comparative statements below give statistics of the import and export trade of the minor ports of Chittagong, Narayanganj, Balasore (including both Balasore and Chandbali), Cuttack and Puri during the week ending 14th February 1897, as compared with the trade of the corresponding period of 1896 :—

IMPORTS.

Port.			From Foreign ports.	From Indian ports.	Total.	
					Cwts.	Mds.

	{ 1897	...	8,409	8,409	11,446
Puri	{ 1896	...	6,322	4,158	10,480	14,264
	{ 1897	...	14,106	14,106	19,200
Total			40,291	61,771	102,062	1,38,918
			47,013	8,917	55,930	76,127

Of the total increase of 8,635 cwts. in the import trade of Chittagong, 4,203 cwts. were in paddy and 3,092 cwts. in rice received from Burma. The imports into Balasore fell off by and 352 cwts. on account of smaller despatches of wheat and gram and pulses from Calcutta.

In the case of Puri, the total exports showed an improvement of 3,626 cwts. The shipments of rice to Mauritius amounted to 14,106 cwts., against nil in 1896, while nothing was shipped to Madras and Coluzabo during the week under report, against 4,158 cwts. and 6,322 cwts., respectively, in 1896. The falling off of 37,314 cwts. under Balasore is attributed to smaller supplies of rice, paddy and gram and pulses sent to Calcutta. In consequence of the cessation of the exports of rice and gram and pulses to Indian ports, the trade of Cuttack also declined by 12,452 cwts.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below:—

Statement showing the quantities of Food-grains imported into Chittagong from each Foreign and Indian Port during the week ending 14th February 1897, as compared with the trade of the corresponding period of 1896.

EXPORTS OF FOOD-GRAINS BY THE EAST INDIAN RAILWAY.

No. 585 Statistics.—The following statement shows the quantities of rice and other food-grains carried by the East Indian Railway from Calcutta and Howrah during the period from 1st January to 27th February 1897, both dates inclusive. The total quantity so exported was 18,12,050 maunds, but information is available regarding the destination of 16,64,028 maunds only. Of the latter quantity, 11,82,395 maunds (or more than seven-tenths) were exported to the North-Western Provinces and Oudh; 2,31,852 maunds (a little over one-seventh) to various parts of Bengal; and the rest (2,49,781 maunds) to other parts of India.

STATISTICAL DEPARTMENT,
The 9th March 1897.

M. FINUCANE,
Sery. to the Govt. of Bengal.

Statement showing the quantities of rice and other food-grains exported from Howrah and Calcutta (Chitpur, Kidderpur Docks and Port Trust Railway) by the East Indian Railway from 1st January to 27th February 1897.

COMPARATIVE STATEMENT OF THE PRICES OF FOOD-GRAINS.

RETAIL prices of common rice and other food-grains in the several districts of Bengal and in the neighbouring districts of the North-Western Provinces during the first and second fortnights of January and February 1897, as compared with the corresponding fortnights of January and February in 1896, are published for general information. The latest available prices of common rice in Cachar and Sylhet are also published.

M. FINUCANE,
Secy. to the Govt. of Bengal.

REVENUE DEPARTMENT, the 9th March 1897.

Quantity obtainable for a rupee.

WEATHER AND CROP REPORT.

For the week ending the 8th March 1897.

Burdwan.—No rain. Weather hot. *Rabi* being harvested. A fair outturn is expected in Sadar and Katwa subdivisions. Outturn in Kalna and Raniganj not as good. Sugarcane is being pressed and *til* is being sown. Fodder and water sufficient. Common rice selling as follows:—

			Srs. q.	Srs. c.	
Sadar 10 0	to 12 0	} per rupee.
Kalna 10 8	to 11 0	
Katwa 10 15	to 11 2	
Raniganj	10 8	

Birbhum.—No rain. Weather getting hot. *Rabi* crops poor for want of rain. Price of common rice at Sadar 9½ seers, and Rampur Hât 11 seers per rupee.

Bankura.—No rain. Weather becoming hot. Pressing of sugarcane still continues. Ploughing stopped again, and harvesting of *rabi* has begun in places. Fodder is everywhere sufficient. Water insufficient in a few places. Rice selling at 11½ seers per rupee at Bankura and Vishnupur. Considerable export of rice.

Midnapore.—No rain. Weather hot. Threshing of *aman* still going on. *Boro* is being sown in Gopiballavpur and Binpur. Prospect of indigo and *rabi* good. Sugarcane is still being pressed. Cattle-disease reported from Jhargram, Dantun, Salbani, Sabang, Naraingarh, Binpur, and Ramnagar. Fodder and water sufficient. Common rice selling as follows:—

			Srs.		
Sadar	11	} per rupee.
Contai 12	to 14	
Tamluk	10½	
Ghatal	12	

Hooghly.—No rain. Want of rain felt throughout the district. *Rabi* suffering for want of moisture. Common rice sells from 8 to 11 seers per rupee.

Howrah.—Rainfall nil. Weather hot with strong south-easterly wind. Prospect of *rabi* not good. Fodder and water sufficient. Common rice sells from 8½ to 11 seers per rupee.

24-Parganas.—Rainfall nil. Weather hot with south wind. Prospects of crops poor. Some preparation of lands is going on, but more rain is wanted for ploughing. Common rice sells as follows:—

			Srs.	c.	
Sadar 9	to 11 0	} per rupee.
Barasat	10 0	
Basirhat	10 8	
Diamond Harbour	10 10	

Nadia.—Rainfall nil. Weather getting very hot. Wheat and barley are being reaped and threshed in places. Ploughing almost stopped for want of rain. Water-supply generally deficient. Fodder insufficient in places. Common rice sells from 8 to 10 seers 11 chitaks per rupee. Latest price of rice where test-works are open is 9 seers per rupee. Numbers on relief on Saturday, 6th March—

			Men.	Women.	Children.	Total.
Relief-workers	3,323	726	635	4,684

Relieved in poor-houses	Nil	Nil	Nil	Nil
Otherwise relieved	665	2,612	642	3,919
Test-workers	117	Nil	Nil	117
			Total		...	10,329

Murshidabad.—No rain. Weather seasonable. Harvesting of *rabi* crops commenced. Pressing of sugarcane still continues. State of indigo and mulberry good. Fodder sufficient. Common rice sells as follows:—

			Srs.		
Sadar	10	} per rupee.
Kandi	11	
Jangipur	10½	

Four test-works open. Numbers on relief on Saturday, 6th March—

			Men.	Women.	Children.	Total.
Test-workers	324	42	9	375

Jessore.—No rain. Days hot, nights cool. Harvesting of *rabi* crops nearly over. Sugarcane is being pressed. Rain badly wanted for sowing *til* and *boro* seedlings, and for preparation of lands for *aus* and jute. No cattle-disease reported. Fodder sufficient. Want of water is being felt in some places. Common rice sells as follows:—

				Srs. c.	
Jessore	10 to 11	8
Jheuda	10	0
Magura	10 to 10	14
Narail	10	10 $\frac{1}{2}$
Bangaon	10 to 11	0

Khulna.—No rain. Weather hot. *Boro* crop fair. Rain wanted. Common rice sells as follows:—

				Srs.	
Khulna	10 to 11	
Bagerhat	12 $\frac{1}{2}$	
Satkhira	9 $\frac{1}{2}$	

Wages calculated at 10 seers per rupee. Five deaths of cattle reported from Paskohima in Baliaghata. Fodder available. Water getting scarce. Numbers employed on four relief-works—

			Men.	Women.	Children.	Total.
Relief-workers	436	Nil	43	479
Otherwise relieved	301	1,136	586	2,023
					Total	2,502

Rajshahi.—Rainfall at Naogaon 0·39; no rain elsewhere. Prospects of existing standing crops very poor. Transplantation of *boro* paddy still going on in Nator. Sowing of jute and *bhadoi* crops commenced in places. Lands are being prepared for *aman* paddy. Fodder available everywhere. Scarcity of drinking-water reported from some places. Price of rice ranges between 8 $\frac{1}{2}$ and 12 seers per rupee. Three test-works open. Numbers employed on Saturday, 6th March—

			Men.	Women.	Children.	Total.
Test-workers	426	Nil	9	435

Price of rice at relief-works, 9 $\frac{1}{2}$ to 10 seers per rupee.

Jalpaiguri.—No rain. Days warm, nights cool. Sowing of *tetri* paddy and jute retarded for want of rain, and standing crops getting bad for want of moisture. Drinking-water and fodder-supply fair. Average price of common rice, 8 $\frac{1}{2}$ seers per rupee.

Darjeeling.—No rain. Weather seasonable. Hills—Wheat, *tori* and barley coming to perfection; lands being prepared for planting *bhutta* and other crops. Terai.—Tobacco on the ground; ploughing for sugarcane, jute and *bhadoi dhan* going on. Price of coarse rice:—

				Srs.	
Hills	8	
Terai	9 to 11	

Bhutta sells at 13 to 22 seers per rupee.

Rangpur.—District average rainfall 0·16. No rain at Sadar. Lands mostly prepared for *aus* and jute, and sowing of *aus* going on. More rain wanted. Common rice selling at 9 to 11 seers per rupee. Fodder and water sufficient.

Bogra.—Rainfall ·95. Sowing of jute and *kauni* commenced. Prospects of jute and *aus* much improved. Fodder and water sufficient. Common rice selling at head-quarters 10 $\frac{1}{2}$ seers per rupee, and in the interior from 9 to 11 $\frac{1}{2}$ seers per rupee.

Pabna.—Rainfall at Sadar 0·13, Sirajganj 0·47. Weather warm and partially cloudy. Prospects of standing crops indifferent. *Cheena* very fair where sown. Common rice selling from 8 to 10 seers per rupee in different places. Fodder sufficient. Number of test-workers on 8th March—men 52 and children 55.

Dacca.—Rainfall at Sadar 1·18, Manickganj ·31, Narainganj ·04. Weather hot. The recent rain has done some good to the standing crops. More rain is wanted. Fodder available. There is want of drinking-water in some parts of the district. No cattle-disease. Common rice sells at 10 to 11 seers per rupee.

Mymensingh.—Rainfall at Sadar 1·00. Weather cloudy with prospect of rain. The recent rain will be beneficial to *boro* and other spring crops. Cultivation for *aus* and jute going on. Average price of common rice 10 seers per rupee.

Faridpur.—No rain. Weather seasonable. Harvesting of *rabi* in progress. Common rice selling at 10 to 11 seers per rupee. Fodder and water available.

Backergunge.—Rainfall nil. Weather seasonable. Prospects of crops poor. Common *aman* rice sells from 9½ to 12 seers per rupee.

Tippera.—Rainfall at Sadar 2·27. Weather unsettled; cloudy and warm with high winds. The rain will do much good to standing crops. Prices of rice:—

	Srs. c.	Srs. c.	
Sadar	10 0 to 11 0
Chandpur	10 8 to 11 8
			per rupee.

Noakhali.—No rain. Prospects of crops not good. No cattle-disease. Fodder and water available. Price of common rice 9 to 11 seers per rupee.

Chittagong.—Rainfall 1·15. Weather warm and occasionally cloudy. Prospects not good. More rain wanted for *rabi* crops. Water and fodder sufficient. Rice selling at 10 seers per rupee. Sporadic cattle-disease continues.

Patna.—No rain. *Rabi* being harvested. Sugarcane being pressed. Lancing of poppy continues. *Rahar* being reaped. Prospects favourable all round. Fodder and water for cattle sufficient. Prices rising slightly in Barh and rice in Bihar. Numbers on relief on Saturday, 6th March—

Purnea.—No rain. Mustard and tobacco harvest continues; outturn good. Standing *rabi* crops doing fairly. Molasses being manufactured at Kishanganj. Lands being prepared for next jute and *bhadai* crops. A few cases of cattle-disease reported from Araria and Raniganj thanas. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	
Sadar ...	9½	} per rupee.
Kishanganj ...	9	
Araria ...	11	

Malda.—No rain. Days warm; mornings and evenings cool. Ploughing for *bhadai* paddy going on. Prospects of standing *rabi* crops fair. Want of drinking-water has begun to be felt in the Barind tract. Fodder sufficient. Ordinary rice selling at 9 to 11 seers per rupee.

Sonthal Parganas.—No rain. *Rabi* and *mahua* fair. Water and fodder beginning to fail. Price of rice 10 to 11 seers, and of maize 11 to 13 seers per rupee.

Cuttack.—No rain. Weather hot. *Dalua* in ear. Ploughing for next *baali* and *sarad* in progress. Rice more or less available in all places. Cattle-disease prevalent in places. Fodder sufficient. Common rice sells as follows:—

	Srs.	c.	
Cuttack ...	11	13	} per rupee.
Jajpur ...	14	7	
Kendrapara ...	14	7	
Banki ...	15	12	

Balasore.—No rain. *Sarad* rice being threshed. *Dalua* crop flourishing, and is in ear in places. Sugarcane being pressed. Ploughing going on. Price of rice varies from 12 to 14 seers per rupee in the interior. Rice sells at 12 and 14 seers per rupee at Balasore and Bhadrak respectively. Fodder and water sufficient.

Puri.—No rain. *Dalua*, *mandia*, *cheena*, and *mug* growing fairly well. Land being prepared for next rice crop. Fodder and food-supply fair. Price of common rice stationary.

Angul.—Rainfall nil. There are no edible crops on the ground, though sugarcane is being planted. Quite 50 per cent. of the culturable area has been ploughed by aid of the recent rain in February. There is no demand for labour. No disease among cattle reported. Price of coarse rice, 14 to 16 seers per rupee in Angul and 15 seers in Khondmals.

Hazaribagh.—No rain. Weather bright and warm. *Mahua* promising full crop. Price of rice 9½ to 10 seers per rupee. 1,200 on test-works.

Lohardaga.—No rain. Ploughing continues. Prospect of *mahua* good. Rice sells at Ranchi 8 seers per rupee, and in the interior from 8 to 12 seers. Cattle-disease reported from Banda, Pulkote, and Lohardaga. Fodder and water sufficient. Grain stock sufficient for the present.

Palaman.—Rainfall nil. Weather getting warm. *Rabi* in good condition being reaped in places; about 8 annas of a normal outturn expected. Prices still rising. In 72 markets rice selling below 9 seers, against 63 markets in the previous week; 12 markets against 17 at 9 seers, and 4 markets against 10 above 9, but below 10 seers. Bounty rice imported all sold. Supply not equal to demand. *Mahua* very backward, but coming on. *Phalgoni mahua* crop nil, and mango crop very poor. Cattle-disease reported from eastern thanas:—

	Men.	Women.	Children.	Total.
Relief-workers ...	1,681	1,226	751	3,658
Otherwise relieved ...	276	392	145	813

Manbhum.—Rainfall nil. Weather seasonable. *Mahua* promising well. Rinderpest in thanas Chandil, Raghunathpur, and Purulia. Fodder and drinking-water sufficient at present. Price of common rice 10 seers at Sadar and 9 seers at Govindpur. 1,719 m^r f, 1,086 women, 218 children and 328 dependants on nine test works on 6th instant; 4,600 others on gratuitous-relief.

Singhbhum.—No rain. Rice plentiful. Price, 10 to 12 seers per rupee.

General Summary.—There was rain in parts of Northern and Eastern Bengal during the week. More and general rain is required for the cultivation of autumn rice and jute in Bengal Proper. In Orissa the ploughing of lands is in progress. Spring rice is doing well. The harvesting of the *rabi* crops is in progress, and the collection of opium is going on. The *mahua* crop in Chota Nagpur is promising, but in Palamau it is said to be very backward. Sugarcane pressing continues. Prices show but little change during the week. In the distressed districts the prices of the staple grain on which the famine wage is based are—Nadia (common rice) 9 seers, Khulna (common rice) 10 seers, Rajshahi (common rice) 9½ to 10 seers, Shahabad (common rice) 9½ seers, Saran (Indian-corn) 10 seers 9 chitaks, Champaran (Indian-corn) 10½ seers, Muzaffarpur (Indian-corn) 10½ seers, Darbhanga (Indian-corn) 9½ seers, Bhagalpur (common rice) 9½ seers. These figures show a slight fall in Saran and Champaran, and a slight rise in Darbhanga and Bhagalpur: elsewhere prices remained unchanged.

The numbers on relief on Saturday, 6th March, were—

Nadia	...	10,329
Murshidabad	...	375
Khulna	...	2,502
Rajshahi	...	435
Pahna	...	107

Abstract of the results of Meteorological Observations taken at the Alipore Observatory in the month of February 1897.

	Inches.	Date,	Hour.
The mean pressure of the month ...	29.919		
The average pressure of February from 24 years' registers ...	29.945		
The highest pressure in the month ...	30.083	12th	10
The lowest pressure in the month ...	29.761	26th	16
The range of pressure ...	0.322		
Hours			
The total number of hours of bright sunshine during the month	184.3		
The maximum possible number of hours of sunshine ...	318.0		
°			
The mean temperature of the month ...	72.8		
The average temperature of February from 24 years' registers	73.0		
The highest temperature in the month ...	91.6	25th	
The lowest temperature in the month ...	53.2	19th	
The range of temperature during the month ...	38.4		
The mean daily range of temperature ...	18.8		
The greatest range of temperature in one day ...	29.4	24th	
Per cent.			
The mean humidity of the month ...	72		
The average humidity of February from 24 years' registers ...	67		
Inches.			
The mean vapour tension of the month ...	0.564		
The average vapour tension of February from 9 years' registers	0.538		
The mean cloud proportion of the month ...	3.06		
The average cloud proportion of February from 20 years' registers ...	1.89		
Ins.			
The total rainfall of the month ...	1.59		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	?		
The average fall of February from 48 years' registers ...	0.87		
The greatest fall in 24 hours ...	1.26	2nd	
Days.			
The number of rainy days in the month ...	7		
The average number of rainy days in February from 24 years' registers ...	3		
°			
The mean maximum equilibrium temperature of solar radiation during the month ...	131.9		
The mean difference of sun and air temperatures ...	49.3		
The greatest sun temperature ...	143.2	25th	
The greatest excess of sun over air temperature ...	57.3	20th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth ...	57.8		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground ...	6.4		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature ...	10.8	25th	
Miles.			
The mean movement of the wind per day ...	81.1		
The greatest movement of the wind in one day ...	172.0	12th	
The greatest movement of the wind in one hour ...	?		

The number of hours with winds from each of the 8 points—

N. 37, N.E. 25, E. 25, S.E. 37, S. 35, S.W. 101, W. 83, N.W. 56, Calm 33.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore .003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 2.1° lower; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0.6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

NOTE.—The wind directions are for 18 days, as during the remaining period of the month the anemograph was under repair.

J. H. GILLILAND,

METEOROLOGICAL OFFICE, INDIA,
Calcutta, the 8th March 1897.

For Meteorological Reporter to the Govt. of India.

Abstract of the Results of the Barometric and Thermometric Observations taken at 10 a.m. at the Meteorological Office, Chowringhee, in the month of February 1897.

	Inches.	Date.
The mean pressure at 10 A.M. during the month ...	30.002	
The mean temperature at 10 A.M. during the month ...	75.7	
The highest temperature during the month ...	93.1	25th.
The lowest temperature during the month ...	53.9	19th.
The absolute range of temperature during the month ...	39.2	
The mean daily range of temperature during the month ...	20.2	
The greatest range of temperature in one day during the month ...	29.9	27th.
The mean 10 A.M. humidity during the month ...	66	
The mean 10 A.M. vapour tension during the month ...	583	
The total rainfall of the month ...	2.19	
The greatest fall in 24 hours ...	1.56	2nd.
The number of rainy days in the month ...	3

The mean pressure of the seven days 29.849

The average pressure of the corresponding period for 24 years, Surveyor-General's Office 29.860

The total number of hours of bright sunshine 57.6

The maximum possible number of hours of sunshine 81.9

The mean temperature of the seven days 78.2

The average temperature of the corresponding period for 24 years, Surveyor-General's Office 77.6

The extreme variation of temperature 29.7

The maximum temperature 92.1

The highest velocity of the wind in one hour 20

The mean relative humidity 70

The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office 68

The total fall of rain from 28th February to 6th March 1897 Nil

The average fall of the corresponding period for 24 years, Surveyor-General's Office 0.65

The total fall from 1st January to 6th March 1897 1.63

The average fall of the corresponding period for 24 years, Surveyor-General's Office 2.05

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed, open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

, dew; fog; o, overcast.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Indian Councils Acts, 1861 and 1892.

THE Council met at the Council Chamber on Saturday, the 27th February, 1897.

Present:

The Hon'ble SIR ALEXANDER MACKENZIE, K.C.S.I., Lieutenant-Governor of Bengal, *presiding*.
 The Hon'ble SIR CHARLES PAUL, K.C.I.E., Advocate-General of Bengal.
 The Hon'ble H. H. RISLEY, C.I.E.
 The Hon'ble RAI DURGA GATI BANERJEA BAHADUR, C.I.E.
 The Hon'ble NAWAB SYUD AMEER HOSSEIN, C.I.E.
 The Hon'ble C. E. BUCKLAND, C.I.E.
 The Hon'ble M. FINUCANE.
 The Hon'ble C. W. BOLTON.
 The Hon'ble W. H. GRIMLEY.
 The Hon'ble J. G. H. GLASS, C.I.E.
 The Hon'ble C. A. WILKINS.
 The Hon'ble SURENDRANATH BANERJEE.
 The Hon'ble A. M. BOSE.
 The Hon'ble RAI ESHAN CHUNDRA MITTRA BAHADUR.
 The Hon'ble GURU PROSHAD SEN.
 The Hon'ble M. S. DAS.
 The Hon'ble SAHIBZADA MAHOMED BAKHTYAR SHAH.

PUBLIC DEMANDS RECOVERY ACT, 1895, AMENDMENT BILL.

The Hon'ble MR. FINUCANE moved that the Report of the Select Committee on the Bill to amend the Public Demands Recovery Act, 1895, be taken into consideration.

The Motion was put and agreed to.

The Hon'ble MR. FINUCANE also moved that the clauses of the Bill be considered for settlement in the form recommended by the Select Committee.

The Motion was put and agreed to.

The Hon'ble MR. FINUCANE said :—"The Report has been in the hands of Hon'ble Members for some time, and I hope it sufficiently explains what we have done.

"When introducing this Bill I stated that the sole object of it was to correct certain clerical errors and to supply certain omissions which had inadvertently occurred in the Act of 1895, so as to give effect to the intention of the framers of that Act. It was then proposed that instead of a small amending Bill an altogether new Bill should be introduced embodying all the provisions of the law for recovery of public demands, and in reply to that proposal, I said that the object and intention of this Bill was not to re-open discussion on the substantive law, or to make a new law on the subject, but merely to give effect to the intention of the existing law.

"I should not have thought it necessary to occupy the time of the Council by entering into an explanation of the details of the manner in which we propose to effect the object of the Bill, or to say anything on the present occasion more than to make a formal motion, were it not that I see a formidable number of amendments on the list of business which seem to me to be based on a misapprehension of the scope of this Bill and to be entirely inconsistent with its principle, and therefore, as I shall presently submit, out of order.

"My object in doing so is not to stifle discussion, for all but one of the questions which it is proposed to raise now in an irregular manner, were fully discussed when the Act was under consideration; conclusions were deliberately come to on them, and it would be obviously most inconvenient and contrary to precedent, when a small Bill is introduced amending an existing Act, with a view to correct clerical mistakes, to permit the whole of the Act to be brought again under consideration. All that would result from allowing a procedure of this kind would be wanton waste of the time of the Council. The very same arguments would be advanced and refuted as were advanced and refuted less than two years ago (when the *personnel*, of the non-official elements of the Council, was very much the same as it now is), and with the same results.

"I think I may appeal to the Hon'ble the Advocate-General, the oldest and most experienced Member of this Council, and ask if this view be correct. If it be then the only amendment on the Bill as settled by the Select Committee in the long list of amendments before us—is the first amendment proposed by the Hon'ble Guru Proshad Sen. That amendment would, if carried, have the effect of omitting clauses (c) and (e) of section 6 of the Bill. These clauses are new and of little importance. By them it is proposed to make the certificate procedure applicable to the recovery of pleaders' and mukhtears' fees and costs when awarded by Revenue Officers under any law or rule having the force of law, in revenue proceedings before these officers, and where the award is final. Under the law as it stands the fees and costs in such cases, if not voluntarily paid, can be recovered only by suit in a Civil Court. The Select Committee were of opinion that the Certificate Procedure should obviously apply in these cases, and thought that it was only by an oversight that it had not been made applicable before. I admit that the clauses are new and so far inconsistent with the principle of the Bill. If they are not unanimously accepted, I am prepared to withdraw them.

"I hope in light of this explanation that all the amendments will be withdrawn, and that the Bill will be at once passed.

"If the amendments are pressed, I shall submit in respect of each of them *seriatim* that it is out of order and have to give my reasons."

The Hon'ble THE PRESIDENT said:—"I may say at once in connection with this Bill that I cannot allow the substantive law which was settled so recently to be re-opened. It is entirely out of order, as the Hon'ble Mr. Finucane rightly submitted, that we should travel again over the whole ground of the discussion which took place before. This Bill was introduced for certain definite limited purposes, and we have not the consent of the Government of India to re-open legislation which was settled so short a time ago and which has received the sanction of the Viceroy and is the settled law of the land. I hold, therefore, that unless it can be shown that the amendments which are on the notice paper deal with new matters which have been introduced by the Select Committee, they are out of order, and I cannot allow them to be discussed. If any Hon'ble Member can show that any particular amendment of his does not fall within the scope of the bar which I feel bound, as a matter of order, to place over these proposals, I shall be prepared to consider it; but anything which attempts to re-open the substantive law as it stands cannot be considered at all."

The Hon'ble BABU SURENDRANATH BANERJEE said:—"I desire, with your Honour's permission, to point out that, although the Hon'ble Member in charge of the Bill has observed that the Bill as it was introduced was intended to be a non-contentious Bill, merely giving effect to the intentions of the existing law, yet matters which are altogether outside the scope of a mere amending Act which only seeks to rectify clerical errors have found their way into the Bill. That being so, it strikes me, with all deference to the ruling of the chair, that we might perhaps travel outside the limits imposed upon us by the Hon'ble Mr. Finucane in his opening speech. With reference to precedents, I wish to point out that when the Bill to amend the Bengal Municipal Act was introduced, we were permitted to deal with sections of the Act which were referred to in the Bill as it was introduced, and sometimes even with sections which were not so referred to, and I think we ought to be permitted to follow the principle laid down by that precedent, and at any rate to deal with sections in the Public Demands Recovery Act which are included in this Bill."

The Hon'ble THE PRESIDENT said:—"I have no doubt whatever as to the Hon'ble Babu Surendranath Banerjee's particular amendment, because it would be re-opening a cardinal question which has been carefully discussed before. It is not an amendment upon any provision which has been introduced by the Select Committee. I am not, however, quite clear as to some of the amendments standing in the name of the Hon'ble Babu Guru Proshad Sen."

The Hon'ble BABU GURU PROSHAD SEN said:—"I am not particularly anxious to press my first amendment. I put it on the notice paper simply to show how the Select Committee in their report have gone beyond the terms of the reference. When this Bill was introduced into Council it was what the outside public called a "tinkering Bill," a measure which the Hon'ble Member in charge of the Bill characterised as a very small one—a non-contentious measure in which no question of principle was involved. But I submit that the clauses (c) and (e), which were proposed by section 6 of the Bill to be inserted in section 7 of the Act, do involve questions of principle. By clause (e) sums awarded as compensation are made recoverable under the provisions of the Public Demands Recovery Act. I have to remind the Council that though compensations are made recoverable under the Revenue Sale Laws, in the event of a sale being cancelled even when Act VII (B C.) of 1868, introducing for the first time the Certificate Procedure, awards of compensation in sale cases under the Act were not made recoverable. Since 1863 about thirty years had elapsed, and during the whole of that period the want has not been felt of a summary power for the recovery of such compensation. It is, however, now for the

first time proposed to supplement the alleged defect in the law of 1868. This is certainly open to the remark that it is perfectly new to the principle of the Bill. As, however, I am not entitled, under your Honour's ruling, to move any of the other amendments of which I have given notice, and which I consider to be much more important, I think I may as well withdraw my amendment No. 1 to omit the new clauses."

The Hon'ble THE PRESIDENT said:—"This is, as the Hon'ble Babu Guru Proshad Sen says, a tinkering Bill, and I think it was open to the Select Committee to do any additional tinkering which may have appeared necessary to them in the further examination of the law. It was not open to them to introduce any substantive legislation; but it was open to them to supply any defect or omission that they may have discovered, and in this respect I think it is open to the Hon'ble Member, if he desires to press it, to move his first amendment, which is a perfectly legitimate one. If he desires to argue this amendment, I have not the least objection."

The Hon'ble MR. FINUCANE said:—"I understand the Hon'ble Member has no objection to these provisions on the merits, and that he is willing to withdraw his amendment No. 1 with regard to them."

The Hon'ble BABU GURU PROSHAD SEN asked if the President would permit him to move his amendment No. 9, which was also an addition and which stood thus:—

"Section 6 of the Bill.—If the above amendments numbered (1) to (6) be lost, that the following clause be added to the proposed new section 7 of the Act, namely:—

'(j) any arrears of rent or cess due to a registered proprietor with regard to lands in an estate which has been surveyed and settled under the Bengal Tenancy Act, and the records kept up and mutations registered.' "

The Hon'ble THE PRESIDENT said:—"The amendment No. 9 is not a tinkering amendment. It opens up a very large question of principle. An entirely new Bill would have to be introduced after leave obtained."

The Hon'ble SIR CHARLES PAUL said:—"Permit me to point out that the Public Demands Recovery Act is rather in alleviation of the subject. If that Act was not passed, Government demands could be levied in a much more summary way; therefore that Act is in derogation of the rights of the Crown. The principle of the Act has been extended to Wards' Estates. To extend these provisions to demands in zamindars' estates would need the introduction of a separate Bill."

The Hon'ble the President having declared the following amendments of the Hon'ble Babu Surendranath Banerjee to be out of order, they were not brought forward:—

- (1). Section 6.—That clause (h) in section 6 of the Bill be omitted.
- (2). That corresponding changes be made in all sections of the Bill which refer to the aforesaid clause.

The Hon'ble the President having also declared the following amendments of the Hon'ble Babu Guru Proshad Sen to be out of order, they were not proposed:—

- (1). Section 6 of the Bill.—That the new clauses (c) and (e) which it is proposed to insert in section 7 of the Act be omitted.
- (2). Section 6 of the Bill.—That clause (h) and sub-section (2) of the proposed new section 7 of the Act be omitted.
- (3). Section 6 of the Bill.—That the proviso appearing after clause (h) of the proposed new section 7 of the Act be placed after clause (g) of that section.
- (4). Section 6 of the Bill.—That the words "or any Local Authority" in clause (i) of the proposed new section 7 of the Act be omitted.

(5). *Section 7 of the Bill.*—That the words from “in the case specified in clause (h) of the said section” to “the said Local Authority shall be deemed to be the decree-holder” be omitted.

(6). *Section 8 (1) of the Bill.*—That the words from “or to a Local Authority” to “as the case may be” be omitted.

(7). If the above amendments be lost, that the words “and there shall be payable in respect thereof a court-fee of the same amount as is payable under the Court-fees Act for the time being in force in respect of a plaint for the recovery of a sum of money equal to that stated in such requisition,” in section 9 (2) of the Act, be repealed.

(8). If the last foregoing amendment be carried, that the words “together with the cost of any court-fee paid in respect of such requisition under subsection (2) of this section,” in section 9 (3) of the Act, be repealed.

(9). *Section 6 of the Bill.*—If the above amendments numbered (1) to (6) be lost, that the following clause be added to the proposed new section 7 of the Act, namely :—

“(j) any arrears of rent or cess due to a registered proprietor with regard to lands in an estate which has been surveyed and settled under the Bengal Tenancy Act, and the records kept up and mutations registered.”

(10). *Section 12 of the Bill.*—That the words “one-twentieth” or the words “five per cent.” be substituted for the words “one-tenth” in clause (b) of the proposed new section 21 of the Act [corresponding with clause (b) of the existing section 19 of the Act.]

(11). *Section 16 of the Bill.*—That the following portion of this section be omitted, namely :—

“the words ‘Local Authority, Manager or Revenue Authority’ shall be, and be deemed to have always been, substituted for the words ‘other than a Certificate Officer, or from a manager appointed by the Court of Wards.’”

(12). *Section 17 of the Bill.*—That, instead of inserting the words “or as the case may be” in Form No. 2 in the Schedule to the Act, the words “or to A, B, a Ward of Court, or a minor, or a lunatic, by his next friend C. D.” in that Form should be repealed.

The Hon’ble Mr. FINUCANE then moved that the Bill, as amended, be passed.

The Motion was put and agreed to.

The Council adjourned to Saturday, the 20th March, 1897.

THE KHARIF IRRIGATION OPERATIONS FOR 1896-97.

No. 3367.

GOVERNMENT OF BENGAL—IRRIGATION DEPARTMENT.

IRRIGATION.

Dated Calcutta, the 12th March 1897.

RESOLUTION.

READ —

Statements Nos. I, II, and III showing irrigation operations of canals in Bengal during the *khari*f season of 1896-97.

OBSERVATIONS.—The area irrigated during the *khari*f season of 1896-97 was 601,792 acres, against 491,017 acres in 1895-96, showing an increase of 22.56 per cent.

2. The increase took place in the areas irrigated by the Orissa, Midnapore and Sone Canals, the only decrease being in the areas irrigated by the Eden Canal. In Orissa, although the total average rainfall during the season was 4.69 inches more than last year, there was a very large increase of 75,265 acres in the area irrigated. This was mainly due to the introduction of the revised system of irrigation similar to that of the Sone Circle, under which raiyats were induced to enter into new long-term leases and to renew those which had lapsed. The increase in the Midnapore and Sone Canals was chiefly attributable to the insufficient rainfall during the season.

The falling off of 16,574 acres in the areas irrigated by the Eden Canal was partly due to the non-renewal of the expired long-term leases and partly to the limited water-supply.

3. The increase or decrease in the irrigation from each canal is given in the following statement:—

CANALS.				KHARIF SEASON.		More.	Less.
				1895-96.	1896-97.		
1				2	3	4	5
				Acres.	Acres.	Acres.	Acres.
Orissa	{	Taldunda Canal	24,991	51,221	26,230
		Kendrapara Canal	60,638	72,158	11,520
		High Level Canal, Ranges I, II	...				
		and III, and Jajpur Canal	25,922	62,437	37,515
Midnapore Canal		65,251	67,690	2,439
Eden		34,336	17,763	16,574
Sone	{	Patna Canal	76,471	84,794	8,323
		Arrah "	133,552	149,540	15,988
		Buxar "	69,826	95,190	25,364
Saran Canals*	
Total				491,017	601,792	127,849	16,574

* There was no irrigation from the Saran Canals during the *khari*f season of these years.

4. On the Sone Canals the *khari*f crops irrigated are rice, sugarcane and hot-weather crops, on the Orissa Canals rice and sugarcane, and on the Midnapore and Eden Canals rice alone.

ORDER—Ordered that a copy of this Resolution and of the statements Nos. I, II and III be published in the Supplement to the *Calcutta Gazette*, and submitted to the Government of India, Public Works Department, for information.

Ordered also that copies of this Resolution and of the statements be forwarded to the Commissioners of the Orissa, Burdwan and Patna Divisions; the Collectors of the Cuttack, Balasore, Midnapore, Burdwan, Hooghly, Gaya, Patna, Shahabad and Saran districts; the Superintending Engineers of the Orissa, South-Western and Sone Circles; and Examiner of Public Works Accounts, Bengal, for information.

By order of the Lieutenant-Governor of Bengal,

A. D. McARTHUR, Col., R.E.,

Secretary to the Govt. of Bengal,

**THE EMBANKMENT AND DRAINAGE REPORTS FOR THE
YEAR 1895-96.**

No. 344L.

GOVERNMENT OF BENGAL—IRRIGATION DEPARTMENT.

Irrigation.

Dated Calcutta, the 15th March 1897.

RESOLUTION.

READ—

The Embankment and Drainage Reports for the year 1895-96.

The expenditure incurred during the year on embankments and drainage and other miscellaneous irrigation works in Bengal, which are not dealt with in the Canal Revenue Report, is shown below:—

	Rs.
I.—Embankment, class A, in Orissa ...	1,02,123
Ditto, do. B, Schedule D and other Govern- ment embankments ...	1,61,633
Ditto, do. C, maintained under contract ...	79,896
Ditto, do. D, maintained by annual appor- tionment of charges ...	12,943
II.—Works carried out by Civil Officers in Government or temporarily-settled estates ...	48,491
III.—Works undertaken under the provisions of the Drainage Act ...	30,012
IV.—Drainage works carried out at the cost of Government ..	18,014
V.— Ditto ditto under the Embankment Act	32,253
Total ...	<u>4,85,365</u>

2. *I.—Embankments maintained by the Irrigation Department.*—The public embankments in Bengal are divided into two classes:—

- 1st.*—Embankments the property of Government which are maintained at the public expense.
2nd.—Embankments maintained by Government officers at the cost of the persons interested.

In the first class there are—

- A.*—The embankments in Orissa, which are maintained under Act XXXII of 1855.
B.—The embankments enumerated in Schedule D of Act VI (B.C.) of 1873, among which are included those of the Burdwan Raj estate taken over by Government in 1804, and some additional lengths which have at various times been added to the schedule under the provisions of section 43 of Act II (B.C.) of 1882, as also two small embankments in the Pabna and Bogra districts.

In the second class there are—

- C.*—The embankments of which the cost of maintenance is recovered from the persons interested by the payment of a fixed annual charge under a contract extending over a term of years not exceeding 30, as provided for in sections 63—68 of Act II (B.C.) of 1882.
D.—The embankments of which the cost of maintenance is recovered from the persons interested by an annual apportionment of the actual charges.

Embankments A in Orissa are also for departmental purposes further classed as follows:—

- Class I.—Capital embankments (maintained as part of the Orissa Canal system).

Class II.—Embankments on large rivers to be permanently repaired.

„ III.— Ditto of local importance, such as marginal embankments outside canal embankments.

„ IV.—Embankments of doubtful utility.

„ V.— Ditto which have been abandoned and are not repaired.

The capital embankments, class I, are not treated of in this report.

3. *Lengths of embankments.*—The lengths of embankments in each class are shown below:—

Embankments.	Lengths.	
1	2	
	Miles.	Feet.
Embankments the property of Government maintained at the public expense—		
Class A.—In Orissa	*552	3,894
Class B.—Schedule D and other Government embankments	1,115	3,990
Embankments not the property of Government maintained at the cost of the persons interested—		
Class C.—Maintained under contract	473	1,812
Class D.—Maintained by annual apportionment of charges	77	4,094
Total for 1895-96 ..	2,219	3,230
Total for 1894-95 ...	2,209	978
Difference, increase	10	2,252

* In addition to those there are 168 miles of effective flood banks maintained in connection with the Orissa Canals.

In class A embankments there was no change.

In class B embankments there is an increase of 8 miles 400 feet. In the Burdwan district 8 miles at Chanchai on the left bank of the Damodar, hitherto omitted, were added during the year, and in the 24-Parganas 1,290 feet and 1,100 feet on the Charial khal were added, but 1,990 feet being subsequently found to be unnecessary were struck off, making a net increase of 400 feet only.

Class C embankments show an increase of 2 miles 3,470 feet. This increase in the Midnapore district was found by actual chain measurement made during the year of the existing embankments in the Cossye Division.

In class D embankments there is a decrease of 1,619 feet only. This decrease in the length of the Belwa embankment in the Purnea district was found by actual measurement made during the year.

4. *Floods.*—In the Orissa Circle the flood in the Mahanadi river was a fairly high one, but those in the Brahmini-Byturni and Salindee rivers were of moderate character. Many small breaches occurred, but no damage of any consequence was done to the canal works. In the South-Western Circle there were no high floods, and consequently no great damage was done to the embankments. In the Bhagirathi the highest reading at Berhampore was 4.86 feet below the highest flood level of 1890. At Laltakuri and Dadpur, the weakest places on the embankments, the river banks were protected by spurs, but erosion continued until the embankments were cut away up to crest level. No damage, however, was done, as ring bunds had been constructed behind the main embankment. In the Hooghly the floods were of an ordinary nature, while those in the Damodar were high, and their effect on the right bank within the spill area of the Bangacha and Lakra breaches proved beneficial, as the flood-water entering the breaches irrigated the whole area. The spurs stood well, and helped to silt up the breaches to a large extent. The Haldi river rose higher than usual. There were no breaches in any of the embankments in the Northern Circle, as the floods were of ordinary character. In the Sone Circle there were two high floods in the river Gaudak, which did considerable damage to the various protective works along that river. No high floods

occurred in the Ganges, Bagmati, and Sukri rivers, but in the Bur Gandak river a fairly high flood occurred, and the river made a serious encroachment on the Daudpur Municipal embankment at Muzaffarpur. There were three breaches in the Saran, Champaran, and Tirhut embankments, but in consequence of the retired lines which had been constructed at the places breached, no floods occurred in the country protected by the embankments.

5. *Original works.*—There were no original works undertaken or executed in the Orissa, South-Western, and Northern Circles during the year. In the Sone Circle the only work undertaken was the construction of a sluice in the 51st mile of the Champaran embankment. It was completed at a cost of Rs. 1,775 and was used during the year for drainage. The funds were provided by the proprietor of the Turcowlia Indigo Concern.

6(a). *Ordinary repairs.*—The cost of ordinary repairs to the Government embankments in the Orissa Circle was Rs. 40,210, against Rs. 42,272 in the preceding year, showing a decrease of Rs. 2,062. The average of the nine years ending 1894-95 was Rs. 66,835. In the South-Western Circle the expenditure incurred under this head was Rs. 1,38,428, against Rs. 1,40,699 in the previous year, showing a decrease of Rs. 2,271. The Orissa embankments in the Balasore district were maintained in good order at a cost of Rs. 4,493, against Rs. 9,839 in the previous year. Of the total outlay of Rs. 1,38,428 on repairs, Rs. 78,459 was expended on embankments protecting the Burdwan Raj estate in the districts of Hooghly, Burdwan, Birbhum, and Midnapore, against Rs. 1,08,998 in the previous year. The decrease of Rs. 30,539 is mainly due to there having been no high floods during the year. All the embankments in the circle were maintained in an efficient state. In the Sone Circle, where there are no Government embankments, the expenditure was incurred on the maintenance of the embankments under contract. The amount expended during the year was Rs. 44,107, against Rs. 46,140 in the previous year. The expenditure on the Tirhut embankment and on the river protective works was much less than last year, but there was a considerable increase in the Champaran embankment due to the construction of a retired line at a cost of Rs. 9,696. In the Northern Circle Rs. 305 was expended on repairs to the Chandan embankment in Bhagalpur district, Rs. 268 on the Belwa bund in Purnea district, Rs. 284 on the Malda embankment in Malda district, and Rs. 230 on the Pabna embankment in Pabna district. There was no expenditure on the Chota Manika embankment in Bogra district, as no repairs were necessary.

(b) *Breaches and retired lines.*—In the Orissa Circle the expenditure incurred on repairs to the revetments of river banks and the river-improvement works, and for constructing spurs and retired lines and filling in of breaches was Rs. 57,420, against Rs. 50,948 in the previous year and Rs. 41,289, the average of the nine years ending 1894-95. More than three-fourths of the expenditure were on repairs to the revetments and river-improvement works. The revetment at Bogla, where the Katjoree river has been attacking for some years the bank close to the Machgong Canal, and that at Chowsatpara on the Brahmini river above the anicut at Janapore, were the most important ones, and their extensions were effected with good results at a cost of Rs. 16,858 and Rs. 12,964 respectively. The revetment at Nilkantpur on the right bank of the Brahmini river, about three miles above Pattamoondi, where the stream had encroached nearly up to the toe of the canal flood bank, was successful in arresting the progress of erosion. Its cost was Rs. 1,565 only. In the South-Western Circle there were no breaches in any of the embankments. The expenditure incurred in constructing retired lines was Rs. 23,133, against Rs. 27,110 in 1894-95, as detailed below:—

			1895-96.	1894-95.
			Rs.	Rs.
In Murshidabad district	10,952	3,985
„ 24-Parganas	„	...	1,959	5,039
„ Midnapore	„	...	2,192	8,459
„ Hooghly	„	...	7,732	9,627
„ Burdwan	„	...	298	...
			<hr/> 23,133	<hr/> 27,110

In the Sone Circle, in addition to the three retired lines which were constructed at the places breached in the Saran, Champaran, and Tirhut embankments, Rs. 17,497 was spent on river protective works on the Gundak River against Rs. 20,354 in the previous year. The protective works on the Turki, Bazitpur, and Monghyr embankments, and the protection of the Sekunderpur maidan in Muzaffarpur from the encroachment of the Bur Gandak river, cost in the aggregate Rs. 3,408.

7. *Financial.*—The cost of repairs to the Orissa embankments (class A) was Rs. 1,02,123, against Rs. 1,03,059 in 1894-95, the rate being Rs. 184 per mile against Rs. 86. The amount expended on class B embankments was Rs. 1,61,433, against Rs. 2,03,002, or at the average mile rate of Rs. 144, against Rs. 183 in the previous year. Although there was an addition of 8 miles 400 feet in the total length of this class of embankments, the decrease of Rs. 41,569 in the expenditure was due to there having been no high floods and no cyclone damages during the year.

As regards class C embankments maintained by Government under the contract system, the actual cost incurred was Rs. 79,896, against Rs. 97,891, showing a decrease of Rs. 17,995, the average rate per mile being Rs. 168, against Rs. 207 in the previous year. The expenditure exceeded the contract rate only in the case of the Champaran embankment, owing to the construction of a retired line at a heavy cost of Rs. 9,696 in the 81st mile, where 2,000 feet were washed away by floods.

The sums payable under contract for this class of embankments, compared with the maintenance charges, including book charges for establishment and tools and plant, are shown in the following table, together with the amount recovered during the year and the balance remaining to be recovered :—

YEAR.	MIDNAPORE DISTRICT.		SARAN DISTRICT.		CHAMPARAN DISTRICT.		MUZAFFARPUR DISTRICT.		TOTAL.		Recoveries.	Balance to be recovered.	Surplus.	Deficit on the contract.

Total ...	7,30,474	8,25,000	4,74,782	3,68,500	4,24,779	1,66,000	2,43,589	1,24,080	14,75,501	14,64,480	13,86,653	77,827	...	

It will be seen from the above figures that Government is a loser by Rs. 18,280 on the working of the year, and that the outstanding balance to be recovered from the persons interested amounts to Rs. 77,827.

The loss to Government in 1894-95 was Rs. 48,655, and the average annual loss for the nine years ending with 1894-95 was Rs. 29,473.

In the Midnapore district the amount payable under contract is ordinarily quite sufficient to keep the embankments in repair. There was excess expenditure in three years only since the introduction of the contract system in 1881-82. In 1882-83 the excess was Rs. 11,320, and in 1893-94 and 1894-95, owing to the extensive damages caused by the cyclone and floods of 1892-93, the excesses were Rs. 18,983 and Rs. 15,635 respectively.

As regards the Saran, Champaran, and Muzaffarpur embankments, the excess over the contract amounts is chiefly due to the heavy cost of constructing retired lines and to the necessity of preventing encroachments by the maintenance of spurs.

On embankments of class D (Appendix C), the actual outlay incurred during the year by the Civil Department, as stated by the Superintending Engineers concerned, was Rs. 15,457, while the recoveries and adjustments were Rs. 19,286, the balance unadjusted at the end of the year being Rs. 16,721. Compared with the figures supplied by the Board of Revenue (Appendix B), it

will be seen that the collections of the year were Rs. 32,527, or Rs. 13,241 in excess of that reported by the Superintending Engineers. No explanation of this discrepancy has been given by the Board of Revenue. The figures given in the Board's return (Appendix B) include only the amounts which have been accepted and apportioned by the Civil Department, and hence no comparison can be made between the "advances" and "outstanding balances" as reported by the Board and as given by the Superintending Engineers.

The figures supplied by the Board (Appendix B) are shown in a more concise form in the following statement. The recoverable amount or demand falling due within the year was Rs. 69,649, out of which Rs. 32,527 were collected, the recoveries thus falling short of the amount of the demand by Rs. 37,122:—

	DUE DURING THE YEAR.		FALLING DUE IN SUBSEQUENT DATE.		TOTAL.	
	Column of Board's return.	Amount.	Column of Board's return.	Amount.	Column of Board's return.	Amount.
1	2	3	4	5	6	7

Collections of the year, including remission.	18 & 19	32,527	18 & 19	32,527
Balance (arrear) ...	27	37,122	28	2,65,970	27 & 28	3,03,092
Total	69,649	2,65,970	...	3,35,619

8. *Agricultural public works carried out in Government or temporarily-settled estates by Civil officers from the grant placed at the disposal of the Board of Revenue.*—The provision for Rs. 50,000 was omitted for the first time from the Irrigation Budget for 1895-96, and amalgamated with the allotment made out of the 12 per cent. deduction from collections of Government estates for sanitary and miscellaneous improvements in those estates, by order of the Lieutenant-Governor.

The amount expended during the year was Rs. 48,491. Its distribution by districts, as supplied by the Board of Revenue, is given in the subjoined statement:—

Division.	District.	Expenditure.
		Rs.
Burdwan	Bankura	541
Presidency	24 Parganas, Nadia, and Khulna	6,988
Rajshahi	Rajshahi, Jalpaiguri, and Bogra	1,597
Dacca	Mymensingh and Backergunge	3,156
Chittagong	Chittagong and Noakhali	11,470
Patna	Patna	2,450
	Gaya	9,802
	Shahabad	2,331
Bhagalpur	Saran	200
	Bhagalpur	270
Orissa	Cuttack	745
	Balasore	350
	Puri	2,656
Chota Nagpur	Palamau	2,978
	Hazaribagh	603
	Singhbhum	2,174
	Lohardaga	180
Total		48,491

The nature of the expenditure is shown below :—

Construction and repairs of embankments	28,785
Excavation and repairs of tanks	1,924
Construction and repairs of wells for irrigation purposes	3,838
Excavation and repairs of water-courses, canals, khals and nalas	1,990
Construction and repairs of irrigation channels and pynes	4,021
Repairs to irrigation culverts	285
Construction and repairs of reservoirs and <i>ahars</i>	7,982
Construction and repairs of aqueducts	54
Repairs to village channels	109
Plantation of trees	3
Total	48,491

The principal works of construction and repairs to embankments and their cost were—(1) the Kutubdia and other embankments in the Chittagong district, on which Rs. 11,470 was expended, and (2) embankments in Port Canning estate and in Diamond Harbour subdivision over the Satpukur khal in the 24-Parganas district, and embankments in the Khulna and Bhagalpur districts, which cost Rs. 5,683, Rs. 1,005, and Rs. 268 respectively.

In the Nadia district Rs. 300 was expended on a drainage canal, and in the Rajshahi, Bogra, Jalpaiguri, Mymensingh, and Backergunge districts, the expenditure of Rs. 236, Rs. 745, Rs. 616, Rs. 235, and Rs. 2,921 respectively was incurred in constructing and repairing bunds, excavating tanks, khals, drains, and irrigation channels.

In the Cuttack, Balasore, and Puri districts the expenditure of Rs. 3,751 was mainly confined to the construction and repairs of bunds and tanks. The construction and repairs of wells, water-courses, irrigation pynes, and *ahars* and irrigation culverts at a total cost of Rs. 14,783 were carried out in the Patna, Gaya, Shahabad, and Saran districts. In the Hazaribagh, Lohardaga, Palamau, and Singhbhum districts the expenditure of Rs. 5,935 was confined to the construction and repairs of embankments and reservoirs.

9. *Works undertaken under the provisions of the Drainage Act, VI (B.C.) of 1880.*—The drainage works, (five in number) lie in the southern part of the Hooghly district in the South-Western Circle. Four of them, viz., the Dankuni, Howrah, Rajapur, and Burrajolla, have been completed, and the costs of their maintenance have been capitalized. The fifth (Ampta project), the cost of which was estimated at Rs. 9,50,359, has not yet been sanctioned by Government. It is in contemplation to abandon this costly scheme and to prepare a less costly one for improving the low lands lying on the drainage basin. The Superintending Engineer, South-Western Circle, writes :—

“There is no urgency about this scheme, as the low lands are higher than those in the Rajapur and other swamps, so it is only in seasons of exceptional rainfall that the crops are destroyed. The possibility of improving the drainage of this basin by simply remodeling a portion of the Purana Khal is under consideration, and a report will be shortly submitted.”

The following is an account given by the Superintending Engineer of the expenditure incurred on the construction of the drainage schemes, inclusive of charges for establishment and tools and plant :—

			Rs.	
1. Dankuni Drainage Works	4,04,159	(completed).
2. Howrah ditto	2,72,062	(ditto).
3. Rajapur ditto	}	...	9,10,286	(ditto).
4. Burrajolla ditto		...		

10. The lengths of the schemes, their channels, and the areas drained by them are the same as given in last year's report. The maintenance charges of the Dankuni and Howrah drainage schemes were capitalized at an annual cost of Rs. 4,390 and Rs. 2,000, respectively, in the years 1891-92 and 1893-94. The capitalization of the cost and maintenance charges of the Rajapur Drainage Works up to 31st March 1895 was sanctioned in Bengal Government letter No. 13137., dated 15th December 1896 at an annual cost of Rs. 5,000.

11. The Dankuni Drainage Works were efficiently maintained at a cost of Rs. 2,527, against Rs. 2,029 in the previous year. These charges include a portion of the Drainage Deputy Collector's salary, amounting to Rs. 1,200.

12. The Howrah Drainage Works were maintained in good order at a cost of Rs. 3,299, against Rs. 3,665 in the year 1894-95. These sums include a portion of the Drainage Deputy Collector's salary, amounting to Rs. 2,400.

13. The Rajapur drainage scheme was efficiently maintained during the year at a cost of Rs. 4,259, against Rs. 3,561 in the previous year. The maintenance cost of the Burrojolla work was Rs. 1,422, against Rs. 716 in 1894-95. The sum of Rs. 30,030-0-9, being the charges incurred on the scheme during 1895-96 and already debited to the Civil Department, has, by order of the Government of Bengal (No. 1401.A., dated the 2nd February 1897), been written back from the Civil Department and adjusted finally against the head "Agricultural Works, Provincial," in the books of this Department.

14. *Efficiency of the Drainage Works.*—The drainage schemes have proved very successful, as they have not only reclaimed large tracts of lands lying in their basins, but have also efficiently drained them and the high lands surrounding. In seasons of drought and scanty rainfall they contribute to irrigate these lands by taking in water from the river Hooghly.

15. *Drainage Works carried out at the cost of Government.*—The construction of a sluice at the mouth of the Raimoni khal for draining a portion of the Howrah drainage basin at an estimated cost of Rs. 4,000, which was taken up in 1894-95, has nearly been completed and a sum of Rs. 682 was spent during the year. The extension of the Howrah drainage branch channel No. 1, which was taken up last year, has been completed during the year. The expenditure incurred on it was Rs. 195 only. For land compensation Rs. 251 was paid.

A revised estimate, amounting to Rs. 6,020, for improving the drainage of the Magra portion of the Surpai basin, lying along the Kedgeree road north of Contai, by a cut into the Amirabad khal, was sanctioned in Bengal Government letter No. 14321., dated the 28th December 1895. The work was completed during the year at a cost of Rs. 4,684. The new dock at Baliaghye in the 5th mile of the Balliaghye drain for the development of navigation of the canal, was under construction during the year.

An estimate amounting to Rs. 2,73,818 for improving the drainage of the Peechaboni and Surpai basins, situated on Range III of the Orissa Coast Canal, is under the consideration of Government.

During the year silt was cleared from the Baliaghye main drain, Surpai sluice, Bhograi supply channel, and Amirabad khas tahsil khal. A bund was put in November at the mouth of the Surpai drainage channel and cut in the rains at a cost of Rs. 1,022. For repairing the Bullee Bhil drainage works Rs. 5,374 was expended during the year, against Rs. 3,325 in the previous year.

16. *Drainage works carried out under the Embankment Act, 11 (B.C.) of 1882.*—On applications being submitted under section 18 of the Act, two sluices were constructed during the year, one of three vents at Tangrabichi, between the 74th and 75th mile-posts of Schedule D embankment No. 73, another of one vent at Alumpur, between the 15th and 16th mile-posts of Schedule D embankment No. 61, on the left bank of the Hooghly, at a cost of Rs. 22,291 and Rs. 6,966 respectively.

The water-course known as Boycari Boar from the Koyjoori regulator in the district of 24-Parganas, 2 miles and 940 feet in length, which was declared a public water-course and included in Schedule D, in Bengal Government Notification No. 178, of the 20th May 1895, was cleared of weeds, etc., during the year at a cost of Rs. 445.

The Churrial khal drainage scheme in the district of 24-Parganas was maintained during the year at Rs. 929, against Rs. 756 in the previous year. The total expenditure incurred on its maintenance up to 31st March 1896 amounts to Rs. 1,41,260.

Fourteen small sluices in Schedule D embankments in the district of 24-Parganas were efficiently maintained during the year at a cost of Rs. 438.

The Koomrool sluice in the 53rd mile of Damodar left embankment, together with its channel, was maintained at a cost of Rs. 816, against Rs. 256

in the previous year. Another sluice at Bacherhat in the 22nd mile thereof was repaired at Rs. 37 only.

In repairing the Dainan sluice khal Rs. 340 was expended during the year, against Rs. 1,581 in 1894-95.

Order.—Ordered that a copy of this Resolution and of its appendices (A to C) be published in the supplement to the *Calcutta Gazette*, and submitted to the Government of India, Public Works Department, for information.

Ordered, also, that copies of this Resolution and of its appendices (A to C) be forwarded to the Secretaries to the Government of Bengal in the Revenue and Financial Departments, Secretary to the Board of Revenue, Lower Provinces, Commissioners of the Patna, Bhagalpur, Rajshahi, Presidency, Burdwan, and Orissa Divisions, Superintending Engineers of the Orissa, South-Western, Sone, and Northern Circles, and Examiner of Public Works Accounts, Bengal, for information.

By order of the Lieutenant-Governor of Bengal,

A. D. McARTHUR, COL., R.E.,

Secretary to the Government of Bengal.

APPENDIX B.

[Compiled by the Board of Revenue.]

Advances relating to embankments of Clives D [Act II (B.C.) of 1862] for the year 1895-96.

DIVISION.	DISTRICT.	OUTSTANDING ADVANCES.				CLASSIFICATION OF THE DEMAND OF THE YEAR.												COLLECTIONS.						BALANCES.						REMARKS.
		Total amount advanced in preceding years outstanding on 1st April 1905.	Total amount advanced during the year.	Total of columns 3 and 4.	Unrecovered interest of previous years.	Amount due during the year out of the sum shown in column 3, i.e., instalments falling due for the first time and arrears of previous instalments.	Amount due during the year out of the sum shown in column 4.	Unrecovered interest of previous years. STATISTICAL DEPARTMENT,
The 15th March 1897.

M. FINUCANE,
Secretary to the Government of Bengal.

STATISTICS OF THE SEA-BORNE TRAFFIC OF CALCUTTA
IN FOOD-GRAINS.

No. 662 Statistics.—The following memorandum and statements are published for general information.

STATISTICAL DEPARTMENT,
The 16th March 1897.

M. FINUCANE,
Secy. to the Govt. of Bengal.

Memorandum.

The sea-borne import and export traffic of Calcutta in food-grains during the week ending the 7th March 1896 and 1897 is shown in the following statement:—

		1ST TO 7TH MARCH			
		1896.		1897.	
1		2	3	4	5
		Cwts.	Mds.	Cwts.	Mds.
<i>Imports.</i>					
From Foreign Ports	...	1	1	8	11
„ Indian „	...	51,096	69,547	218,230	2,97,035
Total	...	51,097	69,548	218,238	2,97,046
<i>Exports.</i>					
To Foreign Ports	...	120,514	1,64,023	127,262	1,73,217
„ Indian „	...	21,857	29,750	21,526	28,619
Total	...	142,371	1,93,783	148,288	2,01,836

Imports—The different staples comprising the import traffic are shown in the table below, and the figures for the week are compared with those for the corresponding period last year:—

		1ST TO 7TH MARCH			
		1896.		1897.	
1		2	3	4	5
		Cwts.	Mds.	Cwts.	Mds.
<i>Food-grains.</i>					
Rice	...	35,657	48,533	197,302	2,68,550
Paddy	...	10,996	14,967	13,992	19,045
Wheat
Gram and pulses	...	4,444	6,048	6,643	7,680
Other food-grains, such as jowar, barley, oats, &c.	1,301	1,771
Total	...	51,097	69,548	218,238	2,97,046

The importation of rice from Burma amounted to 188,209 cwts., against 102,395 cwts. in the preceding week. The total quantity received from Burma since the 1st November 1896 aggregates 1,501,753 cwts., or 75,088 tons. The imports from Chandbali were only 5,298 cwts. of rice and 802 cwts. of paddy, against 29,381 cwts and 6,905 cwts. respectively in the corresponding period of last year. Taking rice and paddy together, the figures for Balasore remained practically unchanged.

Exports.—In the following statement the total quantity of each kind of food-grain exported by sea during the first week of March 1897 is compared with the figures for the corresponding period of 1896 :—

1	1ST TO 7TH MARCH			
	1896.		1897.	
	2	3	4	5
<i>Food-grains.</i>	Cwts.	Mds.	Cwts.	Mds.

Paddy	22	30
Wheat	753	1,025	172	234
Gram and pulses	16,901	23,004	10,926	14,871
Other food-grains, such as jowar, barley, oats, &c.	897	1,221	2,167	2,950
Total ...	142,371	1,93,783	148,288	2,01,836

The chief features of the transactions of the week under report are that the exports of rice to foreign ports were almost double those of the previous week (120,039 cwts. against 64,955), and that the exportation of rice to foreign countries was greater by 10·53 per cent. than in the corresponding period of 1896. The principal fluctuations are an increase of 30,949 cwts. in the shipments to the United Kingdom and of 4,812 cwts. in those to Ceylon, while the consignments to Muscat and Persia showed a decline of 24,257 cwts. and 7,761 cwts. respectively. On the other hand, Mauritius and Reunion drew nothing during the week, against 23,021 cwts. and 3,476 cwts., respectively, in the corresponding period of last year, while the ports of Hamburg, Cape Colony, Delagoa Bay, Natal, West Indies, and Aden collectively received 41,754 cwts., against nothing in 1896. The decrease under gram and pulses was owing to no gram having been sent to Mauritius, against 4,437 cwts. in 1896.

Compared with the week ending 7th March 1896, the exports of rice to Indian ports remained unchanged, but Bombay imported largely at the cost of the Madras ports. The total trade under the other heads is not important.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below.

Statement No. I, showing the Imports of Food-grains into Calcutta from Foreign and Indian Ports during the week ending 7th March 1896 and 1897.

STATISTICS OF THE SEA-BORNE TRAFFIC OF THE MINOR PORTS
IN BENGAL IN FOOD-GRAINS.

No. 659 Statistics.—The following memorandum and statements are published for general information.

M. FINUCANE,
Secy. to the Govt. of Bengal.

STATISTICAL DEPT.,
The 16th March 1897.

MEMORANDUM.

THE comparative statements below give statistics of the import and export trade of the minor ports of Chittagong, Narayanganj, Balasore (including both Balasore and Chandbali), Cuttack and Puri during the week ending 21st February 1897, as compared with the trade of the corresponding period of 1896 :—

Ports.		IMPORTS.		Total.	
		From Foreign ports.	From Indian ports.	Cwts.	Mds.
Chittagong ...	{ 1896	485	485	660
	{ 1897	7,486	7,486	10,189

	{ 1897	7,840	7,840	10,671

Ports.		EXPORTS.		Total.	
		To Foreign ports.	To Indian ports.	Cwts.	Mds.
Chittagong ...	{ 1896 ...	7,287	17,480	24,767	33,711
	{ 1897
Narayanganj ...	{ 1896	37	37	50
	{ 1897
Balasore ports...	{ 1896 ...	1,175	59,173	60,348	82,140
	{ 1897 ...	11,312	15,950	27,262	37,107
Cuttack ...	{ 1896
	{ 1897 ...	18,184	18,184	24,750
Puri ...	{ 1896 ...	6,232	6,232	8,482
	{ 1897
Total ...	{ 1896 ...	14,694	76,690	91,384	1,24,383
	{ 1897 ...	21,496	15,950	45,416	61,857

The increase of 7,001 cwts. in the import trade of Chittagong, which amounted to 7,486 cwts., was mainly due to larger receipts of rice and paddy from Burma.

In consequence of the cessation of despatches to both Foreign and Indian ports, the export trade of Chittagong and Puri fell off by 24,767 cwts. and 6,232 cwts. respectively. Balasore also showed a decline of 33,086 cwts. chiefly on account of smaller shipments of rice, paddy, and gram and pulse to Calcutta; on the other hand, the exports to Mauritius aggregated 11,312 cwts. against nil in 1896. The improvement of 18,184 cwts. under Cuttack was entirely due to exports of rice to Mauritius, which drew nothing during the corresponding week of 1896.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below:—

Statement showing the quantities of Food-grains imported into Chittagong from each Foreign and Indian Port during the week ending 21st February 1897, as compared with the trade of the corresponding period of 1896.

EXPORTS OF FOOD-GRAINS BY THE EAST INDIAN RAILWAY.

No. 658 Statistics.—The following statement shows the quantity of rice and other food-grains exported by the East Indian Railway from Calcutta and Howrah during the period from 1st January to 6th March 1897, both days inclusive, to have been 20,55, 375 maunds. The destination of 19,02,554 maunds is specified. More than seven-tenths of this quantity (13,46,964 maunds) was carried to the North-Western Provinces and Oudh, less than one-seventh (2,71,413 maunds) to stations in Bengal, and the rest (2,84,177 maunds) to other provinces.

M. FINUCANE,
Secy. to the Govt. of Bengal.

STATISTICAL DEPARTMENT,
The 16th March 1897.

Statement showing the quantities of rice and other food-grains exported from Howrah and Calcutta (Chitpur, Kidderpur Docks and Port Trust Railway) by the East Indian Railway from 1st January to 6th March 1897.

STATION TO WHICH CONSIGNEE.	Total from 1st to 30th January 1897.	Total from 31st Janu- ary to 27th February 1897.	Week ending 6th March 1897.

WEATHER AND CROP REPORT.

For the week ending the 15th March 1897.

Burdwan.—Rainfall at Sadar 0·16, Kalna nil, Katwa 0·45, Raniganj 0·65. Weather hot. Lands being ploughed. *Rabi* being harvested. Sugarcane being pressed. Sowing of *til* continues. Fodder and water sufficient at present. Common rice selling as follows:—

			Srs. a.	Srs. a.	
Sadar	11 0 to 12 0	} per rupee.
Kalna	11 0	
Katwa	10 15 to 11 2	
Raniganj	10 0	

Birbhum.—Rainfall at Sadar ·13, Rampur Hat ·01, and over half inch in some parts of district. Weather much cooler. Price of common rice at Sadar 9½ seers, and Rampur Hat 10½ seers per rupee.

Bankura.—Rainfall at Gangajalghati 0·15, Maliara 0·10. Weather cloudy at the beginning of the week and somewhat cool. Very slight rain in Kusthole on 9th with stormy weather. Pressing of sugarcane almost finished. Harvesting of *rabi* going on. Water insufficient in a few places. Rice selling at 11½ seers per rupee at Vishnupur and Bankura.

Midnapore.—No rain. Days hot, nights cool. Prospect of indigo not good. *Boro* suffering for want of rain. Plantation of sugarcane going on in Keshpur. Cattle-disease reported from Keshpur, Binpur, Dantun, Benapura, Ramnagar, and Chaudrakona. Prices show a tendency to fall. Common rice selling as follows:—

			Srs.		
Sadar	11	} per rupee.
Contai	12 to 15	
Tamluk	11½	
Ghatal	11 to 12½	

Hooghly.—No rain. Want of rain felt throughout the district. *Boro* doing well in some places. Common rice sells from 9 to 11 seers per rupee.

Howrah.—Rainfall nil. Weather hot. Prospect of *rabi* not good. Fodder and water sufficient. Common rice sells at 8½ to 11 seers per rupee.

24-Parganas.—Rainfall nil. Weather hot with dry wind. Prospects of crops poor. Some preparation of land going on, but more rain is wanted for ploughing. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

			Srs.	c.	
Sadar	9 to 11	} per rupee.
Barasat	10 0	
Basirhat	10 8	
Diamond Harbour	10 10	

Nadia.—Rainfall at Sadar ·06, Kushtea ·09, Meherpur ·26, Chuadanga ·2. Harvesting of *rabi* crops nearly over; outturn poor. Ploughing retarded for want of rain. Isolated cases of cow-pox in thana Tehatta in the Meherpur subdivision. Water-supply generally deficient. Fodder insufficient in places. Common rice sells from 8 to 10 seers per rupee. Latest price of rice where test-works are open is 9 seers per rupee. Numbers on relief on Saturday, 13th March—

			Men.	Women.	Children.	Total.
Relief-workers	4,547	720	607	5,874
Dependants	23	57	1,386	1,466
Otherwise relieved	833	3,221	741	4,795
Test-workers	259	Nil	2	261
			Total		...	12,396

Murshidabad.—Rainfall at Sadar nil, Kandi nil, Jangipur 0·03. Weather seasonable. Harvesting of *rabi* crops still continues. State of indigo and mulberry tolerably good. Pressing of sugarcane continues. Fodder sufficient. Common rice sells as follows:—

			Srs.	
Sadar	10½
Kandi	11
Jangipur	10½

Numbers on relief on Saturday, 13th March, Sadar subdivision—

			Men.	Women.	Children.	Total.
Test-workers	1,369	30	57	1,456

Jessore.—Rainfall at Jhenida ·03, Narail ·07. Nights and mornings cool, days hot. Harvesting of *rabi* crops nearly over. Rainfall in Narail did good to *boro* paddy, which is doing well, but more rain wanted for it and for sowing *ai*. If there be no rain within a week or fortnight, *ai* will not be sown on high lands, and that on low lands will suffer. Cultivation of lands for *aus* and jute going on. Fodder available. Want of good water felt in places. Common rice sells as follows:—

	Srs.	
Jessore	10 to 11	} per rupee.
Jhenida	9½	
Magura	10 to 10½	
Narail	10 to 10½	
Bangaon	10 to 11	

Khulna.—No rain. Weather hot. Prospect of *boro* fair, but rain needed urgently. Common rice sells as follows:—

	Srs.	
Khulna	10 to 13	} per rupee.
Bagerhat	12½	
Satkhira	9½	

Relief wages calculated at 10 seers per rupee. Fodder available. Water scarce. Numbers employed on eleven relief-works—

	Men.	Women.	Children.	Total.
Relief-workers	812	Nil	75	887
Otherwise relieved	425	1,716	886	3,027
Total				3,914

Rajshahi.—Rainfall at Sadar 0·04, Naogaon 0·02, Nator nil. Harvesting of *rabi* crops almost completed. Transplantation of *boro* paddy nearly finished. Sowing of jute and *bhador* going on. Lands being prepared for *aman*. Fodder available. Scarcity of water reported from some places. Common rice selling at 9 to 11½ seers per rupee. Numbers on relief on Saturday, 13th March—

	Men.	Women.	Children.	Total.
Test-workers	627	Nil	16	643

Price of rice at relief-works, 9½ to 10 seers per rupee.

Dinajpur.—Average rainfall 0·17. Weather seasonable. Condition of standing crops fair. Lands are being prepared for *bhador*. Condition of cattle good. Fodder and water sufficient. Common rice selling from 9 to 10 seers per rupee.

Jalpaiguri.—No rain. Weather seasonable. Rain badly wanted for *letra* crop. Average outturn of tobacco reported to be 11 annas. Drinking-water drying up in places. Fodder-supply fair. Average price of common rice, 8½ seers per rupee.

Darjeeling.—Rainfall at Sadar ·02. Weather very dry. Hills—Wheat and barley coming to perfection; *bhutta* and potatoes being sown. Terai—Ploughing for *dhan*, jute and sugarcane going on; tobacco being out and mustard being threshed. Price of coarse rice:—

	Srs.	
Hills	8 to 9	} per rupee.
Terai	9 to 11	

Bhutta, 13 to 16 seers per rupee.

Rangpur.—District average rainfall 0·21, Sadar 0·11. Sowing of *aus* going on. Lands mostly prepared for *aus* and jute. More rain wanted. Common rice selling at 9 to 10 seers per rupee. Fodder and water sufficient.

Bogra.—Rainfall ·17. Sowing of jute, *laun* and *aus* rice in progress. Fodder and water sufficient. Price of common rice at head-quarters 10½ seers, and in the interior from 9 to 12 seers per rupee.

Pabna.—Rainfall at Sadar 0·05, Sirajganj nil. Weather cool at night and warm at day. No change in prospects of standing crops. Common rice selling at 8 to 10 seers per rupee. Fodder sufficient. Number on test-workers in Sadar subdivision on Saturday, 13th March—men 158 and children 33.

Dacca.—Rainfall nil. Days hot, nights cool. Prospects of standing crops not very favourable, but the recent rain has done some good to *boro dhan* and other spring crops. Fodder available. No cattle-disease. Want of drinking-water in some parts of Munshiganj subdivision. Common rice sells at 10 to 11 seers per rupee.

Mymensingh.—Rainfall at Sadar 0·24. Weather seasonable. *Aus* sowings are commencing. Cattle-disease reported. Average price of common rice 10 seers per rupee. Some scarcity of water in places.

Faridpur.—Rainfall at Sadar ·02, Goalundo ·80. Weather seasonable. Rain wanted. Price of common rice 9 to 11 seers per rupee. Fodder and water sufficient. No cattle-disease.

Backergunge.—No rain. Days hot, nights cool. Prospects of crops poor. Price of rice stationary.

Tippera.—Rainfall .01 at Sadar and no where else. Weather bright with unseasonably cool nights. Prospects of *rabi* crops fair. Want of drinking-water reported from places in Chandpur subdivision. Rice sells at 10 to 12 seers per rupee.

Noakhali.—Rainfall .02. Prospect of crops not good. No cattle-disease. Fodder and water not sufficient. Price of common rice 8 to 11 seers per rupee.

Chittagong.—No rain. Weather warm and unsettled. Rain urgently wanted. Prospects of standing crops poor. Water and fodder sufficient. Rice selling at 10 seers per rupee. Sporadic cattle-disease still reported.

Patna.—No rain. *Rabi* crops being harvested. Millets and sugarcane plants doing well. Tobacco and *rakar* being gathered. Fodder and water for cattle sufficient. Green fodder scarce in Bihar. Prices rising in Barh and Bihar, and also at Sadar. Price of common rice at Patna 10½ seers per rupee. Numbers on relief on 13th March—

} per rupee.

Balasore.—No rain. Ploughing going on in parts. *Sarad* rice being threshed. *Dalua* crop in ear. Sugarcane being pressed. Price of rice varies from 12 to 16 seers per rupee in the interior. Rice sells at 12 and 14 seers per rupee at Balasore and Bhadrak respectively. Fodder and water sufficient.

Puri.—No rain. State of *rabi* same as before. Ploughing of land for next rice crop going on in places. Fodder and food-supply fair. Price of common rice stationary.

Angul.—No rain. Weather seasonable. Fodder for cattle becoming scarce, and cattle-pox reported from western portion of Angul. Mr. Lloyd reports all well in the Khondmala, where coarse rice sells at 15 seers per rupee. In Angul coarse rice can be obtained at from 13 to 16 seers per rupee.

Hazaribagh.—No rain. Weather seasonable. *Rabi* crops being harvested. *Mahua* promises well. Mango is a complete failure. Rice sells from 8½ to 10½ seers per rupee. 2,400 on test-works, 600 on cotton work.

Lohardaga.—Rainfall 0 24. Ploughing continues. State of *tawa dhan* fair. Prospect of *mahua* continues favourable. Rice sells 8 seers at Ranohi and 8 to 12 seers in the interior. Cattle-disease reported from Bundoo, Boormu, Silli, Lohardaga, and Toto. Fodder and water sufficient. Grain in stock sufficient for the present.

Palamau.—Rainfall 0 37. Weather very abnormal—rain, hail, and storm; unusually cold and cloudy. *Rabi* indifferent. Trust to wheat and barley and worms to gram done much damage; 6 to 8 annas outturn only expected. *Mahua* giving cause for great anxiety—very backward and weather damaging. Prices of common rice much the same as last week. Cattle-disease reported from eastern thanas. 183½ maunds of Rangoon rice imported during the week. Numbers on relief—

	Men.	Women.	Children.	Total.

Total			...	5,617

Decrease in numbers due to ripening of *mahua*.

Singhbhum.—No rain. Rice plentiful. Price of rice 10 to 12 seers per rupee.

General Summary.—There were slight showers of rain in many districts during the week. The rain was accompanied by hail and storm in places in Bhagalpur and Palamau, where some damage to the standing crops is reported. Ploughing is going on, and sowing of early rice and jute has begun in North Bengal. More rain is required generally. Spring rice is doing well. The harvesting of the *rabi* crops and the collection of opium are in progress. The opium has suffered from blight in Chapra and Hajipur. The prospects of the *mahua* crop in Chota Nagpur continue favourable except in Palamau, as previously reported. The pressing of sugarcane continues, and the plantation of cane has begun in some districts. The price of common rice shows slight rises in some districts and slight falls in others. In the distressed districts the prices of the staple grain on which the famine wage is based are—Nadia (common rice) 9 seers, Khulna (common rice) 10 seers, Rajshahi (common rice) 9½ to 10 seers, Patna (common rice) 10½ seers, Shahabad (common rice at Bhabua) 8½ seers, Saran (Indian-corn) 10 seers 6 chitaks, Champaran (Indian-corn) 9½ seers, Muzaffarpur (Indian-corn) 10½ seers, Darbhanga (Indian-corn) 9½ seers, Bhagalpur (common rice) 9½ seers.

The numbers on relief on Saturday, 13th March, were —

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 16th March, 1897.

M. FINUCANE,
Secretary to the Govt. of Bengal.

**SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS
TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS
TAKEN IN ASSAM, FOR THE MONTH OF FEBRUARY 1897.**

THE weather during January was marked by absence of rainfall over almost the whole province, the showers, which were fairly numerous in places, being invariably light.

Conditions were much more unsettled during February up to the end of the third week, and especially about the middle of the month, when moist showery weather continued over the whole province for several days. The rain which fell during those days was not evenly distributed, the heaviest falls being received in Orissa and Chota Nagpur, while in East and North Bengal they were light and scattered.

Throughout the period of disturbed weather temperature remained high, almost without interruption and at times by as much as 10° . In consequence, average maximum and minimum temperatures are above the normal at all stations—the former by amounts varying from 5° in the West of Bihar to 2° in Orissa and the East of North Bengal, and the latter by amounts varying from 6° in Orissa to less than 1° in the extreme north of the province.

At the beginning of the month the pressure distribution was very uniform over the Bay and the south-western districts, but there was a moderate gradient towards the north. This was due to the approach of a shallow depression from the west. At 8 A.M. on the 1st it was over Chota Nagpur, where the fall of pressure was more than $\cdot 05$ inch, and as it passed rapidly across the province, the sudden changes of wind were followed by thunder-storms, the most severe of which occurred in South-West Bengal. Light rain was reported from many Bihar stations on the 1st, and heavier falls occurred in Chota Nagpur, Orissa and South-West Bengal on the 2nd. The tendency shown by almost all of the shallow depressions during the month was to follow a somewhat southerly course, so that, instead of passing straight across the province, they reached the north of the Bay and filled up there; this was generally due to a rise of pressure in Bengal, which displaced the area of lowest pressure southwards. In the case of the depression which caused showery weather on the 1st and 2nd, the area of greatest defect moved from Chota Nagpur and Orissa on the 1st, to Orissa and the north-west of the Bay on the 2nd, and was diffused over the whole Bay area on the 3rd.

Though the changes which gave rise to the displacement noticed above were in almost all cases small, they appear to have had an important influence on the rainfall distribution over the eastern half of the province, the average fall in East and North Bengal being only a third of the normal.

Immediately after the disappearance of the first depression over the Bay, a rapid fall of pressure occurred on the 4th in the north of the province. It gave rise to a shallow depression in North Bengal and southerly winds, but the disturbance was very slight and occasioned a few light showers only, most of them in East Bengal. There was a rapid rise on the 5th, after which the distribution was practically normal over both the province and the Bay.

Settled weather prevailed for three days, that is till the 8th, when pressure again fell in the west of the province. The fall of pressure was very slow, but that it was accompanied by disturbed weather was shown by the rainfall in Chota Nagpur on the 8th and 9th, and the scattered showers in various other districts. As there was no rain anywhere on the 10th, the period of unusually disturbed weather which commenced on the 11th may be assumed to be distinct from the slight disturbance of the 8th and 9th.

The pressure distribution on the 11th was unusual in there being a shallow depression over the south of the Bay, while readings were in excess over the north of the province, and the gradient was steep. An arrangement of this nature should give rise to northerly winds over the whole area, but in the west of Bihar the air movement was from the south-west. This was accounted for by the changes of the following day, when pressure began to fall in the extreme west of Bihar, and a depression of small extent moved across Bihar and North Bengal on that and the subsequent days. General rain fell in Bihar on the 11th and 12th, and numerous showers occurred in North Bengal and Chota Nagpur on these days.

Again the depression moved southwards, and the disturbed weather became fairly general over the whole province; there was dense cloud almost everywhere, and occasional light showers on the 13th and 14th. The effects of this slight disturbance would soon have been over if they had not been maintained by a second depression which began to affect Orissa and Chota Nagpur on the 15th. The cloudy weather continued over almost the whole province, and heavy rain fell in Orissa and Chota Nagpur on the 15th and 16th, False Point, Kendrapara, Puri, Satpara, and Gangpur receiving more than 3 inches. The rainfall was almost general in Lower and Central Bengal, but it was in nearly all cases light.

The pressure changes caused by the second depression were only of moderate amount, the greatest being $\cdot 07$ inch on the 16th, and defect was then everywhere less than $\cdot 1$ inch; the rise began on the 17th and became general on the 18th, the depression having by that time moved eastward across the north of the Bay.

From the 18th till the end of the month settled weather prevailed, no rain occurring anywhere, except a few showers in Orissa on the 20th.

The various depressions which, during the first three weeks of February, affected the weather in rapid succession were, as stated above, always shallow, and the pressure changes were smaller than during the last week, when settled weather prevailed. The reason for this

difference appears to be connected with the wind circulation. The distribution of pressure was generally uniform with light northerly winds, and these winds were easily altered, as to direction, by the shallow depressions. Cloud and rainfall, more or less general, followed the shift of winds. During the last week of the month the hot weather pressure arrangement was beginning to appear; but winds were west or south-west, and the effect of a brisk or rapid fall of pressure in the north of the province was to strengthen the south-westerly winds and not to change their direction. Thus the fall of pressure on the 23rd, amounting to .12 inch in Bihar and North Bengal, gave rise to light cloud, but no rainfall.

Pressure.—Though several depressions crossed the province or the north of the Bay during the first three weeks of the month, changes during that period were seldom more than moderate. They became more rapid towards the end of the month, when pressure was low in the northern districts as compared with the south of the Bay. Average pressure for the month is below the normal at all stations, by about .02 inch in North Bengal and .04 to .05 inch elsewhere.

Temperature has been above the normal with but little interruption, and at times by large amounts, the greatest excess being in the southern districts. The average excess in mean daily values is 4.1° in Orissa, 3.7° in East Bengal, about 3° in Chota Nagpur, South-West Bengal and Bihar, and 2.2° in North Bengal. The highest maximum reading in Orissa was 99.2°, South-West Bengal 98.3°, Chota Nagpur 95.6°, and in the other divisions 92° or 93°.

Rainfall.—Showers were fairly frequent during the first three weeks of the month in Orissa, South-West Bengal and Chota Nagpur. The falls, however, were very light, except about the middle of the month, in Orissa and Chota Nagpur, and on the 2nd in part of South-West Bengal. In Bihar general light rain fell from the 11th to the 13th, and on the same days it was almost general in North Bengal. During the last week there was practically no rain in any part of the province.

The heavy falls in Orissa and Chota Nagpur on the 16th and 17th, in some cases exceeding 4 inches, have led to a much higher average for the month in these Divisions than in the others. In Orissa it is 2.73 inches, more than three times the normal, and in Chota Nagpur 1.55 inches, about twice the normal. In Bihar the fall was practically normal, but in Bengal proper there was comparatively a large defect. The average fall in East Bengal was only one-third of an inch and in North Bengal one-fifth.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the Province for the month of February 1897:—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.							RAINFALL.						
	Highest observed during month.	Lowest observed during month.	Averages for month.			Average mean of month above or below normal mean of month.	Of month.			Rainy days.			Since 16th October 1896.

The average fall of the corresponding period for 24 years, Surveyor-General's Office 0.23

The total fall from 1st January to 13th March 1897 1.63

The average fall of the corresponding period for 24 years, Surveyor-General's Office 2.28

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed, open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; Δ , dew.

OFFICE OF SANITARY COMMISSIONER FOR BENGAL,
The 13th March 1897.

CONSOLIDATED PROVINCIAL STATEMENTS OF FOOD-GRAIN TRAFFIC
OF THE LOWER PROVINCES.

No. 364 Statistics.—The following memorandum and statements are published for general information.

STATISTICAL DEPARTMENT;
The 16th March 1897.

M. FINUCANE,
Secy. to the Govt. of Bengal.

MEMORANDUM.

In the *Calcutta Gazette* of the 14th February 1897, consolidated provincial statements were published in respect of the food-grain traffic of the Lower Provinces for the months of November 1895 and 1896, but they related only to the rail-borne trade. The statements now published, however, furnish complete statistics for the month of December 1896, in comparison with the figures for the corresponding month of 1895, showing the traffic in food-grains in all the routes by which this trade is registered in Bengal. The following divisions of the trade are registered on the routes shown against each :—

- (1) Trade of Calcutta and Howrah—
With all districts and provinces in India ... By inland routes, i.e., by rail, country boats, inland steamers and road, and by sea-going vessels, both foreign and coasting.
- (2) Trade of the Dacca, Chittagong, and Orissa Divisions—
With Calcutta ... By all inland routes and coasting vessels.
With foreign ports ... By sea.
And with other districts and provinces in India ... By rail only.
- (3) Trade of the Burdwan, Presidency, Rajshahi, Patna, Bhagalpur, and Chota Nagpur Divisions—
With Calcutta ... By all inland routes.
And with other districts and provinces in India ... By rail only.

The table below shows the total quantity of food-grains carried to and from these provinces during the months of December 1895 and 1896 :—

		Imports.		Exports.	
		1895. Mds.	1896. Mds.	1895. Mds.	1896. Mds.
Rice	...	14,53,329	17,44,486	28,26,983	25,62,473
Paddy	...	2,19,531	4,33,155	2,70,917	4,60,408
Wheat	...	2,05,135	5,10,381	87,031	62,858
Gram and pulses	...	4,70,000	2,99,743	6,91,652	8,12,010
Other food-grains	...	2,12,859	2,29,211	3,84,761	6,15,762
Total	...	25,60,854	32,16,976	42,61,544	45,13,511

The aggregate quantity imported during the month was 6,56,122 maunds, or 25·62 per cent. in excess of the figures for the corresponding month of 1895, and the exports increased by 2,52,167 maunds, or 5·91 per cent. The staple of which the largest quantity was registered was coarse rice; of this nearly 17½ lakhs of maunds were imported against 14½ lakhs in 1895, and a little above 25½ lakhs against 28½ lakhs were exported from the Lower Provinces. The trade in paddy was very brisk, the increase being roughly 2 lakhs of maunds both in imports and exports as compared with 1895. The importation of wheat was two and-a-half times greater than in 1895; but in the export trade, which was small, there was a slight decline. In the case of gram and pulses, while the imports fell off by 1½ lakhs of maunds, the exports rose by 1½ lakhs. Under miscellaneous food-grains, the quantity imported was practically unchanged, but that exported showed an increase of 2½ lakhs of maunds.

The total trade of Calcutta and Howrah taken together, and of the districts in each division during the month of December 1896, is compared below with the totals of the corresponding month of the preceding year:—

Name of Division.	Rice.		Paddy.		Wheat.		Gram and pulses.		Other food-grains.		Total.	
	Import.	Export.	Import.	Export.	Import.	Export.	Import.	Export.	Import.	Export.	Import.	Export.

The very large importation of wheat from the United States and of miscellaneous food-grains from the United Kingdom is worthy of notice; on the other hand, as was to be expected, a great falling off took place in the exports of rice and gram and pulses.

As regards the trade between Bengal and other Provinces in India, the following statement furnishes the necessary details :—

	IMPORTS INTO THE LOWER PROVINCES FROM OTHER PORTS OF INDIA.				EXPORTS FROM THE LOWER PROVINCES TO OTHER PORTS OF INDIA.

Total { 1895 { 1896	2,24,000 1,51,964	13,181 11,019	6,813 7,281	2,44,894 1,83,195	3,74,821 4,02,204	2,07,953 3,02,440	3,77,943 8,22,537	8,80,137 15,57,181

The foregoing figures show that, while the imports fell off by 25·19 per cent., the exports rose considerably, that is, by 72·68 per cent. In the import trade, the chief point of interest is the large influx of Burma rice and the considerable decrease under wheat and gram and pulses, attributable mainly to shorter despatches from the North-Western Provinces and Oudh. Out of the total exports shown above, the quantity despatched to the United Provinces alone amounted to 12,82,332 maunds, as against 3,53,821 maunds in the corresponding month of the previous year, as will be seen from the figures given below :—

	{ 1896 ...	1,84,640	2,93,269	3,26,762	4,77,661	12,82,332

The quantity of rice shipped for Assam from Calcutta was 63,251 maunds against 13,832 maunds in 1895, and the consignments of gram and pulses and miscellaneous food-grains sent to the Punjab aggregated 7,288 maunds against nil and 5,681 maunds against nil respectively.

Following the arrangement adopted in the preceding month, the internal traffic of these Provinces will be dealt with separately under the several heads noted below :—

- (1) Inter-district trade of Bengal Proper.
- (2) Trade between Bengal Proper and Bihar.
- (3) Inter-district trade of Bihar.

The following statement shows the total food-grain traffic under head (1)—

		1895.	1896.
		Mds.	Mds.

{ 1896	29,523	82,717	1,11,240	1,90,155	23,419	2,13,574	3,24,813

The quantity imported into Bengal was about half that registered in 1895. By far the largest falling off occurred in the despatches of gram and pulses and miscellaneous edible grains into Calcutta from the Bhagalpur Division; the supply from the Patna Division also was reduced by more than half that of the preceding year. The largest item in the export trade is rice, of which almost the entire supply was carried to the Patna Division. The Bhagalpur Division drew a very large supply of gram and pulses from Calcutta.

The inter-district trade, division by division, of the Bihar Province is illustrated in the following abstract :—

ARTICLES.			LOCAL TRADE OF THE BIHAR PROVINCE.				TOTAL
			Exports from the Patna Division.		Exports from the Bhagalpur Division.		
			Inter-district or local trade of the Division.	To Bhagalpur Division.	Inter-district or local trade of the Division.	To Patna Division.

		{ 1896 ..	1,51,925	2,800	9,429	2,01,896	3,70,050

The local trade of the Patna Division diminished by 30,000 maunds, while its exports to the districts in the Bhagalpur Division were only half those of 1895. The Bhagalpur Division supplied the Patna Division very largely with paddy and miscellaneous food-grains. The trade within that Division was very slack.

Statement showing the quantities of food-grains imported into and exported from each district in the Lower Provinces carried by rail, inland steamer, country boat, road and sea, during the month of December 1896, as compared with the figures for the corresponding period of 1895.

DISTRESS IN THE PATNA AND OTHER DIVISIONS.

No. 796(Fam.).—The 19th March 1897.—The following papers are published for general information.

M. FINUCANE,

Secretary to the Govt. of Bengal.

No. 778Agri. (Fam.), dated Calcutta, the 18th March 1897.

From—M. FINUCANE, Esq., Secretary to the Government of Bengal, Revenue Department.

To—The Secretary to the Govt. of India, Revenue and Agricultural Dept.

IN continuation of this Government's letters noted on the margin, I am directed to submit the monthly report, required by section 29 of the Bengal Famine Code, for the period ending the 27th February 1897. Copies of the half-monthly reports of the Commissioner of the Patna Division, No. 491F.G., dated the 21st February, and No. 687F.G., dated the 8th March, 1897, and their enclosures, together with maps of the Patna Division and of the districts of Khulna, Nadia, Palaman and Manbhum, showing the affected tracts, are herewith enclosed.

2. The affected districts in the Patna Division continue to be Shahabad in South Bihar and the four districts of North Bihar. The Lieutenant-Governor, accompanied by the Revenue Secretary to this Government and the Commissioner of the Patna Division, Mr. J. A. Bourdillon, recently paid a visit to the districts of North Bihar, which are now the most severely affected districts in this Province. Leaving Calcutta on the 28th February, His Honour reached Bettiah on the evening of the 1st March, and thence drove, on the following morning, to Ramnagar (28 miles). After inspecting certain relief works there and on the way back to Bettiah, Sir Alexander Mackenzie left for Darbhanga, *via* Muzaffarpur, where he arrived on the morning of the 4th March. Two tanks, undertaken as relief works, one under the immediate supervision of the Collector and the other under the Public Works Department, were inspected, and in the afternoon of the same day a Conference was held with the local officers of North Bihar to discuss certain questions connected with the operations in progress. The party left Darbhanga on the 5th after paying a visit to the relief works carried on by the Darbhanga Raj at Kantaul, 14½ miles from Darbhanga, and reached Calcutta on the following morning.

The general result of the inspections held at Ramnagar and Darbhanga was satisfactory, except in the case of a tank near Ramnagar, the site of which had been badly chosen. About 4,000 people were employed on this tank, but practically no task was being exacted, pits were not defined owing to the sandy nature of the soil, and every one was placed on the penal wage. In the other works inspected by the Lieutenant-Governor, His Honour found that the tasks prescribed in Mr. Glass's tables were being enforced, that these tasks can be performed without undue hardship, and that labourers who, were unable or, being able, were unwilling to do the full tasks assigned to them were put either on the minimum or penal wage. Some difficulty was, however, felt by the workers in understanding what the exact task expected from them was, owing to the fact that the tasks of diggers and carriers had not been set out separately in the tables. Further, it was found that the people did not readily

form themselves into gangs of 60 persons willing to work together, and that as the whole gang was being fined for the short work of portions of it, discontent arose among individual members of the gangs who, having done a full task, failed to receive a full wage, because of the shortcomings of others. These defects in the matter of exacting tasks and organising gangs necessitated a reconsideration of the details of the system in force, and the following extract from the proceedings of the Conference held at Darbhanga shows the steps that have been taken:—

“His Honour explained that the complications arising from setting out the gang tasks took up much of the time of the supervising officers, and expressed the opinion that the gang system did not permit of payments being made to, and fines for short work being imposed on, individuals or a sufficiently small squad of individuals. When the gang consists of 60 persons and a certain number of them do the full task, but others fail to do it, all alike are put on the penal wage. The system thus holds out a premium to idlers, for when all are punished alike for the short work of a portion of their number, it is obviously the interest of all to do as little as they can so long as they get the penal wage. It was arranged that—

“(1) The tasks of diggers and the tasks and numbers of carriers should be set out separately in Mr Glass’s tables, the full task prescribed for diggers being exacted from diggers, and the number of carriers required as their task to carry the earth excavated by the diggers, and their number regulated according to length of lift and load. This merely involves a statement of the tasks set out in Mr. Glass’s tables in a way that may be readily understood by the workers.

“(2) It was also agreed that the gangs need not consist of any particular number. The people may arrange themselves into squads of 12 to 16 each. A mate may be appointed over a number of squads aggregating about 60 persons, but for the purposes of payment of wages and assessment of fines, each squad or pit-gang, consisting of about 12 to 16 persons, who are willing to work together, should be a separate unit. Joint responsibility will thus be reduced to a moderate number of labourers who voluntarily combine to work together.

“(3) It was agreed that the carriers who perform their full task, that is to say, carry the amount of earth excavated by the diggers to whom they have been allotted with due regard to length of lift and lead, should receive the full wage laid down for persons of the class to which they belong (i.e., the wage of A, B, C, D classes of section 62 of the Code, according as they fall under each of these classes). Women of the D class may be treated as dependents. Effect will be given to these conclusions by the issue from the Public Works Department of explanatory orders. A muster-roll should be kept on every work showing the names of all persons on the work; abstracts of the roll to be made weekly.

“(4) It was also agreed that it is to be clearly understood that Collectors and Subdivisional Officers should visit all relief works in their jurisdiction, and whenever they find anything that requires correction or alteration that they should there and then record in an order book to be kept on the works any instructions they think fit. Such orders should be promptly obeyed by the officer in charge of the work.

“If the Executive Engineer or other superior officer of the Public Works Department differs from the Collector, he should refer any matter in which he so differs to the Commissioner through the Superintending Engineer; but, pending receipt of the Commissioner’s orders, the Collector’s orders should be obeyed.

“(5) It was agreed that Charge Superintendents of Relief should also visit all relief works in their jurisdictions, and record such remarks in the order books as they may find necessary. Their remarks will be forwarded to the Assistant or Executive Engineer in charge of the work, who, in case he differs from the Superintendent of Relief, should take the orders of the Collector, and where he differs from the Collector, the orders of the Commissioner. Charge Superintendents of Relief are to be regarded as Subdivisional Officers within their jurisdictions under section 22 of the Code, save that they will not give orders direct to the “officers in charge.”

Another question considered at the Conference was the introduction of the modified system of piece work suggested in the Government of India’s Circular No. $\frac{16}{103-1}$ F., dated the 13th February 1897. It was pointed out that the system is practically one of petty contract, pure and simple. It was thought that this system could not be worked side by side with the task work system, and it was generally agreed that it is not advisable to introduce it in Bihar on ordinary relief works so long as the establishment available is strong enough to cope with the numbers of relief-workers and to insist on tasks being enforced. The question is under consideration whether the proposed system can be tried with advantage on the railway lines about to be started as relief works in the Patna Division, and on relief works generally in other Divisions of Bengal.

3. The following paragraphs deal with the important features of the relief operations in the Patna Division.

Rainfall and prospects of the crops.—Light showers of rain fell in all the districts of the Patna Division between the 10th and 12th February, and the

figures recorded, including the rainfall in the first week of February, are shown below in comparison with the corresponding figures of 1874 :—

				February 1874. Inches.	February 1897. Inches.
Patna	...	Bankipore58	.46
		Barh 1.05	.66
		Bihar 1.93	.98
		Dinapore32	.54
Gaya	...	Average for the district		... 1.04	1.13
Shahabad	...	Sadar 1.00	.71
		Buxar 1.00	.86
		Sasaram 1.04	1.33
		Bhabhua57	1.17
Saran	...	Sadar87	.39
		Siwan77	.38
		Gopalganj 1.75	.35
Champaran	...	Motihari 1.10	.15
		Bettiah 1.00	.08
		Barharwa21
Muzaffarpur	...	Muzaffarpur80	.50
		Hajipur63	.32
		Sitamarhi70	.28
		Shiuhar	1.42
Darbhanga	...	Darbhanga89	.31
		Samastipur56	.33
		Madhubani76	.22

During the second half of February there was no rain anywhere except in Bihar in the district of Patna .05 inch, and in Aurangabad in Gaya .49 inch. As the rainfall in February was gentle and steady, and was not accompanied by wind or hail and was rapidly followed by sunshine and a west wind, the effect was most beneficial and improved the prospects of the *rabi* crops, which at the end of the month continued to be good everywhere. Reports of insect pests have been received from a few places, but the damage done is not reported to be great. The reports of the poppy crop are satisfactory on the whole, and a full average crop is expected all round.

Estimates of area and population affected—In Muzaffarpur and Darbhanga there was no change in the area or the population affected.

Shahabad.—In Shahabad a narrow strip of land between the Sone and the Rhotas Plateau, about 30 miles in length and 5 miles at its greatest width, is under observation. In this area the winter rice was a general failure in all villages, and the *rabi* varies, promising a good crop in some and very little in other places. A test work has been opened, and steps to distribute gratuitous relief have been taken, but the tract has not yet been added to the affected area in the district.

Saran.—An area of 16 square miles, with an approximate population of 10,000 persons in thana Parsa, has been added to the affected tracts in the Sadar Subdivision of Saran, so that the total area affected in this district has been raised to 1,442 square miles with a total population of 1,352,598 persons. In the tract newly affected the *bhadai* crop was better than in the other tracts previously declared to be affected and enabled the people to hold out longer. It is reported that they might have continued to do without Government relief had not their *rabi* crop been seriously injured by frost.

Champaran.—The Collector of Champaran reports that certain small tracts in thanas Hardih, Bagaha, and Dhaka, aggregating 83 square miles, should be added to the area at present in need of relief, and he has also revised his previous figures of areas and population. The total area now reported to be affected in Champaran is 1,865 square miles with an estimated population of 1,110,000 persons, against 1,620 square miles with a population of 9,72,000 persons previously reported.

4. *Relief works*.—The transfer of large works to the management of the Public Works Department, which commenced towards the latter end of January,

was in progress during the month under report, the number of works open at the end of February in each district being—

			Under the Public Works Department.	Under Civil Officers.	Total.
Saran	2	34	36
Champanan	12	54	66
Muzaffarpur	3	45	48
Darbhanga	13	91	104
Total	30	224	254

To these must be added four works under the Civil Officers in the district of Shahabad. The total number of works open at the end of January was 191. In consequence of the want of a sufficient number of officers to take charge of relief works and other causes, the progress made in taking over large works by the Public Works Department was slow, and arrangements to supply the District Officers regularly with information as to the numbers employed, and other particulars relating to the works transferred were not complete. The Government of India has, therefore, been separately solicited to help this Government in recruiting a further staff of "officers in charge." The figures reported to Government as to the average daily numbers on relief works in the last week of February, which are shown below in comparison with the figures at the end of January, are not, therefore, quite accurate:—

DAILY AVERAGE NUMBER OF MALE UNITS.			
		January.	February.
Saran	...	10,132	10,572
Champanan	...	76,010	74,166
Muzaffarpur	...	8,198	19,733
Darbhanga	...	92,220*	91,000*
Total	...	1,86,560	1,95,471

The average daily number of male units employed on the four relief works in the Bhabhua Subdivision of Shahabad in the last week of February was 845. The fall in the numbers in Champanan and Darbhanga is reported to be due to task-workers having been drawn off to the harvesting of the *rabi* crops, and to the temporary closing of works required for their transfer to the Public Works Department. The latest weekly returns again show a large increase in the number of relief workers in this district. The number in Muzaffarpur commenced increasing from the beginning of February, and is now more than double the number at the end of January, and a very much larger increase is expected in April.

The following table shows the average wages paid, tasks exacted and cost rate per 1,000 cubic feet of earthwork in the several districts during the second half of February, in comparison with the corresponding figures for January:—

DISTRICT.	AVERAGE DAILY WAGE.				WORK DONE PER DIEM ON TASK WORK.		COST, RATE PER 1000 C. FT.	
	Second half of January.		Second half of February.		Second half of January.	Second half of February.	Second half of January.	Second half of February.
	Task work.	Irrespec- tive of task.	Task work.	Irrespec- tive of task.				
1	2	3	4	5	6	7	8	9
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	c. ft.	c. ft.	Rs. A. P.	Rs. A. P.
Saran	0 1 2	0 1 2	0 1 5	0 1 6	27½	50½	2 13 4	3 4 0
Champanan	0 1 3	0 1 8	0 1 5½	0 1 9½	13½	23½	5 11 0½	5 15 5½
Muzaffarpur	0 1 4	0 1 0	0 1 4½	0 1 9½	74	66½	1 1 11	1 4 8
Darbhanga	0 1 5	0 1 4	0 1 5	0 1 7	31	32½	2 13 0	2 11 5
Shahabad	0 1 7	0 1 7	0 1 10	0 2 1	34	49	2 15 4	2 6 5

* Includes numbers on the relief works of the Darbhanga Raj.

These figures show satisfactory improvement in all the districts. It is to be remembered that the number of cubic feet per day shown in column 7 does not represent the quantity excavated by diggers, which would be very much larger, but the average number of cubic feet per unit *dug and carried*. Where, as in Champaran, the lead and lift in large and deep tanks are long, the average quantity of earth dug and carried per unit is necessarily smaller and the cost rate per 1,000 cubic feet greater than where, as in Muzaffarpur, the work consists chiefly in repairs and construction of roads. The rates of wage at the end of February were nearly the same everywhere, though rather high in Shahabad, and there was an increase in the average outturn of work, and a consequent decrease in the cost rate per thousand cubic feet, except in the case of Muzaffarpur. In this district the tasks previously demanded were in excess of those laid down in the tables of tasks drawn up by the Hon'ble Mr. Glass, Secretary to this Government in the Public Works Department, which has been circulated with that Department's Resolution No. 520 M.P.—I., dated the 25th

* Public Works Department letter to the Commissioner of the Patna Division, No. 1661 M.P.—I., dated the 16th March 1897, with enclosures.

January 1897, and a copy of which is hereto annexed for ready reference, with copies of the supplementary instructions* since issued by the Public Works Department. The reduction in the outturn of work per male unit with the consequent increase in the cost rate per 1,000 cubic feet in Muzaffarpur is the result of the introduction of Mr. Glass's tables in this district as elsewhere. As explained in the note prefixed to the table, Mr. Glass's method of calculation is that he has taken the amount of work done by labourers under contractors on ordinary works, and has deducted from it an allowance of two-fifths on account of the special conditions governing the work of famine labourers, leaving three-fifths or 60 per cent. of the amount of work ordinarily done by professional coolies as the task laid down for relief-workers. Sir Alexander Mackenzie considers this to be a reasonable if not a severe test of distress. He found in one of the tanks inspected in Bihar that the full tasks were being done by no less than 95 per cent. of the pit-gangs, and this was in work supervised by Mr. Blackwood, a junior Civilian. It is, in His Honour's opinion, incredible that cultivators or others not ordinarily accustomed to work as professional labourers would come to and stay on relief works, and perform the task assigned in Mr. Glass's tables for the miserable pittance of $1\frac{1}{3}$ annas a day, which is little more than half the ordinary wage in ordinary times, when prices of food-grains are half what they now are, unless they were driven to do so by acute distress, and it is also incredible that professional labourers would remain on these works at these rates if they could obtain employment on more remunerative terms elsewhere.

His Honour thinks the performance of these tasks (which are heavier than those prescribed in the Famine Code) is conclusive evidence of widespread and severe distress in Bihar; but Sir Alexander Mackenzie has no means of judging whether the tasks thus laid down are adequate or excessive, in comparison with the tasks which are being exacted elsewhere, and it would be helpful to this Government if the Government of India could furnish it with information regarding the tasks demanded, and actually found capable of being enforced as tests of distress in other provinces.

5. *Private relief works*.—In Shahabad three tanks have been undertaken, one by the Courts of Wards and two by private individuals, but no figures for them have been supplied. In Saran, besides works under private individuals in the Siwan and Sadar subdivisions, the Hatwa Raj has ten works open in the Gopalganj subdivision, which employed during the week ending 25th February a daily average number of 2,938 male units on task work, and of 1,240 units on work irrespective of task. In Champaran there were two works undertaken by the Bettiah Raj and two by the Tettaria and Bala indigo factories, the average daily number employed on the four works being 11,801. The Darbhanga Raj is carrying on relief operations in the districts of Muzaffarpur and Darbhanga. In the former district the total number employed on the Raj works on the 27th February was 3,041, and in Darbhanga the total number on seven works was 21,900. The Collector of Darbhanga reports that besides

the Raj works a very large number of tanks, employing about 30,000 labourers, are being excavated by private individuals in the north-east of the district.

6. *Poor-houses and village relief.*—Including the district of Patna, in which the only kind of relief which was being given was that distributed at a poor-house and to a small extent by gratuitous relief, the total number of Government poor-houses open in February was 16 and in Motihari one has been opened since the close of the month, while kitchen relief was given at four places in Saran and at several places in Champaran. Four private poor-houses are conducted by the Hatwa Raj and another by the zamindars of Manjha in the district of Saran. The Darbhanga Raj has a poor-house in the district of Muzaffarpur and some kitchens in the district of Darbhanga. It is reported from Champaran that no arrangements for giving special employment to weavers, artisans, &c, have been found necessary. Cotton was given out to

"A considerable number of wanderers have found their way into this district (Champaran) across the Gandak from the North-Western Provinces, and on the 3rd March, when the Lieutenant-Governor visited the Bettiah poor-house, out of 760 inmates 304 were from those provinces. Considering that these invaders also supply the bulk of the vagrants picked up by the police, both here and along the Grand Trunk Road in the Shahabad district, it might be as well to enquire what arrangements are being made in the border districts of those provinces for the relief of their poor. The Collector will be asked to ascertain, if possible, what number of immigrants from the North-Western Provinces are to be found in the Traus-Gandak thana of Madhubani. He was at one time afraid that relief works would have to be opened in that area solely for the benefit of these people."

pardanashin women to be spun into thread in return for gratuitous relief, but no information as to the results has been furnished, except that one Charge Superintendent has found that, including the cleaning of cotton, a woman takes about 10 days to spin a seer of cotton into thread. In Darbhanga cotton was distributed in most circles, and in one of the charges it was being made into cloth. Another form of employment given in this district was basket-making. No detailed information has yet been furnished.

His Honour found, on inspecting the Bettiah poor-house during his recent tour, that of 760 inmates 304, or 40 per cent. of the total number, consisted of waifs and strays from the neighbouring district of Gorakhpur, who had been picked up by the police or the relief officers aimlessly wandering in a more or less emaciated condition. I am to invite the attention of the Government of India to the remarks made in paragraph 40 of the Commissioner's report dated the 8th March, quoted in the margin.

7. *Gratuitous relief.*—The following table shows the average daily doles of gratuitous relief for the second half of February in comparison with the corresponding figures for January :—

District.	SECOND-HALF OF—			
	January.		February.	
	As.	P.	As.	P.
Saran	0	9
Champaran	1	0½
Muzaffarpur	2	0
Darbhangā	2	8
Shahabad	1	5

The dole in Muzaffarpur and in Darbhanga has been reduced in accordance with the orders of Government, the doles at first reported having been excessive.

The numbers in receipt of gratuitous relief have increased considerably, the increase being most marked in Muzaffarpur and Champaran. In the former district the total number at the end of January was 818, while the corresponding figure for February is 11,219. This advance is attributed by the Collector to an increase of distress, and the Commissioner thinks that it is also due to the better development of circle organisation and a more careful inspection of the villages. In Champaran the number on

gratuitous relief rose from 6,019 at the end of January to 37,333 at the end of February. This is due to the completion of the circle organisation, to the relief works having been cleared of a large number of D class labourers who have been placed on gratuitous relief, and to the development of distress which, as already reported, must continue to increase in Bihar till the latter end of June. The percentages of the numbers relieved gratuitously in the most distressed districts of North Bihar to the total numbers relieved, as given in paragraph 72 of Mr. Boudillon's letter of 8th March 1897, are as follows, the corresponding percentage for the whole division being 41·91:—

Saran	56·83
Champanan	27·19
Muzaffarpur	64·49
Darbhangha	37·81

The numbers shown in the present report as gratuitously relieved should, following the classification adopted in the North-Western Provinces and recently proscribed by the Government of India for Bengal, be taken to include all the

three heads noted on the margin. The numbers in receipt of gratuitous relief were apparently high, but not higher than in the neighbouring provinces of the North-West and Oudh. The total number on

gratuitous relief in the 19 distressed districts of the North-Western Provinces on the 27th February, as shown at page 272, Part 1 of the *North-Western Provinces Gazette* of March 6th, was 518,188; the total number relieved being 1,515,124, the percentage of the number on gratuitous relief is 34·2. The corresponding figures for the Patna Division (excluding the district of Gaya), as given in the weekly telegraphic reports for the 27th February, are—

Relief works	243,492
Gratuitous relief	136,788
Total					380,280

The percentage of the number on gratuitous relief to the total number relieved is therefore 35·9. But this percentage is not quite correct, for the figures of relief-workers in the district of Darbhanga do not include figures for certain works under the Public Works Department in the Madhubani subdivision. Were these figures complete, the percentage would probably be about the same as that in the North-Western Provinces and Oudh.

In Saran and Shahabad the numbers gratuitously relieved are large compared with the numbers on relief works, because the male working members of families in these districts have gone to seek employment in Eastern Bengal and elsewhere. In Saran, the Collector reports that several cases have been brought to light of people becoming emaciated almost to the point of starvation without applying for gratuitous relief or having recourse to relief works. "The disinclination," he adds, "to apply for gratuitous relief can be understood, and this is the chief difficulty which circle officers have to combat." Cases of this sort, in which laudable self-respect deters respectable people from voluntarily becoming State paupers, are precisely the cases which deserve the greatest sympathy, and which it is necessary for the circle officers and relief committees to search out in the villages.

The Darbhanga Raj was distributing gratuitous relief to 10,518 persons during the week ending 27th February.

8. *Physical condition of the people, &c.*—The public health continues to be exceptionally good, and no authenticated cases of starvation have come to notice.

The following table shows the death-rates for the months of November, December, January and February of the present and three preceding years:—

DISTRICT.	Years.	DEATH-RATE PER THOUSAND OF POPULATION.			
		November.	December.	January.	February.
1	2	3	4	5	6
Patna	1894 ...	4.37	3.67	2.22	1.53
	1895 ...	2.82	2.93	2.24	1.44
	1896 ...	2.11	1.93	2.19	3.13
	1897	1.50	(not yet reported.)
Shahabad	1894 ...	5.79	4.05	2.92	2.18
	1895 ...	2.24	2.42	2.54	1.51
	1896 ...	1.89	1.97	1.83	2.46
	1897	1.96	1.88
Saran	1894 ...	4.62	4.45	2.38	1.68
	1895 ...	2.33	2.94	2.93	1.96
	1896 ...	2.65	2.41	2.29	2.98
	1897	1.92	(Not yet reported.)
Champaran	1894 ...	3.66	3.67	2.78	1.77
	1895 ...	2.85	3.78	2.69	1.96
	1896 ...	3.22	2.84	2.55	2.90
	1897	2.20	2.86
Muzaffarpur	1894 ...	4.28	4.06	3.15	2.16
	1895 ...	2.67	3.25	3.00	2.15
	1896 ...	2.59	2.37	2.43	3.25
	1897	1.83	1.90
Darbhanga	1894 ...	3.49	3.60	3.28	2.28
	1895 ...	2.31	3.08	2.77	1.99
	1896 ...	2.22	2.11	2.25	2.74
	1897	1.64	1.4

It will thus be seen that the year is a particularly healthy one in Bihar, and that the reported percentage of deaths is below rather than above the normal, and markedly below that of the preceding year.

The facts mentioned in paragraph 4 above show, in His Honour's opinion, that there can be no question that distress is acute and widespread in North Bihar. The table of mortuary statistics given above in this paragraph shows that the distress has been so far adequately met, and that the local officers have discharged fully and efficiently the duty imposed upon them of preventing increase of mortality from starvation. Hence it is that Sir Alexander Mackenzie recently expressed to the local officers his entire satisfaction with the results so far attained.

The condition of the cattle is reported to be good everywhere.*

9. *Loans.*—Loans for village works, amounting to Rs. 3,500, were granted in the district of Saran during the period under report. Applications for advances were received in certain other districts, but the offer made by Government to give loans on advantageous terms does not appear to have so far proved attractive.

10. *Food-stocks, Importation of grain, and Prices.*—During the four weeks now under report, the total imports of food-grains are reported to have been 5,51,769 and the exports 1,84,456 maunds, against 7,71,186 and 3,75,650 maunds, respectively, in January. The imports exceeded the exports by 3,67,313 maunds, and no scarcity of grain has been reported from any

of the affected districts. Burma rice is stated by the Collector of Saran to be obtainable in all the large marts in the district, and the Collector of Champaran writes that it is now penetrating right into the interior. In the latter district the local grain-dealers are moving in the matter of importation, and have expressed their readiness to go on importing so long as they can do so at a profit. The Collector of Champaran writes that all officers report that there is no present apprehension of stocks getting depleted. The Secretary of the Bihar Indigo Planters' Association, on the other hand, has quite recently reported that coolies are coming to him with complaints that though they have money to purchase grain they are unable to obtain it. The price of rice is reported to have been steady during the month under report; that of Indian-corn, however, rose a little, as the stock of this grain was being exhausted. Though the *rabi* crop has been, and is being harvested, the tendency of prices at the present time generally in Bihar is still upwards. His Honour the Lieutenant-Governor, however, thinks that so long as the supply of rice from Burmah lasts, no fear need be entertained of its not finding its way to North Bihar.

The following paragraphs deal with the other Divisions in Bengal, which were last reported on in my letter No. 609Fam., dated the 1st March 1897:—

11. *Presidency Division*.—The most severely affected districts in the Presidency Division are at present Nadia and Khulna.

There was a small increase in the affected tracts, the condition of which has undergone a slight temporary improvement in consequence of the harvesting of the *rabi* crops.

Nadia.

There was rain on the 16th, 17th and 18th February, which will enable the people to prepare lands for the next *aus* or autumn crop. There were 14 relief works open, 8 under the Public Works Department, and 6 under the Civil officers; of the latter 4 were tanks, and the rest roads. The total number of persons employed at the end of February was 6,873, while the corresponding figure for January was 8,229, employed on five works. This falling off is probably due to the temporary improvement already noticed. The cost per 1,000 cubic feet and the daily wage in this district were high, being for the second half of the month Rs. 3-3-3 and 2 annas 5 pies, respectively.

The total number on gratuitous relief is reported to be 703. In return for this form of relief women are required to twist jute into string. Thread has been distributed to a few families of weavers. Rice was being imported in considerable quantities into the affected tracts. Public health and condition of cattle continued good. During February the total amount of loans sanctioned under the Land Improvement Loans Act was over Rs. 45,000, but the amount actually paid was Rs. 3,650.

The area affected in the district of Khulna was 442 square miles as before. It is reported that the general condition of the affected area has deteriorated. Four relief works were open against three in January, and the number employed had risen from 147 in January to 583 at the end of February. The numbers on gratuitous relief also rose to 1,949 from 142 at the end of January. Widows and orphans, it is stated, show signs of emaciation, and two deaths, alleged to be due to starvation, have been reported. The correctness of these reports is, however, still under enquiry. Public health is fair, as also the condition of cattle. The total amount advanced under the Land Improvement Loans Act is reported to be Rs. 19,890.

Of the two tracts in Jessore, mentioned in my previous letter, there has been no improvement in thana Muhammadpur, but the condition of the tract in thana Bangaon has materially improved owing to recent rainfall. The prices of common rice showed a tendency to fall, and food-stocks were being supplemented by importation. A test work was opened but did not attract labourers. Some gratuitous relief was given, the total number in receipt of such relief at the end of the month being 712.

In Murshidabad distress is reported to have made its appearance in a tract covering about 80 square miles, with a population of 42,000, lying partly in the Sadar and partly in the Kandi subdivision. The total area likely to be affected in this district is reported to be 280 square miles, with a population of 160,000, including the 80 square miles above mentioned. Winter rice is the principal crop grown. There was a partial failure in 1895-96, the outturn of the *aman* and *aus* crops being eight and nine annas respectively. During the last season, the estimated outturn of the *aman* for the whole district was nine annas and that of *aus* eight annas. The *rabi* crop in the area above mentioned has been very poor, and in places a complete failure. The export of grain from this to other districts and the North-Western Provinces has been unprecedented, and it is feared by the Collector that the stocks in hand will not be sufficient for the requirements of the district up to September. Test works have been opened, and the numbers employed on them are reported to be rising. As far as the information now before this Government goes, no gratuitous relief was being given.

24 Parganas.

The position in the 24 Parganas remained unchanged.

12. *Chota Nagpur Division*.—Of the districts in the Chota Nagpur Division there seems, so far, to be no need for any apprehension with regard to Lohardaga, while in Singhbhum the prospects continue to be altogether reassuring. With regard to the Division as a whole, the Commissioner writes that the rain which fell in February was fairly general, and has been of decided benefit to the *rabi* crops without at the same time doing any material harm to the *mahua*. Mr. Forbes writes that the latter now gives promise everywhere of at least a full average outturn, provided the weather continues favourable. At the date of the report the *mahua* trees were beginning to blossom, and rain would be injurious to the crop. There appears to be some increase in emigration. Public health is good. Cattle-disease is reported from Manbhum and Palamau, but not to any unusual extent.

Distress in Palamau is turning out to be less acute than was at first anticipated by the Commissioner. The worst portion of the district comprises the jurisdiction of Garhwa, Daltonganj, Balumath, Latehar and Patan thanas, with the outposts of Untari, Lesliganj, Panki, Chandwa, Ker and Manatu, the area being 2,563 square miles. The total population of this tract is 383,440 persons, of whom the Deputy Commissioner thinks that 10,000 may be set down as the number affected. Relief is being given by employment on relief works and by the distribution of gratuitous relief. In the beginning of February there were five works open, employing in all 745 persons. At the end of the month there were nine Government relief works, and the total number shown as employed on them on the 26th February is 4,287. All are paid for task work, the rate per 1,000 cubic feet being Rs. 2-3, and the average wage earned per male unit is about 2 annas. The Commissioner reports that, so far, there are no signs of any rush on the relief works. It is also reported that several well-to-do zamindars of the district have opened relief works, some of which appear to have been undertaken with advances granted under the modified rules under the Land Improvement Loans Act, the total amount thus advanced in Palamau as first instalments being Rs. 3,333. Exact figures are not known, but the Deputy Commissioner thinks the numbers employed on these works cannot fall far short of 2,000.

The number on gratuitous relief in the beginning of February was 333; by the end of the month it had risen to a daily average of 514. The average daily dole per male unit amounted to 1 anna 1 pie. Up to the end of the period under report only one trader had taken advantage of the bounty of 8 annas a maund offered by Government in aid of the importation of grain, and had imported 658 maunds of rice, and been paid Rs. 329. There was a slight revival of exports from Lohardaga, the returns showing that 1,648

bullocks came away with rice from Lohardaga and Chainpur marts during February. Prices, however, continued very high.

The areas now affected in the district of Manbhum aggregate 885 square miles, with a population of 268,692 persons, lying in thanas Gobindpur, Tundi, Nirsha and Chas.

Relief in this district was still at the test work stage. There were 11 test works, 7 within the affected tracts and 4 in other places. The first test works were opened in the Gobindpur subdivision on the 30th January, and on the 31st the total number employed was 180. At the end of February the number had risen to 3,492, and since then it has again increased considerably. The labourers are paid at piece-work rates varying from Re. 1-4 to Re. 1-9, and in two cases of tanks to Rs. 2-3 per 1,000 cubic feet. The daily wage earned per male unit varied from 1 anna 4 pies to 2 annas $\frac{1}{4}$ pie. The Deputy Commissioner, Mr. Luson, writes that the test works opened have not been attended by as many workers as he had expected, and he concludes that the reports which he had received about the destitution among the labouring classes were somewhat exaggerated. Small works such as *bunds* and tanks were being carried out by private individuals throughout the district, but no figures have been furnished as to the number employed on them.

Complete figures have not been furnished as to the numbers on gratuitous relief. The Deputy Commissioner estimates the total number in receipt of this form of relief on the 27th February at 5,000.

Considerable quantities of grain were being imported into the affected tracts, and food-stocks are reported to be sufficient for the present.

There were isolated cases of distress, but no general call for assistance in the district of Hazaribagh during the period under report. The Deputy Commissioner was on tour throughout the south of the district, and found people able to get on without assistance except at a place called Guneah, with an area of 10 square miles and a population of 6,000. Test works were open in many places, but were not attended by any considerable numbers. Eighty-five persons were in receipt of gratuitous relief. Cotton was distributed in the town of Hazaribagh and elsewhere to be spun, but no information has been furnished as to the results. The Deputy Commissioner expects to have about ten thousand persons employed on relief-works scattered over this district during the next three or four months.

13. *Bhagalpur Division.*—The two districts threatened with distress likely to require assistance from Government are Bhagalpur and the Sonthal Parganas. Particulars relating to both the districts were given in paragraph 11 of my letter No. 447 Agri., dated the 16th February 1897.

Two relief works were open in thana Bongong in the Madhipura subdivision. The number on one of these on 27th February was 5,828, with 295 non-working children, and on the other 375. In the Supaul subdivision two works were open under Government, besides works undertaken by zamindars. The total number on the Government works in the Supaul subdivision on the 27th February was 1,593, with 34 non working children. No gratuitous relief was given in either subdivision beyond allowances on account of non-working children.

In the Sonthal Parganas distress has appeared in the north and north-west part of the Jamtara subdivision, comprising an area of about 350 square miles, with a population of 93,000. The estimated number likely to need relief is 10,000 on works and 1,200 on gratuitous relief. Measures have been taken to afford relief to the needy.

14. *Orissa Division.*—There is nothing of importance to mention with regard to Angul and Balasore, except that the rain which fell in the middle of February benefited the standing crops. Prices were stationary. The Collector of Cuttack reports that the condition of the people generally is better than he had hoped for at this season. He anticipates little trouble before May, and even then sees no reason to fear anything like widespread distress.

As regards the district of Puri, this Government is not yet in possession of complete information. The timely rain in February is reported to have saved the standing crops and given field employment to labourers. The general aspect of the tracts adjoining the Chilka lake is also said to have slightly improved. The Commissioner has been requested to proceed to the place and arrange for such measures of relief as may be necessary.

15. There is nothing of importance to report with regard to the Burdwan, Rajshahi, Dacca and Chittagong Divisions.

16. There has been some delay in the submission of this report owing to non-receipt in time of some of the Commissioners' reports.

Monthly Famine Statement A for the four weeks ending Saturday evening, the 27th February 1897.

* The figures in columns 2 to 6 are for the whole district, as no particular portion of it can be said to be affected.

† The figures in columns 2 to 6 include 73 miles of the proposed railway from Baranagar to Bagaha, which would give employment to about 14,120 persons for three months.

‡ The figures in columns 8 and 9 do not include works under the Public Works Department.

No. 1661M.P.I.

Government of Bengal.

PUBLIC WORKS DEPARTMENT.

Mis. Pub. Improvements.

From J. G. H. GLASS, Esq., C.E.,

Chief Engineer of Bengal,

To THE COMMISSIONER OF THE PATNA DIVISION; SUPERINTENDENTS OF
FAMINE RELIEF WORKS, 1ST AND 2ND CIRCLES.

Dated Calcutta, the 16th March 1897.

SIR,

At a conference held at Darbhanga on the 4th instant, of officers engaged on relief operations, the opinion was expressed that the method of exacting the task from the gang as described in paragraph 40 of Resolution No. 420M.P.I., dated 25th January last, was attended with many difficulties, and it was decided to abandon it and to adopt in lieu thereof the system of exacting the task from the diggers and carriers forming a pit gang as the unit. The accompanying note has been drawn up describing the task to be exacted from diggers and carriers under the varying conditions of lead, lift and soil in tank and road construction.

2. The proportion of carriers to diggers has been worked out in general accordance with the task tables for earthwork which formed an accompaniment to the Resolution already referred to, and the numbers laid down in the note should be generally adopted in carrying out work. It is not, however, intended that they should be strictly adhered to in all cases, as some latitude must necessarily be given to the officers who are in charge of the works. Circumstances may occur, such as the people on any particular work being in an exceptionally weakly state, a preponderance of women and children, &c., which in the opinion of the responsible officer may render it expedient to increase the number of carriers beyond that mentioned in the note. In such cases the officer in charge of the work should exercise his own judgment in determining the proportion of carriers to diggers subject to the approval of his superior officer.

I have the honour to be,

SIR,

Your most obedient servant,

J. G. H. GLASS,

Chief Engineer.

No. 1662M.P.I.

COPY forwarded to the Commissioners of the Presidency, Burdwan, Orissa, Bhagalpur, Rajshahi, Dacca, Chittagong and Chota Nagpur Divisions, to all Superintending Engineers of Public Works Circles and Inspectors of Works and Examiner of Public Works Accounts, Bengal; also to the Judicial, Financial, and Revenue Departments of this Government, and to the Government of India, Revenue and Agricultural Department (Scarcity), for information.

J. G. H. GLASS,

Chief Engineer.

CALCUTTA,

The 16th March 1897.

Note by the Chief Engineer of Bengal on the manner of laying out tanks for Famine Relief Works, and on the method of determining the proportion of carriers to diggers under the varying conditions of lead and lift in the construction of Tanks and Roads.

1. The dimensions of the tank should first be settled, and if it is to be filled from an adjacent nala, the position of the inlet and of the waste water channel should be determined. The length and breadth should be regulated on the understanding that the excavation of the tank is to be carried on in a series of pits measuring 20 feet square with footpaths 5 feet wide between for the passage of the people carrying away the spoil. In diagram No. 1 below, the arrangement of the pits of a typical tank is shown. On the long side there are 12 pits, each 20 feet square, and 11 footpaths, each 5 feet wide. The length of the tank, exclusive of the slopes, is therefore $(12 \times 20) + (11 \times 5) = 295$ feet. In the breadth there are 8 pits 20 feet square and 7 footpaths 5 feet wide. The breadth exclusive of the slopes is therefore $(8 \times 20) + (7 \times 5) = 195$. The depth to which the tank is to be excavated is taken at 12 feet and the side slopes are allowed for at 2 to 1. The width necessary for the slopes is therefore 24 feet. Adding this the top dimensions of the tank are, length $295 + 24 = 319$ feet, and breadth $195 + 24 = 219$ feet. A berm 25 feet from the edge of slope to the inner toe of the spoil bank slope is left, and all the earth excavated from the tank is to be thrown beyond this line. In the example the crest of the spoil bank is taken at 40 feet, the height $8\frac{1}{2}$ feet, and the side slopes 2 to 1. These dimensions are only given as an example.

2. The task is in the first place to be exacted from the diggers; and as it varies according to the class of soil, it follows that, as the length and breadth of the pits are uniform, the depth to be excavated for the daily task will depend on the amount of that task. The task to be exacted is laid down in the note attached to Resolution No. 420M.P.I., dated 25th January 1897, as follows—

Soft soil	...	200	cubic feet per digger.
Medium soil	...	130	" " "
Hard "	...	85	" " "

For reasons which will be stated further on, it has been found desirable to slightly reduce the tasks for medium and hard soils. The tasks will now be—

Soft soil	...	200	cubic feet per digger.
Medium soil	...	125	" " "
Hard soil	...	83	" " "

3. As has been mentioned, the tank is divided up into pits, each measuring 20 feet square, the boundaries being formed by footpaths each 5 feet wide. In each pit there are four diggers. The method of determining the number of carriers for each pit of four diggers in soft soil is arrived at thus. Taking first the line of outer pits, that is, the pits all round the margin left for the slopes of the tank, it is seen that the lead to which the soil has to be carried is as follows:—

		Feet.
Centre of pit to part left for slopes	...	10
Slope space	...	24
Berm	...	25
To centre of spoil bank	...	36
		—
Total	...	95
		—

This may be taken as 100 feet lead. Referring to Table No. 1(A) of the Task Tables, it is seen from the example there worked out that six carriers are required per 1,000 cubic feet for a lead of 50 feet. For a further lead of 50 feet, that is, a lead of 100 feet, two more carriers are necessary. Each carrier will remove $\frac{1,000}{8} = 125$ cubic feet, but working under famine conditions, carriers will only do $\frac{3}{4}$ ths of that amount, or 75 cubic feet. The four diggers will excavate $200 \times 4 = 800$ cubic feet, and the number of carriers necessary to remove that quantity will be $\frac{800}{75} =$ nearly 11. The number may be fixed at 12. The task imposed on the carriers is that they should remove the earth excavated by the diggers. It is not possible to lay down definitely what the composition of the gang should be, as each case will have to be governed by the conditions which are found to obtain. As an example, this pit gang may be made up as follows:—

	Rs.	A.	P.
4 Diggers at anna 1-9 each ...	0	7	0
2 Men carriers at anna 1-9 each ...	0	3	6
4 Women carriers at anna 1-3 each ...	0	5	0
4 Children carriers, Class I, at 9 pies	0	3	0
2 " " Class II, at 6 pies	0	1	0
Cost for 800 cubic feet ...	1	3	6
Cost for 1,000 cubic feet ...	1	8	4

For the second line of pits the carriers will be increased by two to allow for the extra lead (25 feet). This is somewhat in excess of the results arrived at by calculating from the tables, but the difference is small.
